Professional Series

Key Features:
- Weather-Resistant, All Fiberglass Enclosure
- 60° x 60° Coverage
- 2262H Differential Drive® Low-Frequency Driver
- 2432H High Frequency Compression Driver
- Large PT™ Progressive Transition waveguide for excellent pattern control and low distortion
- Available in Gray and Black finish
- 400 W, 70/100V Transformer Included
- U-type Mounting Bracket Included

Applications:
- Sports Facilities
- Themed Entertainment Venues
- Outdoor Entertainment Centers
- Cruise Ships
- Water Parks

The AW266 is a high power, lightweight, 2-way, full-range loudspeaker system comprised of the JBL Differential Drive dual voice coil and dual magnetic gap 2262H 300 mm (12 in) low-frequency driver and 2432H high-frequency 38 mm (1.5 in) exit, 75 mm (3 in) voice-coil compression driver. The large format Progressive Transition wave-guide provides excellent 60° x 60° coverage. The loudspeaker system can used in either the vertical or horizontal orientation.

The enclosure is constructed of multilayer glass composite and is heavily braced to maximize low-frequency performance. The 16-gauge stainless steel grille, backed with open cell foam and stainless steel mesh, provides excellent protection in the harshest environments. The system is equipped with a 400 W 70/100V transformer.

A corrosion-resistant extra-thick zinc-plated polyester powder coated U-type mounting bracket is included.

The AW266 is part of JBL’s AE Series, a versatile family of loudspeakers intended for a wide variety of applications.

Specifications:

1IEC standard, full bandwidth pink noise with 6 dB crest factor, 100 hours.
2Calculated based on power rating and sensitivity, exclusive of power compression.
3Anechoic sensitivity in free field, no additional sensitivity gain from boundary loading.
4JBL continually engages in research related to product improvement. Changes introduced into existing products without notice are an expression of that philosophy.
