

Huddly + Nureva + MAXHUB Meeting Room Collaboration

Boost meeting engagement and productivity with the powerful collaboration between Huddly, Nureva, and MAXHUB. Together, we deliver smarter, more inclusive meetings through future-proof solutions tailored for every room size—from huddle spaces to large conference rooms. Huddly's premium cameras leverage Edge AI to create intelligent meeting experiences,

while Nureva's full-room microphone and speaker pickup and MAXHUB's room solutions ensure remote participants feel fully immersed with visually engaging, seamless operation. By integrating these technologies, you'll create an environment that fosters dynamic, human-centric collaboration, with solutions that adapt to your evolving needs.

Solution benefits

Smarter meetings

- **Comprehensive room solutions**
A full room setup that enhances visibility and engagement for all participants, boosting overall productivity.
- **AI-Powered video conferencing**
Cutting-edge AI experiences like Huddly Director and advanced image processing boost meeting quality and effectiveness.
- **Flexible solution**
Supports both single-camera and multi-camera configurations to capture more participants and conversations.

Empowering the human experience

- **User-focused design**
Solutions prioritize the human experience, addressing real challenges faced by participants to foster more productive interactions.
- **AI-directed meetings**
Autonomous meeting solutions deliver real-time editing for maximum engagement without manual intervention.
- **Streamlined setup**
Plug-and-play functionality minimizes installation complexity for quicker deployment.

Evolving AI

- **Adaptive technology**
Designed to respond to user needs, ensuring that video conferencing technology effectively serves all participants.
- **Versatile room integration**
Adapts to any room size or layout, providing effective solutions that fit existing environments.
- **Future proof technology**
Regular software updates enhance device performance over time with the latest AI capabilities, without the need for new hardware.
