Section 1: Introduction

Product Description
Your new Interactive Digital Signage (IDS) Display combines Elo Touch Solutions reliable performance with the latest developments in touchscreen technology and display design. This combination of features creates a natural flow of information between a user and the IDS Display.

This IDS Display incorporates a 10-bit color, active matrix thin-film-transistor, and digital signage LCD panel to provide superior display performance. It outputs 4K resolution (3840 x2160) suitable for displaying graphics and images. Other features that enhance this LCD monitor’s performance are Plug & Play compatibility, built-in speakers and headphone output capability, Touch On-Screen Display (OSD) controls, and a family of IDS computer modules.

Elo Computer modules can be installed to the back of the IDS Display to convert it into an IDS All-in-One touchcomputer.

Precautions
Follow all warnings, precautions and maintenance as recommended in this user manual to maximize the life of your unit and prevent risks to user safety.

For your health and safety, it is strongly recommended that at least two people handle, lift, and/or move these IDS Displays.

This manual contains information that is important for the proper setup and maintenance of the IDS monitor. Before setting up and powering on your new IDS Display, read through this manual, especially the Installation, Mounting, and Operation chapters.

CAUTION: Risk of Explosion if Battery is replaced by an Incorrect Type. Dispose of Used Batteries According to the Instructions.
Section 2: Unpacking

Unpacking the Interactive Digital Signage (IDS) Display

To unpack the IDS, follow these steps:

1. The carton should be oriented in the manner according to its labeling. The hinged plastic locks should be at the ‘bottom’.
2. Open and remove all 4 hinged plastic locks.
3. Once the locks are removed, lift the cartons top lid off the bottom frame.

4. With the top lid removed, you now have access to the IDS Display and the included accessories.
Verify that the box contains:

- IDS ET6553L/ET5553L IDS Display:
- HDMI 2.0 cable
- USB 3.0 cable (Type A plug to Type B plug)
- power cable, IEC 60320-C13 to NA plug
- power cable, IEC 60320-C13 to EU/KR plug
- power cable, IEC 60320-C13 to UK plug
- Serial 3.5mm male to Serial DB9 female cable
- Energy label according to EU Regulation 1062/2010
- 2x Stylus Active or Passive depending on the monitors touch technology.
  - Active stylus for Projected Capacitance model
  - Passive Stylus for Infrared model
- Quick Install Guide
- OKTOPUS license card
Section 3: IDS Display Installation

Connector Panel and Interfaces

Remove the cable cover located on the back-right side of the IDS Display (when viewed in landscape orientation) to access the connector panel.

IDS Display I/O ports

- Optional Expansion Bay
- HDMI 1
- HDMI 2
- DisplayPort
- Touch USB
- OSD Remote
- Serial RS-232
- Audio Out
IDS Display: Connecting to an External Computer

1. Connect the included HDMI cable (or your own or DisplayPort cable) between the monitor and the video source.
2. Connect the USB touch cable between the monitor and your host PC.
3. Select the correct power cable for your region. Connect it between the AC power source and the IDS Display POWER IN connector.
4. As soon as power is detected, the monitor will turn on.
5. In order to access the OSD menu, press the Menu button located behind the hidden door on the right side of the monitor.
IDS Display: Connecting to the Elo Computer Module (ECM)

1. Remove the cover in order to expose the computer module docking area.
2. Slide the Elo Computer Module into the bay and secure the ECM with the locking screws.
3. Select the correct power cable for your region. Connect it between the AC power source and the IDS Displays POWER IN connector.
   a. Note: The ECM can be plugged in while there is power the monitor.
4. As soon as video is detected, the monitor will begin to display the content.
5. In order to access the OSD menu, press the Menu button located behind the hidden door on the right side of the monitor.

