Convolutional Neural Network
Multi-layered CNN design allows Huddly ONE to instantly identify visual patterns, and detect people and objects.

Neural Compute Engine based on Intel Movidius MyriadX
Edge-based Machine Learning platform that enables onboard intelligent features.

Desktop Framing
A default zoom level customized to best suit the one-person home office scenario. The framing can be adjusted to suit personal preference anytime.

Portrait Lighting
The camera uses AI to understand the lighting conditions in the image and automatically adjusts exposure to ensure that the face is well-lit and facial expressions are clearly visible.

Visual Noise Filtering
Bias compensating spatio-temporal filtering with wide area chroma filtering.

Dynamic Light Optimization
Adapts to poor lighting conditions.

Real-Time Dewarping
The wide-angle image is dewarped and perspective corrected in real time, rendering a natural, true-to-life view.

Software-upgradable
Designed to get even smarter over time with regular enhancements and new intelligent feature releases.

180° Auto-Flip
When mounted upside down, the camera automatically provides the correct view.

Digital Pan/Tilt/Zoom
Huddly ONE has no moving parts, making it compact and silent, as well as more reliable and accurate. Instantly pan, tilt and zoom digitally up to 4 times.
