Thank you for purchasing this projector.

► Before using this projector, read all the manuals for this projector. Read Safety Guide first. After reading the manuals, store them in a safe place for future reference.

Various symbols are used in this manual. The meanings of these symbols are described below.

⚠ WARNING This symbol indicates information that, if ignored, could possibly result in personal injury or even death due to incorrect handling.

⚠ CAUTION This symbol indicates information that, if ignored, could possibly result in personal injury or physical damage due to incorrect handling.

 Noticed This entry notices of fear of causing trouble.

Refer to the pages written following this symbol.

NOTE • The information in this manual is subject to change without notice.
• The illustrations in this manual are for illustrative purposes. They may differ from your projector.
• The manufacturer assumes no responsibility for any errors that may appear in this manual.
• The reproduction, transfer or copy of all or any part of this document is not permitted without express written consent.

LWU900-DS/LHD878-DS/LWU755-DS
020-001587-01 Rev. 1 (12-2018)
LIT MAN USR DS Series
Introduction

Features

The projector provides you with the broad use by the following features.

- The HDMI™/DisplayPort™/HDBaseT™ ports can support various image equipment which have digital interface to get clearer pictures on a screen.
- The super bright light source and high quality optical system can fulfill the demands of professional uses.
- Optional lens units and a wide range of the lens shift feature provide more flexibility in where you can install the projector.
- The multiple I/O ports is believed to support any business scene.
- HDCR and an eClarity features are original image stabilizer for a clearer image.
- A DICOM® ("Digital Imaging and Communication in Medicine") provides simulation mode. This mode simulates the DICOM standard, which is a standard applicable to digital communications in medicine.
- Advanced Color Adjustment corrects an image by dividing it into three-dimensional space such as color phase, color saturation, and brightness.

Checking the contents of package

See the Contents of package section in the Setup Guide which is a book. Your projector should come with the items shown there. Consult your dealer immediately if any items are missing.

⚠️ WARNING ⚠️ Keep small parts away from children and pets. Take care not to put in the mouth. If swallowed, consult a physician immediately for emergency treatment.

NOTE • Keep the original packing materials for future shipment. Use the original packing materials when moving the projector. Remove the lens unit and attach the lens hole cover when moving the projector.
Part names

Projector

(1) Filter cover (113)
   The air filter and intake vent are inside.
(2) Elevator feet (x2) (37)
(3) Remote sensors (x2) (30, 99)
(4) Lens hole cover
(5) Indicators (5)
(6) Intake vents
(7) Control panel (5)
(8) AC (AC inlet) (27)
(9) Exhaust vents
(10) Ports (6)
(11) Security bar (26)
(12) Security slot (26)
(13) Safety bar (26)
(14) Battery cover (115)

⚠️ WARNING ▶️ Do not open or remove any portion of the projector, unless the manuals direct it.
▶️ Do not subject the projector to unstable conditions.
▶️ Do not apply a shock or pressure to this projector. Remove all the attachments including the power cord and cables, from the projector when carrying the projector.
▶️ Do not look into the lens and the openings on the projector while the light source is on as the projection ray may cause a trouble on your eyes.
▶️ Keep any object away from concentrated projection light beam. Blocking the beam causes high temperature and could result in fire or smoke.

⚠️ CAUTION ▶️ Do not touch around the exhaust vents during use or just after use, since it is too hot.
▶️ Do not attach anything onto the lens except the lens cover of this projector because it could damage the lens, such as melting the lens.

(continued on next page)
Part names (continued)

Control panel and Indicators

(1) **STANDBY/ON** button (31)
(2) **INPUT** button (34, 54)
(3) **MENU** button (54)
(4) **LENS SHIFT** button (39)
(5) **ZOOM** button (38)
(6) **FOCUS** button (38)
(7) **SHUTTER** button (49)
(8) **SERVICE** indicator (124, 125)
(9) **STATUS** indicator (122 ~ 124)
(10) **FILTER** indicator (123)
(11) **LIGHT** indicator (124)
(12) **TEMP** indicator (123 ~ 125)
(13) **POWER** indicator (31, 121 ~ 125)

(continued on next page)
Introduction

Part names (continued)

Ports (13 ~ 23)

1. COMPUTER IN port
2. HDBaseT port
3. LAN port
4. WIRELESS port
5. HDMI 1 port
6. HDMI 2 port
7. DisplayPort port
8. VIDEO port
9. 3G-SDI port (LWU900-DS/LHD878-DS)
10. AUDIO IN1 port
11. AUDIO IN2 (L, R) ports
12. AUDIO OUT port
13. MONITOR OUT port
14. REMOTE CONTROL IN port
15. REMOTE CONTROL OUT port
16. CONTROL port
17. HDMI OUT port

LWU755-DS

LWU900-DS/LHD878-DS
Part names (continued)

Remote control

(1) STANDBY button (31)
(2) ON button (31)
(3) ID - 1 / 2 / 3 / 4 buttons (29)
(4) COMPUTER 1 button (34)
(5) COMPUTER 2 button *1
(6) VIDEO button (34)
(7) LAN button (34)
(8) USB TYPE A button *1
(9) USB TYPE B button *1
(10) HDMI 1 button (34)
(11) HDMI 2 button (34)
(12) DisplayPort button (34)
(13) HDBaseT button (34)
(14) SDI button (34)
(Supported only for LWU900-DS/LHD878-DS)
(15) DIGITAL button *1
(16) FOCUS + / - buttons (38)
(17) ZOOM + / - buttons (38)
(18) AV MUTE button (33)
(19) LENS MEMORY LOAD / SAVE buttons (40)
(20) SHIFT button (39)
(21) OSD MSG button (36)
(22) ▲/▼/◄/►cursor buttons
(23) ENTER button (54)
(24) RESET button (54)
(25) MENU button (54)
(26) GEOMETRY button (41)
(27) PICTURE button (60 ~ 62)
(28) NETWORK button
(29) INTERACTIVE button *2
(30) FREEZE button (49)
(31) PbyP button (50)
(32) MAGNIFY ON / OFF buttons (48)
(33) VOLUME + / - buttons (33)
(34) INFO button (35) ASPECT button (35)
(35) MY BUTTON - 1 / 2 / 3 / 4 buttons (90, 91)
(36) Battery cover (28)
(37) Wired remote control port (21)
(38) Back of the remote control

NOTE
• When you press the button marked with *1, the input signal selection menu is displayed.
• Any button marked with *2 is not supported on this projector (120).
• Each time you press any button (except ID buttons), the ID button of current selected ID number lights (29).
Install the projector according to the environment and manner the projector will be used in.
This projector will perform in a free tilt angle, as shown in the figures below.
For the case of installation in a special state such as ceiling mount, the specified mounting accessories and service may be required. Before installing the projector, consult your dealer about your installation.

Horizontal 360°  Vertical 360°  Tilt 360°  (combination of horizontal and vertical)
Setting up (continued)

Secure a clearance of 30 cm or greater between the intake vents of the projector and other objects such as walls. There are intake vents on the left and right sides.

Secure a clearance of 50 cm or greater between the exhaust vents of the projector and other objects such as walls. There are exhaust vents on the back side.

When installing the projectors side by side, secure a clearance of 50 cm or greater between both projectors.

Assume that there is enough clearance in the front and top of the projector. These also apply to the portrait mode installation.

Installing the lens unit

See the manual of the optional lens.
Arrangement

Refer to tables T-2 to T-3 at the back of Setup Guide as well as the following to determine the screen size and projection distance. The values shown in the table are calculated for a full size screen.

\[ H \times V: \text{ Screen size} \]
\[ a: \text{ Projection distance} \]

Projector top
Projector bottom
Elevator feet

(continued on next page)
Arrangement (continued)

⚠️ WARNING ⬗ Install the projector where you can access the power outlet easily. If an abnormality should occur, unplug the projector immediately. Otherwise it could cause a fire or electric shock.

► Do not subject the projector to unstable conditions. If the projector falls or topples over, it could result in injury or damage to the projector and the surrounding things. Using a damaged projector could result in a fire and an electric shock.

• Do not place the projector in unstable places, such as an inclined surface, places subject to vibration, on top of a wobbly table or cart, or a surface that is smaller than the projector.
• Do not put the projector on its side, front or rear position.
• Do not attach nor place anything on the projector unless otherwise specified in the manual.
• Do not use any mounting accessories except the accessories specified by the manufacturer. Read and keep the manuals of the accessories used.
• For special installation such as ceiling mounting, be sure to consult your dealer beforehand.
• You can install the projector for any direction with specified mounting accessories. Consult with your dealer about such a special installation.
• Remove all the attachments including the power cord and cables, from the projector when carrying the projector.

► Do not install the projector near thermally conductive or flammable things. Such things when heated by the projector could result in a fire and burns.

• Do not place the projector on a metal stand.

► Do not place the projector where any oils, such as cooking or machine oil, are used. Oil may harm the projector, resulting in malfunction, or falling from the mounted position. Do not use adhesive such as threadlocker, lubricant and so on.