Visit the Elo Touch Solutions website www.elotouch.com for:

- Updates to the monitor firmware
- Detailed driver installation guides
- Touch drivers for other operating systems

TouchPro and Infrared units are HID compatible and do not require an Elo touch driver. If an Elo touch driver has previously been installed on the host computer, remove this driver by opening Control Panel and selecting the option to remove the driver completely.
Section 4: Mounting Information

*Note:* It is strongly recommended that at least two people handle, lift, or move the IDS Display.

*Note:* Do not leave the IDS Display facing down for long periods of time as this will cause permanent damage to the LCD panel.

Mounting Orientations

The following mounting orientations are supported: landscape and portrait.

**Landscape Orientation**
When mounting the IDS Display in landscape orientation, ensure that the Elo logo appears in the same location as the pictures below.
**Portrait Orientation**
When rotating the IDS Display to portrait orientation, ensure that the Elo logo appears in the same location as the pictures below. The IO ports will be located at the bottom.

![Portrait Orientation Diagram]

**Rear VESA Mount**

A four-hole, 600x600mm and 400x400mm mounting pattern is provided on the rear of the IDS Display. The VESA FDMI-compliant mounting are coded

- VESA MOUNT PER MIS-F, 400 x 400mm, M6
- VESA MOUNT PER MIS-F, 600 x 600mm, M8

Refer to www.elotouch.com for dimensional drawings.
Optional Mounting Methods

An optional low profile wall-mount kit is available for the IDS ET6553L/ET5553L Displays. Detailed information is available on the marketing specification drawing at www.elotouch.com.

Elo Low Profile Wall Mount kit:
P/N E282876 and Drawing MS602094 for IDS ET6553L
P/N E727774 and Drawing MS602320 for IDS ET5553L
Consult the wall mount user guide for detailed installation information.

Audio speaker mounting in portrait orientation (optional)
The lower left audio speaker can be relocated to the top right side when the IDS Display is mounted in portrait mode. This provides a more natural stereo performance.
1. Remove the mounting screw from the lower left speaker and slide the speaker downward to disengage the mounting hooks. Pull the speaker downward enough so the cable connector is exposed and disengage the connector.

2. Remove the mounting screw from the mounting cover on the top right of the IDS Display and slide the cover downward to disengage the mounting hooks.
3. Install the speaker into the new location by connecting the speaker cable connector and then feeding the connector into the hole in the back cover whole sliding the speaker down from the top so both hooks are engaged with the slots in the back cover. Reinstall the mounting screw.

![Slide cable connector into this hole]

4. Install the cover removed in step 2 in the old speaker location by sliding it in so the hooks engage the slots in the back cover and then install the mounting screw.
Section 5: Operation

Power

To turn the IDS Display on or off, press the power button once. If a computer module is installed, then the computer module will also turn on with the monitor.

To gracefully shut down the computer module, follow the computer modules operating systems normal power off procedure.

The system consumes low power when in SLEEP and OFF modes. For detailed power consumption specifications, refer to technical specifications available on the Elo website www.elotouch.com.

Touching the screen will bring the system out of MONITOR SLEEP mode.

If long periods of disuse are planned, unplug the AC power cable to save power.

The maximum voltage, frequency and current for the IDS Display are provided in the power ratings table below:

<table>
<thead>
<tr>
<th>Operating Voltage Range</th>
<th>Operating Frequency Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>100 - 240Vac</td>
<td>50/60 Hz</td>
</tr>
</tbody>
</table>

Usage Duty Cycle

In order to save energy and extend life of the display, Elo recommends shutting off the display when not in use. A number of tools, such as Content Management System (CMS) player applications, Operating System settings and the Real Time Clock feature on the On-Screen Display Menu (OSD) within the IDS display can be used for this task.

Touch Technology

When connected to Windows 10 computer, the IDS Display will report simultaneous touches per the product specification. TouchPro supports up to 40 touch Infrared support up to 20 touch

The IDS Display product specification can be found by visiting https://www.elotouch.com/
**Video Information**

An LCD panel's native resolution is its width and height measured in number of pixels.

