Welcome to Atlona!

Thank you for purchasing this Atlona product. We hope you enjoy it and will take a few extra moments to register your new purchase.

Registration only takes a few minutes and protects this product against theft or loss. In addition, you will receive notifications of product updates and firmware. Atlona product registration is voluntary and failure to register will not affect the product warranty.

To register your product, go to http://www.atlona.com/registration

Operating Notes

- Android devices require the Google™ Home app for casting.
- Miracast P2P reliability is dependent on the capabilities of laptop wireless cards.
- This product does not support URL casting (VP8 / VP9 decoding) from apps such as YouTube®, Netflix®, Hulu®, or Amazon Prime®. However, videos can be played directly from the web browser.
- This product does not support wireless casting of HDCP content.
- This product supports Bluetooth® discovery using an optional Bluetooth adapter (Bluetooth adapter not included). Atlona recommends the use of Plugable or Kinivo™ Bluetooth 4.0 adapters.

Atlona, Inc. (“Atlona”) Limited Product Warranty

Coverage
Atlona warrants its products will substantially perform to their published specifications and will be free from defects in materials and workmanship under normal use, conditions and service.

Under its Limited Product Warranty, Atlona, at its sole discretion, will either:

• repair or facilitate the repair of defective products within a reasonable period of time, restore products to their proper operating condition and return defective products free of any charge for necessary parts, labor and shipping.

OR

• replace and return, free of charge, any defective products with direct replacement or with similar products deemed by Atlona to perform substantially the same function as the original products.

OR

• refund the pro-rated value based on the remaining term of the warranty period, not to exceed MSRP, in cases where products are beyond repair and/or no direct or substantially similar replacement products exist.

Repair, replacement or refund of Atlona products is the purchaser’s exclusive remedy and Atlona liability does not extend to any other damages, incidental, consequential or otherwise.

This Limited Product Warranty extends to the original end-user purchaser of Atlona products and is non-transferrable to any subsequent purchaser(s) or owner(s) of these products.

Coverage Periods
Atlona Limited Product Warranty Period begins on the date of purchase by the end-purchaser. The date contained on the end-purchaser’s sales or delivery receipt is the proof purchase date.

Limited Product Warranty Terms – New Products
• 10 years from proof of purchase date for hardware/electronics products purchased on or after June 1, 2013.
• 3 years from proof of purchase date for hardware/electronics products purchased before June 1, 2013.
• Lifetime Limited Product Warranty for all cable products.
• NOTE: Data cable (USB-C) and Wifi antenna covered by 1 year warranty.

Limited Product Warranty Terms – Refurbished (B-Stock) Products
• 3 years from proof of purchase date for all Refurbished (B-Stock) hardware and electronic products purchased on or after June 1, 2013.

Remedy
Atlona recommends that end-purchasers contact their authorized Atlona dealer or reseller from whom they purchased their products. Atlona can also be contacted directly. Visit www.atlona.com for Atlona’s contact information and hours of operation. Atlona requires that a dated sales or delivery receipt from an authorized dealer, reseller or end-purchaser is provided before Atlona extends its warranty services. Additionally, a return merchandise authorization (RMA) and/or case number, is required to be obtained from Atlona in advance of returns.

Atlona requires that products returned are properly packed, preferably in the original carton, for shipping. Cartons not bearing a return authorization or case number will be refused. Atlona, at its sole discretion, reserves the right to reject any products received without advanced authorization. Authorizations can be requested by calling 1-877-536-3976 (US toll free) or 1-408-962-0515 (US/international) or via Atlona’s website at www.atlona.com.

Exclusions
This Limited Product Warranty excludes:
• Damage, deterioration or malfunction caused by any alteration, modification, improper use, neglect, improper packaging or shipping (such claims must be presented to the carrier), lightning, power surges, or other acts of nature.
Atlona, Inc. (“Atlona”) Limited Product Warranty

- Damage, deterioration or malfunction resulting from the installation or removal of this product from any installation, any unauthorized tampering with this product, any repairs attempted by anyone unauthorized by Atlona to make such repairs, or any other cause which does not relate directly to a defect in materials and/or workmanship of this product.
- Equipment enclosures, cables, power supplies, batteries, LCD displays, and any accessories used in conjunction with the product(s).
- Products purchased from unauthorized distributors, dealers, resellers, auction websites and similar unauthorized channels of distribution.

Disclaimers
This Limited Product Warranty does not imply that the electronic components contained within Atlona’s products will not become obsolete nor does it imply Atlona products or their electronic components will remain compatible with any other current product, technology or any future products or technologies in which Atlona’s products may be used in conjunction with. Atlona, at its sole discretion, reserves the right not to extend its warranty offering in instances arising outside its normal course of business including, but not limited to, damage inflicted to its products from acts of god.

Limitation on Liability
The maximum liability of Atlona under this limited product warranty shall not exceed the original Atlona MSRP for its products. To the maximum extent permitted by law, Atlona is not responsible for the direct, special, incidental or consequential damages resulting from any breach of warranty or condition, or under any other legal theory. Some countries, districts or states do not allow the exclusion or limitation of relief, special, incidental, consequential or indirect damages, or the limitation of liability to specified amounts, so the above limitations or exclusions may not apply to you.

Exclusive Remedy
To the maximum extent permitted by law, this limited product warranty and the remedies set forth above are exclusive and in lieu of all other warranties, remedies and conditions, whether oral or written, express or implied. To the maximum extent permitted by law, Atlona specifically disclaims all implied warranties, including, without limitation, warranties of merchantability and fitness for a particular purpose. If Atlona cannot lawfully disclaim or exclude implied warranties under applicable law, then all implied warranties covering its products including warranties of merchantability and fitness for a particular purpose, shall provide to its products under applicable law. If any product to which this limited warranty applies is a “Consumer Product” under the Magnuson-Moss Warranty Act (15 U.S.C.A. §2301, ET SEQ.) or other applicable law, the foregoing disclaimer of implied warranties shall not apply, and all implied warranties on its products, including warranties of merchantability and fitness for the particular purpose, shall apply as provided under applicable law.

Other Conditions
Atlona’s Limited Product Warranty offering gives legal rights, and other rights may apply and vary from country to country or state to state. This limited warranty is void if (i) the label bearing the serial number of products have been removed or defaced, (ii) products are not purchased from an authorized Atlona dealer or reseller. A comprehensive list of Atlona’s authorized distributors, dealers and resellers can be found at www.atlona.com.
Important Safety Information

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this product near water.
6. Clean only with a dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8. Do not install or place this product near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of a polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the product.
11. Only use attachments/accessories specified by Atlona.
12. To reduce the risk of electric shock and/or damage to this product, never handle or touch this unit or power cord if your hands are wet or damp. Do not expose this product to rain or moisture.
13. Unplug this product during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the product has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the product, the product has been exposed to rain or moisture, does not operate normally, or has been dropped.

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK
DO NOT OPEN ENCLOSEMENT OR EXPOSE TO RAIN OR MOISTURE.
NO USER-SERVICEABLE PARTS INSIDE REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance instructions in the literature accompanying the product.

The information bubble is intended to alert the user to helpful or optional operational instructions in the literature accompanying the product.

FCC Statement

FCC Compliance and Advisory Statement: This hardware device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a commercial installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed or used in accordance with the instructions, may cause harmful interference to radio communications. However there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: 1) reorient or relocate the receiving antenna; 2) increase the separation between the equipment and the receiver; 3) connect the equipment to an outlet on a circuit different from that to which the receiver is connected; 4) consult the dealer or an experienced radio/TV technician for help. Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment. Where shielded interface cables have been provided with the product or specified additional components or accessories elsewhere defined to be used with the installation of the product, they must be used in order to ensure compliance with FCC regulations.

### Index 91
Introduction

The Atlona **AT-UHD-SW-510W** is a 5×2, multi-format matrix switcher with wireless presentation capability. It provides universal BYOD (bring your own device) compatibility with HDMI, DisplayPort, and USB-C inputs, plus wireless connectivity for mobile devices. The SW-510W is HDCP 2.2 compliant, and features matrixed or mirrored HDMI and HDBaseT outputs. The HDBaseT output is ideal for use with the Atlona AT-UHD-EX-100CE-RX-PSE HDBaseT receiver, or the AT-HDVS-SC-RX scaling HDBaseT receiver. It also includes automatic input switching and automatic display control capability, both applicable to wired and wireless source connections. This unique multi-format matrix switcher and wireless gateway provides a universal connectivity solution for presentation devices in a wide range of professional AV applications.

