Welcome to Atlona!

Thank you for purchasing this Atlona product. We hope you enjoy it and will take an extra few moments to register your new purchase.

Registration only takes a few minutes and protects this product against theft or loss. In addition, you will receive notifications of product updates and firmware. Atlona product registration is voluntary and failure to register will not affect the product warranty.

To register your product, go to http://www.atlona.com/registration

Sales, Marketing, and Customer Support

Operating Notes

As of this writing, there are no firmware updates for this product. When new firmware is released, update instructions will be included with the firmware and will be appended to this manual.

Atlona, Inc. ("Atlona") Limited Product Warranty

Coverage
Atlona warrants its products will substantially perform to their published specifications and will be free from defects in materials and workmanship under normal use, conditions and service.

Under its Limited Product Warranty, Atlona, at its sole discretion, will either:
• repair or facilitate the repair of defective products within a reasonable period of time, restore products to their proper operating condition and return defective products free of any charge for necessary parts, labor and shipping.
  
  OR

• replace and return, free of charge, any defective products with direct replacement or with similar products deemed by Atlona to perform substantially the same function as the original products.

  OR

• refund the pro-rated value based on the remaining term of the warranty period, not to exceed MSRP, in cases where products are beyond repair and/or no direct or substantially similar replacement products exist.

Repair, replacement or refund of Atlona products is the purchaser’s exclusive remedy and Atlona liability does not extend to any other damages, incidental, consequential or otherwise.

This Limited Product Warranty extends to the original end-user purchaser of Atlona products and is non-transferrable to any subsequent purchaser(s) or owner(s) of these products.

Coverage Periods
Atlona Limited Product Warranty Period begins on the date of purchase by the end-purchaser. The date contained on the end-purchaser’s sales or delivery receipt is the proof purchase date.

Limited Product Warranty Terms – New Products
• 10 years from proof of purchase date for hardware/electronics products purchased on or after June 1, 2013.
  • PTZ motor is not covered under the 10 year warranty, the PTZ motor is covered for 3 years.
• 3 years from proof of purchase date for hardware/electronics products purchased before June 1, 2013.
• Lifetime Limited Product Warranty for all cable products.

Limited Product Warranty Terms – Refurbished (B-Stock) Products and Discontinued Products
• 3 years from proof of purchase date for all Refurbished (B-Stock) and Discontinued hardware and electronic products purchased on or after June 1, 2013.

Remedy
Atlona recommends that end-purchasers contact their authorized Atlona dealer or reseller from whom they purchased their products. Atlona can also be contacted directly. Visit www.atlona.com for Atlona’s contact information and hours of operation. Atlona requires that a dated sales or delivery receipt from an authorized dealer, reseller or end-purchaser is provided before Atlona extends its warranty services. Additionally, a return merchandise authorization (RMA) and/or case number, is required to be obtained from Atlona in advance of returns.

Atlona requires that products returned are properly packed, preferably in the original carton, for shipping. Cartons not bearing a return authorization or case number will be refused. Atlona, at its sole discretion, reserves the right to reject any products received without advanced authorization. Authorizations can be requested by calling 1-877-536-3976 (US toll free) or 1-408-962-0515 (US/international) or via Atlona’s website at www.atlona.com.

Exclusions
This Limited Product Warranty excludes:
• Damage, deterioration or malfunction caused by any alteration, modification, improper use, neglect, improper packaging or shipping (such claims must be presented to the carrier), lightning, power surges, or other acts of nature.
Atlon, Inc. ("Atlon") Limited Product Warranty

- Damage, deterioration or malfunction resulting from the installation or removal of this product from any installation, any unauthorized tampering with this product, any repairs attempted by anyone unauthorized by Atlon to make such repairs, or any other cause which does not relate directly to a defect in materials and/or workmanship of this product.

- Equipment enclosures, cables, power supplies, batteries, LCD displays, and any accessories used in conjunction with the product(s).

- Products purchased from unauthorized distributors, dealers, resellers, auction websites and similar unauthorized channels of distribution.

Disclaimers
This Limited Product Warranty does not imply that the electronic components contained within Atlona’s products will not become obsolete nor does it imply Atlona products or their electronic components will remain compatible with any other current product, technology or any future products or technologies in which Atlona’s products may be used in conjunction with. Atlona, at its sole discretion, reserves the right not to extend its warranty offering in instances arising outside its normal course of business including, but not limited to, damage inflicted to its products from acts of god.

