Applications:

The Control 64P/T is a compact full-range, pendant-type loudspeaker that provides superb sound reproduction for rooms with open architecture ceilings and other locations where a pendant form factor is desired.

The 120° coverage pattern (average mid-range coverage) distributes the sound broadly for the listening space.

Stylish design and easy installation makes the Control 64P/T ideal for a wide variety of applications including retail, restaurants, hotels, casinos, fitness centers, convention centers, exhibit spaces, conference rooms, atriums, museums, transit centers and other open-ceiling applications.

The Control 64P/T includes a single-point mounting system for easy and secure suspension in open-ceiling applications. Two complete hanging cable systems are included, providing both main and safety suspension cables. Include are extra-long 4.5 m (15 foot) high tensile galvanized steel wire rope having spring clips for the loudspeaker end of the cable and UL listed cable fasteners for infinitely adjustable suspension height.

The system’s 100 mm (4 in) full-range driver features a polypropylene-coated cone and 20 mm (0.8 in) high temperature copper voice coil for high power handling and improved long-term reliability.

The Control 64P/T contains a high-quality 30 Watt multi-tap transformer for use on 70V/100V distributed loudspeaker lines, and is switchable for 8-ohm voice-coil direct operation.

Euro-style clip-in connectors allow for easy wiring. For protected outdoor applications, rubber boots are included to cover the input connectors, and an optional terminal cover is available for harsher locations.

### Notes:

- Full space (suspended)
- At 8Ω setting. Continuous Pink Noise rating is IEC-shaped pink noise with a 6 dB crest factor. Continuous Program Power is defined as 3 dB above the Continuous Pink Noise Rating and is a conservative expression of the system's ability to handle normal speech and music program material.
- Calculated from sensitivity and power handling, exclusive of power compression, at THRU setting.
- Half-space (on-wall) averaged 100 Hz – 10 kHz, 2.83V.
- Coverage angle (6 dB) averaged between 600 Hz and 12 kHz.
- For protection against driving below resonant frequency and to keep transformer out of saturation.
- In vertical orientation

JBL continually engages in research related to product improvement. Changes introduced into existing products without notice are an expression of that philosophy.