The USB-C port on the SW-510W is ideal for newer Mac, Chromebook, and Windows PCs. All inputs and the local HDMI output are compatible with video signals up to 4K/UHD @ 60 Hz with 4:4:4 chroma sampling, as well as data rates up to 18 Gbps. For integration convenience and flexibility, simultaneous 18 Gbps HDMI and 10 Gbps HDBaseT outputs make the SW-510W ideal for various presentation scenarios such as primary and confidence displays in a corporate auditorium or lecture hall. The HDBaseT output extends video, audio, control, and Ethernet up to 100 meters. (For AV signals exceeding 10 Gbps, 4K/UHD video will be subsampled to 4:2:0, or HDR metadata removed for HDBaseT transmission.)

Features

- Two HDMI®, one DisplayPort, and one USB-C input, plus an input for wireless AV.
- Matrixed or mirrored HDBaseTTM and HDMI outputs.
- Wireless AV gateway for iOS®, AndroidTM, Mac®, ChromebookTM, and Windows® devices.
- 4K/UHD capability @ 60 Hz with 4:2:0 chroma subsampling, plus support for 4K/60 4:4:4 and HDR formats on local ports (HDMI, USB-C, and DisplayPort).
- HDCP 2.2 compliant.
- Automatic input selection and automatic display control.
- USB-C port supports device charging for laptops, tablets, and smartphones.

Package Contents

1 x AT-UHD-SW-510W
1 x Captive screw connector, 5-pin
1 x Captive screw connector, 4-pin
2 x Captive screw connector, 3-pin
2 x Wi-Fi antenna modules
1 x USB-C cable, 2 meters
1 x 24V DC power supply
2 x Mounting plates
4 x Mounting screws
1 x Installation Guide
Panel Description

1 Input Indicators
Displays the currently selected input.

2 INPUT
Press this button to cycle through each input.

3 Cursor Buttons
Adjust the volume on the display.

4 DISPLAY
Press this button to toggle the power state of the desired display.

5 AUDIO IN
Connect a 3.5 mm mini-stereo cable from an analog audio source to this connector.

6 AUDIO OUT
Use the included captive screw connector to connect a balanced audio device.

7 USB
Connect the included Wi-Fi modules to the WIFI and MIRACAST ports. Refer to Connection Instructions (page 13) for more information.

8 RELAY
Connect one of the included 3-pin captive screw connectors to this port to control screens, drapes, lights, or other devices.

9 TRIGGER I/O
Connect voltage-controlled device to this port. A 4-pin captive screw connector is required.

10 RS-232
Use the included captive screw connector to connect an RS-232 controller or automation system.

11 USB-C
Connect a USB-C cable from this port to a USB-C source.

12 DP IN
Connect a DisplayPort device to this port.

13 HDMI IN
Connect an HDMI cable from each of these ports to a UHD/HD source.

14 HDMI OUT
Connect an HDMI cable from this port to an HD/UHD display.

15 HDBaseT OUT
Connect to a locally powered HDBaseT receiver such as the AT-UHD-EX-100CE-RX-PSE.

16 LAN
Connect an Ethernet cable from this port to the network.

17 DC 24V
Connect the included 24 V DC power supply to this power receptacle.
Installation

Audio

The **AUDIO OUT** connector on the AT-UHD-SW-510W provides a separate output for balanced audio using XLR connectors. Use the included 5-pin Phoenix terminal block. Balanced audio connections use two signal wires and a ground to minimize interference in audio signals. Unbalanced output audio is not supported.

![Audio Connector Diagram]

Trigger

The **TRIGGER I/O** port allows voltage-controlled devices, such as an occupancy sensor, to be connected to the AT-UHD-SW-510W. Use the included 4-pin captive screw connector to connect the device. Voltage range is 3 to 30 V DC.

**Passive sensor**

- \(-\)
- \(+\)
- \(P\)

**Powered sensor**

- \(+12\ V\ DC\)
- \(Control\ (Set\ HIGH)\)

**Powered sensor**

- \(+12\ V\ DC\)
- \(Control\ (Set\ HIGH)\)
RS-232

The AT-UHD-SW-510W provides RS-232 control between an automation system and an RS-232 device. This step is optional.

1. Use wire strippers to remove a portion of the cable jacket.
2. Remove at least 3/16” (5 mm) from the insulation of the RX, TX, and GND wires.
3. Insert the TX, RX, and GND wires into correct terminal on the included Phoenix block. If using non-tinned stranded wire, press the orange tab, above the terminal, while inserting the exposed wire. Repeat this step for the TX, RX, and GND connections.

Relay

The AT-UHD-SW-510W provides a RELAY port, which allows the control of screens, curtains, and other devices. Use a 48 V DC relay with no more than 1 A current draw.

When the AT-UHD-SW-510W is powered-on or rebooted, C1 and C2 are set to the Normally Open (NO) state.
Connection Instructions

1. Connect a USB-C cable from a source to the **USB-C (1)** port.
2. Connect a DisplayPort cable from a source to the **DP IN (2)** port.
3. Connect up to two UHD/HD sources, using HDMI cables, to the **HDMI IN (3)** and **HDMI IN (4)** ports.
4. Connect an HDMI cable from the **HDMI OUT** port to a UHD/HD display.
5. Connect up to two USB wireless antenna modules to the **USB** ports. Two USB wireless antennas are included. The **WiFi** port supports Google Cast™ and Apple AirPlay®. The **MIRACAST** port only supports Miracast™. The **AUX** port is reserved for obtaining the IP address of the unit. Refer to Getting the IP Address (page 15) for more information.

**IMPORTANT:** Only use Atlona Wi-Fi USB modules. Other Wi-Fi modules may not be supported by this product.

6. Connect the relay leads from the control motors of the projection screen, blinds, or curtains, to the relay outputs to the **RELAY** port, using the included 3-pin captive screw connector. Use a 48 V DC relay with no more than 1 A current draw.
7. Connect a trigger device, such as an occupancy sensor switch, to the **TRIGGER I/O** port. A 4-pin captive screw connector is required. Voltages from 3 to 30 V are supported.
8. Connect a 3.5 mm analog audio cable from an analog source to the **AUDIO IN** port. This audio source can be used to embed analog audio on any of the input sources.
9. Connect an Ethernet cable from the **LAN** port to the Local Area Network (LAN).
10. Connect an Ethernet cable from the **HDBaseT** port to an HDBaseT receiver unit, such as the AT-UHD-EX-100CE-RX-PSE.
11. Connect the included green 5-pin captive screw connector to the **AUDIO OUT** connector.
12. Connect the included power supply to the **DC 24V** connector and connect the power cord to an available electrical outlet.
13. Follow the on-screen instructions to complete the set-up procedure.
IP Configuration

The AT-UHD-SW-510W is shipped with DHCP enabled. Once connected to a network, the DHCP server (if available), will automatically assign an IP address to the unit. Use an IP scanner, along with the MAC address on the bottom of the unit, to identify both the unit and its IP address on the network.

If the AT-UHD-SW-510W is unable to detect a DHCP server within 15 seconds, then the unit will use a self-assigned IP address within the range of 169.254.xxx.xxx. If this occurs, refer to Auto IP Mode (page 17).

If a static IP address is desired, the unit can be switched to static IP mode. Use one of the following procedures to switch between DHCP and static IP mode. The default static IP address of the AT-UHD-SW-510W is 192.168.1.254.

Switching the IP Mode Using the Front Panel

1. Make sure the AT-UHD-SW-510W is powered.
2. Press and hold the INPUT button for approximately 15 seconds.
3. Release the INPUT button. All the front-panel LED indicators will begin to flash, then the unit will reboot. The number of flashes will indicate the currently selected IP mode:

<table>
<thead>
<tr>
<th>PW LED flashes</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Two</td>
<td>DHCP mode</td>
</tr>
<tr>
<td>Four</td>
<td>Factory Static IP mode (IP address set to 192.168.1.254)</td>
</tr>
</tbody>
</table>

Getting the IP Address

1. Make sure the unit is powered.
2. Insert a USB drive into the AUX port.
3. Wait approximately 10 seconds.
4. Remove the USB drive from the AUX port insert the drive into an available USB port on a computer.
5. Two files will be present on the USB drive. One file is formatted for Windows and the other is formatted for Linux.

