1000 Eaton Boulevard Cleveland, OH 44122 United States

DisplayPort over Cat6 Receiver with Repeater, 4K, 4:4:4, Transceiver, PoC, HDCP 2.2, 230 ft. (70.1 m), TAA

MODEL NUMBER: B127A-110-BD

Works with Tripp Lite's DisplayPort extender kit to extend 4K video an extra 230 ft. between source and display via Cat6 cable.

Features

DisplayPort 1.2a Extender Transceiver Ideal for Digital Signage in Schools and Restaurants

This 4K transceiver is recommended for video presentations in conference rooms, schools, trade shows, meeting facilities, houses of worship, retail settings, hotels and other digital signage applications where the source and display are farther apart than conventional A/V cables allow.

Combines with DisplayPort Extender Kit to Add More Distance

The B127A-110-BD works with B127A-111-BDTD extender kit (sold separately) to further extend a 4K audio/video signal up to 230 feet (70.1 meters) with no latency. It connects between the transmitter and receiver from the extender kit with user-supplied Cat6 cabling.

Transmits Crystal-Clear 4K Video with Multi-Channel Audio and 4:4:4 Color

The B127A-110-BD supports Ultra HD resolutions up to 3840 x 2160 (4K x 2K) at 30 Hz with 7.1-channel surround sound audio through its TOSLINK port. HDCP 2.2 compliance allows you to stream 4K Amazon and Netflix content with no complications. This receiver also supports 4:4:4 chroma subsampling for top-level PC gaming or using your HDTV as a PC monitor. Built-in equalization allows you to fine-tune the image quality at the remote display.

Create a Daisy Chain to Achieve More Distance

This transceiver combines with the B127A-111-BDTD extender kit (sold separately) and additional B127A-110-BD transceivers to form daisy-chain installations up to 920 feet (280.4 meters) from the transmitter. Up to four total transceivers can be chained together, each capable of extending a 4K signal up to 230 feet per unit. In addition to the extender kit, this transceiver is also compatible with B127A-1A1-BDBD and can be used to replace any receivers in the installation as well.

Add a Signal Booster to Achieve, Yes, Even More Distance

The receiver is also compatible with B127A-010-H signal booster (sold separately), which allows the signal to be boosted up to 400 feet (121.9 meters) total between the transmitter and transceiver. When used in a daisy-chain installation, this brings the total extension distance up to 1,090 ft. (332.2 meters). **Note:** B127A-010-H will only work when used in the first link of the daisy-chain installation.

Highlights

- Combines with B127A-111-BDTD to extend 4K signals up to 230 ft.
- Supports UHD resolutions up to 4K @ 30 Hz (4:4:4) for crystalclear video
- Can be daisy-chained up to 4 times (920 ft. total) via additional B127A-110-BD transceivers
- Power over Cable (PoC) technology provides power to the transceiver via Cat6 cable
- Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases

Applications

- Extend video signals from one room to another using Cat6 cable, which can pass through conduit to meet building codes
- Gain flexibility in where the receiver is placed, with the freedom to move and relocate it away from an AC outlet
- Improve the line of sight for digital signage in a hotel, restaurant, theater, house of worship, trade show or other location

System Requirements

- Source device with DisplayPort output (computer, laptop, media server)
- Display device with DisplayPort input (HDTV, projector, monitor)
- B127A-111-BDTD DisplayPort over Cat6 Extender Kit

Package Includes

- B127A-110-BD DisplayPort over Cat6 Receiver
- External power supply (Input: 100–240V, 50/60 Hz, 0.6A; Output: 24V 1A)
- (4) International plug adapters (North America, Europe, U.K. and Australia)
- Mounting hardware
- Owner's manual

Built-In PoC Technology Provides Receiver Power to Avoid Bulky External Power Bricks

Power over Cable (PoC) technology powers the B127A-110-BD over Cat6 cable. LEDs indicate when the system is receiving power and a signal is being transmitted. PoC lets you avoid the hassle of a bulky power brick and gives you the freedom to place the transceiver where needed without worrying about finding a nearby AC outlet. Power is also equally distributed to any additional receivers within a daisy-chain installation.

Plug-and-Play Operation for Quick Setup and Immediate Use

The transceiver works right out of the box with no software required. Mounting hardware is included for installing it on a wall, pole or 19-inch rack. Connect the transceiver to a transmitter and any additional transceivers with user-supplied Cat6 cable (such as N202-Series). Connect to a 4K display with a user-supplied DisplayPort cable (such as P580-Series).

TAA-Compliant for GSA Schedule Purchases

The B127A-110-BD is compliant with the Federal Trade Agreements Act (TAA), which makes it eligible for GSA (General Services Administration) Schedule and other federal procurement contracts.

AUDIO	single B127A-110-BD unit can be connected to a transmitter unit to reach 230 ft. When daisy-chaining multiple 127A-110-BD's (up to 4 total) each link in the chain reaches 230 ft., for a maximum distance of 920 ft. When using B127A-010-H signal booster between the first transmitter and first B127A-110-BD in the chain in a four-link daisy- ain installation the total distance can be 1070 ft.
