RS3000 HEATER WITH TEMPERATURE REGULATION SYSTEM

Model 5812

This innovative heater with temperature regulation system is unlike any portable heater in its class. Its ingeniously engineered heat regulation system automatically adjusts the heat output as the temperature of the room changes for the ultimate in comfort. Not too hot, not too cold … just right. Fan-forced circulation delivers heat at floor level and rises to surround you in warmth. Best of all, its space-saving design allows it to be placed at the wall and out of the way, minimizing clutter.