Windows: AtlonaReport-Win-GWB-20170821200241.txt
Linux: AtlonaReport-Unix-GWB-20170821200241.txt
6. Double-click the desired file to open it. Information, similar to the following, will be displayed:

   Ethernet #1  
   IP: 192.168.41.68  
   MAC: B8:98:B0:05:7E:73  

   Ethernet #2  
   IP: 169.254.7.58  
   MAC: B8:98:B0:05:7E:72  

7. The IP address of the AT-UHD-SW-510W is listed under Ethernet #1.

Setting the IP Address using the Web GUI

The System page (page 38) in the web GUI allows the AT-UHD-SW-510W to use either DHCP or static IP mode. In order to access the web GUI, the IP address of the AT-UHD-SW-510W must be known.

1. Open the desired web browser and enter the IP address of the AT-UHD-SW-510W.

2. Log in, using the required credentials. The factory-default username and password are listed below:

   Username: admin  
   Password: Atlona

3. Click Administration > Networking > Ethernet.

4. Click the Mode drop-down list and select DHCP, Static, or Factory Static. Refer to the Networking page (page 51) for more information.

   When set to Static, the IP, Network Mask, and Gateway fields can be modified.

5. Click the Save button to save the changes.
Installation

Auto IP Mode

If the AT-UHD-SW-510W is unable to detect a DHCP server within 15 seconds, then the unit will use a self-assigned IP address within the range of 169.254.xxx.xxx. If this occurs, connect the AT-UHD-SW-510W to a computer running Microsoft Windows® and follow the procedure below.

1. Click **Start** > **Settings** > **Control Panel** > **Network and Sharing Center**.
2. Click **Change adapter settings**.
3. Right-click on the adapter that is used to establish a wired connection to the network, and select **Properties** from the context menu.
4. Under the **Ethernet Properties** dialog box, select **Internet Protocol Version 4** and then click the **Properties** button.
5. Click the **Use the following IP address** radio button.

   **IMPORTANT:** Before continuing, write down the current IP settings in order to restore them, later. If **Obtain an IP address automatically** and **Obtain DNS server automatically** are selected, then this step is not required.

6. Enter the desired static IP address or the IP address provided by the network administrator. If the PC does not require Internet access or if a statically-assigned IP address is being used, then an IP address of 169.254.xxx.xxx can be entered.
7. Set the subnet mask to 255.255.0.0.
8. Click the **OK** button then close all **Control Panel** windows.

Resetting to Factory-Default Settings

If necessary, the AT-UHD-SW-510W can be reset to factory-defaults from the front panel. Press and hold the **DISPLAY** button for 15 seconds to reset the AT-UHD-SW-510W to factory-default settings. Note that the AT-UHD-SW-510W will be placed in DHCP mode, as part of the reset procedure. The AT-UHD-SW-510W can also be reset through the web GUI. Refer to **System page (page 38)** for more information.
Basic Operation

Boot Sequence

1. After the power supply has been connected to the AT-UHD-SW-510W, the input indicators on the front panel will begin to flash, in an up-and-down pattern, as shown by the arrows.

2. After about 45 seconds, the standby screen will be displayed.

3. Once the boot sequence is complete, the splash screen will be displayed and the BYOD input indicator will be illuminated.

4. The unit is now ready for use. The entire boot process takes approximately two minutes to complete.
The Splash Screen

The illustration below identifies each portion of the Splash Screen. The vertical position of the Panel can be adjusted using the **Y Offset** feature. Displaying **Metadata** can be enabled or disabled. The background image for both the **Splash Screen** and the **Standby Screen** can also be changed. Refer to the **Splash Screen page** (page 41) for information.

- **Panel**
  Displays information on how to connect to the AT-UHD-SW-510W and the name of the unit (subtitle). Each text field is identified below, and can be changed in the **Splash Screen page** (page 41) of the Web GUI.
Basic Operation

- **OSD**
  This text displays the name and wireless password of the AT-UHD-SW-510W. The Name field represents the SSID of the AT-UHD-SW-510W and is used to identify the unit when used as an **Access Point**. When configured as an **Access Point**, the SSID password will automatically be displayed. The password can be hidden (masked) if desired. Refer to the **Networking page (page 51)** for more information on these topics.

- **Metadata**
  Displays the name, model, current date, wired IP address, and current firmware version. The name can be changed under the **General page (page 37)** of the Web GUI. The date (and time) can be set under the **System page (page 38)** of the Web GUI. Refer to **Networking page (page 51)** for information on changing the wired IP address of the AT-UHD-SW-510W.

**Selecting the Input**

Press the **INPUT** button to cycle through each of the available inputs on the unit. If the unit is powered-off, then powered-on, the AT-UHD-SW-510W will set the default input to **BYOD**.
Wireless Configuration

The AT-UHD-SW-510W features a wireless gateway, providing convenient Wi-Fi® connectivity for an iOS, Android, Mac, Chromebook, or Windows-based device, and a built-in web GUI. In addition, the AT-UHD-SW-510W can be configured as a wireless access point (AP). The addition of a built-in firewall provides control of incoming and outgoing network traffic.

Access Point Mode

When configured as an Access Point (AP), users will be able to connect wireless devices to the AT-UHD-SW-510W.

1. Make sure the AT-UHD-SW-510W is configured properly for use on a wired network. Refer to IP Configuration (page 15) for more information.

2. Launch a web browser and enter the IP address of the AT-UHD-SW-510W in the address bar.

3. Login to the web GUI. Refer to Introduction to the Web GUI (page 34) for more information.

4. Click Administration > Networking from the menu bar on the left.

5. Under the Wifi tab, select Access Point from the Mode drop-down list.

6. The name of the wireless network will appear in the SSID field. This name is identical to the text in the Derived field, under the General page (page 37). To change the SSID, go to the General page and modify the Name field.

7. The name of the wireless network will appear in the SSID field. This name is identical to the text in the Derived field, under the General page (page 37). To change the SSID, go to the General page and modify the Name field.
Basic Operation

8. Enter the password in the **Password** field. This password will be required by clients connecting to the AT-UHD-SW-510W.

9. Click the **Hide Password** check box to mask the password. When the password is masked, the text in the Password field will appear as asterisks.

10. Enter the wireless channel number in the **Channel** field. Contact the network administrator if necessary.

**Firewall Mode (optional)**

This feature allows control of incoming and outgoing network traffic. The AT-UHD-SW-510W provides the following firewall modes: Block Private Network, Block Internet, Block All, and None. If this feature is not desired, then skip to Step 12. The firewall can be configured or disabled at any time. The default setting is None.

11. Click **Firewall Mode** drop-down list and select the desired option.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>None (default)</td>
<td>Select this option to disable the firewall on the AT-UHD-SW-510W and allow all incoming and outgoing network traffic.</td>
</tr>
<tr>
<td>Block Private Network</td>
<td>Select this option to prevent unauthorized clients from accessing the AT-UHD-SW-510W.</td>
</tr>
<tr>
<td>Block Internet</td>
<td>Allows wireless access to the AT-UHD-SW-510W but prevents Internet access (Google, YouTube, etc).</td>
</tr>
<tr>
<td>Block All</td>
<td>All outbound network traffic is blocked.</td>
</tr>
</tbody>
</table>

12. Click the **Save** button to accept and save all changes.
Basic Operation

Connect Mode

To connect the AT-UHD-SW-510W to another wireless network, select the Connect Mode.

1. Launch a web browser and enter the IP address of the AT-UHD-SW-510W in the address bar.
2. Login to the web GUI. Refer to Introduction to the Web GUI (page 34) for more information.
3. Click Administration > Networking from the menu bar on the left.
4. Under the Wifi tab, select Connect from the Mode drop-down list.
5. Click the Pick button.
6. Select the desired wireless network from the pop-up dialog box.

7. Click the OK button to accept the selection and dismiss the dialog box. Click the Cancel button to return to close the dialog and return the Wifi tab.

8. Enter the password for the wireless network in the Password field.

9. Click the Save button to attempt to connect to the wireless network.
Once a successful connection has been established, the **Status** field will display **Connected**, as shown below.

The following table provides a list of possible status messages.