In almost all cases, an image displayed on an LCD monitor will look best when your computer's output resolution matches the LCD panel's native resolution. See the display specifications on the Elo website [www.elotouch.com](http://www.elotouch.com) to find your IDS Display's native resolution. Operating in other resolutions will degrade video performance and is not recommended.

For computer output resolutions at non-native resolutions, the monitor will scale the video to panel's native resolution. For smaller input video resolutions, this involves "stretching" the input image in the X- and Y-dimensions to fit the panel. For larger input video resolutions, this involves "compressing" the input image in the X- and Y-dimensions to fit the panel. An unavoidable byproduct of the scaling algorithms is a loss of fidelity when the computer's output video image is scaled by the monitor to fit the display. This loss of fidelity is most apparent when viewing feature-rich images at close distances (for example images containing small-font text).

Your IDS Display will likely not require any video adjustments.

**Touch On-Screen Display (OSD)**

This monitor uses an easy-to-navigate Touch OSD interface. Use the settings menu in the sidebar to adjust the IDS Display settings.

**Example of the Popup OSD Menu:**

All IDS Display adjustments made through the OSD are automatically stored as soon as they are entered. This feature saves you from having to reset your choices every time the IDS Display is unplugged or powered off and on or if there is a power failure.

</tbody>
</table>
Audio

Audio can be output from the following locations:
1. From the IDS Display speakers via the video channel
2. The Line Out port on the IDS Display IO ports
3. From the computers Line Out port (If an Elo Computer Module is installed)
See the “Audio” OSD parameter for details.

Note: When headphones are plugged into the headphone output jack, the internal speakers turn off and audio is played over the headphones.

Volume and muting of the speaker and headphone outputs are controlled by the OSD.

Controlling the IDS Display remotely

The IDS Display allows remote access from a host application. This is done using either the VESA Display Data Channel Command Interface (DDC/CI) or the Multiple Display Control command sets. Users can communicate with the monitor through either of these protocols. The host application can send a variety of different commands which will be executed on the IDS Display. For detailed information regarding the command set, refer to the application note available here.

CEC Functionality (Consumer Electronic Control)

The IDS Display is equipped with CEC capability. If a host device (with CEC built in) is connected to the monitor through HDMI, the monitor can be turned on by only turning the host device on.
Real Time Clock (RTC) Functionality

This IDS Display has real time clock functionality. In the OSD menu, there is a sub-menu called RTC Settings.

To utilize the RTC functionality:
The user must set up the Time setting for their specific time zone.
When the On/Off Schedule is Enabled, the user can choose when to leave the monitor on and when it should be off. Individual or multiple days can be chosen.

Example:
Have the monitor ON for Monday, Wednesday and Friday between 9:00AM and 5:00PM. All other days and time, the monitor shall be OFF.
  - Enable the On/Off Schedule
  - Select M W F
  - Set the ON time for 09:00:00 and the OFF time for 17:00:00

*Note that all of time settings operate on the 24-hour clock.

Wake-On-Touch

The touch display supports wake-on-touch functionality when the PC is in sleep mode. To enable this, please ensure that the BIOS settings have enabled USB support during the S4 sleep cycle.

Intelligent Brightness Control and Color Sensor Functionality

This IDS Display includes a light and color sensor that can adjust the brightness of the screen and the color of the display to meet the ambient light and color levels. Details of the functionality can be found in the Section 10, Appendix A.

The light sensor can be used to wake the monitor from sleep mode. This will happen when there is a change in the amount of light from very dim (<50 lux) to bright (>200 lux). To enable this feature, ensure that the power saving mode for the monitor is disabled.
Energy Saving Mode

IDS ET6553L can meet Energy Star 7.1 requirements, if Energy Saving Mode is enabled.
IDS ET5553L can meet Energy Star 8.0 requirements, if Energy Saving Mode is enabled.