► Do not place the projector in a place where it may get wet. Getting the projector wet or inserting liquid into the projector could cause a fire and an electric shock, and damage the projector.

• Do not place the projector near water, such as in a bathroom, kitchen, or poolside.
• Do not place the projector outdoors or by the window.
• Do not place anything containing liquid near the projector.

► Do not block the intake vents and exhaust vents of the projector. If the intake vents and exhaust vents of the projector are blocked, the accumulated inside heat may cause fire.

(continued on next page)
Setting up

Arrangement (continued)

⚠️ CAUTION  ► Place the projector in a cool place with sufficient ventilation. The projector may shutdown automatically or may malfunction if its internal temperature is too high. Using a damaged projector could result in a fire and an electric shock.
• Do not place the projector in direct sunlight or near hot objects such as heaters.
• Do not place the projector where the air from an air conditioner or similar unit directly blows on it.
• Do not place the projector on carpet, cushions or bedding.
• Do not stop up, block nor cover the projector's vent holes. Do not place anything around the projector that could be sucked in or stuck to the projector's intake vents.
• Do not place the projector at places that are exposed to magnetic fields, doing so can cause the cooling fans inside the projector to malfunction.

► Avoid placing the projector in smoky, humid or dusty place. Placing the projector in such places could cause a fire, an electric shock and malfunction of the projector.
• Do not place the projector near humidifiers. Especially for an ultrasonic humidifier, chlorine and minerals contained in tap water are atomized and could be deposited in the projector causing image degradation or other problems.
• Do not place the projector in a smoking area, kitchen, passageway or by the window.

NOTICE  • Position the projector to prevent light from directly hitting the projector's remote sensor.
• Positional deviation or distortion of a projected image, or shift of the focus may occur due to ambient conditions, and so on. They tend to occur until the operation becomes stable, especially within about 30 minutes after the light source is turned on. Check and readjust them as necessary.
• Do not place the projector in a place where radio interference may be caused.
• Keep heat-sensitive things away from the projector. Otherwise, they may be damaged by the heat from the projector.

NOTE  • When the ambient temperature is around 35 to 45°C, the brightness of light source is reduced automatically.
Connecting with your devices

Before connecting the projector to a device, consult the manual of the device to confirm that the device is suitable for connecting with this projector and prepare the required accessories, such as a cable in accord with the signal of the device. Consult your dealer when the required accessory did not come with the projector or the accessory is damaged.

After making sure that the projector and the devices are turned off, perform the connection, according to the following instructions. Refer to the figures in subsequent pages.

Before connecting the projector to a network system, read Network Guide too.

WARNING ► Use only the appropriate accessories. Otherwise it could cause a fire or damage the projector and devices.
• Use only the accessories specified or recommended by the projector’s manufacturer. It may be regulated under some standard.
• Neither disassemble nor modify the projector and the accessories.
• Do not use the damaged accessory. Be careful not to damage the accessories. Route a cable so that it is neither stepped on nor pinched out.

CAUTION ► For a cable with a core at only one end, connect the end with the core to the projector. That may be required by EMI regulations.

NOTE • Do not turn on or off the projector while connected to a device in operation, unless directed in the manual of the device. Otherwise it may cause malfunction in the device or projector.
• The function of some input ports can be selected according to your requirements. Check the reference page indicated beside each port in the following illustration. (14 ~ 23)
• Be careful not to mistakenly connect a connector to a wrong port. Otherwise it may cause malfunction in the device or projector.
  - When connecting a connector to a port, make sure that the shape of the connector fits the port.
  - Tighten the screws to connect a connector equipped with screws to a port.
  - Use the cables with straight plugs, not L-shaped ones, as the input ports of the projector are recessed.

About Plug-and-Play capability

• Plug-and-Play is a system composed of a computer, its operating system and peripheral equipment (such as display devices). This projector is VESA DDC 2B compatible. Plug-and-Play can be used by connecting this projector to a computer that is VESA DDC (display data channel) compatible.
  - Take advantage of this feature by connecting a computer cable to the COMPUTER IN port (DDC 2B compatible). Plug-and-Play may not work properly if any other type of connection is attempted.
  - Use the standard drivers in your computer as this projector is a Plug-and-Play monitor.

(continued on next page)
Connecting with your devices (continued)

LWU755-DS

![Diagram of LWU755-DS connections]

LWU900-DS/LHD878-DS

![Diagram of LWU900-DS/LHD878-DS connections]

(continued on next page)
Before connecting the projector to a computer, consult the computer’s manual and check the compatibility of the signal level, the synchronization methods and the display resolution output to the projector.

- Some signal may need an adapter to input this projector.
- Some computers have multiple screen display modes that may include some signals which are not supported by this projector.
- Although the projector can display signals with a resolution up to 4K (4096x2160), the signal is converted to the projector’s panel resolution before being displayed. The best display performance is achieved if the resolutions of the input signal and the projector panel are identical.

- If you connect this projector and a notebook computer, you must output the display to an external monitor, or output simultaneously to the internal display and an external monitor. Consult the computer's manual for the setting.
- Depending on the input signal, the automatic adjustment function of this projector may take some time and not function correctly.
- A composite sync signal or sync-on-green signal may confuse the automatic adjustment function of this projector (Page 69).
- If the automatic adjustment function does not work correctly, you may not see the dialog to set the display resolution. In such a case, use an external display device. You may see the dialog and set an appropriate display resolution.

- Use DisplayPort cables conforming to the DisplayPort standard.
- Use of DisplayPort cables not conforming to the DisplayPort standard may cause abnormal operations such as images with interruption or not displayed.
- When the projector is connected to the output of the computer with an early type of chipset or graphics card that supports the DisplayPort, the projector and/or computer may not operate normally. In that case, turn off the projector and/or computer, then turn on again.
- When connecting the output of the DisplayPort to the input of the projector, use of the computer with the newest chipset or graphics card is recommended.
- Commercially available DisplayPort cables may have a lock system. When unplugging the cable, push the button on the connector of the cable.
- Some computers may take a long time to display the image.
- Power supply is available to the connected device with the input port of DisplayPort. However, it is not available to the computer.
- When the signal from the device with a signal converting adapter is connected to the input port of DisplayPort, the image may not be displayed.
- Use a commercially available converter when connecting the output port of HDMI of the computer with the input port of DisplayPort of the projector.
Connecting with your devices (continued)

LWU755-DS

LWU900-DS/LHD878-DS

(continued on next page)
Connecting with your devices (continued)

⚠️ **WARNING** ► Heat may build up in the USB wireless adapter, to avoid possible burns disconnect the projector power cord for 10 minutes before touching the adapter.

⚠️ **CAUTION** ► Before connecting the projector to a network system, obtain the consent of the administrator of the network.
► Do not connect the **LAN** port to any network that might have the excessive voltage.
► The designated USB wireless adapter sold as an option is required to use the wireless network function of this projector. Before connecting the USB wireless adapter, turn off the power of the projector and disconnect the power cord. Do not use any extension cable or device when connecting the adapter to the projector.
► To connect both the LAN cable and USB wireless adapter to the projector, use a LAN cable that is flat on the side where the plug’s wire is visible. Otherwise, both of them cannot be connected correctly, or the wire may break (malfunction).

Connecting with your devices (continued)

LWU755-DS

LWU900-DS/LHD878-DS

(continued on next page)
Connecting with your devices (continued)

About HDBaseT™ connection
- HDBaseT is a technology to transmit image, sound, ethernet or serial control signal using a LAN cable.
- Go to the following URL regarding the device of other company that supports HDBaseT and has been confirmed compatible with this projector.
  http://www.christiedigital.com

LAN or HDBaseT input port can be selected as ethernet signal input by switching in the menu.
- Use LAN cables of up to 100m long. Up to 70m long for 4K signal. Exceeding this length, the image and sounds are deteriorated, and even experience malfunction on LAN transmission.

NOTE • The HDMI ports of this model are compatible with HDCP (High-bandwidth Digital Content Protection) and therefore capable of displaying video signals from HDCP compatible DVD players or the like.

- The HDMI ports support the following signals:
  For Video signals, refer to User’s Manual (detailed) Technical.
  Audio signal : Format Linear PCM
  Sampling frequency 48kHz / 44.1kHz / 32kHz
- This projector can be connected with another equipment that has HDMI™ connector, but with some equipment the projector may not work properly, something like no video.
- Qualified cable is required for HDBaseT connection.
- Use an HDMI™ cable that has the HDMI™ logo.
- Use a Category 2-certified HDMI™ cable to input 1080p@50/60 signal to the projector.
- When the projector is connected with a device having DVI connector, use a DVI to HDMI™ cable to connect with the HDMI™ input.
- The HDMI™ cables might come off due to the lack of a mechanical lock on the cables and connectors. Fasten the HDMI cables by using the HDMI cable holder and the Cable tie to prevent them from coming off (24).