<table>
<thead>
<tr>
<th>State</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Connected</td>
<td>The AT-UHD-SW-510W is connected to the wireless network.</td>
</tr>
<tr>
<td>Not Connected</td>
<td>Unsuccessful connection. Check to make sure the password was entered correctly. This state will also occur if the wireless network, to which the AT-UHD-SW-510W is connected, is taken offline.</td>
</tr>
<tr>
<td>Unknown</td>
<td>The network state is unknown. This message is displayed if the AT-UHD-SW-510W has not been configured to connect with a wireless network.</td>
</tr>
</tbody>
</table>
Basic Operation

Casting

The AT-UHD-SW-510W interface provides the ability to transmit ("cast") the screen of any iOS®, Android™, macOS®, Chromebook, or Windows device over Wi-Fi, without having to install a separate application or driver. The AT-UHD-SW-510W can serve as an integrated, dual-band access point, or be networked into an existing Wi-Fi installation.

NOTE: The AT-UHD-SW-510W can support a maximum of 254 wireless connections. However, only one wireless device can display an image on the connected display, at a time.

iOS Devices

AirPlay® is only supported on iOS 5 or higher.

1. Select the BYOD input on the AT-UHD-SW-510W.
2. On the iOS device, go to Settings > Wi-Fi.
3. Under Wi-Fi, select the SSID of the AT-UHD-SW-510W in the list of available devices. The SSID is displayed on the splash screen. See Boot Sequence (page 18) for more information on locating the SSID.
4. Enter the password for the device. The default password is 88888888.
5. Once connected, swipe-up on the bottom of the iOS device to display the Control Center.
6. Tap the AirPlay Mirroring option to display a list of available AirPlay® devices.

Note that if the iOS device is running 11.0.3 or later, the AirPlay option has been changed to Screen Mirroring.
7. Tap the SSID from the list of devices.

8. Close the **Control Center** by either swiping down or pressing the **Home** button.

9. The image of the iOS device will now appear on the connected display.

   Note that depending upon the application, the image on the screen can be rotated. For example, when using the camera app, if the iOS device is rotated 90 degrees, the image on the screen will also be rotate 90 degrees.

### OS X

AirPlay is only supported on Mountain Lion 10.8 or later. To determine if AirPlay is supported, click **System Preferences > Displays**. If the “Show mirroring options in the menu bar when available” check box is not displayed, then AirPlay is not supported.

1. Click the **Wi-Fi** icon in the menu bar and select the SSID of the AT-UHD-SW-510W. If the **Wi-Fi** icon is not displayed, then refer to the Macintosh documentation for information on setting up a Wi-Fi connection.

2. Enter the password for the Wi-Fi network, then click the **Join** button. The default password is 88888888.
AirPlay can be used to either mirror or extend the Mac display.

- **Mirroring**
  Click the AirPlay icon in the menu bar and select the desired display to be mirrored.

- **Extending**
  Click the AirPlay icon and select “Use As Separate Display” from the list of displays, to extend the Desktop to another display.

- **Turning Off AirPlay**
  Click the AirPlay icon and select “Turn AirPlay Off”.

AirPlay can also be turned off by clicking **System Preferences > Displays**. Click the **AirPlay Display** drop-down list and select “Off”. To re-enable AirPlay, select the device from the drop-down list.
Casting on Android devices is only available on Android 4.4.2 or higher.

**NOTE:** Although there are different ways to cast from an Android device, the easiest method is through the Google Home App.

1. Select the **BYOD** input on the AT-UHD-SW-510W.
2. Connect the Android device to the SSID of the AT-UHD-SW-510W. See **Boot Sequence** (page 18) for more information on locating the SSID of the AT-UHD-SW-510W.
3. Download and open the **Google Home** app.
4. In the top-left corner, tap **Menu ➤ > Cast Screen / audio**.

   - Select **Cast Screen** to mirror both screen and audio to the device.
   - Select **Cast Audio** to mirror the audio, only.
Microsoft Miracast

Miracast is a wireless protocol that allows content to be transmitted from laptops and other mobile devices to displays. The latest release of Microsoft Windows® 10 supports Miracast along with UIBC support, which provides wireless connectivity to touch screens, mouse devices, and keyboard.

Displaying Miracast devices can be done in several ways. Two methods are presented below. The first method is recommended, as it is the most direct method.

Method 1

The following is the recommended (and quickest) way to configure Miracast on Microsoft Windows®.

1. Press the ⌘ and P keys, simultaneously.
2. Click the Connect to a display device, on the PROJECT menu.

3. The Connect menu will be displayed, providing a list of Miracast-capable devices.
4. Select the AT-UHD-SW-510W from the list.

Method 2

1. Right-click on the Windows Desktop and select Display Settings from the pop-up menu.
2. In the right-hand column, scroll down, then click Connect to a wireless display.
**Basic Operation**

**Matrix Modes**

The AT-UHD-SW-510W features two matrix modes: Standard Mode and VTC Mode. Enabling matrix mode provides the ability to use AT-UHD-SW-510W in video codec / conference applications, using a dual-presentation mode.

**Standard Mode**

This mode allows the AT-UHD-SW-510W to independently switch between any input or both outputs. The diagram below, shows an example setup.

1. Login to the web GUI. Refer to *Introduction to the Web GUI (page 34)* for more information.
2. Click **Routing** from the menu bar on the left.
3. Scroll down to the bottom of the **Routing** page and click the **Matrix Switch** check box. When a check mark is present in this box, matrix switching will be enabled.

**NOTE:** When matrix mode is enabled, both auto-switching and display power control will be disabled.

4. Leave the **Matrix Mode Static Source** and **Matrix Mode Static Output** to their current values. Note that the values shown in the illustration above, are arbitrary. Routing will be managed using API commands and a control system.
Basic Operation

VTC Mode
This mode allows the AT-UHD-SW-510W to be integrated with a video conference system. In VTC Mode, both static input and output routing is specified. Auto switching will be enabled. However, the specified static input will be removed from the auto-switching pool. For example, if the HDMI IN 3 port is specified as a static input, then auto-switching will “skip” this port when auto-switching. The diagram below, shows an example setup.

1. Login to the web GUI. Refer to Introduction to the Web GUI (page 34) for more information.
2. Click Routing from the menu bar on the left.
3. Scroll down to the bottom of the Routing page.
4. Click the Matrix Mode Static Source drop-down list and select the desired source.
5. Click the Matrix Mode Static Output drop-down list and select the desired output.
The AT-UHD-SW-510W supports Bluetooth®-assisted device discovery. An optional Bluetooth adapter is required, but not included. Atlona recommends Plugable and Kinivo Bluetooth 4.0 adapters.

1. Connect the Bluetooth adapter to the AUX port on the AT-UHD-SW-510W.
2. Login to the web GUI. Refer to Introduction to the Web GUI (page 34) for more information.
3. Click Administration > Networking from the menu bar on the left.
4. Click the Mode drop-down list and select the Access Point or Connect option.
5. Click the Save button.
6. Click Administration > Advanced from the menu bar on the left.
7. Click the Airplay - Bluetooth check box, under the BYOD section.
8. Go to the AirPlay device. The AT-UHD-SW-510W should now be discoverable.
The AT-UHD-SW-510W includes a built-in web GUI. Atlona recommends that the web GUI be used to set up the AT-UHD-SW-510W, as it provides intuitive management of all features. Follow the instructions below to access the webGUI.

1. Make sure that an Ethernet cable is connected between the LAN port on the AT-UHD-SW-510W and the network.

2. Launch a web browser and enter the IP address of the unit. If the default static IP address is being used, enter 192.168.1.254.

3. The AT-UHD-SW-510W Login page will be displayed.

4. Type admin, using lower-case characters, in the User field.

5. Type Atlona in the Password field. This is the default password. The password field is case-sensitive. When the password is entered, it will be masked.

6. Click the Login button or press the ENTER key on the keyboard.
7. The **Info** page will be displayed.

**Menu Bar**

The window on the left side of the screen is the menu bar and lists all available menus. Click on the desired menu item to open that page.

In this example, clicking **Display**, in the menu bar, will display the **Display** page.
After logging in, the Info page will be displayed. The **Info** page provides basic information about the receiver, including the model name, software version, input video timing, and the device being used as the transmitter.

### Model Name
The model SKU of this product.

### Date / Time
The current time and date, in Universal Coordinated Time (UTC).

### Master Version
The version of firmware.

### Firmware Version
The version of firmware that the AT-UHD-SW-510W is running. Always make sure to check the AT-UHD-SW-510W product page, on the Atlona web site, for the latest version of firmware.
Name
Enter the desired name of the AT-UHD-SW-510W in this text field. Include the \{id\} tag to use the last four digits of the hardware MAC address. The \{id\} tag is optional and can be placed anywhere within the Name field.

