DisplayPort over Cat6 Extender Kit, Transmitter and Receiver with Repeater, 4K, 4:4:4, PoC, 230 ft. (70.1 m), TAA

MODEL NUMBER: B127A-111-BDTD

DisplayPort extender kit with transmitter and transceiver extends a 4K signal via Cat6 cable to a DisplayPort monitor up to 230 ft. away.

Features

DisplayPort 1.2a Extender Kit Ideal for Digital Signage in Schools and Offices

This complete transmitter and transceiver system is recommended for video presentations in conference rooms, schools, trade shows, meeting facilities, houses of worship, retail settings, hotels and other digital signage applications where the source and display are farther apart than conventional A/V cables allow. The B127A-111-BDTD extends 4K signals from a DisplayPort source device to a DisplayPort monitor up to 230 feet (70.1 meters) away with zero latency via user-supplied Cat6 cabling.

Transmits Crystal-Clear 4K Video with 4:4:4 Color

The B127A-111-BDTD supports Ultra HD resolutions up to 3840 x 2160 (4K x 2K) at 30 Hz with 7.1channel surround sound via the transceiver's TOSLINK audio output. HDCP 2.2 compliance allows you to stream 4K Amazon and Netflix content with no complications. This extender kit also supports 4:4:4 chroma subsampling for top-level PC gaming or using your HDTV as a PC monitor. Built-in equalization allows you to fine-tune the image quality at the remote display.

Local HDMI Port on Transmitter Supports 4K @ 30 Hz Resolution

To monitor the video signal being extended to the transceiver, connect a 4K display to the transmitter's local HDMI port with a user-supplied HDMI cable.

Built-In PoC Technology Provides Transceiver Power to Avoid Bulky External Power Bricks

Power over Cable (PoC) technology powers either the transmitter or transceiver over Cat6 cable. Connect the included power supply at either end to power the entire installation. LEDs on both the transmitter and transceiver will light up to indicate the system is receiving power and a signal is being transmitted. PoC lets you avoid the hassle of a bulky power brick and gives you the freedom to place the transceiver where needed without worrying about finding a nearby AC outlet.

Create a Daisy Chain to Achieve Even More Distance

This extender kit is capable of forming daisy-chain installations up to 920 feet (280.4 meters) from the transmitter by connecting additional B127A-110-BD transceivers (sold separately). Up to four total transceivers can be chained together, each capable of extending a 4K/30 Hz signal up to 230 feet per unit. The kit is also compatible with B127A-010-H signal booster (sold separately), which allows the signal, when used in a daisy chain, to be enhanced up to 1,090 feet (332.2 meters) total. *Note:* B127A-010-H will

Highlights

- Supports UHD resolutions up to 4K @ 30 Hz (4:4:4) for crystalclear video
- Power over Cable (PoC) technology provides power to either unit via Cat6 cable
- Can be daisy-chained up to 4 times (920 ft. total) via additional B127A-110-BD receivers
- Plug-and-play operation with no software required for easy, immediate installation
- Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases

Applications

- Connect a DisplayPortcompatible laptop for a video or PowerPoint presentation in an auditorium or lecture hall, where the source device changes frequently
- Extend video signals from one room to another using Cat6 cable, which can pass through conduit to meet building codes
- Gain flexibility in where the receiver is placed, with the freedom to move and relocate it away from an AC outlet
- Improve the line of sight for digital signage in a hotel, restaurant, theater, house of worship, trade show or other location

System Requirements

- Source device with DisplayPort output (computer, laptop, media server)
- Display device with DisplayPort 1.2a input (HDTV, projector, monitor)

Package Includes

- Transmitter
- Transceiver
- External power supply (Input: 100–240V, 50/60 Hz, 0.6A; Output: 24V 1A)
- (4) International plug adapters (North America, Europe, U.K. and Australia)
- Mounting hardware

only work when used in the first link of the daisy-chain installation.

Plug-and-Play Operation for Quick Setup and Immediate Use

The included transmitter and transceiver units work right out of the box with no software required. Mounting hardware is included for installing the transceiver on a wall, pole or 19-inch rack. Connect the transmitter to the source with a user-supplied DisplayPort cable (such as P580-Series). Then, connect the transceiver to the display with another user-supplied DisplayPort cable. Finally, connect the two units with user-supplied Cat6 patch cable (such as N202-Series cable).

TAA-Compliant for GSA Schedule Purchases

The B127A-111-BDTD is compliant with the Federal Trade Agreements Act (TAA), which makes it eligible for GSA (General Services Administration) Schedule and other federal procurement contracts.
