1 Introduction

Welcome to Kramer Electronics (since 1981): a world of unique, creative and affordable solutions to the infinite range of problems that confront the video, audio and presentation professional on a daily basis. In recent years, we have redesigned and upgraded most of our line, making the best even better! Our 500-plus different models now appear in 8 Groups, which are clearly defined by function.

Congratulations on purchasing your 104LN, which is ideal for:

- Any system requiring a compact distribution amplifier and line driver
- Rental and staging applications

The package includes the following items:

- **104LN 1:4 Differential Video Line Amplifier**
- Power adapter (12V DC Input)
- Mounting bracket
- This user manual

2 Getting Started

We recommend that you:

- Unpack the equipment carefully and save the original box and packaging materials for possible future shipment
- Review the contents of this user manual
- Use Kramer high performance high resolution cables

2.1 Quick Start

This quick start chart summarizes the basic setup and operation steps.

---

1 GROUP 1: Distribution Amplifiers; GROUP 2: Video and Audio Switchers, Matrix Switchers and Controllers; GROUP 3: Video, Audio, VGA/XGA Processors; GROUP 4: Interfaces and Sync Processors; GROUP 5: Twisted Pair Interfaces; GROUP 6: Accessories and Rack Adapters; GROUP 7: Scan Converters and Scalers; and GROUP 8: Cables and Connectors

2 Download up-to-date Kramer user manuals from the Internet at this URL: http://www.kramerelectronics.com

3 The complete list of Kramer cables is on our Web site at http://www.kramerelectronics.com
Getting Started

Step 1: Connect the Input and the outputs - see section 5

1. Connect a composite video source to the INPUT

2. Connect the OUTPUTs to the acceptors:
   - OUT 1 to a video recorder
   - OUT 2 to a video display
   - OUT 3 to a video display
   - OUT 4 to a video display

Step 2: Connect the power

Step 3: Set the INPUT GROUND switch - see section 4

- When the INPUT GROUND switch is set to FLOAT, the input signal is ungrounded
- When the INPUT GROUND switch is set to ON, the input signal is grounded to the chassis
3 Overview

The high performance 104LN is a distribution amplifier and a line driver for composite and SDI video signals.

In particular, the 104LN 1:4 Differential Video Line Amplifier:

- Accepts a composite video input and provides 4 identical buffered outputs
- Includes recessed Gain and EQ. (equalization) trimmer controls, which compensate for signal losses inherent in long cable runs
- Has a differential input, which helps to eliminate common mode noise picked up by the input cable, and supports the use of long cables (letting you locate it anywhere in the distribution chain)
- Has a bandwidth in excess of 400MHz, ensuring that it remains transparent even in the most critical applications
- Is fully DC coupled, ensuring the best linearity and signal flatness

To achieve the best performance:

- Connect only good quality connection cables, thus avoiding interference, deterioration in signal quality due to poor matching, and elevated noise-levels (often associated with low quality cables)
- Avoid interference from neighboring electrical appliances and position your Kramer 104LN away from moisture, excessive sunlight and dust

| Caution – No operator-serviceable parts inside unit. |
| Warning – Use only the Kramer Electronics input power wall adapter that is provided with this unit. |
| Warning – Disconnect power and unplug unit from wall before installing or removing device or servicing unit. |

1 For example: model number AD2512C, part number 2535-000251

Figure 4 illustrates the INPUT GROUND switch:

![INPUT GROUND Switch](image)

Figure 4: 104LN 1:4 Differential Video Line Amplifier (Underside Panel)

By default, the INPUT GROUND switch is set to FLOAT\(^2\). If the image appears noisy, set the switch to ON\(^3\).

---

1 Insert a screwdriver into the hole and carefully rotate it, to trim the level
2 The input signal is isolated from the chassis
3 The input signal is grounded to the chassis
5 Connecting the 104LN 1:4 Differential Video Line Amplifier

To connect the 104LN 1:4 Differential Video Line Amplifier, as the example in Figure 5 illustrates, connect the following:

1. Connect a composite video source (for example, a satellite decoder and receiver) to the INPUT BNC connector.

2. Connect the four OUT BNC connectors to up to four composite video acceptors, as follows:
   - Connect the OUT 1 connector to video acceptor 1 (for example, a video recorder)
   - Connect the OUT 2 connector to video acceptor 2 (for example, a video display)
   - Connect the OUT 3 connector to video acceptor 3 (for example, a video display)
   - Connect the OUT 4 connector to video acceptor 4 (for example, a video display)

3. Adjust the output signal level and/or cable compensation equalization level, if required.

4. If the image appears noisy, set the INPUT GROUND to either ON or FLOAT to lower the noise level.

1 Switch OFF the power on each device before connecting it to your 104LN. After connecting your 104LN, switch on its power and then switch on the power on each device.