**NOTE:** The hardware MAC address differs from the MAC address of the unit, which is found on an adhesive label applied to the bottom of the unit.

Display Name
The name based on the information provided in the Name field. This name is used by the AT-UHD-SW-510W to identify it within the OSD.

Derived
This field will automatically be populated by the AT-UHD-SW-510W, based on the information provided in the Name field. This field provides a “computer-friendly” name used by the SSID. If special characters and/or spaces are included in the Name field, then these are removed when populating this field.

Save
Click this button to accept all changes.

Revert
Click this button to abort changes and reset the previous text in the Name field.
**Display name**
The name of the display, provided in the **Name** field of the **General** tab. Refer to **General page (page 37)** for more information.

**Set Date / Time [UTC]**
Displays the current time and date, in Universal Coordinated Time (UTC). UTC must be used when setting the date and time. Refer to the next page for more information.

**Restart**
Click this button to restart the AT-UHD-SW-510W.

**Shutdown**
Click this button to shut down the AT-UHD-SW-510W. This should always be performed before disconnecting power from the unit.

**Factory Reset**
Click this button to reset the AT-UHD-SW-510W to factory-default settings. Resetting to factory-default setting may take up to five minutes to complete. Refer to **Default Settings (page 67)** for the list of default settings.

**Factory Reset MCU**
Click this button to reset the MCU of the AT-UHD-SW-510W. This feature is used as part of **Updating the Firmware (page 63)**.

**Model Name**
The SKU of the product: AT-UHD-SW-510W.

**Master Version**
The master version of firmware. Always make sure to check the AT-UHD-SW-510W product page, on the Atlona website, for the latest version of firmware.

**Firmware Version**
The version of (MCU) firmware that the AT-UHD-SW-510W is running. Always make sure to check the AT-UHD-SW-510W product page, on the Atlona website, for the latest version of firmware.
The Web GUI

**Firmware Check**
Click the **Check** button to check for the latest version of firmware. Each time the unit is rebooted, this feature is performed, automatically. The AT-UHD-SW-510W must be connected to the Internet to use this feature.

**Master Firmware**
Click the **Upload** button to select the master firmware file, when updating the unit.

**MCU Firmware**
Click the **Upload** button to select the MCU firmware file, when updating the unit.

**Download**
Click this button to save the current configuration to a file on the connected computer.

**Upload**
Click this button to upload a configuration file to the AT-UHD-SW-510W. Uploading a new configuration file will overwrite the current configuration settings.

**Documentation**
Click each of these links to access the latest version of the User Manual, IT Deployment Guide, or API Documentation.
Setting the System Date and Time

The AT-UHD-SW-510W uses the internal clock to store the current date and time. When setting the time and date, Universal Coordinated Time (UTC) must be used.

Converting local time to UTC

1. Convert the local time to 24-hour time.
2. Use the tables below, to convert 24-hour time to UTC. For US Daylight Savings Time, subtract one hour from each value, when converting to UTC. UTC for other specific regions can be obtained from https://time.is/UTC.

<table>
<thead>
<tr>
<th>Region</th>
<th>Eastern Std Time</th>
<th>Central Std Time</th>
<th>Mountain Std Time</th>
<th>Pacific Std Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>United States</td>
<td>+ 5:00</td>
<td>+ 6:00</td>
<td>+ 7:00</td>
<td>+ 8:00</td>
</tr>
</tbody>
</table>

3. Click the icon to display the calendar fly-out menu.
4. Select the desired year by clicking on the << or >> icons. To select the month, use the < or > icons.
5. Select the day.
6. Set the time by either clicking on the hour, minute, and second drop-down lists or by entering the time, directly into the Set Date / Time [UTC] field. Always use Universal Coordinated Time (UTC).

![Calendar Fly-out Menu]

7. Exit the Set Date / Time [UTC] field by pressing the TAB key or clicking outside the text field. The time and date information will automatically be saved.

**NOTE:** When setting a time or date that is ahead of the current settings, the web session will automatically time out. This is normal behavior. Login to continue setting up the unit.
Splash Screen

Show Meta Data
Click this check box to display metadata on the splash screen.

Show Panel
Check (enable) this box to display the panel, containing connection instructions and other information.

Y Offset
Sets the up-and-down position of the overlay panel, on the screen. A value of 0 vertically positions the panel in the center of the screen. Positive values move the panel down. Negative values move the panel up.

Title
The title of the overlay panel. The default value is “Welcome”.

Subtitle
The text directly under the text in the Title field. The default text contains the name of the unit.

Column Title
The title text for the centered text, above both instruction columns. The default text is “To begin your presentation”.

Column #1
The text positioned in the left column. The default text is “Connect wired: Connect the HDMI, USB-C, or DisplayPort cable at the table to your device”.

Show Second Column
Check this box to display the second (right-hand) column. Uncheck this box to hide the text in this column.

Column #2
The text positioned in the right-hand column. The default text is “Connect wirelessly: Search for SW510-E753 on your AirPlay, GoogleCast, or Miracast device".

Legend
Click this link to display a list of available tags that can be used in any of the text fields. Refer to the illustration above.

Save
Click this button to commit all changes on this page.
The default loading and splash screen can be replaced with a custom image. Click the drop-down list and select the target image. Once the file is selected, it will automatically be pushed to the AT-UHD-SW-510W.

Preferred image size is either 1920x1080 or 3840x2160. All common image types, such as JPG, BMP, PNG, TIF, GIF, are supported.

1. Click the drop-down list and select the type of image to upload.

2. Click the **Upload** button to select the desired image.

3. Click the **Open** button on the **Open** dialog box to upload the image.
Input Selection

**USBC, DP, HDMI3, HDMI1, BYOD**
Click the desired button to set the auto-switch input.

**Fallback Delay (ms)**
Set the time interval, in seconds, before the AT-UHD-SW-510W auto-switches to the selected input, if no signal is present. The default value is 5000 milliseconds (5 seconds).

Matrix Switching

**Matrix Switch**
Click this check box to enable matrix switching. When this check box is not checked, matrix switch will be disabled. When this feature is enabled, the **Input Selection** section will be disabled. Refer to **Matrix Modes (page 31)** for more information.

**Matrix Mode Static Source**
Click this drop-down list to select the static source: **None, USB-C, DisplayPort, HDMI 3, HDMI 4, or BYOD**.

**Matrix Mode Static Output**
Click this drop-down list to select the static output: **None, HDBaseT, or HDMI**.
The Web GUI

Display page

Control

AutoSwitch
Click this box to enable or disable auto-switching. When this box is checked, the AT-UHD-SW-510W will automatically switch inputs when the new device is connected. To disable auto-switching, uncheck this box.

Display Auto Power
Click this check box to allow the AT-UHD-SW-510W to send the power-on command to the display when an A/V signal is detected. When the AV signal is no longer present, then the AT-UHD-SW-510W will send the power-off command to the display. If this feature is not desired, then uncheck this box. This feature is disabled by default.

Lamp Cool Down Timer (0 - 300 sec)
Click this drop-down list to select the lamp cool down timer interval. This value is the cool-down interval, in seconds, before the projector can be powered-off. During this time, the projector will not accept any “power on” or “power off” commands until the last “power off” command has been processed and the projector lamp has completed the cool-down cycle. Range: 0 to 300. The default value is 30 seconds.

Display Warm-Up Timer (0 - 300 sec)
Click this drop-down list to select the display warm-up time interval. Range: 0 to 300. The default value is 30 seconds.

Auto Power Off Timer
Click this drop-down list to set the time interval, in seconds, between when the loss of A/V signal is detected and when the “Display Off” command is sent to the display. Range: 0 to 300. The default value is 1 minute.
Control Type
Click this drop-down list to select the control method for sending commands.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RS-232</td>
<td>RS-232 is used to send commands.</td>
</tr>
<tr>
<td>IP</td>
<td>Commands are sent over IP.</td>
</tr>
<tr>
<td>CEC</td>
<td>Uses CEC to send commands.</td>
</tr>
</tbody>
</table>

**NOTE:** If **Control Type** is set to **CEC**, then the **Volume / Mute** drop-down list will be disabled. Refer to the **CEC (page 48)** section for more information.