(continued on next page)
Connecting with your devices (continued)

NOTE • This projector has HDMI input/output ports and can be connected to multiple devices such as projectors or monitors with HDMI cable.
• The projected image is output when HDMI 1 or HDBaseT is selected.
• The resolution of the signal input to the projector and signal output from the projector may be restricted by the maximum resolution of the connected device such as projector or monitor.
• HDMI output operation in normal standby depends on the setting of the menu (79). It is not output when standby mode is NETWORK-WOL or POWER SAVE.
• When outputting HDMI signal, turn on the output side connected device before inputting image signal to the projector.
• Up to 4 devices can be connected in series for HDMI output port of this projector.
• The number of devices that can be connected varies depending on HDCP version, the restriction of the number of devices for HDCP repetition of source device, and the quality of a cable.
• The projected image from the projector may be interrupted when POWER OFF/ON, input switching, or HDMI cable removal/insertion is executed on the second or subsequent projector or monitor.
• HDMI output may be interrupted when the projector is turned on/off.

Setting up

Connecting with your devices (continued)

**NOTE**

- To use a wired remote control, connect a wired remote control to the **REMOTE CONTROL IN** port. You can also connect another projector to the **REMOTE CONTROL OUT** port to control it from the wired remote control. You can use this projector as a remote control-relay with the **REMOTE CONTROL IN** and **OUT** ports. To connect the wired remote control or another projector to the **REMOTE CONTROL IN** or **OUT** ports, use audio cables with 3.5 mm diameter stereo mini plugs. This function is useful when a wireless remote signal may not reliably reach the projector.
- The signal received in a remote sensor and the remote control signal input from HDBaseT™ are also output from **REMOTE CONTROL OUT**.
- The projector may not be operated correctly if they are operated from multiple remote controls at the same time.

(continued on next page)
Connecting with your devices (continued)

LWU900-DS/LHD878-DS

NOTE  • The 3G-SDI port of this model supports the following SDI signals:
- SD-SDI signal: conforming to SMPTE ST 259-C standard
  YCBCR 4:2:2 10-bit
  480i, 576i
- Single link HD-SDI signal: conforming to SMPTE ST 292 standard
  YPBPR 4:2:2 10-bit
  720p@50/60, 1080i@50/60, 1080sf@25/30
- 3G-SDI Level-A signal: conforming to SMPTE ST 424 standard
  YPBPR 4:2:2 10-bit
  1080p@50/60

- This projector can be connected with other equipment that has SDI connector, but with some equipment the projector may not work properly.
- Use a cable of 5CFB or greater (5CFB, 7CFB, and so on), or Belden 1694A or greater to transmit the image properly. Use a cable with a length of 100m or less.
- Setting by MENU is necessary depending on a connected device.
Fastening the cables

Use the supplied cable tie to fasten the HDMI cable.

⚠️ WARNING  ► Do not fasten the cables other than HDMI.

주의 ! ► Do not fasten the cables other than HDMI.

⚠️ CAUTION  ► To fasten the cable, use a supplied cable tie.
► Do not bind the cables too tightly. The cables or the hole might be damaged.
Attaching the terminal covers

Two types of terminal covers for the ports side of the projector are available. The smaller one is the cover for the left part. The larger one is the cover for the right part.

To attach the terminal cover, insert the two claws of the cover into the hole on the projector and fasten the cover with the hook.

To detach the terminal cover, while pushing lightly the hook in the direction of arrow in the figure, pull it toward you.
Using the security bar and slot

A commercially available anti-theft chain or wire can be attached to the security bar on the projector. Refer to the figure to choose an anti-theft chain or wire. This projector has the security slot for the Kensington lock. For details, see the manual of the security tool.

⚠️ **WARNING**  ► Do not use the security bars and slot to prevent the projector from falling down, as it is not designed for it.

⚠️ **CAUTION**  ► Do not place anti-theft chain or wire near the exhaust vents. It may become too hot.

**NOTE**  • The security bar and slot is not comprehensive theft prevention measures. It is intended to be used as supplemental theft prevention measure.

• The safety bar (4) can be used for the same purpose as the security bar.
Connecting to a power supply

1. Put the connector of the power cord into the AC (AC inlet) of the product.

2. Firmly plug the power cord’s plug into the outlet. In a couple of seconds after the power supply connection, the POWER indicator lights up in steady orange. When the DIRECT POWER ON function activated, the connection of the power supply make the projector turn on. When the AUTO POWER ON function is activated and the projector is receiving an input signal, it is turned on by connecting to the power supply.

3. Use the supplied cable tie (for power cord) to fasten the power cord.

⚠️ WARNING ⚠️
- Do not connect the projector to a power supply while no lens unit is attached to it.
- Use extra caution when connecting the power cord, as incorrect or faulty connections may result in fire and/or electrical shock.
  - Do not touch the power cord with a wet hand.
  - Only use the power cord that came with the projector. If it is damaged, consult your dealer to get a new one. Never modify the power cord.
  - Only plug the power cord into an outlet whose voltage is matched to the power cord. The power outlet should be close to the projector and easily accessible. Remove the power cord for complete separation.
  - Do not distribute the power supply to multiple devices. Doing so may overload the outlet and connectors, loosen the connection, or result in fire, electric shock or other accidents.
  - Do not press the main body of projector on the power cord.
  - Connect the ground terminal for the AC inlet of this unit to the ground terminal of the building using an appropriate power cord (bundled).

NOTICE ⚠️ This projector is also designed for IT power systems with a phase-to-phase voltage of 220 to 240 V.
Remote control

Installing the batteries

Insert the batteries into the remote control before using it. This product does not include batteries for the remote control. Use the appropriate AA carbon-zinc or alkaline batteries (non-rechargeable) in accordance with laws and regulations.

If the remote control starts to malfunction, try to replace the batteries. If you will not use the remote control for a long period, remove the batteries from the remote control and store them in a safe place.

1. Remove the battery cover.
2. Align and insert the two AA batteries according to their plus and minus terminals as indicated in the remote control.
3. Put the battery cover back to the former state.

⚠️ WARNING ❯ Always handle the batteries with care and use them only as directed. Improper use may result in battery explosion, cracking or leakage, which could result in fire, injury and/or pollution of the surrounding environment.
• Be sure to use only the batteries specified. Do not use batteries of different types at the same time. Do not mix a new battery with used one.
• Make sure the plus and minus terminals are correctly aligned when loading a battery.
• Keep a battery away from children and pets.
• Do not recharge, short circuit, solder or disassemble a battery.
• Do not place a battery in a fire or water. Keep batteries in a dark, cool and dry place.
• If you observe battery leakage, wipe out the leakage and then replace a battery.
• If the leakage adheres to your body or clothes, rinse well with water immediately.
• Obey the local laws on disposing the battery.
Using the REMOTE ID function

Use this function to control specific projectors by the remote control assigned the same ID number when you use multiple projectors of the same type at the same time. Assign an ID number to each projector before using the REMOTE ID item in the SERVICE menu of the OPTION menu (99). Press the ID button with the same ID number as assigned to the projector you are going to control. The ID button selected lights for several seconds.

**NOTE** • Each time you press any button (except ID buttons), the ID button of current selected ID number lights.
• To confirm the projector's current ID, press any ID button for three seconds. Its number is shown on each screen regardless of set ID of projector.

Changing the frequency of remote control signal

The accessory remote control has the two choices on signal frequency Mode 1:NORMAL and Mode 2:HIGH. If the remote control does not function properly, attempt to change the signal frequency.
To set the Mode, press the combination of two buttons listed below simultaneously for about three seconds.

1. Set to Mode 1:NORMAL
   - MENU and MY BUTTON-4 buttons
2. Set to Mode 2:HIGH
   - RESET and MY BUTTON-1 buttons

The REMOTE FREQ. in the SERVICE item of the OPTION menu (99) of the projector to be controlled should be set to the same mode as the remote control.
About the remote control signal

The remote control works with the projector’s remote sensor. This projector has two remote sensors on the front and back sides.
The sensors can sense signals within the following range:
   60 degrees (30 degrees to the left and right of the sensor) within about 3 meters.

NOTE • You can deactivate one of the sensors using the REMOTE RECEIV. item in the SERVICE menu of the OPTION menu (99).
• The remote control signal reflected in the screen may be available. If it is difficult to send the signal to the sensor directly, try to make the signal reflect.
• The remote control uses infrared light to send signals to the projector (Class 1 LED). Use the remote control in an area free from obstacles that could block the remote control's signal to the projector.
• The remote control may not work correctly if strong light (such as direct sun light) or light from an extremely close range (such as from an inverter fluorescent lamp) shines on the remote sensor of the projector. Adjust the position of projector avoiding those lights.
### Turning on the power

1. Make sure that the power cord is firmly and correctly connected to the projector and the outlet.

2. Make sure that the POWER indicator is lighted in steady orange (121). Then remove the lens cover.

3. Press STANDBY/ON button on the projector or the ON button on the remote control. The projection light source lights up and the POWER indicator begins blinking in green. When the power is completely on, the indicator stops blinking and light in a steady green (121).

To display the picture, select an input signal according to the section Selecting an input signal (34).

### Turning off the power

1. Press the STANDBY/ON button on the projector or the STANDBY button on the remote control. The message “Power off?” appears on the screen for about five seconds.