Limitation on Liability
The maximum liability of Atlona under this limited product warranty shall not exceed the original Atlona MSRP for its products. To the maximum extent permitted by law, Atlona is not responsible for the direct, special, incidental or consequential damages resulting from any breach of warranty or condition, or under any other legal theory. Some countries, districts or states do not allow the exclusion or limitation of relief, special, incidental, consequential or indirect damages, or the limitation of liability to specified amounts, so the above limitations or exclusions may not apply to you.

Exclusive Remedy
To the maximum extent permitted by law, this limited product warranty and the remedies set forth above are exclusive and in lieu of all other warranties, remedies and conditions, whether oral or written, express or implied. To the maximum extent permitted by law, Atlona specifically disclaims all implied warranties, including, without limitation, warranties of merchantability and fitness for a particular purpose. If Atlona cannot lawfully disclaim or exclude implied warranties under applicable law, then all implied warranties covering its products including warranties of merchantability and fitness for a particular purpose, shall provide to its products under applicable law. If any product to which this limited warranty applies is a “Consumer Product” under the Magnuson-Moss Warranty Act (15 U.S.C.A. §2301, ET SEQ.) or other applicable law, the foregoing disclaimer of implied warranties shall not apply, and all implied warranties on its products, including warranties of merchantability and fitness for the particular purpose, shall apply as provided under applicable law.

Other Conditions
Atlona’s Limited Product Warranty offering gives legal rights, and other rights may apply and vary from country to country or state to state. This limited warranty is void if (i) the label bearing the serial number of products have been removed or defaced, (ii) products are not purchased from an authorized Atlona dealer or reseller. A comprehensive list of Atlona’s authorized distributors, dealers and resellers can be found at www.atlona.com.
Important Safety Information

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this product near water.
6. Clean only with a dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8. Do not install or place this product near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of a polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the product.
11. Only use attachments/accessories specified by Atlona.
12. To reduce the risk of electric shock and/or damage to this product, never handle or touch this unit or power cord if your hands are wet or damp. Do not expose this product to rain or moisture.
13. Unplug this product during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the product has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the product, the product has been exposed to rain or moisture, does not operate normally, or has been dropped.

CAUTION: TO REDUCT THE RISK OF ELECTRIC SHOCK DO NOT OPEN ENCLOSURE OR EXPOSE TO RAIN OR MOISTURE. NO USER-SERVICEABLE PARTS INSIDE REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance instructions in the literature accompanying the product.

The information bubble is intended to alert the user to helpful or optional operational instructions in the literature accompanying the product.

FCC Statement

FCC Compliance and Advisory Statement: This hardware device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a commercial installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed or used in accordance with the instructions, may cause harmful interference to radio communications. However there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: 1) reorient or relocate the receiving antenna; 2) increase the separation between the equipment and the receiver; 3) connect the equipment to an outlet on a circuit different from that to which the receiver is connected; 4) consult the dealer or an experienced radio/TV technician for help. Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment. Where shielded interface cables have been provided with the product or specified additional components or accessories elsewhere defined to be used with the installation of the product, they must be used in order to ensure compliance with FCC regulations.

Introduction

The Atlona AT-HDVS-CAM is an enterprise-grade PTZ camera designed for use with the AT-UHD-HDVS-300-KIT in soft codec conferencing applications. It features a USB interface for video and camera control. The HDVS-CAM seamlessly integrates with the HDVS-300-KIT for a complete, automated conferencing system that includes AV and USB extension, plus automatic input selection and display powering when a PC is connected. The HDVS-CAM delivers high performance, professional-quality imaging with video resolutions up to 1080p @ 30 Hz, as well as fast and accurate auto-focusing, and a fast yet quiet pan and tilt mechanism. This PTZ camera is ideal for a wide range of small to medium-sized meeting spaces, classrooms, and training rooms. The HDVS-CAM is available in black or white.