**Control Type : RS-232**

When **RS-232** is selected from the **Control Type** drop-down, both the **HDBaseT RS-232** and **RS-232/IP Commands** section is displayed.
The Web GUI

**HDBaseT RS-232**
The RS-232 settings over the HDBaseT port.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>

<td>Baud rate</td>
<td>Sets the baud rate. The following options are available: 9600, 14400, 19200, 57600, 115200.</td>
</tr>
<tr>
<td>Data bit</td>
<td>Sets the number of data bits used to represent each character of data. The following options are available: 7 or 8.</td>
</tr>
<tr>
<td>Parity</td>
<td>Sets the parity bit, which can be included with each character to detect errors during the transmission of data. The following options are available: None, Odd, or Even.</td>
</tr>
<tr>
<td>Stop bit</td>
<td>Sets the stop bit. Stop bits are sent at the end of each character, allowing the client to detect the end of a character stream. The following options are available: 1 or 2.</td>
</tr>
</tbody>
</table>

**RS-232/IP Commands**
The RS-232 settings over the HDBaseT port.

Enter the appropriate command for the display in each field. Command can be either ASCII or hex. If hex values are being used, then use the /x delimiter at the end of the string. ON, OFF, Volume+ (increase), Volume- (decrease), and Mute are supported.
Save
Click this button to commit all changes.

Revert
Click this button to undo all changes.

Control Type: IP
When IP is selected from the Control Type drop-down, both the IP and RS-232/IP Commands section is displayed.

IP Address
Enter the IP address of the remote device.

Port [0 - 65535]
Enter the listening port for the remote device. Values from 0 through 65535 are valid.

RS-232/IP Commands
The IP settings over the HDBaseT port.

Enter the appropriate command for the display in each field. Command can be either ASCII or hex. If hex values are being used, then use the /x delimiter at the end of the string. ON, OFF, Volume+ (increase), Volume- (decrease), and Mute are supported.

CEC

Power
When a display is connected to the AT-UHD-SW-510W, power-on and power-off control of the display using the CEC protocol. The power-on and power-off command can also be sent over HDBaseT or HDMI. These buttons will only be enabled if a device is connected to the AT-UHD-SW-510W, using the correct cable. For example, the HDMI ON / OFF buttons will only be enabled when an HDMI cable is connected from the AT-UHD-SW-510W to a display.

Consumer Electronics Control (CEC): Atlona has confirmed proper CEC functionality with several current models of Samsung, Panasonic, and Sony displays. However, it is not guaranteed that CEC will work with all displays. Many manufacturers do not support the CEC “off” command, and older displays use proprietary commands. Atlona only supports displays that use the CEC command structure defined in HDMI 1.2a. It is recommended that dealers request an evaluation product from Atlona, before designing a system using the CEC protocol. If this is not possible, then other control methods will need to be considered, in order to control displays using Atlona products.

Relay

Enable Momentary Relay
When enabled, the RELAY port can be used to control screens, curtains, and other devices. Use a 48 V DC relay with no more than 1 A current draw. This feature is enabled, by default. Refer to Relay (page 12) for wiring information.

Trigger I/O

This section defines how the TRIGGER port will respond to varying voltage levels. Either or both of the following conditions can be enabled or disabled.

- **Enable Power Off**
  Check this box to enable a power-off state when the trigger voltage is pulled from low to high. Uncheck this box to disable this function.

- **Enable Power On**
  Check this box to enable a power-on state when the trigger voltage is pulled from low to high. Uncheck this box to disable this function.
**EDID page**

This feature will be implemented in a future release of firmware.

![Image of EDID page](image)

**EDID (Extended Display Identification Data)**
Displays the EDID assigned that is being used by each output. Press the **Save** button to save the EDID to a file.

**Inputs**
The **Input** column displays each of the inputs on the AT-UHD-SW-510W. Click the drop-down list, under the **Selection** column, to select the desired EDID to be used. When selecting an EDID, make sure that the display/sink device is capable of supporting the resolution/timing. If the sink device is not able to support a feature, then the source will not be displayed. Selecting the Default EDID will send the EDID from the display/sink to the source. Click the **Save** button to accept the changes. The table below lists the available EDID presets. Each EDID is available for all inputs.

The table below provides a listing of available EDID presets. Refer to Internal EDID Data (page 71) for a summary of each EDID structure.

<table>

The Web GUI

Administration page

Telnet page

The **Telnet** page provides an emulated terminal for entering commands.

Shell page

The **Shell** page is provided for use only by Atlon Technical Support Engineers.
Networking page

This page contains a **Wifi** and **Ethernet** tab. Use the settings, under these tabs, to connect the AT-UHD-SW-510W to a network or Wireless Access Point (WAP). Refer to the IT Network Deployment Guide for detailed information on configuring the AT-UHD-SW-510W in various network environments.

### Hostname
The name assigned to the AT-UHD-SW-510W. This name can be changed, if desired. Refer to the **General page** (page 37).

### Mode (Wifi)
Select the Wi-Fi mode from this drop-down list. Refer to the next page for more information on configuration of Wi-Fi modes.

### Save
Click this button to accept all changes to the **Wifi** tab. When **Connect** mode is selected, click this button to connect the AT-UHD-SW-510W to the wireless network.

### Cancel
Resets the Wifi and Ethernet settings to factory-default settings, then displays the Wifi tab.

### Reset Network Settings
Click this button to reset the network settings to factory-default.
The Web GUI

WiFi tab

Mode
Select this mode to use the AT-UHD-SW-510W as a Wireless Access Point (WAP).

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Access Point</td>
<td>Select this option to configure the AT-UHD-SW-510W as a Wireless Access Point, allowing other wireless devices to connect to the same wired network as the AT-UHD-SW-510W.</td>
</tr>
<tr>
<td>Connect</td>
<td>Select this option to connect the AT-UHD-SW-510W to the specified SSID of a wireless host.</td>
</tr>
<tr>
<td>Disabled</td>
<td>Select this option to disable Wi-Fi on the AT-UHD-SW-510W.</td>
</tr>
</tbody>
</table>

Firewall Mode
This option is unique to Access Point Mode. Refer to the Firewall Mode option, below, for more information.

SSID
The SSID assigned to the AT-UHD-SW-510W. The SSID name can be changed under the General page (page 37).

Password
Enter the password, required to connect to the AT-UHD-SW-510W. The default password is 88888888.

Hide Password on OSD
By default, the password will be displayed on the OSD. Check this box to mask the password.

Channel
Click this drop-down list to select the desired wireless channel. Consult with a network administrator for assistance, if required. Channels 1 - 11 are 2.4 GHz. Channels 36 and greater use the 5 GHz band.

Firewall Mode
This feature is only available when the WiFi mode is set to Access Point. Click the Firewall Mode drop-down list to select the desired mode.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>None</td>
<td>Select this option to disable the firewall on the AT-UHD-SW-510W and allow all incoming and outgoing network traffic.</td>
</tr>
<tr>
<td>Block Private Network</td>
<td>Select this option to prevent unauthorized clients from accessing the AT-UHD-SW-510W.</td>
</tr>
<tr>
<td>Block Internet</td>
<td>Allows wireless access to the AT-UHD-SW-510W but prevent Internet access (Google, YouTube, etc).</td>
</tr>
<tr>
<td>Block All</td>
<td>All outbound network traffic is blocked.</td>
</tr>
</tbody>
</table>
The Web GUI

Connect Mode
Select this option to allow the AT-UHD-SW-510W to connect to an available wireless network.

SSID
The name of the wireless network to which the AT-UHD-SW-510W is connected. Click the Pick button to select the desired wireless network.

Password
Enter the password, required to connect to the AT-UHD-SW-510W.

Status
Displays the connection status.

<table>
<thead>
<tr>
<th>State</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Connected</td>
<td>The AT-UHD-SW-510W is connected to the wireless network.</td>
</tr>
<tr>
<td>Not Connected</td>
<td>Unsuccessful connection. Check to make sure the password was entered correctly. This state will also occur if the wireless network, to which the AT-UHD-SW-510W is connected, is taken offline.</td>
</tr>
<tr>
<td>Unknown</td>
<td>The network state is unknown. This message is displayed if the AT-UHD-SW-510W has not been configured to connect with a wireless network.</td>
</tr>
</tbody>
</table>

Ethernet tab
Click this tab to configure wired network settings on the AT-UHD-SW-510W. By default, the AT-UHD-SW-510W is set to DHCP mode, allowing a DHCP server (if present) to assign the unit an IP address.