2. Press the STANDBY/ON or STANDBY button again while the message appears. The light source goes off, and the POWER indicator begins blinking in orange. The POWER indicator stops blinking and lights in a steady orange when the light source cooling is completed (121).

3. Attach the lens cover, after the POWER indicator turns to steady orange. (continued on next page)
**WARNING**

► A strong light is emitted when the projector's power is on. Do not look into the lens of the projector or look inside of the projector through any of the projector's openings as the projection ray may cause a trouble on your eyes.
► Keep objects away from concentrated projection light beam. Blocking the beam by something causes high temperature and could result in fire or smoke.
► Do not touch around the exhaust vents during use or just after use, as it is too hot.

**NOTE**

- Turn the power on/off in the right order. Power on the projector prior to the connected devices.
- This projector can automatically turn on/off. Refer to the DIRECT POWER ON (88), AUTO POWER ON (88) and AUTO POWER OFF (89) items of the OPTION menu.
Adjusting the volume

Use the VOLUME + / - buttons to adjust the volume. A dialog appears on the screen to help you in adjusting the volume. If you do nothing, the dialog automatically disappears after a few seconds.

NOTE • When \( X \) is selected for current picture input port, the volume adjustment is disabled. See AUDIO SOURCE item of AUDIO menu (\( \text{\#80} \)).
• If the projector is in the standby mode, the volume is adjustable when both of the following conditions are true:
  - An option other than \( X \) is selected for AUDIO OUT in the STANDBY OUTPUT item of the SETUP menu (\( \text{\#79} \)).
  - NORMAL or QUICK START is selected in the STANDBY MODE item of the SETUP menu (\( \text{\#76} \)).

Temporarily turning off the screen and audio

Press AV MUTE button on the remote control. The BLANK screen is displayed instead of the screen of input signals and the sound is muted. Refer to the BLANK item in MENU PREFERENCES about the BLANK screen (\( \text{\#81} \)). To exit from the AV MUTE mode and restore the screen and audio, press AV MUTE button again.

NOTE • The projector automatically exits from the AV MUTE mode when some control buttons are pressed.
• The LIGHT indicator of the projector blinks while a black BLANK screen is displayed.
Selecting an input signal

Press **INPUT** button on the projector. Select a desirable input referring to the displayed input list.

Press **COMPUTER 1, VIDEO, LAN, HDMI 1 / 2, DisplayPort, HDBaseT or SDI** button on the remote control. The port corresponding to each button is selected as below.

<table>
<thead>
<tr>

</table>

**NOTE** • While ON is selected for AUTO SEARCH item in the OPTION menu, the projector keeps checking every port sequentially till an input signal is detected (87).

* LWU900-DS/LHD878-DS only
Selecting an aspect ratio

Press the ASPECT button on the remote control. Each time you press the button, the projector switches the mode for aspect ratio in sequence.

- **For a computer signal**
  
  NORMAL → 4:3 → 16:9 → 16:10 → ZOOM → NATIVE

- **For HDMI™, HDBaseT™, and DisplayPort™ signals**
  
  NORMAL → 4:3 → 16:9 → 16:10 → 14:9 → ZOOM → NATIVE

- **For a video signal or component video signal**
  
  4:3 → 16:9 → 16:10 → 14:9 → ZOOM → NATIVE

- **For an SDI signal (LWU900-DS/LHD878-DS only)**
  
  LWU900-DS : NORMAL → 4:3 → 16:9 → 16:10 → ZOOM → NATIVE

  LHD878-DS : NORMAL → 4:3 → 16:9 → ZOOM → NATIVE

- **For an input signal from the LAN port, or if there is no signal**
  
  LWU900-DS/LWU755-DS: 16:10 (fixed)

  LHD878-DS: 16:9 (fixed)

**NOTE** • The ASPECT button does not work when no proper signal is input.
• NORMAL mode keeps the original aspect ratio setting.
• You cannot select NATIVE when inputting 4K signal.
Operating

Limiting OSD display

To change this function, follow the steps below.
1. Press the **OSD MSG** button on the remote control for 3 seconds.
2. The OSD MESSAGE dialog will be displayed. While this OSD is displayed, press the **OSD MSG** button again on the remote control.
3. Toggle and change the function.
   
   ON ⇔ OFF ⇔ HIDE

![OSD MSG button](image)
Adjusting the projector’s elevator

Increasing or shortening the length of the elevator feet shifts the projection position and the projection angle. Turn the elevator feet each to adjust their length.

⚠️ **WARNING**  ► Do not lengthen the elevator feet exceeding 30 mm. The foot lengthened exceeding the limit may come off and drop the projector down, and result in an injury or damaging the projector.
Adjusting the lens

Adjusting the zoom and focus

The ZOOM or FOCUS dialog appears when you press any of the buttons from ZOOM, ZOOM -, ZOOM +, FOCUS, FOCUS + and FOCUS -.

1. Use the ZOOM + / - buttons on the remote control or ZOOM button and ◄/► cursor buttons on the projector to adjust the screen size.

2. Use the FOCUS + / - buttons on the remote control or FOCUS button and ◄/► cursor buttons on the projector to focus the picture.

NOTE • The projector may ignore the operation by other buttons while the lens is moving.
Operating

Adjusting the lens (continued)

Adjusting the lens position

Press the LENS SHIFT button on the projector or the SHIFT button on the remote control to display the LENS SHIFT menu. Press the ► or ENTER button to select LENS SHIFT, then shift the lens with the ▲/▼/◄/► buttons. Generally, better image quality can be got when the lens is set to the center.

Press the ◄ or ENTER button to go back to menu selection. To exit the LENS SHIFT function, press the LENS SHIFT button while LENS SHIFT menu is displayed, or select EXIT and press the ► or ENTER button.

CENTERING

Select CENTERING in LENS SHIFT menu and press the ► or ENTER button to execute the CENTERING feature which adjusts the lens to the center. A message dialog is displayed for confirmation. Pressing the ► button performs CENTERING. You can also perform CENTERING in the standby mode by pressing the INPUT and LENS SHIFT buttons on the control panel for three seconds at the same time.

⚠️ CAUTION  ► Do not put your fingers or any other things around the lens. The moving lens could catch them in the space around the lens and result in an injury.

NOTE  • While the lens is moving to the center, the menu disappears and an hourglass icon appears on the screen. CENTERING may take some time till the lens reaches the center.
• The projector may ignore operation by buttons while moving the lens.
• The CENTERING feature while the projector is in the standby mode is disabled if the STANDBY MODE item of SETUP menu is set to NETWORK-WOL or POWER SAVE. Perform CENTERING before the projector’s power is turned off, or set the STANDBY MODE to NORMAL or QUICK START.
• The adjustable range of LENS SHIFT varies depending on the lens unit mounted on the projector to maintain picture quality. Therefore, LENS SHIFT adjustment may not reach the end of the indicator in the dialog. This is not a failure.
Operating

Adjusting the lens (continued)

**Lens memory**

This projector is equipped with memory functions for the lens adjustments (LENS SHIFT and LENS TYPE). Up to three sets of adjustments can be stored. To use the lens memory feature, press the LOAD or SAVE button, or select LENS MEMORY in LENS SHIFT menu and press the ► or ENTER button. Then the LENS MEMORY dialog appears. The current lens adjustments are displayed on the “CURRENT” line. The adjustments already stored in the lens memory are displayed on the lines of SAVE and LOAD-1 to 3.

- **SAVE:**
  
  To store the current lens adjustments, select one of the "SAVE" options numbered 1 to 3 (number of the lens memory) and press the ► or ENTER button. Remember that the current data being stored of a memory is lost by saving new data into the memory.

- **LOAD:**
  
  To recall stored adjustments, select one of the "LOAD" options numbered 1 to 3 (number of the lens memory) and press the ► or ENTER button. Remember that the current adjusted condition is lost by loading data. If you want to keep the current adjustment, save it before performing a LOAD function.

- **CLEAR LENS MEMORY:**
  
  To clear the adjustment stored in a lens memory, select CLEAR LENS MEMORY and press the ► or ENTER button. A message dialog is displayed for confirmation. Press the ► button again to clear the lens memory.

**NOTE**  
- The projector may ignore the operation by buttons while moving the lens.
- You can perform the SAVE or LOAD function using LENS MEMORY button.
Correcting the distortion

To correct the distortion of projected screen, you can select one of three options, KEYSTONE, 3D KEYSTONE, and WARPING. First press the GEOMETRY button to display the GEOMETRY CORRECTION menu, and point at one of the items with the ▲/▼ buttons.

KEYSTONE: Adjust the vertical and horizontal keystone.

3D KEYSTONE: Adjust each of the screen corners and sides to correct the distortion.

WARPING: Project an image on several types of screen.

Use Keystone/3D Keystone/Warping for adjustment. When one is selected, other items are not available.

Complete the following procedure for the item you selected.

NOTE • The menu or dialog automatically disappears after several seconds of inactivity. Press the GEOMETRY button again, or point the cursor at EXIT in the dialog and press the ► or ENTER button to end the operation and close the menu or dialog.

KEYSTONE:

When KEYSTONE is pointed at, pressing the ► or ENTER button displays the KEYSTONE dialog.