Features

- Available video resolutions from 176x144 up to 1080p @ 30 Hz
- Fast and accurate auto focus, plus auto white balance and auto exposure modes
- Fast and quiet pan and tilt mechanism
- USB 2.0 interface for video and camera control
- Multi-element zoom lens with 10x optical zoom and a 60.9° horizontal field of view
- Picture controls available for brightness, color, saturation, contrast, sharpness, and gamma
- TCP/IP, RS-232, USB, and IR control – convenient handheld IR remote control included
- High performance imaging, fine detail, and color rendering with 1/2.8" low-noise, HD CMOS sensor

Package Contents

1 x AT-HDVS-CAM or AT-HDVS-CAM-W
1 x Wall mounting plate
4 x Mounting screws
1 x IR Remote Control
1 x USB A cable
1 x VISCA to RS-232 DB-9 adapter
1 x AAA battery
1 x Installation Guide
Panel Description

1. **RS-232**
   Connect included VISCA to RS-232 adapter here to control the camera with a third party software or hardware controller.

2. **USB**
   Connect USB A cable to this port from the USB port of the AT-UHD-HDVS-300-RX.

3. **LAN**
   Connect to a network switch to control the unit via TCP/IP or webGUI.

4. **DC 12V**
   Connect the included 12V power supply to this port.
Installation

Connection Instructions

1. Connect the Ethernet cable to the LAN port on the back of the AT-HDVS-CAM.
2. Connect the USB cable to the AT-UHD-HDVS-300-RX.
3. “Optional” Connect the Visca to RS-232 cable to the Visca port for RS-232 control.
4. Connect the DC 12V power cable to the unit.

Mounting Instructions

The AT-HDVS-CAM has two installation options, wall mount (included) and ceiling mount (purchased separately).

Wall Mount installation

The install the AT-HDVS-CAM, 4 M6 swelling bolts, 1 1/4 20UNC bolt, 4 M6 nuts & shims, the included wall mount bracket, and the AT-HDVS-CAM are needed.

1. Install the M6 swelling bolts in a rectangular pattern on the wall, 100 mm wide and 50 mm high.
2. Attached the wall mount bracket onto the wall, by placing them on the M6 swelling bolts and securing it with the M6 nuts and shims.
3. Once the wall mount bracket is secure on the wall, place the camera on the top of the wall mount bracket and secure it with the 1/4 20UNC bolt.

Connection Instructions

Visca  RS-232  Visca  RS-232

Mounting Instructions

Wall Mount installation

The AT-HDVS-CAM has two installation options, wall mount (included) and ceiling mount (purchased separately).

Wall Mount installation

The install the AT-HDVS-CAM, 4 M6 swelling bolts, 1 1/4 20UNC bolt, 4 M6 nuts & shims, the included wall mount bracket, and the AT-HDVS-CAM are needed.

1. Install the M6 swelling bolts in a rectangular pattern on the wall, 100 mm wide and 50 mm high.
2. Attached the wall mount bracket onto the wall, by placing them on the M6 swelling bolts and securing it with the M6 nuts and shims.
3. Once the wall mount bracket is secure on the wall, place the camera on the top of the wall mount bracket and secure it with the 1/4 20UNC bolt.
Ceiling Mount installation

To install the AT-HDVS-CAM, 4 PA3X30 self-tapping screws, 4 PM3X6 screws, 4 screw stoppers, 1 1/4 20UNC screw, the optional ceiling upper and lower covering plates, and the AT-HDVS-CAM are needed.

1. Install the 4 screw stoppers in the ceiling.
2. Connect the upper ceiling covering plate to the screw stoppers using the PA3X30 self-tapping screws.
3. Connect the lower ceiling covering plate to the bottom of the AT-HDVS-CAM using the 1/4 20UNC screw.
4. Mount the lower ceiling covering plate to the upper ceiling plate using 3 PM3X6 bolts.

**NOTE:** The camera picture will need to be inverted for video to be viewed correctly. View the AT-HDVS-CAM manual for instructions on how to invert video.
Basic Operation

Initialization Procedure

Once both power and USB are connected to the AT-HDVS-CAM, the camera will go through an initialization procedure. During this process, a flashing red LED indicator will be displayed. When the AT-HDVS-CAM is ready for use, the LED indicator on the front panel will be solid green. The AT-HDVS-CAM will repeat this process each time it is powered on.

