

## SmartPro 120V 750VA 600W Line-Interactive Sine Wave UPS, 2U, Extended Run, WEBCARDLX, LCD, USB, DB9

MODEL NUMBER: **SMART750RML2UN**

Line-interactive UPS offers complete power protection for small network applications, including telecom, security and digital signage.

### Features

#### 750VA/600W/120V Battery Backup for PC Networks, Security Systems or Digital Signage

The SmartPro® line-interactive SMART750RML2UN UPS system with AVR provides reliable battery backup and AC power protection against blackouts, brownouts, overvoltages, surges and line noise that can damage valuable electronics or destroy data. The six-outlet 120V battery backup is ideal protection for small networks, wiring closets, security systems, telecom, high-end PC gaming, digital signage equipment and other professional applications, including retail, casino and hotel/motel management.

#### Reliable, Expandable Battery Backup Keeps You Operational Through Power Outages

The user-replaceable, hot-swappable internal battery provides 20.7 minutes of support at half load (300W) and 8.5 minutes at full load (600W), allowing you to work through short power failures and giving you enough time to safely save files and shut down your system in case of a prolonged blackout. For mission-critical applications demanding scalable extended runtime, the UPS supports external battery packs, such as Tripp Lite's BP24V36-2US (sold separately). The intelligent battery management system extends battery life.

#### WEBCARDLX Network Interface Offers 24/7 Remote Access for Monitoring and Control

The Java-free HTML5-based WEBCARDLX enables full remote access for site power and UPS status monitoring, configuration, control and email notifications via secure web browser, SNMP, telnet or SSH. It supports 10/100 Mbps auto-sensing for optimum communication with an Ethernet network. Automated alerts help prevent accidental overloads, power loss and downtime. WEBCARDLX allows you to use the Auto Probe feature, which can prevent costly service calls by automatically rebooting non-responsive network devices.

#### 6 NEMA Outlets Protect Your Connected Components

Six 5-15R outlets provide battery backup, 570 joules of surge protection and voltage regulation for your crucial components. Two independently switched two-outlet load banks enable both scheduled and real-time remote rebooting and load shedding.

#### Automatic Voltage Regulation (AVR) Corrects Low- and High-Voltage Conditions

AVR protects your equipment from incremental hardware damage, data loss and performance problems caused by brownouts and overvoltages. The SMART750RML2UN can correct brownouts as low as 83V and overvoltages as high as 147V back to nominal 120V power continuously, all while keeping the battery fully charged and ready to take over in case of power failure.

### Highlights

- Protects equipment against blackouts, brownouts, overvoltages, surges and line noise
- Keeps AC power running during blackouts to allow time for file saves and safe shutdown
- Maintains continuous 120V nominal output during brownouts and overvoltages
- Pre-installed WEBCARDLX network interface supports Auto Probe feature
- Easy-to-read LCD allows real-time monitoring of voltage, battery status and other data

### Applications

- Protect your small network server and other network components against power surges, line noise, brownouts, overvoltages and blackouts
- Operate essential equipment during short-term power outages using battery backup power
- Shut down desktop PCs and other equipment without data loss during long-term power outages
- Connect high-end security systems, casino gaming machines or digital signage in a small network

### Package Includes

- SMART750RML2UN 120V 750VA 600W Line-Interactive

**Premium Protection from EMI/RFI Line Noise Helps Your Equipment Perform Better**

This UPS system filters out disruptive electromagnetic and radio frequency interference that can inflict hardware damage or data loss. This EMI/RFI filtering also helps your connected components perform better and last longer.

**Designed for High Efficiency to Help You Save Money and Protect the Environment**

A 95% efficiency rating reduces BTU emissions, energy consumption and, ultimately, your energy costs.

**Silenceable Alarm and Easy-to-Read LCD Keep You Informed Around the Clock**

The front-panel LCD lets you monitor important data, such as load level, power factor, voltage, battery charge and estimated runtimes. It rotates for comfortable viewing in both rack and tower configurations. The audible alarm sounds for power failure, low battery and overloads. You may silence it using the built-in switch or disable it.

**Advanced Communications Ports Allow for Automatic Saves and Shutdowns**

RS-232 and HID-compliant USB ports connect to a computer running Tripp Lite's free downloadable PowerAlert® software to enable safe unattended file saves and system shutdown in case of a prolonged power failure. The EPO port supports emergency shutdown in large facilities. Cables are included.

**Versatile Installation Options**

Hardware is included for mounting the Tripp Lite SmartPro UPS system in 2U of space in an EIA-standard 19-inch 4-post rack. Using optional mounting accessories (sold separately), you can adapt the SMART750RMXL2UN for 2-post (2POSTRMKITWM), front-rail (UPSHDEARKIT), 4-post short-depth (4POSTRAILKITWM), tower (2-9USTAND) or wall mounting (2POSTRMKITWM). The 10-foot power cord with NEMA 5-15P plug connects to any compatible AC outlet.