1. Select the vertical or horizontal keystone (▲ / ▼) with the ▲/▼ buttons.
2. Use the ◄/ ► buttons to adjust the keystone distortion.

NOTE • When the zoom adjustment is set to the TELE (telephoto focus), this function may be excessive. This function should be used when the zoom adjustment is set to the full WIDE (wide-angle focus).
• When the horizontal lens shift is not set to the center, this function may not work correctly.
• Point at RETURN in the dialog with the ▲/▼ buttons and press ◄ or ENTER button to return to the GEOMETRY CORRECTION menu.
Correcting the distortion (continued)

3D KEYSTONE:
When 3D KEYSTONE is pointed at, pressing the ► or ENTER button displays the 3D KEYSTONE dialog.

This projector is equipped with a test pattern for 3D KEYSTONE. Select TEST PATTERNS with the ▲/▼ buttons, then press the ◄/► buttons to switch on and off.

1. Select SETUP with the ▲/▼ buttons and press the ► or ENTER button.
2. Select one of the corners or sides to be adjusted with the ▲/▼/◄/► buttons and press the ENTER or INPUT button.
3. Adjust the selected part as below.

- To adjust a corner, use the ▲/▼/◄/► buttons to adjust the position of the corner.
- To adjust the upper or lower side, use the ▲/▼ buttons to adjust the distortion of the side.
- To adjust the left or right side, use the ◄/► buttons to adjust the distortion of the side.
- To adjust another corner or side, press the ENTER or INPUT button and follow the procedure from step 2.

(continued on next page)
**Correcting the distortion (continued)**

4. This projector is equipped with a memory feature for 3D KEYSTONE adjustment. Up to three sets of adjustments can be stored.

- **LOAD:**
  To recall stored adjustments, select one of the "LOAD" options numbered 1 to 3 (number of the memory) with the ▲/▼ buttons and press the ►, **ENTER** or **INPUT** button.
  The current adjusted condition is lost by loading data. If you want to keep the current adjustment, save it before performing a LOAD function.

- **SAVE:**
  To store the current 3D KEYSTONE adjustment, select one of the "SAVE" options numbered 1 to 3 (number of the memory) with the ▲/▼ buttons and press the ►, **ENTER** or **INPUT** button.
  The current data being stored is lost by saving new data.

**NOTE**
- The LOAD functions whose linked memories have no data are skipped.
- There may be some noise and the screen may flicker for a moment when loading data. This is not malfunction.

- **WARPING:**
  Projection on several types of screen can be performed by WARPING function. This function is operated by using dedicated PC tool, "Warping Tool".
  PC and projector are required to be connected with LAN cable to use this function.
  You can get the PC tool from the following URL.
  http://www.christiedigital.com
  Refer to Application Manual for operations.
Using the EDGE BLENDFING features

1. Mode (Manual/Camera)
   - OFF: Disables the Blending function.
   - Manual: Allows you to adjust Blending Region or Blending Level by using menu.
   - Camera: Allows you to perform automatic adjustment by using Camera in Projector Blending Tool.
   - Keystone/3D Keystone/Warping are not selectable when Camera is selected in Blending.

2. Blending Region
   2.1 Specifying Blending Region
   Select one of the four sides with ▲/▼/◄/► buttons and press ENTER or INPUT button. Blending Region can be specified for left and right sides with ◄/► buttons and for top and bottom sides with ▲/▼ buttons.
   Specify Blending Region for each projector.
   Adjust them referring to the guide displayed during the adjustment of Blending Region.
   * The minimum value of Blending Region is 200 dots.

(continued on next page)
3. Cropping
When inputting the same image to each projector, The cropping function enables two projectors to cut out a part of input image and display one image on a large screen. The following patterns are supported.

2 x 1           1 x 2           2 x 2

3.1 Displaying Cropping Menu
Select CROPPING with ▲/▼ buttons and press ►, ENTER or INPUT button to display Cropping Menu.

3.2 Setting Cropping
Select MODE with ▲/▼ buttons and select ON with ◀/▶ buttons.
The input image is automatically cut out according to the settings of Blending Region.

(continued on next page)
3.3 Adjusting Cropping Area
Adjust the Cropping Area when cutting out a part of input image.
Select SETUP with ▲/▼ buttons and press ►, ENTER or INPUT button.
* MODE is set to [OFF] temporarily and the guide of the Cropping Area is displayed.
Select [LT]/[WH] with ▲/▼ buttons and press the ENTER or INPUT button.
Move the guide display with ▲/▼/◄/► buttons to select the region of the screen to be cut out.
Press the ENTER or INPUT button and then press ◄ button to select SETUP, and MODE switches to ON automatically.

3.4 Adjust Cropping Area of the other projector.
Set the Cropping Area of the other projector with the same value as one projector.
The input image is automatically cut out according to the settings of the Blending Region.
* To keep input image from not being seen while setting up, set BLANK to ON.
4. Selecting Blending Level
   Select the BLENDING LEVEL with ▲/▼ buttons.
   [1-25] can be selected with ◄/► buttons.
   Adjust the brightness of the Blending Region according to the settings.

5. LIGHT OUTPUT
   Adjusts the brightness of the projectors which are using Blending.

6. WHITE BALANCE
   Adjusts the white balance of the whole screen.

   6.1. OFFSET
       Changes the color intensity on the whole tones.

   6.2. GAIN
       Mainly affects color intensity on the brighter tones.

7. BLACK LEVEL
   Adjusts black color level of the projectors which are using Blending.
   Adjusts the adjustment value of R/G/B at the same time when W is selected.
   When each of R/G/B is selected, the adjustment value of R/G/B can be adjusted respectively.

**NOTE** • The positional deviation of the screen may occur after installing the projector over time. Perform the screen adjustment again to correct the positional deviation.
Using the magnify feature

1. Press the **MAGNIFY ON** button on the remote control.
   The picture is magnified, and the **MAGNIFY** dialog appears on the screen. When the **MAGNIFY ON** button is pressed for the first time after the projector is turned on, the picture is zoomed by 1.5 times. On the dialog, triangle marks to show each direction are displayed.

2. The display magnification of the projector switches with every press of the **MAGNIFY ON** button.
   - For **computer signals**, **RGB signals for HDMI™, HDBaseT™ and DisplayPort™**, and **input signals from the LAN port**
     1.5 times → 2 times → 3 times → 4 times → 1 time
     
   - For **video signals**, **Component signals for HDMI™, HDBaseT™ and DisplayPort™**, and **SDI signals**
     1.5 times → 2 times → 1 time

3. While the triangles are displayed on the dialog, use the ▲/▼/◄/► cursor buttons to shift the magnifying area.

4. Press the **MAGNIFY OFF** button on the remote control to exit magnification.

**NOTE**  • The **MAGNIFY** dialog automatically disappears in several seconds with no operation. The dialog appears again if the **MAGNIFY ON** button is pressed when the dialog has automatically disappeared.
• The magnification is automatically disabled when the displaying signal or its display condition is changed.
• While the magnification is active, the keystone distortion condition may vary. It is restored when the magnification is disabled.
• Some horizontal stripes might be visible on the image while magnification is active.
• This function is not available in the following cases:
  - A sync signal in the range not supported is input.
  - There is no input signal.
Temporarily freezing the screen

Press the **FREEZE** button on the remote control. The “FREEZE” indication appears on the screen (however, the indication does not appear when the OFF is selected for the OSD MESSAGE item in the SETUP (78), and the projector goes into the FREEZE mode, which the picture is frozen.

To exit the FREEZE mode and restore the screen to normal, press the **FREEZE** button again.

**NOTE** • The projector automatically exits from the FREEZE mode when some control buttons are pressed.
• If the projector continues projecting a still image for a long time, the LCD panel might possibly be burned in. Do not leave the projector in the FREEZE mode for too long.
• Images might appear degraded when this function is operated, but it is not a malfunction.

Temporarily shading the screen

Press the **SHUTTER** button on the control panel. Light source output is turned off. Refer to "Regarding the indicator lamps" (122) about the indicator when the shutter is closed.

To open the shutter and restore the screen, press the **SHUTTER** button again.

⚠️ **CAUTION** ▶ If you want a blank screen while the light source is lit, use the shutter function above or the AV MUTE function (33). Any other action may cause the damage on the projector.

**NOTE** • The projector turns off automatically when the time set up by the SHUTTER TIMER passes (89).
• When turning off the power by the normal procedure, the shutter opens automatically.
PbyP (Picture by Picture) / PIP (Picture in Picture)

The PbyP / PIP is a function for displaying two different picture signals on a screen that is separated into main and sub areas for each signal.

Press the PbyP button on the remote control. This activates the PbyP mode. Then, press the PbyP button again. The projector goes into PIP mode. The screen which is displayed before the PbyP button was pressed is displayed as the main area. Most of operations are effective for the main area only. To quit the PIP mode, press the PbyP button again.

