

## CREATING THE ULTIMATE MEETING EXPERIENCE.

### Redefining the Standard for Meeting Room Displays

In today's meeting rooms, ambient light often plays a negative factor to ensuring that content, typically displayed with conventional projectors, is clearly seen by attendees. Often times such ambient light causes the picture that is casted by a projector to become washed out, barely visible and illegible.

Absenicon helps to grab and maintain your attendees' attention while improving information delivery effectiveness and overall efficiency at each and every meeting. This new LED display series takes the current meeting room experience to the next level by creating a bright, open and highly-productive meeting environment.

### Multiple Installation Methods

## Perfect View

Abseinicon enables every meeting member to receive complete presentation content and improve productivity. The contrast ratio reaches 5,000:1 through ANSI 16-zone (4x4) checkerboard pattern. With enhanced colors and deeper black, the image is colorful and dazzling, whether in a bright or dark room.

# ABSEINICON IS STILL UNDERDEVELOPMENT, SPECS SUBJECT TO CHANGE

TYPE	C110	C138	C165
