**Architect and Engineer Specifications**

Voice control loudspeaker shall be Atlas Sound Model ____ (AP-15TU, AP-15TUC, AP-15TUC(R)). Weather-resistant unit shall be constructed of heavy-gauge, treated aluminum. Loudspeaker shall be able to operate within any ambient temperature environment ranging from 70°C (158°F) to -40°C (-40°F). Model shall be a double re-entrant type with 15 watts RMS audio power rating compression driver producing a UL-rated sound pressure level of 102dB measured at 15 Watts, 10ft. (3dB increment rating) within a frequency range of 400 Hz to 4 kHz. Impedance shall be 8 Ohms and sound dispersion 70°. Unit shall have impedance selection via 7-position switch of 5000, 2500, 1300, 666, 333, 89 and 45 Ohms. Power taps shall be available at 1, 2, 3.8, 7.5, 15 Watts for 70V line and .48, .94, 1.8, 7.5, 15 Watts for 25V line. Loudspeaker assembly shall be furnished with mounting bracket allowing adjustment on either a vertical or horizontal plane with a single locking pin and including provisions for mounting, banding, or strapping. Wiring terminals for amplifier output shall be fully enclosed and a vandal-resistant adapter cover shall provide connection facilities for cable or conduit. Dimensions shall be H 8½” x W 7½” x D 9¾”. Unit shall be finished in grey or red baked epoxy.

**Features**

- High-Efficiency, 15 Watt Compression Driver
- Built In Vari-Tap® Transformer for Easy Impedance Selection
- 5 MFD Capacitor for Line Supervision
- Omni-Purpose Surface Mounting Bracket for Precise Positioning
- Durable, Environment-Resistant Metal Construction for Outdoor or Indoor Use
- Recommended for High Intelligibility Paging, Intercommunication, and Signaling

**Applications**

Atlas Sound's UL Listed AP Series loudspeakers are surface-mounting, high-efficiency units for life safety, and communication system applications. When used with compatible control equipment, they provide high-intelligibility voice reproduction and signal transmission for indoor or outdoor emergency alarm, protective signaling, and intercom system installations.

**Description**

Atlas Sound AP Series Omni-Purpose loudspeakers are equipped with a compression driver providing up to 15 Watts RMS power handling capability, superior intelligibility and dispersion to achieve maximum sound projection, and penetration.

Weather-resistant metal construction and re-entrant acoustic path assure protection against water, humidity, vermin, and corrosion. The Omni-Purpose® mounting bracket allows directional sound dispersion via vertical and horizontal positioning. Provisions are also included for surface or strap mounting to pillars and I-beams.

All models include a built-in 25/70.7V Vari-Tap® transformer featuring a screw-driver adjustable, 7-position watt/impedance selection switch. Wiring terminals are protected with a vandal-resistant adapter cover for control equipment utilizing cable or conduit.

A built-in, 5 mfd capacitor is provided on Model AP-15TUC(R) for line supervision. Model AP-15TU is not equipped with a capacitor.

All models meet or exceed the UL Listed standards for audible signal appliances and are capable of operating within an ambient temp. range of 70°C (158°F) to -40°C (-40°F). Models comply with UL Standard 1480 - Speakers for Fire Protective Signaling Systems and California State Fire Marshal (Title 19). Models with special modifications to meet UL Canada are also available as standard product. Contact Factory.