**NOTE**

- If the LAN port is selected when the PbyP button is pressed, input from other port is displayed on the main area.
- When in the PbyP / PIP mode, use the MENU button on the remote control or ▲/▼ buttons on the control panel to display the OSD menu.
- Some functions that cannot be used when in the PbyP / PIP mode.
- Normally a message is displayed when buttons that cannot be used are pressed (120). However, the messages are not displayed for some unusable buttons.
- The functions on the OSD menu that cannot be used are displayed in gray and cannot be selected.
- When in the PbyP / PIP mode, image quality may deteriorate.

(continued on next page)
PbyP (Picture by Picture) / PIP (Picture in Picture) (continued)

Setting information

The setting information appears for several seconds when the PbyP / PIP function is started. Displays the input information for each area. A frame will be displayed around the main area and an audio mark indicating the audio output is also displayed.

The information can be redisplayed with the ◄/► buttons after it has been erased.

Changing the main area

The position of the main area can be toggled with the ◄/► buttons when the setting information is displayed on the screen. The frame and the audio mark move together with it.

(continued on next page)
Operating

*PbyP (Picture by Picture) / PIP (Picture in Picture) (continued)*

**Changing the picture input signal**
Press any button to select an input port on the remote control or press the **INPUT** button on the control panel. A dialog box to select the input signal for the main area is displayed. Choose a signal using the ▲/▼ buttons. To change the signal in the sub area, switch temporarily across to the main area with the ◄/► buttons.

Displaying the same signal on both areas is not allowed. Refer to the table for details on available input signal combinations. Any combinations marked with "X" cannot be selected.

**PbyP (Picture by Picture) / PIP (Picture in Picture) (continued)**

○ **PbyP / PIP SWAP function**

Press the **MY BUTTON** assigned the PbyP / PIP SWAP (.rev.90). The position of the area is exchanged without any setting change.

![Diagram of PbyP mode and PIP mode with SWAP function](image)

**NOTE**
- For some signals, it may not be displayed correctly in the PbyP / PIP mode, even if it can be displayed properly in the normal mode.
- PbyP/PIP is unavailable when other than OFF is selected in GEOMETRY CORRECTION > EDGE BLENDING > MODE.

○ **Changing the size of main area in PbyP mode**

Using ▲/▼ buttons on the remote control changes the size of main area in PbyP mode.

![Diagram of changing main area size](image)

○ **Changing the position of sub area in PIP mode**

1. Select PIP POSITION in INPUT MENU (rev.71).
2. Using ▲/▼ buttons on the remote control changes the position of sub area in PIP mode.

![Diagram of changing sub area position](image)
Using the menu function

This projector has the following menus: IMAGE SETTINGS, SIZE AND POSITION, INPUT, SETUP, AUDIO, MENU PREFERENCES, OPTION, NETWORK, SECURITY and EASY MENU. EASY MENU consists of functions often used, and the other menus are classified into each purpose and brought together as the ADVANCED MENU. Each menu is operated using the same methods. While the projector is displaying any menu, the MENU button on the projector works as the cursor buttons. The basic operations of these menus are as follows.

1. To start the MENU, press the MENU button. The MENU you last used (EASY or ADVANCED) appears. EASY MENU has priority to appear just after powered on.

2. In the EASY MENU
   (1) Use the ▲/▼ cursor buttons to select an item to operate. To change it to the ADVANCED MENU, select the ADVANCED MENU.
   (2) Use the ◄/► cursor buttons to operate the item.

In the ADVANCED MENU
   (1) Use the ▲/▼ cursor buttons to select a menu. To change it to the EASY MENU, select the EASY MENU.
   The items in the menu appear on the right side.
   (2) Press the ► cursor button or ENTER button to move the cursor to the right side. Then use the ▲/▼ cursor buttons to select an item to operate and press the ► cursor button or ENTER button to progress. The operation menu or dialog of the selected item appears.
   (3) Use the buttons as instructed in the OSD to operate the item.

(continued on next page)
Using the menu function (continued)

3. To close the MENU, press the MENU button again or select EXIT and press the ◄ cursor button or ENTER button. If you do not do anything, the dialog automatically disappears after about 30 seconds.

NOTE • Some functions cannot be performed when a certain input port is selected, or when a certain input signal is displayed.
• To reset the operation, press RESET button on the remote control during the operation. Note that some items (such as LANGUAGE, VOLUME) cannot be reset.
• In the ADVANCED MENU, when you want to return to the previous display, press the ◄ cursor button on the remote control.

Indication in OSD (On Screen Display)

The meanings of the general words on the OSD are as follows.

<table>
<thead>
<tr>
<th>Indication</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>EXIT</td>
<td>Closes the OSD menu. It is the same as pressing the MENU button.</td>
</tr>
<tr>
<td>RETURN</td>
<td>Returns the menu to the previous menu.</td>
</tr>
<tr>
<td>CANCEL or NO</td>
<td>Cancels the operation in the present menu and returns to the previous menu.</td>
</tr>
<tr>
<td>OK or YES</td>
<td>Executes the prepared function or shifts the menu to the next menu.</td>
</tr>
</tbody>
</table>
# Using the menu function (continued)

| PICTURE MODE   | Using the ◄/► buttons switches the picture mode. The picture modes are combinations of GAMMA and COLOR TEMP settings. Choose a suitable mode according to the projected source.  

• Lines or other noise might appear on the screen when this function is operated, but it is not a malfunction.  

• DICOM SIM. is the projector’s DICOM® ("Digital Imaging and Communication in Medicine") simulation mode. This mode simulates the DICOM standard, which is a standard applicable to digital communications in medicine, and can be useful for displaying medical images, such as X-rays photos. This projector is not a medical device and is not compliant to the DICOM standard, and neither the projector nor the DICOM SIM. mode should be used for medical diagnosis.

### SIZE AND POSITION menu

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| **H PHASE** | Using the ◄/► buttons adjusts the horizontal phase to eliminate flicker.  
Right ⇔ Left  
• This item can be selected only for a computer signal or a component video signal. This function is unavailable for a signal from the LAN, HDMI 1 / 2, HDBaseT, DisplayPort, or 3G-SDI port. |
| **H SIZE**  | Using the ◄/► buttons adjusts the horizontal size.  
Small ⇔ Large  
• This item can be selected only for a computer signal. This function is unavailable for a signal from the LAN, VIDEO, HDMI 1 / 2, HDBaseT, DisplayPort, or 3G-SDI port.  
• When this adjustment is excessive, the picture may not be displayed correctly. If this occurs, reset the adjustment by pressing the RESET button on the remote control during this operation.  
• Images might appear degraded when this function is operated, but it is not a malfunction. |
| **AUTO IMAGE** | Selecting this item performs the automatic adjustment feature.  
**For a computer signal**  
The vertical position, the horizontal position and the horizontal phase are automatically adjusted.  
Make sure that the application window is set to its maximum size prior to attempting to use this feature. A dark picture may still be incorrectly adjusted. Use a bright picture when adjusting.  
**For a video signal**  
The video format best suited for the respective input signal is selected automatically. This function is available only when the AUTO is selected for the VIDEO FORMAT item in the INPUT menu (67). The vertical position and horizontal position are automatically set to the default.  
• The automatic adjustment operation requires approx. 10 seconds. Note that it may not function correctly with some input.  
• When this function is performed for a video signal, an extra line may appear outside a picture.  
• When this function is performed for a computer signal, a black frame may be displayed on the edge of the screen, depending on the computer model.  
• The items adjusted by this function may vary when the FINE or DISABLE is selected for the AUTO IMAGE ADJUST item of the SERVICE item in the OPTION menu (95). |
## INPUT menu

Select an item from the Input menu using the ▲/▼ cursor buttons, and press the ► cursor button or ENTER button to execute the item. Then perform it according to the following table.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| PROGRESSIVE   | Using the ▲/▼ buttons switches the progress mode.  
TV ⇔ FILM ⇔ OFF  
• This function works only for a video signal, component video signal (of 480i@60 or 576i@50 or 1080i@50/60), an HDMI™ signal (of 480i@60 or 576i@50 or 1080i@50/60) and HDBaseT™ signal (of 480i@60 or 576i@50 or 1080i@50/60).  
• When TV or FILM is selected, the screen image is sharp. FILM adapts to the 2-3 Pull-Down conversion system. But these may cause a certain defect (for example, jagged line) of the picture for a quick moving object. If this occurs, select OFF, even if the screen image loses sharpness. |
| VIDEO NR      | Using the ▲/▼ buttons switches the noise reduction mode.  
HIGH ⇔ MID ⇔ LOW  
• This function works only for a video signal, component video signal (of 480i@60 or 576i@50 or 1080i@50/60), an HDMI™ signal (of 480i@60 or 576i@50 or 1080i@50/60) and HDBaseT™ signal (of 480i@60 or 576i@50 or 1080i@50/60). |
| COLOR SPACE   | Using the ▲/▼ buttons switches the mode for color space.  
• This item can be selected only for a computer signal (except for signals from the LAN port) and component video signal (except for signals from the 3G-SDI port).  
• The AUTO mode automatically selects the optimum mode.  
• The AUTO operation may not work correctly at some signals. If this occurs, select a suitable mode except AUTO. |

</thead>
</table>
| **LIGHT & FILTER** (continued) | **FILTER HOURS** Displays the usage time of the air filter, counted after the last resetting. Pressing the **RESET** button on the remote control or the ► button of the projector displays a dialog. To reset the filter hours, select the OK using the ► button.  
  