1. Starting position.
2. The included 12 V DC power supply and USB cable are connected. The camera will rotate approximately 180 degrees. Camera lens assembly will be tilted forward, approximately 45 degrees, during the initialization process.
3. The camera then returns to its starting position. Once in this position, the camera lens will zoom-in as part of the initialization process.
4. Camera will rotate 90 degrees.

**NOTE:** If a USB cable is not connected from the AT-HDVS-CAM to a host computer, then the initialization process will stop at Step 4 and the blinking LED on the front panel will turn off. To complete the initialization process, connect a USB cable from the AT-HDVS-CAM to a computer.

5. Camera returns to the starting position and the camera lens tilt setting will be set to 0 degrees.
Home Position

“Home” position is a term that is used throughout this manual. When the AT-HDVS-CAM is in home position, the camera is facing forward and has no tilt angle, as shown in the illustration below:
Basic Operation

Field of View

When positioning the camera in a huddle room or similar area, it will be helpful to know the viewing area of the camera, based on a fixed target. The viewable area of the camera is called the linear field of view or sometimes referred to as the image plane.

The illustration below shows the AT-HDVS-CAM pointed at a fixed target.

Sample Calculations Table

The following table provides a list of predefined distances, which the camera must be placed from the target, in order to capture the required Linear Field of View (L). The Angle of View, for the camera, has been set to 60.9° (wide-angle).

To calculate custom values, refer to Calculating Specific Values (page 16).

<table>
<thead>
<tr>
<th>Angle of View (θ), in degrees</th>
<th>Distance (d), in feet</th>
<th>Linear Field of View (L), in feet</th>
</tr>
</thead>
<tbody>
<tr>
<td>60.9°</td>
<td>5</td>
<td>5.875076864</td>
</tr>
<tr>
<td></td>
<td>10</td>
<td>11.75015373</td>
</tr>
<tr>
<td></td>
<td>15</td>
<td>17.6253059</td>
</tr>
<tr>
<td></td>
<td>20</td>
<td>23.50030746</td>
</tr>
<tr>
<td></td>
<td>25</td>
<td>29.37538432</td>
</tr>
</tbody>
</table>
Basic Operation

Calculating Specific Values

In order to calculate custom values, this section introduces some trigonometric formulas which can be used to find the Linear Field of View (L), Distance (d), or the Angle of View (θ). The derivation of each formula is beyond the scope of this manual. However, they are provided as an additional resource. As long as any two values are known, the following can be calculated:

<table>
<thead>
<tr>
<th>Linear Field of View (FOV)</th>
<th>Angle of View</th>
<th>Distance to target</th>
</tr>
</thead>
<tbody>
<tr>
<td>( L = 2 \cdot d \cdot \tan\left(\frac{\theta}{2}\right) )</td>
<td>( \theta = 2 \cdot \arctan\left(\frac{L}{2 \cdot d}\right) )</td>
<td>( d = \frac{L}{2 \cdot \tan\left(\frac{\theta}{2}\right)} )</td>
</tr>
</tbody>
</table>

**NOTE:** When calculating the Angle of View, using a calculator that is set to radians, multiply the result by \( \frac{\pi}{180} \) to convert the answer to degrees. The value \( \pi \) can be approximated by 3.14.

Example

In the following diagram, the camera angle of view is set to 54.7°. The viewing area to be captured is measured to be 9 feet. How far from the target must the camera be placed in order to capture this area?

![Diagram showing a camera with an angle of view of 54.7° and a viewing area of 9 feet, with a target and distance to be calculated.

1. Use the following formula: \( d = \frac{L}{2 \cdot \tan\left(\frac{\theta}{2}\right)} \)
2. Substitute the known values for each variable in the equation. In this case, we know both the linear FOV and the angle of view. Therefore:
   - \( L = 9 \)
   - \( \theta = 54.7° \)
3. The equation becomes: \( d = \frac{9}{2 \cdot \tan\left(\frac{54.7}{2}\right)} \)
4. \( \tan\left(\frac{54.7}{2}\right) = 0.5172 \)
5. Multiplying this result by 2 gives: \( 1.0344 \)
6. Dividing 9 by 1.0344 yields: \( 8.700 \). Therefore, the camera must be placed 8.7 feet from the target.
Basic Operation

Controlling the Camera

The AT-HDVS-CAM can be controlled using the included IR Remote Control or through the webGUI. Refer to the WebGUI (page 24) for more information about accessing the webGUI.

