

Electric Halogen Infrared Heat Lamp

with Remote Control

When choosing an outdoor heating system or garage heater, consider Hanover's line of electric infrared heaters. Hanover's 26.5" wide carbon infrared heat lamp is available in 2 options: alone for hanging or mounting and paired with an adjustable stripod. Each option includes a handy remote control. Use this versatile heater for your patio, porch, balcony, garage, workshop, and more!

Similar to sunshine, infrared heat is a radiant heat that warms a person or an object directly, rather than heating the air in-between. Infrared heat can be felt instantly as soon as you turn it on – no waiting for it to “warm up”.

HEATER FEATURES

- Heats an area up to 52 sq. ft.
- Use for patio, porch, balcony, garage or workshop
- Premium carbon fiber technology
- Instant heat with no warm-up time
- Overheat protection and tip-over safety switch
- Available with or without stand