  CANCEL ⇒ OK  
  
  • Reset the filter hours only when you have cleaned or replaced the air filter, for a suitable indication about the air filter.  
  • For the air filter cleaning, see the section **Cleaning and replacing the air filter** ([113](#)). |
| FILTER MESSAGE | Use the ▲/▼ button to set the timer for notifying by the message when to replace the filter unit. After choosing an item except OFF, the message “REMINDER *** HRS PASSED ....” appears after the timer reaches the interval time set by this feature. When the OFF is chosen, the message does not appear. Use this feature to keep the air filter clean, setting the suitable time according to your environment of this projector.  
  
  • Clean the filter periodically. If the air filter becomes to be blocked by dust or other matter, the internal temperature rises, which could cause malfunction, or reduce the lifetime of the projector.  
  • Be careful with the operating environment of the projector and the condition of the filter unit. |

</tr>
</tbody>
</table>

(continued on next page)
**Wake-On LAN (WOL) function**

If you select NETWORK-WOL in SETUP menu > STANDBY MODE, you can use the Wake-On LAN(WOL) function of wired network while saving power consumption in standby state.

**Operation**

Various communication functions can be used after the projector goes into NORMAL standby mode by receiving WOL Magic packet in standby state. However, the projector automatically goes back to NETWORK-WOL standby mode with less power consumption if 10 minutes have passed after the projector goes into NORMAL standby mode by WOL Magic packet. It takes about 1 minute on a wired network or about 2 minutes on a wireless network until communication functions are available after WOL Magic packet has been received.

**WOL Magic packet**

<td>A packet using MAC address of wired LAN of the projector (FF:FF:FF:FF:FF:FF(6 bytes)) followed by 102-byte data with MAC Address(6 bytes) repeated 16 times</td>
</tr>
</tbody>
</table>

**NOTICE**

Supported WOL Magic packet is a packet to be sent to broadcast address. General routers may not forward a packet of broadcast address to a device with a different network address by default. If you use a router like this, WOL function cannot be used for the projector that is not in the same network address. Consult with your network administrator about router settings. This function is available only in wired network and is not supported in wireless network.

<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| LANGUAGE      | Using the ▲/▼/◄/► buttons switches the OSD (On Screen Display) language. ENGLISH ⇔ FRANÇAIS ⇔ DEUTSCH ⇔ ESPAÑOL ⇔ …… (shown in the LANGUAGE dialog) …… ⇒

Press the ENTER or INPUT button to save the language setting. |
| MENU POSITION | Using the ▲/▼/◄/► buttons adjusts the menu position. To quit the operation, press the MENU button on the remote control or do not perform any operation for about 10 seconds. |
| BLANK         | Using the ▲/▼ buttons switches the mode for the blank screen. The blank screen is a screen for the temporarily blanking feature (33). It is displayed by pressing the AV MUTE button on the remote control.

My Screen ⇔ ORIGINAL ⇔ BLUE ⇔ WHITE ⇔ BLACK

My Screen : Screen can be registered by the My Screen item (83).
ORIGINAL : Screen preset as the standard screen.
BLUE, WHITE, BLACK : Plain screens in each color.
• To avoid remaining as an afterimage, the My Screen or ORIGINAL screen changes to the AUTO BLANK screen after several minutes. |

**NOTE** • The LIGHT indicator of the projector blinks while a black BLANK screen is displayed.

(continued on next page)
## AUTO BLANK

Using the ▲/▼ buttons switches the mode for the AUTO BLANK screen.

- BLUE ⇔ WHITE ⇔ BLACK

- To avoid remaining as an afterimage, displayed image changes to the designated blank color screen by AUTO BLANK after several minutes at the following conditions.
  - When My Screen or ORIGINAL is displayed as BLANK screen.
  - When start-up screen is displayed.

## START UP

Using the ▲/▼ buttons switches the mode for the start-up screen. The start-up screen is a screen displayed when no signal or an unsuitable signal is detected.

- My Screen ⇔ ORIGINAL ⇔ OFF

- **My Screen** : Screen can be registered by the My Screen item (83).
- **ORIGINAL** : Screen preset as the standard screen.
- **OFF** : Plain black screen.

- To avoid the image burning into the screen, the START UP screen changes to the AUTO BLANK screen after several minutes.
- When the ON is selected to the My Screen PASSWORD item in the SECURITY menu (107), the START UP is fixed to My Screen.

### CLOSED CAPTION C.C.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Closed Caption C.C.</td>
<td>The Closed Caption C.C. is the function that displays a transcript or dialog of the audio portion of a video, files or other presentation or other relevant sounds. It must have NTSC format video or 480i@60 format component video source supporting Closed Caption C.C. feature to utilize this function. It may not work properly, depending on equipment or signal source. In this case, turn off the Closed Caption.</td>
</tr>
</tbody>
</table>

#### DISPLAY

Select Closed Caption DISPLAY setting from following options using ▲/▼ buttons.

- **AUTO**: Closed Caption automatically appears when the input signal (Closed Caption C.C. compatible) from the port with the mute icon set at AUDIO SOURCE is selected.
- **ON**: Closed Caption is on.
- **OFF**: Closed Caption is off.

- The caption is not displayed when the OSD menu is active.
- The Closed Caption is the function to display the dialogue, narration, and / or sound effects of a television program or other video sources. The Closed Caption availability depends upon broadcaster and/or content.

#### MODE

Select Closed Caption MODE setting from following options using ▲/▼ buttons.

- **CAPTIONS**: Display Closed Caption.
- **TEXT**: Display Text data, which is for additional information such as news reports or a TV program guide. The information covers the entire screen. Not all of the Closed Caption C.C. program has Text information.

#### CHANNEL

Select Closed Caption CHANNEL from following options using ▲/▼ buttons.

1. **1**: Channel 1, primary channel / language
2. **2**: Channel 2
3. **3**: Channel 3
4. **4**: Channel 4

The channel data may vary, depending on the content. Some channel might be used for secondary language or empty.
### OPTION menu

| KEY LOCK | (1) Use the ▲/▼ buttons to choose the operations control.  
CONTROL PANEL ➔ REMOTE CONTROL  
(2) Use the ◄/► buttons to select  
ALL, ON or OFF.  
ALL ➔ ON ➔ OFF |

If you select ALL, all key functions are disabled. Selecting ON in Step 2 locks the buttons except STANDBY/ON on the operations control selected in Step 1. Selecting OFF releases the locked buttons on the operations control selected in Step 1.

- Use this function to prevent tampering or accidental operation.
- It's not possible to disable both options at the same time.
- If you select ALL, the screen for setting a PIN code appears. Set it as follows.

#### 1. Setting a PIN code

1) When using the ◄/► button to select ALL, a confirmation message appears.
2) Press the ► button to display the Enter Key Lock PIN Code box.
3) Input a 4 part PIN code using the ▲/▼/◄/ ►, INPUT, or ❌ button. The Key Lock PIN Code again box will appear.

Reenter the same PIN code. This will complete the PIN code registration.

If there is no key input for about 55 seconds while the Enter Key Lock PIN Code box or the Key Lock PIN Code again box is displayed, the menu will close.

- Write down the PIN code so as not to forget it.

| INFORMATION | Selecting this item displays a dialog titled “INPUT INFORMATION”. It shows the information about the current input.  
  - The “FRAME LOCK” message on the dialog means the frame lock function is working.  
  - This item cannot be selected for no signal and sync out.  
  - When the MY TEXT DISPLAY is set to ON, the MY TEXT is displayed together with the input information in the INPUT INFORMATION box (111). |
| FACTORY RESET | Selecting OK using the ► button performs this function. By this function, all menu items are collectively returned to the initial setting. Note that the items LIGHT SOURCE HOURS, FILTER HOURS, LANGUAGE, AUTO BLANK, FILTER MESSAGE, STANDBY MODE, COMMUNICATION, SCHEDULE, CONTROL TERMINAL, REMOTE CONTROL OUT, NETWORK and SECURITY settings are not reset.  
  CANCEL ⇒ OK |
See the Network Guide for details of NETWORK operation. Remember that incorrect network settings on this projector may cause trouble on the network. Consult with your network administrator before connecting to an existing access point on your network.
SECURITY menu

This projector is equipped with security functions. From the SECURITY menu, items shown in the table below can be performed.
To use SECURITY menu: User registration is required before using the security functions.

Enter to the SECURITY menu
1. Press the ► button. The ENTER PASSWORD box is displayed.
2. Use the ▲/▼/◄/► buttons to enter the registered password. The factory default password is as follows.
LWU900-DS/LWU755-DS : 7619    LHD878-DS : 6019
This password can be changed (below). Move the cursor to the right side of the ENTER PASSWORD box and press the ► button to display the SECURITY menu.
• It is strongly recommended the factory default password to be changed as soon as possible.
• If an incorrect password is input, the ENTER PASSWORD box is displayed again. If incorrect password is input three times, the projector turns off. Afterwards the projector then turns off every time an incorrect password is input.
3. Items shown in the table below can be performed.