Tilt

The camera tilt range is approximately -45 degrees to +90 degrees. Use one of the following methods to adjust the camera tilt.

**IR Remote Control**

- Press and release the up or down arrow button to adjust the tilt of the camera in small increments.
- Press and hold the up or down arrow button to adjust the camera tilt at a faster rate.
- Press the HOME button to return the camera to the “home” position.

**webGUI**

1. Click **Control** in the side menu bar.
2. Click the up-arrow or down-arrow button to tilt the camera up or down, respectively.
3. Click the circle icon in the center to return the camera to the “home” position.

Pan (Rotation)

The camera pan range is approximately 360 degrees. Use one of the following methods to adjust the camera pan.

**IR Remote Control**

- Press and release the left or right arrow button to adjust the camera tilt in small increments.
- Press and hold the left-arrow or right-arrow button to adjust the camera tilt at a faster rate.
- Press the HOME button to return the camera to the “home” position.

**webGUI**

1. Click **Control** in the side menu bar.
2. Click the left arrow or right arrow button to tilt the camera up or down, respectively.
3. Click the circle icon in the center to return the camera to the “home” position.
Basic Operation

Tilt and Pan Combinations
The webGUI provides a method for combining both tilt and pan motion. Note that this function is *not* available on the included IR Remote Control.

### Tilt and Pan Combinations

The webGUI provides a method for combining both tilt and pan motion. Note that this function is not available on the included IR Remote Control.

**webGUI (only)**

1. Click **Control** in the side menu bar.
2. Click the diagonal arrow buttons to simultaneously tilt and pan the camera in the desired direction:
   - **Upper Diagonal-left arrow**
     Pans and rotates camera up and to the left.
   - **Lower Diagonal-left arrow**
     Pans and rotates camera down and to the left.
   - **Upper Diagonal-right arrow**
     Pans and rotates camera up and to the right.
   - **Lower Diagonal-right arrow**
     Pans and rotates camera down and to the right.
3. Click the **icon** in the center to return the camera to the “home” position.
Basic Operation

Zoom
The camera is provided with a zoom factor up to 10x. Use one of the following methods to adjust the camera zoom.

IR Remote Control
- Locate the ZOOM rocker switch on the IR Remote Control.
- Press and release + to zoom-in or press - to zoom-out.
- Press and hold these buttons to zoom-in or zoom-out at a faster rate.

webGUI
1. Click Control in the side menu bar.
2. Click + to zoom-in or click - to zoom-out.

Focus
When positioning the camera on an object, it may be necessary to adjust the focus for a clear image. The AT-HDVS-CAM can be set to auto focus or manual focus. By default, the AT-HDVS-CAM is set to auto-focus mode.

NOTE: In order to manually control the focus, the AT-HDVS-CAM must be in manual focus mode. Press the MANUAL button to enter manual focus mode.

IR Remote Control
- Press and release the MANUAL button.
- Locate the FOCUS rocker switch on the IR Remote Control.
- Press and release + to increase focus on objects in the foreground. Press and release the - to focus on objects in the background.
- Press and hold these buttons to adjust the focus at a faster rate.

webGUI
1. Click Control in the side menu bar.
2. Set the AT-HDVS-CAM to manual focus mode by selecting Manual from the Focus Mode drop-down list.
3. Click + to focus on foreground objects or click - to focus on background objects.
Backlight Compensation (BLC)

BLC is a feature which automatically adjusts the exposure control of the camera. When enabled, BLC will attempt to increase the ambient foreground light and “darken” any background light. For example, a subject standing in front of a window in the daytime, will produce a sillhouetted effect. Enabling BLC will compensate for the difference in lighting.

IR Remote Control
1. Point the IR Remote Control at the front of the AT-HDVS-CAM.
2. Press and release the BLC ON/OFF button to toggle BLC on or off.

webGUI
1. Click Exposure in the side menu bar.
2. Click ON to enable BLC. Click OFF to disable BLC.

Standby Mode
Placing the AT-HDVS-CAM in standby mode will power-down the camera. Placing the camera in standby mode is managed using the IR Remote Control.