LIMITED WARRANTY
Kramer Electronics (hereafter Kramer) warrants this product free from defects in material and workmanship under the following terms.

HOW LONG IS THE WARRANTY
Labor and parts are warranted for seven years from the date of the first customer purchase.

WHO IS PROTECTED?
Only the first purchase customer may enforce this warranty.

WHAT IS COVERED AND WHAT IS NOT COVERED
Except as below, this warranty covers all defects in material or workmanship in this product. The following are not covered by the warranty:

1. Any product which is not distributed by Kramer, or which is not purchased from an authorized Kramer dealer. If you are uncertain as to whether a dealer is authorized, please contact Kramer at one of the agents listed in the Web site www.kramerelectronics.com.

2. Any product, on which the serial number has been defaced, modified or removed.

3. Damage, deterioration or malfunction resulting from:
   i) Accident, misuse, abuse, neglect, fire, water, lightning or other acts of nature
   ii) Product modification, or failure to follow instructions supplied with the product
   iii) Repair or attempted repair by anyone not authorized by Kramer
   iv) Any shipment of the product (claims must be presented to the carrier)
   v) Removal or installation of the product
   vi) Any other cause, which does not relate to a product defect
   vii) Cartons, equipment enclosures, cables or accessories used in conjunction with the product

WHAT WE WILL PAY FOR AND WHAT WE WILL NOT PAY FOR
We will pay labor and material expenses for covered items. We will not pay for the following:

1. Removal or installations charges.
2. Costs of initial technical adjustments (set-up), including adjustment of user controls or programming. These costs are the responsibility of the Kramer dealer from whom the product was purchased.
3. Shipping charges.

HOW YOU CAN GET WARRANTY SERVICE
1. To obtain service on you product, you must take or ship it prepaid to any authorized Kramer service center.
2. Whenever warranty service is required, the original dated invoice (or a copy) must be presented as proof of warranty coverage, and should be included in any shipment of the product. Please also include in any mailing a contact name, company, address, and a description of the problem(s).
3. For the name of the nearest Kramer authorized service center, consult your authorized dealer.

LIMITATION OF IMPLIED WARRANTIES
All implied warranties, including warranties of merchantability and fitness for a particular purpose, are limited in duration to the length of this warranty.

EXCLUSION OF DAMAGES
The liability of Kramer for any effective products is limited to the repair or replacement of the product at our option. Kramer shall not be liable for:

1. Damage to other property caused by defects in this product, damages based upon inconvenience, loss of use of the product, loss of time, commercial loss; or:
2. Any other damages, whether incidental, consequential or otherwise. Some countries may not allow limitations on how long an implied warranty lasts and/or do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations and exclusions may not apply to you.

This warranty gives you specific legal rights, and you may also have other rights, which vary from place to place.

NOTE: All products returned to Kramer for service must have prior approval. This may be obtained from your dealer.

This equipment has been tested to determine compliance with the requirements of:

EN-50081: “Electromagnetic compatibility (EMC); generic emission standard.
Part 1: Residential, commercial and light industry”
EN-50082: “Electromagnetic compatibility (EMC) generic immunity standard.
Part 1: Residential, commercial and light industry environment”
CFR-47: FCC Rules and Regulations:
Part 15: “Radio frequency devices
Subpart B Unintentional radiators”

CAUTION!
Servicing the machines can only be done by an authorized Kramer technician. Any user who makes changes or modifications to the unit without the expressed approval of the manufacturer will void user authority to operate the equipment.

Use the supplied DC power supply to feed power to the machine.
Please use recommended interconnection cables to connect the machine to other components.
For the latest information on our products and a list of Kramer distributors, visit our Web site: www.kramerelectronics.com, where updates to this user manual may be found. We welcome your questions, comments and feedback.

Safety Warning:
Disconnect the unit from the power supply before opening/servicing.