If you have forgotten your password
(1) While the ENTER PASSWORD box is displayed, press and hold the RESET button on the remote control for approximately three seconds or press and hold the INPUT button for three seconds while pressing the ► button on the projector.
(2) The 10 digit Inquiring Code is displayed. Contact your dealer with the 10 digit Inquiring Code. Your password is sent after your user registration information is confirmed.
• If there is no key input for approximately 55 seconds while the Inquiring Code is displayed, the menu closes. If necessary, repeat the process from (1).

Cleaning and replacing the air filter

Check and clean the air filter periodically. When the indicators or a message prompts you to clean the air filter, comply with it as soon as possible.

1. Turn the projector off, and unplug the power cord. Allow the projector to sufficiently cool down.

2. Use a vacuum cleaner on and around the filter cover.

3. Pick and pull up the filter cover knobs to take it off.

4. Press up slightly the bottom side knobs to unlock the bottom side of the air filter, and take it off.

5. The air filter consists of two parts. Press down around the interlocking parts to unlock, then separate the two parts.

   Use a vacuum cleaner for both sides of the air filter.

   If the air filter is damaged or heavily soiled, replace it with the new one. Request for an air filter with the following type number from your dealer when purchasing a new one.

   Type number: 003-006607-01

6. Use a vacuum cleaner for the filter vent of the projector.

7. Put back the air filter and filter cover into their place.

8. Turn the projector on and reset the filter hours using the FILTER HOURS item in the EASY MENU.

   (1) Press the MENU button to display a menu.

   (2) Point at the FILTER HOURS using the ▲/▼ buttons, then press the ► button. A dialog will appear.

   (3) Press the ► button to select “OK” on the dialog.

   It performs resetting the filter hours.

(continued on next page)
Cleaning and replacing the air filter  (continued)

**WARNING**  ► Before taking care of the air filter, make sure the power cord is not plugged in, then allow the projector to cool sufficiently.
► Use only the air filter of the specified type. Do not use the projector without the air filter or the filter cover. It could result in a fire or malfunction to the projector.
► Clean the air filter periodically. If the air filter becomes clogged by dust or the like, internal temperatures rise and could cause a fire, a burn or malfunction to the projector.

**NOTE**  • Replace the air filter when it is damaged or heavily soiled.
• Reset the filter hours only when you have cleaned or replaced the air filter, for a suitable indication about the air filter.
• The projector may display the message such as the “CHECK THE AIR FLOW” or turn off the projector, to prevent the internal heat level rising.
Inserting or replacing the internal clock battery

This product has an internal clock. The battery for the internal clock is not contained at the time of factory shipment. When you use the function that requires the internal clock (in "Event Scheduling" in the Network Guide), install a new battery according to the following procedure.

Use the following type of battery.

MAXELL, Part No. CR2032 or CR2032H

1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.

2. Turn the battery cover fully counterclockwise using a coin or the like, and pick the cover up to remove it.

3. Pry up the old battery using a flathead screwdriver or the like to take it out. Do not use any metal tools. While prying it up, put a finger lightly on the battery since it may pop out of the holder.

4. Insert the new battery or replace the battery with a new one. Slide the battery in under the plastic claw, and push it into the holder until it clicks.

5. Place the battery cover in place, then turn it clockwise using such as coins to fix.

**WARNING** Always handle the batteries with care and use them only as directed. Battery may explode if mistreated. Do not recharge, disassemble or dispose of in fire.

Improper use may result in cracking or leakage, which could result in fire, injury and/or pollution of the surrounding environment.

- Be sure to use only the batteries specified.
- Make sure the plus and minus terminals are correctly aligned when loading a battery.
- Keep a battery away from children and pets. If swallowed consult a physician immediately for emergency treatment.
- Do not short circuit or solder a battery.
- Do not allow a battery in a fire or water. Keep batteries in a dark, cool and dry place.
- If you observe battery leakage, wipe out the leakage and then replace a battery. If the leakage adheres to your body or clothes, rinse well with water immediately.
- Obey the local laws on disposing a battery.

**NOTE** The internal battery is required to be replaced when the time is off soon after setting date and time.
Maintenance

Other care

Inside of the projector
To ensure the safe use of your projector, have it cleaned and inspected by your dealer every year.

Caring for the lens
If the lens is flawed, soiled or fogged, it could cause deterioration of display quality. Take care of the lens, being cautious of handling.

1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.

2. After making sure that the projector is cool adequately, lightly wipe the lens with a commercially available lens-cleaning wipe. Do not touch the lens directly with your hand.
   • Use commercially available lens tissue to clean the lens (used to clean cameras, eyeglasses, etc.).
   • If the lens is heavily soiled, wipe it with a cloth moistened with little water.
   • Never use polishing agents, detergents, chemicals, or solvents such as benzine or thinner.
   • Excepting for lens, use a soft cloth to clean. When excessively soiled, dilute a neutral detergent in water, wet and wring out the soft cloth.
Caring for the cabinet and remote control

Incorrect care could have adverse influence such as discoloration, peeling paint, etc.

1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.

2. After making sure that the projector is cool adequately, lightly wipe with gauze or a soft cloth.
   If the projector is extremely dirty, dip a soft cloth in water or a neutral cleaner diluted in water, and wipe lightly after wringing well. Then, wipe lightly with a soft, dry cloth.

⚠️ WARNING ⚠️ ◀️ Make sure the power cord is not plugged in, and allow the projector to cool sufficiently. The high temperature state of the projector could cause a burn and/or malfunction to the projector.
   ◀️ Do not clean or service the inside of the projector. Doing is so dangerous.
   ◀️ Avoid wetting the projector or inserting liquids in the projector. It could result in a fire, an electric shock, and/or malfunction to the projector.
   • Do not put anything containing water, cleaners or chemicals near the projector.
   • Do not use aerosols or sprays.

⚠️ CAUTION ⚠️ ◀️ Incorrect care of the projector could cause not only an injury but adverse influence such as discoloration, peeling paint, etc.
   ◀️ Do not use cleaners or chemicals other than those specified in this manual.
   ◀️ Do not polish or wipe with hard objects.

NOTICE ◀️ Do not directly touch the lens surface with hands.
Troubleshooting

If an abnormal operation should occur, stop using the projector immediately.

⚠️ WARNING ⚠️ Never use the projector if abnormal operations such as smoke, strange odor, excessive sound, damaged casing or elements or cables, penetration of liquids or foreign matter, and so on should occur. In such cases, immediately disconnect the power plug from the power outlet. After making sure that the smoke or odor has stopped, contact to your dealer or service company.

If a problem occurs with the projector, the following checks and measures are recommended before requesting repair.
If this does not resolve the problem, contact your dealer or service company. They tell you what warranty condition is applied.

| LAN does not work, if LAN is connected to the projector while having an input signal from HDBaseT. | **Check if the LAN setting is HDBaseT.**  
EASY MENU > ADVANCED MENU > OPTION>SERVICE>CONTROL TERMINAL > WIRED NETWORK  
This projector is compatible with 100BASE-T only.  
Check the specification of the connected equipments.  
If the LAN cable is connected with the hub, try to change the connected port at the hub  
If the LAN cable is connected directly to the computer, try to connect to other computer | – |
| No image is displayed via HDBaseT.                                  | Check the LAN cable if it is CAT5e certified or higher.  
Try to change the LAN cable.  
If the LAN cable is connected with more than three extension connector, the transmission of 100 meters may fail.  
**Check if the extension connector is compatible with CAT5e.**  
All LAN cable and extension connector connected with HDBaseT port must be CAT5e certified. | – |
| No image is displayed via 3G-SDI. (LWU900-DS/ LHD878-DS only).     | Check if it is connected with a cable of 5CFB or greater, or Belden 1694A or greater.  
Check if a cable with a length of 100m or less is used.  
Try to change the cable.  
Check if a supported signal format is input. | – |

</thead>
</table>
| When the projector is connected to the network, it powers off and on as described below. | Disconnect the LAN cable and check that the projector is working properly.  
If this issue occurs after connecting to the network, there may be a loop between two Ethernet switching hubs within the network.  
- Two or more Ethernet switching hubs are in a network.  
- Two of the hubs are doubly connected by LAN cables.  
- This double connection forms a loop between the two hubs.  
Such a loop may have an adverse effect on the projector as well as the other network devices.  
Check the network connection and remove the loop by disconnecting the LAN cables such that there is only one connecting cable between two hubs. | -                                                            |

**NOTE** • Although bright spots or dark spots may appear on the screen, this is a unique characteristic of liquid crystal displays, and it does not constitute or imply a machine defect.
Specifications

See the Specifications in the Setup Guide which is a book.

End User License Agreement for the Product Software

• Software in the projector consists of the plural number of independent software modules and there exist our copyright or/and third party copyrights for each of such software modules.
• Read “End User License Agreement for the Product Software” which is separated document.
