

**1**

**Purchase the appropriate TPCControl license for your device.**

Contact your HARMAN/AMX sales representative for assistance in placing this order.

[https://www.amx.com/product\\_families/touch-panel-control](https://www.amx.com/product_families/touch-panel-control)

**2**

**Search for “TPControl” in your device’s app store and download the TPCControl app.**

Apple App Store: <https://www.apple.com/app-store/>

Android Play Store: <https://play.google.com/>

Microsoft Store: <https://www.microsoft.com/en-us/store/apps/windows>

**3**

**Using TPCloud or the TPCControl app, register your token.**

See the *Quick Start Guide* below for additional information on these two different token registration methods. Additionally, the QSG contains information on creating & registering your TPC account for first-time users.

<https://tpcloud.touchpanelcontrol.com/>

**4**

**Complete device registration in the TPCControl app Settings.**

This varies for Apple, Android, and Windows. See *Device Settings* below for your specific mobile device.

Your device is registered! You can now load touch panel files via TPCloud and use your mobile device as a fully-functioning, feature-rich AMX touch panel.
