THE AVALON 16-IN. ELECTRIC BEACH CRUISER BIKE WITH THUMB THROTTLE AND PEDAL ASSIST

Ride with the same joy you had as a kid, biking every day until the streetlights come on, with the Avalon 16-in. electric beach cruiser bike with thumb throttle and pedal assist. This stylish, aluminum frame e-bike has everything you want from a bike, like sturdy Kenda tires and 1-8 Shimano Drivetrain—plus extra electric power. The Avalon gives you the boost you need to get to where you're going while taking the strain off your body. If you're embracing nature by ditching your car or just getting out for a little fresh air, you can stay active without worrying about limitations thanks to the bike's throttle and pedal assist. There are three levels of pedal assist to give you just the right boost of electric power to help you along as you pedal. Don't feel like pedaling? Then use the fully automatic thumb throttle to take you where you need to go, no pedaling required. Use them to ride faster, climb hills with ease and save your joints by putting less pressure on your knees and hips. The powerful battery allows the bike to run for up to 4 hours or between 35-50 miles using pedal assist and up to two hours or 20-30 miles using the throttle. Go farther without limits with FreeForce.
