Care and Cleaning Of Projection Screen Surfaces

Keep your screen rolled up in its protective case when not in use.

Use compressed air to remove adhering particles.

The screen surface can be cleaned with water or a mild soap and water solution.

Small marks can be removed with a cleaning pad such as Magic Eraser.

Always use a soft, clean, lint free rag or sponge.

Do not scrub the screen or use petroleum based solvents.

Use a blotting action rather than a wiping action to avoid damaging the surface.
