Model # : GSWWA12BKSA10  
UPC # : 190873003793

### 1. Ultimate Cooking Versatility

The multifunctional air fryer, convection oven and microwave that features Combi Speed cooking in one device for 3 Appliances in 1.

### 2. TotalFry 360™ Technology

Air fry with little or no oil for healthier, crunchy fried favorites like chicken, shrimp, wings, and French fries. The easy-clean air fry kit provides more frying surface area with better air circulation compared to traditional air fryers. TotalFry 360 does not use microwaves but uses the built-in heating elements.

### 3. Combi Speed Cooking

Faster than either mode alone, the intelligent combination of True Convection and microwave cooking creates delicious dishes with optimum texture and taste. Roast chicken, baked potatoes and frozen entrees can now be ready when you are.

### 4. True Convection

Heated air circulates throughout the oven as food spins 360°, cooking your food faster and more evenly without hot spots. You can even broil and bake foods with direct heat, such as fish, chicken and fresh, oven-baked goods.

### 5. Sensor Cook and Sensor Reheat

A built-in humidity sensor ensures that your food is never under- or overcooked. For precooked dishes, Sensor Reheat stops automatically when food is hot and ready to eat.
