The Atlona AT-ANC-108D is an 8-button network control panel for Atlona IP-based switchers. It is designed for easy configuration using the free Atlona Management System (AMS) software resource. Only one category cable needs to be connected to the AT-ANC-108D ensuring fast, hassle-free installation of control signal and power. Configuration is also fast. Simply download a configuration file from within AMS for Atlona single output switchers such as the HDVS Series, SW-5 Series, AT-UHD-CLSO-601, or AT-UHD-CLSO-612ED. Combined with Atlona IP-controllable switching products for huddle spaces, classrooms and conference rooms, the network control panel acts as a remote control to send IP commands to the switcher. The switcher in turns acts on those commands or translates the IP commands into RS-232 commands to control external devices such as displays to create a seamless AV system. The AT-ANC-108D fits into a US 1-gang junction box and is compatible with Decora-style wall plates.

Even with Atlona's Advanced Automated System Control (AASC) found on many of our switching products, presenters still want a visual means of changing inputs, operating displays and adjusting volume. The AT-ANC-108D backlit panel provides a user-friendly means of controlling the AV in a meeting room or classroom. System designers need an inexpensive point of control to meet those needs without worrying about complex control system coding. The AT-ANC-108D, working with AMS, meets both of these demands. Regardless of the Atlona IP-based switcher designed into the meeting space or classroom, with the AT-ANC-108D the AV operator will always have a consistent control interface from room to room.

Remote control panel for Atlona IP-based products -
- Works with Atlona single output channel switchers such as the HDVS Series, SW-5 Series, AT-UHD-CLSO-601, or AT-UHD-CLSO-612ED
- Works with AASC to provide an additional point of control in a meeting space to simplify system control

Fast installing, single cable integration -
- Hassle-free installation of control and power using standard category cable and RJ-45 connectors
- Speeds installation and reduces labor costs

AMS-configurable using downloadable templates -
- Easy-to-configure using Atlona's network-based management and configuration software
- Reduces cost of AV systems by eliminating complex control system programing

Eight, soft-touch, back-lit buttons -
- Consistent, well-illuminated panel provides an instantly-familiar point of control for AV systems
- Easy for end users to operate

Flexible powering -
- Works off a provided, external 5 VDC power supply or from industry standard Power over Ethernet supplied from a network switch
- Choice of powering simplifies installation based on available power resources

Installer-customizable, pre-cut label sheets -
- Allows system designers and installers to easily place printed labels on the controller under a protective cover
- Clear, tamper-resistant labeling provides durable function identification on the controller

Fits US 1-gang junction box with Decora wall plate -
- Compact, shallow-depth control is easy to place in walls or specially-design access enclosures in tables and cabinetry
- Aesthetic form-factor is at home in many locations and environments