1. Point the IR Remote Control at the front of the AT-HDVS-CAM.
2. Press and hold the button for three seconds.
3. The camera will rotate 90 degrees and the camera lens assembly will tilt approximately 45 degrees. The camera is now in standby mode.
4. Press and hold the button for three seconds to wake the camera. After the camera is awake, it will return to the home position.

NOTE: The camera will always be set to the home position after this sequence is performed. To return the camera to the last position, either position it manually or recall the saved preset.
Managing Presets

Camera positions can be stored to local memory and recalled at a later time. Presets are stored and recalled using the included IR Remote Control. Up to 10 presets can be saved.

Saving Presets

1. Set the camera in the desired position.
2. Point the IR Remote Control at the front of the AT-HDVS-CAM.
3. Press the SET PRESET button.
4. Press the desired number on the IR Remote Control keypad to assign the position of the camera to the preset.

Recalling Presets

1. Point the IR Remote Control at the front of the AT-HDVS-CAM.
2. Press the number of the desired preset from the IR Remote Control keypad.
3. The camera will be set to the position defined by the preset.

Clearing a Preset

Presets can be erased. It is not necessary to clear a preset, before saving a new camera position in the same preset. If a preset is saved to an existing preset, it will be overwritten.

1. Press the CLEAR PRESET button.
2. Press the desired number on the IR Remote Control keypad to clear the preset.

NOTE: To clear all presets, press and release the [#] key on the keypad, three times.
Basic Operation

Function List

The included IR Remote Control provides a set of functions which can be used to change the behavior of the AT-HDVS-CAM. Each function is invoked by sequentially pressing the following series of keys on the keypad.

<table>
<thead>
<tr>
<th>Function</th>

</table>
The AT-HDVS-CAM includes a built-in webGUI, which allows easy management and control of all features. Follow the instructions below to access the webGUI.

1. Use an IP scanner to determine the IP address of the AT-HDVS-CAM.
2. Launch a web browser.
3. In the address bar, type the IP address of the AT-HDVS-CAM.
4. Enter the following information on the Login page.
   - Login: root
   - Password: Atlona
5. Click the Login button.

The status page will display, giving all the general information of the AT-HDVS-CAM.

Select firmware from the side menu.
System

- MCU - Displays the current OSD software.
- Camera - Displays the current unit software.
- Auto Focus - Displays the software for auto focus.

Firmware Update

- Browse - Select browse and search the local computer for the firmware.
- Update - Load the selected file to the unit.

Information

- Device Name - Displays the SKU of the unit.
- Device ID - Displays the ID of the AT-HDVS-CAM.

Time

- Date Format - Select how the date will display on video and saved files.
- Date Separator - Select the symbol to display between date format.
- Zone - Select the time zone for the camera.
- Hour Type - Select the way the time displays through the day.
- NTP Enable - Enable or disable time synchronization.
- Update Interval - Decide the amount of time between synchronizations.
- Host URL - The unit will synchronize to the time of the url typed in this field.
- Host Port - Type the port to ensure communication between the camera and the host URL.

Time Synchronization

- Sync Type - Decide the device the camera will sync to.
- Computer Time - Displays the current time of the selected synchronization type.
8. Select network from the side menu.

Network Settings

- **DHCP** - Switch between DHCP (ON) and static (OFF).
- **IP Address, Subnet, Gateway** - This will display the current IP settings on DHCP. When set to static, fill in the IP address, netmask, gateway, and telnet port.
- **MAC Address** - Displays the MAC Address of the AT-HDVS-CAM.

Port Settings

- **Data port** - Set to a value between 0 and 65535. Default is 3000.
- **Web Port** - Set to a value between 0 and 65535. Default is 80.
- **Onvif Port** - Set to a value between 0 and 65535. Default is 80.
- **Soap Port** - Set to a value between 0 and 65535. Default is 1936.
- **RTMP Port** - Set to a value between 0 and 65535. Default is 1935.
- **RTSP Port** - Set to a value between 0 and 65535. Default is 554.
- **Visca Port** - Set to a value between 0 and 65535. Default is 3001.

**NOTE:** The AT-HDVS-CAM will restart automatically after the save button is pressed.

DNS Settings

- **Preferred** - Set the preferred DNS server. Default is 0.0.0.0.
- **Alternative** - Set the alternate DNS server. Default is 0.0.0.0.
9  Select User from the side menu.

**User**

Update the username and password of the AT-HDVS-CAM webGUI.

