STAGESCREEN

DRAPER®

The name says it all. The StageScreen is a great product for portable or fixed applications. The StageScrfeen uses modular frame pieces that are color coded for fast simple assembly. Leave it up permanently or use as a portable screen with legs, the frame pieces are interchangeable wither way. The viewing surface attaches quickly with DuraLoop™ bungees for even, self-centering tension. The front border has a black finish to cover frame, allowing for use in front or rear projection applications and given the screen a clean look. No hinges and no snaps makes assembly easier, faster and stronger than any large screen you have seen before.

Screen Type

Modular, large portable or fixed projection screen

Viewing Surfaces

- **OptiFlex Family** (tensioned front screen surfaces): Matt White XT1000VB, Pure White XT1300V, Pearl White MH1500V, Grey XH600V, ReAct MS1000V
