

Electric Carbon Fiber Infrared Heat Lamp

When choosing an outdoor heating system or garage heater, consider Hanover's line of electric infrared heaters. **Hanover's 35-inch wide carbon infrared heat lamp** is the ideal choice for hanging from the ceiling or mounting to a wall. Use it for your patio, porch, balcony, garage, workshop, and more! Similar to sunshine, infrared heat is a radiant heat that warms a person or an object directly, rather than heating the air in-between. Carbon infrared heat is a soft, radiant heat that warms the skin efficiently. Infrared heat can be felt instantly as soon as you turn it on – no waiting for it to warm up. In addition, an outdoor infrared heater saves energy by using less power to create the same amount of heat as traditional gas heaters, and there is no smoke or fumes. Extend the use of your outdoor living space with a Hanover mountable infrared heater.