If a DHCP server is not found within 15 seconds, then the unit will be placed in Auto IP mode and use a self-assigned IP address within the range of 169.254.xxx.xxx.

When Mode is set to DHCP, the IP Address, Network Mask, and Gateway fields will automatically be populated by the AT-UHD-SW-510W, using a DHCP server, and cannot be modified.

Save
Click this button to connect to the specified wireless network (SSID).

Cancel
Resets the Wifi and Ethernet settings to factory-default settings, then displays the Wifi tab.

Reset to Factory Default
Resets the networking subsystem to factory-default settings.
The Web GUI

**Mode**
Click this drop-down to select the desired network mode: DHCP, Static, or Factory Static.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DHCP</td>
<td>Select this option to have a DHCP server (if available) assign an IP address to the AT-UHD-SW-510W.</td>
</tr>
<tr>
<td>Static</td>
<td>Select this option to enter a specific IP address. When set to Static mode, the subnet mask, gateway, and DNS servers can be specified.</td>
</tr>
</tbody>
</table>
| Factory Static | Select this option to use the factory-default wired network settings. In this mode, none of the fields can be modified and will be set to the following values:  
  - IP address = 192.168.1.254  
  - Network mask = 255.255.0.0  
  - Gateway = 192.168.1.1 |

**Static Mode**
Select this option to enter a specific IP address. When set to Static mode, the subnet mask, gateway, and DNS servers can be specified.

**IP Address**
Enter the desired IP address for the AT-UHD-SW-510W in this field.

**Network Mask**
Enter the subnet mask in this field.

**Gateway**
Enter the gateway (router) address in this field.

**DNS Server**
Enter the DNS server addresses in the DNS Server #1 and DNS Server #2 fields. If the AT-UHD-SW-510W will be used within an internal LAN, this information is not required.

**Save**
Click this button to accept all changes to the Ethernet tab.

**Cancel**
 Resets the Wifi and Ethernet settings to factory-default settings, then displays the Wifi tab.

**Reset to Factory Default**
Click this button to set the wired network settings of the AT-UHD-SW-510W to factory-default.
Connecting to a Wifi Network

1. Select **Connect** from the **Mode** drop-down list.

2. Click the **Pick** button to open the **Pick a Wifi Network** dialog box.

3. Click on the desired wireless network from the list.

4. Click the **OK** button.
The Web GUI

Debug page

Click the **Download Logs** button to download the debug logs. Debug logs are downloaded in a .zip file. Debug logs are used by Atlona Technical Support Engineers to identify functionality issues.

1. Click **Debug** on the side menu bar.
2. Click the **Downloads Logs** button to display the **Save As** dialog box.
3. Browse to the desired folder where the .zip file will be downloaded.
4. Click the **Save** button on the **Save As** dialog to save the debug log file.
User Accounts page

This page allows the default password to be changed.

1. Click the **Change** button to display the **Change Password** dialog box.

2. Enter the new password in the **Password** field.
3. Re-enter the same password in the **Repeat Password** field.
4. Click the **Save** button to commit changes or click **Cancel** to abort the process.
**Advanced page**

Show OSD / Hide OSD
Click the Show OSD button to show the On-Screen Display (OSD). Click the Hide OSD button to hide the OSD. Note that the OSD does not include the Panel or the Metadata.

BYOD
Kick User
Click this button to disconnect (“kick”) the current BYOD device from the AT-UHD-SW-510W.

Miracast EDID
Click this drop-down list to select the EDID used by Miracast.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>none</td>
<td>Uses the downstream EDID</td>
</tr>
<tr>
<td>1080p60</td>
<td>1920x1080p @ 60 Hz</td>
</tr>
<tr>
<td>1080p30</td>
<td>1920x1080p @ 30 Hz</td>
</tr>
</tbody>
</table>
The Web GUI

**Airplay - Bluetooth**
Click this check box to enable Bluetooth discovery.

**Arrow Buttons**
Click this drop-down list to define the functionality of the front-panel arrow buttons. By default this option is set to Volume.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Volume</td>
<td>Press the up and down arrow buttons to increase or decrease the output volume, respectively.</td>
</tr>
<tr>
<td>OSD</td>
<td>The up-arrow button displays the OSD. The down-arrow button hides the OSD.</td>
</tr>
</tbody>
</table>
Moderator Mode
This feature will be available in a future firmware release.
Audio page

Adjusts the output volume.

Audio
Click and drag this slider to adjust the output volume. Output is adjustable from -80 to 0 dB.
Event Viewer page

Displays a dynamic list of events, returned in JSON format. The image below shows a list of sample events.
Appendix

Updating the Firmware

The following procedure outlines the firmware update procedure for the AT-UHD-SW-510W. This product can only be updated through the web GUI.

Requirements:

- AT-UHD-SW-510W
- MCU and Master firmware files
- Computer running Microsoft Windows

2. Connect the computer, containing the firmware files, to the same network as the AT-UHD-SW-510W.

3. Launch a web browser and enter the IP address of the AT-UHD-SW-510W in the address bar.
   a. If the IP address is unknown, then insert a USB drive into the AUX port on the back of the unit. Wait approximately 10 seconds then remove the USB drive. Open the .txt file to obtain the IP address.

4. The Login screen will be displayed. Enter the login credentials. The default username and password are listed below:
   
<table>
<thead>
<tr>
<th>User</th>
<th>Password</th>
</tr>
</thead>
<tbody>
<tr>
<td>admin</td>
<td>Atlona</td>
</tr>
</tbody>
</table>

5. Click System on the side menu bar.

**IMPORTANT:** The MCU firmware must be updated before the Master firmware. If this order is not followed, system instability may result.
6. Click the **Upload** button, next to **MCU Firmware**.

7. Select the AT-UHD-SW-510W_MCU_[version].BIN file from the **Open** dialog box, then click **Open** to begin the update process.

8. During the update process, the following message will appear in the upper-right corner of the screen:

![Server connection lost, trying to reconnect...]

Wait approximately four minutes. After the firmware process has completed, the AT-UHD-SW-510W will automatically reboot, twice.

9. The following message will appear at the top of the screen:

![Session Expired Take note of any unsaved data, and click here or press ESC key to continue.]

10. Click the message to return to the **Login** screen. Enter the login credentials.

11. Click **System** on the side menu bar.

12. Click the **Restart** button to reboot the AT-UHD-SW-510W.

**IMPORTANT:** The AT-UHD-SW-510W must be rebooted after each firmware update, in order to make sure that the unit is properly initialized and prepared to receive the Master firmware file.

13. Wait for the reboot process to complete.

14. Click the **Upload** button next to **Master Firmware** and select the AT-UHD-SW-510W_MASTER_[version].war file.
15. Repeat steps 8 through 13, making sure to reboot the unit after the Master firmware has been updated. The firmware process will take approximately four minutes.

**IMPORTANT:** The next and final step requires that the AT-UHD-SW-510W be reset to factory-default settings. Before proceeding, make sure to record all settings by taking screen shots, or writing down all pertinent information. Once the factory-reset is complete, it will be necessary to re-enter these settings/values. Refer to the next page for instructions.

16. Click the **Reset** button, next to **Factory Reset**.

**WARNING:** Performing a factory reset will erase all settings and configuration information. Make sure that all current settings and values are recorded before proceeding. Performing a factory reset will also set the AT-UHD-SW-510W to DHCP mode. If a static IP is being used, make sure to record these IP settings.

The factory-reset procedure will take approximately four minutes.

17. During the update process, the following message will appear in the upper-right corner of the screen:

```
Server connection lost, trying to reconnect...
```

18. After a while, the following message will appear at the top of the screen:

```
Session Expired  Take note of any unsaved data, and click here or press ESC key to continue.
```

19. Click the message to return to the **Login** screen. Enter the login credentials, using the default username and password:

```
User      admin
Password  Atlona
```
20. Click **System** on the side menu bar, then click the Factory Reset MCU **Reset** button.

21. Power-cycle the AT-UHD-SW-510W by disconnecting and reconnecting the power supply.

22. Login to the webGUI using the default username and password.

   The AT-UHD-SW-510W has been reset to factory-default settings and will use DHCP (if a DHCP server is available) to assign itself an IP address, once connected to a network.

   If a static IP was used prior to the firmware update procedure, refer to Step 3a.