When Energy Saving Mode is enabled, four side peripheral ports, MDC command and Auto Display Wake Up function will be limited. To restore full functionality of the IDS Display, disable the Energy Saving Mode.

ENERGY STAR is a program run by the U.S. Environmental Protection Agency (EPA) and U.S. Department of Energy (DOE) that promotes energy efficiency.
This product qualifies for ENERGY STAR in the “factory default” settings and this is the setting in which power savings will be achieved. Changing the factory default picture settings or enabling other features will increase power consumption that could exceed the limits necessary to qualify for ENERGY STAR rating.
For more information on the ENERGY STAR program, refer to energystar.gov.

Stylus (Active and Passive)

Elo provides active stylus pens that can be used on the projected capacitance version of the monitor.
Elo Active Stylus Part Number: E216215
Please visit www.elotouch.com for Stylus API's.
Note: The minimum distance between two monitors should be 72cm (28.35in) ±10%

Elo also provides passive stylus pens that be used on the Infrared version of the monitor which can be used simultaneously with finger for touch.  Elo Passive Stylus Part Number: E727568
Elo Edge Connect micro-USB peripheral ports

Available on all four sides of the monitor are microUSB ports designed for Elo’s optional peripheral ports. See www.elotouch.com for the optional peripherals that work with the IDS ET6553L/ET5553L display.

The pinout is as follows:
Pin1: 5V Power
Pin2: USB D-
Pin3: USB D+
Pin4: PWM control for camera module
Pin5: Ground

Conference Camera (Optional)

Elo provides an optional camera module (P/N E277819) which has a built-in microphone and proximity detection sensor. This camera is designed for video conferencing meetings and supports 1080P Full HD video output.

Whiteboard Software (Optional)

Qwizdom Octopus – Can be used for whiteboard applications and presentations. The user guide for this software is available at https://qwizdomoktopus.com/user-guide/
Section 6: Maintenance Information

To avoid risk of electric shock, follow all safety notices and do not disassemble the IDS Display or Computer Module. They are not user serviceable.

Do not block or insert anything inside any of the ventilation slots.

The IDS Display is equipped with a 3-wire, grounding power cord. The power cord plug only fits into a grounded outlet. Do not fit or modify the plug into an outlet that has not been configured for this purpose. Do not use a damaged power cord. Only use the power cord that came with your Elo IDS Display. Use of an unauthorized power cord may invalidate your warranty.

Ensure that the system is maintained and runs within the specified environmental conditions listed in the products specifications available on the Elo Touch Solutions website www.elotouch.com.
Section 7: Technical Support

Technical Assistance

Technical Specifications
visit www.elotouch.com/products for technical specifications for this device

Support
visit www.elotouch.com/support for technical support

Refer to last page for worldwide technical support phone numbers.
Section 8: Regulatory Information

Waste Electrical & Electronic Equipment Directive (WEEE)

This product should not be disposed of with household waste. It should be deposited at a facility that enables recovery and recycling.

Elo has put in place recycling arrangements in certain parts of the world. For information on how you can access these arrangements, please visit www.elotouch.com/e-waste-recycling-program/.

Electrical Safety Information

Compliance is required with respect to the voltage, frequency, and current requirements indicated on the manufacturer’s label. Connection to a different power source than those specified herein will likely result in improper operation, damage to the equipment or pose a fire hazard if the limitations are not followed.

There are no operator serviceable parts inside this equipment. There are hazardous voltages generated by this equipment which constitute a safety hazard. Service should be provided only by a qualified service technician.

Contact a qualified electrician or the manufacturer if there are questions about the installation prior to connecting the equipment to mains power.

Emissions and Immunity Information

Notice to Users in the United States. This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense. This device complies with Part 15C of the FCC Rules. Operation is subject to the following two conditions:

1) This device may not cause harmful interference; and
2) This device must accept any interference, including interference that may cause undesired operation of the device.
Notice to Users in Canada:
This equipment complies with the Class A limits for radio noise emissions from digital apparatus as established by the Radio Interference Regulations of Industrial Canada.