10  Select Reset from the side menu.

**Factory Reset**

Factory Reset - Sets the device back to the original factory settings.

**Reboot**

Reboot - Reboots the AT-HDVS-CAM.
11 Select Picture from the side menu.

**Picture Settings**

- **Brightness** - Set to a value between 0 and 14. Default is 6.
- **Contrast** - Set to a value between 0 and 14. Default is 8.
- **Sharpness** - Set to a value between 0 and 15. Default is 7.
- **Gamma** - Set the gamma value of the camera. Values are default, 0.45, 0.50, 0.52, and 0.55.
- **DCI (Dynamic Contrast Improvement)** - Set to a value between 1 and 8 or OFF.
- **Saturation** - Set to a value between 60% and 200%. Default is 80%.
- **AWB Sensitivity** - Select between low, middle, and high.
- **B & W Mode** - Toggle color between black and white (ON) and color (OFF). Default is off.
- **Flip-H** - Flip the picture horizontally. Default is off.
- **Flip-V** - Flip the picture vertically. Default is off.

12 Select Focus from the side menu.

**Focus Settings**

- **Focus Mode** - Switch between Auto, Manual, or OnePush.
- **Auto Focus Zone** - Switch the zone between Top, Center, Bottom, and All.
- **Auto Focus Sensitivity** - Switch between High, Middle, and Low.
13 Select Exposure from the side menu.

Exposure Settings
- **Mode** - Switch between Auto, Manual, SAE, AAE, and Bright.
- **Flicker** - Switch between OFF, 50Hz, and 60Hz.
- **DRC (Dynamic Range)** - Set to a value between 1 and 8, or OFF.
- **EV (Exposure Compensation)** - Toggle EV on and off.
- **BLC (Backlight Compensation)** - Toggle backlight compensation on and off.
- **G.Limit (Gain Limit)** - Set to a value between 0 and 15. Default is 3.

14 Select Noise Reduction from the side menu.

Noise Reduction Settings
- **NR-2D Reduction** - Set to a value between OFF, 1 and 7, or Auto.
- **NR-3D Reduction** - Set to a value between OFF, 1 and 8.
- **Dynamic Hot Pixel** - Set to a value between 1 and 5, or OFF.
15 Select OSD from the side menu.

**OSD Settings**

Show Time - Toggle the time on and off on the on screen display.
Show Title - Toggle the title on and off on the on screen display.
Time Font Color - Set the time's font color. Values are White, Black, Yellow, Red, and Blue.
Title Font Color - Set the title's font color. Values are White, Black, Yellow, Red, and Blue.
Scale Font with Resolution - Toggle the font scaling on and off.
Main Stream OSD Font Size - Set the font size between 8 and 200.
Sub Stream OSD Font Size - Set the font size between 8 and 200.
OSD Offset - Use the buttons to position the OSD information on the screen.

16 Select Control from the side menu.

**Camera Control**

Pan-Tilt-Zoom - Use the buttons to adjust the camera’s view and position.
Focus Mode - Switch between Auto, Manual, and OnePush. Use the buttons to adjust the focus.
Preset - Set the current position settings to a preset and save.
Video buttons - Adjust video settings with these buttons.
The AT-HDVS-CAM comes with an IR remote control for full control of the camera and use of the OSD menu.

**IR Remote Control**

**Power** - Toggle the camera on and off with the power button. Press and hold for 3 seconds to place the camera into standby mode.

**Number Buttons** - Use in the selection or creation of camera presets.

**Focus** - Adjust the focus of the camera using the + and - buttons.

**Auto** - Switch the camera focus mode to auto.

**Manual** - Switch the camera focus mode to manual.

**Zoom** - Zoom in (+) or out (-) using these buttons.

**Set Preset** - Set the camera into position then press the Set Preset button followed by a number key (0-9) to set that position to a preset.

**Clear Preset** - Press clear preset followed by a number key to erase the preset set to that number.

**Arrow Buttons** - Use the arrow buttons to adjust the camera position or navigate within the OSD menu.

**Home Buttons** - Returns the camera to the middle position.

**BLC ON/OFF** - Toggle the back light on and off.

**Menu** - Use to pull up the OSD menu.

---

**OSD**

The OSD will display after pressing the MENU button.