23. Set the **icon** to display the calendar fly out and set the correct UTC time and date. UTC for specific regions can be obtained from https://time.is/UTC.

   **IMPORTANT:** Setting the correct UTC time and date must be performed as a final step. When setting a time or date that is ahead of the default settings, the web session will automatically time out. This is normal behavior.
The following tables list the factory-default settings, as defined in the web GUI, for the AT-UHD-SW-510W.

Mounting Instructions

The AT-UHD-SW-510W can be mounted in different ways, based on the number of units that are being installed. The AT-UHD-SW-510W can be mounted in a rack or on/under any flat surface.

**NOTE:** AT-UHD-510W-RM rack ears are sold separately. Contact Atlona for more information.

**Single-unit Rack Installation**

1. Attach the included small rack ear (sold separately) to one side of the AT-UHD-SW-510W, using the included screws.

2. Attach the included longer rack ear (sold separately) to the opposite side of the AT-UHD-SW-510W using the included screws.
Dual-unit Rack Installation

1. Turn both units upside-down on a flat surface, next to each other, as shown.

2. Position the included mounting plates over the holes on the bottom of the enclosure. When attaching mounting plates, the countersink bevels on the mounting plate should face upward.

3. Turn the attached units over and install the rack ears (sold separately) to one side of each enclosure using the included screws.
Appendix

Flat Surface

1. Turn the unit upside down, on a flat surface.

2. Position the included mounting plates over the pre-drilled holes on the bottom of the enclosure. When attaching mounting plates, the countersink bevels on the mounting plates should face upward.

3. Mount the unit using the circular holes, on each mounting plate. If using a drywall surface, a #6 drywall screw is recommended. Mounting screws are not included.

NOTE: The unit can also be mounted under a flat surface, such as a table, by turning the unit upside down.
## Internal EDID Data

The AT-UHD-SW-510W comes with 11 preprogrammed EDID selections. The timing and audio summary (if applicable) for each EDID, is listed below. Raw data is also provided and can be used to view the full EDID structure.

<table>
<thead>

## Appendix

### EDID Description

**Native/preferred timing**

3840x2160p at 30Hz (16:9)

### Standard timings supported

- 720 x 400p at 70Hz - IBM VGA
- 640 x 480p at 60Hz - IBM VGA
- 800 x 600p at 60Hz - VESA
- 1024 x 768p at 60Hz - VESA
- 1024 x 768p at 75Hz - VESA
- 1280 x 1024p at 60Hz - VESA STD
- 1024 x 768p at 60Hz - VESA STD
- 800 x 600p at 60Hz - VESA STD
- 640 x 480p at 60Hz - VESA STD
- 1280 x 1024p at 60Hz - VESA STD
- 1600 x 1200p at 60Hz - VESA STD

### CE video identifiers (VICs) – timing/formats supported

- 1920 x 1080p at 60Hz - HDTV (16:9, 1:1)
- 1920 x 1080p at 30Hz - HDTV (16:9, 1:1)
- 1920 x 1080p at 24Hz - HDTV (16:9, 1:1)
- 1920 x 1080i at 60Hz - HDTV (16:9, 1:1)
- 1280 x 720p at 60Hz - HDTV (16:9, 1:1)
- 720 x 480p at 60Hz - EDTV (16:9, 32:27)
- 720 x 480p at 60Hz - EDTV (4:3, 8:9)
- 720 x 480p at 60Hz - EDTV (4:3, 8:9)
- 720 x 480p at 60Hz - EDTV (4:3, 8:9)
- 720 x 480p at 60Hz - EDTV (4:3, 8:9)
- 720 x 576p at 50Hz - EDTV (16:9, 64:45)
- 1280 x 720p at 50Hz - EDTV (16:9, 1:1)
- 1920 x 1080i at 50Hz - HDTV (16:9, 1:1)
- 1920 x 1080p at 50Hz - HDTV (16:9, 1:1)
- 720 x 480i at 60Hz - Doublescan (16:9, 32:27)
- 720 x 480i at 60Hz - Doublescan (16:9, 32:27)

### CE audio data (formats supported)

LPCM 2-channel, 16/20/24 bit depths at 32/44/48/96/192 kHz

#### Standard timings supported

- 720 x 400p at 70Hz - IBM VGA
- 640 x 480p at 60Hz - IBM VGA
- 640 x 480p at 67Hz - Apple Mac II
- 640 x 480p at 72Hz - VESA
- 640 x 480p at 75Hz - VESA
- 800 x 600p at 56Hz - VESA
- 800 x 600p at 60Hz - VESA
- 800 x 600p at 72Hz - VESA
- 800 x 600p at 75Hz - VESA
- 832 x 624p at 75Hz - Apple Mac II
- 1024 x 768p at 60Hz - VESA
- 1024 x 768p at 70Hz - VESA
- 1024 x 768p at 75Hz - VESA
- 1280 x 1024p at 75Hz - VESA
- 1152 x 870p at 75Hz - Apple Mac II
- 1600 x 1200p at 60Hz - VESA STD
- 1440 x 900p at 60Hz - VESA STD
- 1400 x 1050p at 60Hz - VESA STD
- 1280 x 1024p at 60Hz - VESA STD
- 1280 x 800p at 60Hz - VESA STD
- 1280 x 720p at 120Hz - VESA STD
- 1024 x 768p at 120Hz - VESA STD
- 800 x 600p at 120Hz - VESA STD

#### CE speaker allocation data

- FL/FR

#### CE video identifiers (VICs) - timing/formats supported

- 720 x 400p at 60Hz - EDTV (16:9, 32:27)
- 1280 x 720p at 60Hz - HDTV (16:9, 1:1) [Native]
- 1920 x 1080i at 60Hz - HDTV (16:9, 1:1)
- 720 x 480p at 60Hz - EDTV (4:3, 8:9)
- 720 x 480i at 60Hz - Doublescan (4:3, 8:9)
- 720 x 480i at 60Hz - Doublescan (16:9, 32:27)
- 1440 x 480p at 60Hz - DVD (4:3, 4:9)
- 1440 x 480p at 60Hz - DVD (16:9, 16:27)
- 720 x 576p at 50Hz - EDTV (16:9, 64:45)
- 720 x 576p at 50Hz - EDTV (4:3, 16:15)
- 1280 x 720p at 50Hz - HDTV (16:9, 1:1)
- 1920 x 1080i at 50Hz - HDTV (16:9, 1:1)
- 720 x 576i at 50Hz - Doublescan (4:3, 16:15)
- 720 x 576i at 50Hz - Doublescan (16:9, 64:45)
- 1920 x 1080p at 25Hz - HDTV (16:9, 1:1)
- 1920 x 1080p at 30Hz - HDTV (16:9, 1:1)

### Electrical Rating:

- **HDMI IN/OUT:** 48 V @ 1 A
- **TRIGGER:** 30 V @ 1 A (max.)

### Video

- **UHD/HD/SD:** 4096x2160@60/30/25/24Hz*, 3840×2160@60/30/25/24Hz*, 1080p@60/59.94/50Hz, 576p@50Hz, 576i@50Hz, 480p@60/59.96Hz, 480i@60Hz
- **VESA:** 2560×1600, 2048×1536, 1920×1200, 1680×1050, 1600×1200, 1440×900, 1400×1050, 1280×1024, 1280×800, 1366×768, 1360×768, 1152×864, 1024×768, 800×600, 640×480
- **USB-C:** Up to 4K/UHD @ 60Hz for devices supporting USB-C Alternate Mode video output
- **Wireless:** Up to 1080p @ 30Hz 4:2:0 (up to 1080p @ 60Hz with Miracast™); dependent on wireless signal quality

### Color Space

- **YUV, RGB**

### Chroma Subsampling

- **4:4:4, 4:2:2, 4:2:0**

### Color Depth

- **8-bit, 10-bit, 12-bit**
- **HDR †** HDR10 and Dolby® Vision™ @ 60Hz; HDMI or DisplayPort inputs only

### Audio

- **Pass-Through Formats:** PCM, Dolby® Digital, Dolby Digital Plus™, Dolby TrueHD, Dolby Atmos®, DTS® Digital Surround™, DTS-HD Master Audio™, and DTS:X®
- **Sample Rate:** 32 kHz, 44.1 kHz, 48 kHz, 88.2 kHz, 96 kHz, 176.4 kHz, 192 kHz
- **Bit Rate:** 24 Mbits/s max

### Resolution / Distance
