

6' x 6' Walk-In Greenhouse

Extend your flower and vegetable growing season with the Walk-In Greenhouse by Hanover. Perfect for the home gardener, the sliding door and pitched roof allow easy walk-in access.

Stronger and lighter than glass, the opaque polycarbonate panels block harmful UV rays which enhance plant growth and discourage plant burn. The rooftop vent provides effortless ventilation to moderate the temperature and maximize growing conditions. The sturdy galvanized steel base and durable aluminum frame are both resistant to rust and corrosion, while the apex roof design allows efficient water and snow runoff.

Hanover's walk-in greenhouse offers all the protection your plants need to grow and thrive regardless of the weather outside.

Features
