# Avocor R Series, Powered by Rise Vision

Digital signage that enables you to **effortlessly communicate, update, and inspire.**

Simple, Scalable Solutions – Right Out of the Box

The Avocor R Series is a single, all-in-one solution that combines a display, media player, and smart digital signage software with remote management capabilities to streamline engagement.

Communicate

The hassle-free way to inform your employees or students - customizable templates, simple scheduling and content management by individual owners.

Update

Keep everyone notified, engaged and alert with active content and features like emergency broadcast override.

Inspire

Drive a positive culture and maintain a dynamic and informed workplace by showcasing important messages that foster connection and collaboration.
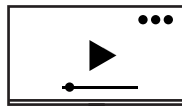

Key Benefits and Features

With the remote device management capabilities of the Avocor R Series, you can easily manage content, scheduling, and over-the-air firmware updates on multiple devices across multiple locations.

43" or 55" – lightweight and easy to install options.

Built in media player – no additional hardware required.

Digital signage software library of customizable templates.

Emergency broadcast override – quickly send out emergency notifications in real-time.

Tamperproof design – no front buttons so unintended interference is prevented.
