

## USB-C Portable Docking Station - HDMI 4K @ 30 Hz, USB-A/C, GbE, SD/Micro SD, PD Charging 3.0, Gray

MODEL NUMBER: U442-DOCK5-GY

USB-C docking station with PD Charging adds HDMI, USB 3.0, Ethernet and memory card ports to your Chromebook, laptop or tablet.

### Features

#### Portable Docking Station Turns Your Device's USB-C or Thunderbolt 3 Port into a Workstation

This USB-C dock with PD Charging expands the potential of your tablet, laptop, Chromebook, MacBook, smartphone or PC's USB-C or Thunderbolt 3 port. It's ideal for transmitting 4K video and digital audio to a large display, adding a thumb drive and other USB peripherals, powering and charging a PD Charging-compliant mobile device, connecting to a Gigabit Ethernet network and a lot more—all at the same time.

#### Supports USB-C DisplayPort Alternate Mode for Converting Audio/Video Signals

By connecting the built-in USB-C cable to a source device that supports USB DisplayPort Alt Mode, you can output 4K video and digital audio to an HDMI monitor, television or projector without installing special software drivers.

#### Transmits Crystal-Clear 4K Video and Digital Audio with True 4:4:4 Color

The U442-DOCK5-GY supports Ultra HD video resolutions up to 4096 x 2160 (4K x 2K) at 30 Hz with multi-channel sound and 4:4:4 chroma subsampling for top-level PC gaming or using your HDTV as a PC monitor. Connect the HDMI port to your display using an HDMI cable (such as Tripp Lite's P568-Series, sold separately). A DVI display may also be connected using an HDMI to DVI adapter (Tripp Lite's P566-Series, sold separately).

#### Connects Keyboards, Thumb Drives and Other USB Peripherals

Three USB-A hub ports accept USB peripherals, such as flash drives, mice, keyboards and printers, and provide 5V 2A (10W) of charging power when connected to a PD 3.0-compliant charger. They support fast USB 3.0 data transfer rates up to 5 Gbps (10 times faster than USB 2.0) and are backward compatible with USB 2.0 and USB 1.1 devices. One BC 1.2-compliant port provides up to 5V 1.5A (7.5W) of fast-charging power to mobile devices.

#### PD Charging Port Charges the Connected Chromebook, MacBook Pro or Other Device

The USB-C 100W Power Delivery (PD) port provides power and charging to the connected PD Charging-compliant device (such as a MacBook Pro, Chromebook or Android smartphone). Connect the device's AC wall charger to the USB-C PD port, which supports power input up to 20V 5A (100W). That's sufficient wattage to fast-charge, sync and power most high-capacity devices, including the MacBook Pro. This port

### Highlights

- Converts audio/video signals from sources supporting USB-C DisplayPort Alt Mode
- Supports UHD resolutions up to 4096 x 2160 (@ 30 Hz) for crystal-clear 4K x 2K video
- Connects you to a wired 10/100/1000 Ethernet network when Wi-Fi is unavailable
- Provides 20V 5A (100W) power output for fast-charging large-capacity mobile devices
- Plug-and-play operation with no software required for easy, immediate installation

### Applications

- Play video from your laptop or PC on an HDMI display, such as an HDTV or projector
- Save data from your computer to a USB thumb drive or memory card
- Access a wired Gigabit Ethernet network in a location with no or spotty Wi-Fi
- Charge your notebook or laptop by connecting its wall charger to the USB-C PD Charging port
- Connect a USB microphone/headset to record a podcast or listen to music
- Write a report using a USB keyboard with your tablet or Android phone

### System Requirements

- Source device with USB-C or

can also be used for transferring data. PD 3.0 Fast Role Swap technology ensures all data and power connections remain stable if the wall charger becomes accidentally dislodged.

#### Accesses a Wired Gigabit Ethernet Network

The RJ45 port offers access to a Gigabit Ethernet network when Wi-Fi is unavailable or when a wired connection offers faster speeds. Connect using a UTP cable (Tripp Lite N201-Series Cat6 cables sold separately), and enjoy true 10/100/1000 Mbps Ethernet speeds for fast data transfers.

#### Allows External Memory Access

The memory card slots support Micro SD and SD/MMC cards for transferring data to and from your connected computer, laptop or tablet. Both slots may be used at the same time.

#### Built-In USB-C Cable Attaches in Either Direction

Unlike traditional USB cables that connect in only one direction, the reversible USB-C male connector plugs into a USB-C or Thunderbolt 3 port in either direction for a fumble-free connection every time.

#### Ready to Use Right from the Package, So You Can Plug and Play Immediately

The plug-and-play USB-C dock is specifically designed for use with the MacBook Pro, Google Chromebook Pixel and other laptops, tablets and devices equipped with a USB-C or Thunderbolt 3 port. It requires no software or drivers. It's about the size of a smartphone, making it easy to pack into a pocket, backpack or laptop bag for multiport convenience wherever you go.