CAN ICES3(A)/NMB3(A)

This device complies with Industry Canada’s license-exempt RSSs. Operation is subject to the following two conditions:
(1) This device may not cause interference; and
(2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d’Industrie Canada applicables aux appareils radio exempts de licence. L’exploitation est autorisée aux deux conditions suivantes:
(1) l’appareil ne doit pas produire de brouillage;et
(2) l’utilisateur de l’appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d’en compromettre le fonctionnement.

Notice to Users in the European Union: Use only the provided power cords and interconnecting cabling provided with the equipment. Substitution of provided cords and cabling may compromise electrical safety or CE Mark Certification for emissions or immunity as required by the following standards:

This Information Technology Equipment (ITE) is required to have a CE Mark on the Manufacturer’s label which means that the equipment has been tested to the following Directives and Standards: This equipment has been tested to the requirements for the CE Mark as required by EMC Directive 2014/30/ EU as indicated in European Standard EN 55032 Class A and the Low Voltage Directive 2014/35/EU as indicated in European Standard EN 60950-1.

General Information to all Users: This equipment generates, uses and can radiate radio frequency energy. If not installed and used according to this manual, the equipment may cause interference with radio and television communications. There is, however, no guarantee that interference will not occur in any particular installation due to site-specific factors.
1. In order to meet emission and immunity requirements, the user must observe the following:
   a. Use only the provided I/O cables to connect this digital device with any computer.
   b. To ensure compliance, use only the provided manufacturer’s approved line cord.
   c. The user is cautioned that changes or modifications to the equipment not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

2. If this equipment appears to cause interference with radio or television reception, or any other device:
   a. Verify as an emission source by turning the equipment off and on. If you determine that the equipment is causing the interference, try to correct the interference by using one or more of the following measures:
      i. Move the digital device away from the affected receiver.
      ii. Reposition (turn) the digital device with respect to the affected receiver.
      iii. Reorient the affected receiver’s antenna
      iv. Plug the digital device into a different AC outlet so the digital device and the receiver are on different branch circuits.
      v. Disconnect and remove any I/O cables that the digital device does not use.
         (Unterminated I/O cables are a potential source of high RF emission levels.)
      vi. Plug the digital device into only a grounded outlet receptacle. Do not use AC adapter plugs. (Removing or cutting the line cord ground may increase RF emission levels and may also present a lethal shock hazard to the user.)

If you need additional help, consult your dealer, manufacturer, or an experienced radio or television technician.
Agency Certifications

The following certifications and marks have been issued or declared for the IDS ET6553L/ET5553L monitor:

- UL, FCC (US) - Class A
- cUL, IC (Canada)
- CB (International safety)
- CE (Europe) - Class A
- RCM (Australia)
- VCCI (Japan)
- CCC (China) (for TouchPro version only)
China RoHS

In accordance to Chinese law (Management Methods for the Restriction of the Use of Hazardous Substances in Electrical and Electronic Products), the section below lists out the name and amount of the toxic and/or hazardous materials that this product may contain.

This table is prepared in accordance with the provisions of SJ/T 11364

O: Indicates that said hazardous substance contained in all homogenous materials for this part is below the limit requirement of GB/T 26572.

X: Indicates that said hazardous substance contained in at least one of the homogenous materials used for this part is above the limit requirement of GB/T 26572.

For items marked with X, exemptions were taken according to EU RoHS.
Explanation of Markings

In accordance with the SJ/T11364 requirement, electrical and electronic products are marked with the following pollution control logo.

The Environment-Friendly Use Period for this product is 10 years. The product will not leak or mutate under normal operating conditions listed below, so that the use of this electronic information product will not result in any severe environmental pollution, any bodily injury, or damage to any assets.

Operating Temperature: See table on next page.
Storage Temperature: See table on next page.

It is encouraged and recommended that product packaging be recycled and reused according to local laws.
