SUPERB PICTURE QUALITY

Clear View with Non-glare Coating
Viewers can be annoyed by unnecessary reflections when watching a screen under brightly lit conditions. The UH5F-H series has resolved such inconveniences by increasing the level of haze, which enhances visibility and text readability.

ULTRA HD Resolution
With the resolution that is 4 times higher than FHD, it makes the color and details of the contents more vivid and realistic. In addition, the wide viewing angle applied with an IPS panel, provides clear contents with no distortion.

SLEEK AND PRACTICAL DESIGN

Narrow Bezel & Slim Depth
This series has a smaller bezel size and thickness, which saves space and enables easy installation. In addition, it increases the immersive experience from the screen and provides a sophisticated design, improving the décor of the space where the product is installed.

Detachable Logo and Built-in Speaker
This series is equipped with a new transparent logo which is well organized with surroundings. Also, its removable feature gives users flexibility for installation. Contents will be enriched with sound effects from built-in speakers, without the need for purchasing or installing external speakers.
PRODUCT RELIABILITY

**IP5x Certified Design**

The IP5x Dust-Proof Certification ensures that the product is completely protected from dust, eliminating the risk of performance degradation.

**30° Tilting Installation**

When a display is installed at high places, it is usually tilted for the user’s comfort viewing. In consideration of this, the installation with 30 degrees of tilt* is supported.

* Tilt installation of up to 30 degrees facedown is supported. (In conditions within 30°C temperature, 50% humidity)

EASY INSTALLATION

**Auto Screen Rotation**

This series automatically detects its orientation (landscape or portrait mode) in the initial installation step, so manual rotation set-up process isn’t required. The direction of OSD and background contents will be already set when you turn on a display at first.

**Fine Adjustment**

This series is equipped with a “horizontal sensor” which shows users how the device is tilt, so that it can be precisely installed.
**High-Performance with webOS**

Built-in Quad Core SoC can execute several tasks at once while providing smooth content playback without the need for a media player. Also, LG webOS platform enhances user convenience with intuitive GUI and simple app development tools.

**Various Sensor Applications**

LG webOS smart signage platform easily supports connections with external sensors such as GPIO, NFC/RFID, temperature sensors, etc., via USB plug-in. The overall cost for maintenance is reduced as there’s no need to purchase additional software or media players for creating value-added solutions.

---

**MEETING ROOM SOLUTION COMPATIBILITY**

**Compatible with AV Control System**

The UH5F-H series has been certified Crestron Connected® for high compatibility with professional AV controls to achieve seamless integration and automated control*, boosting business management efficiency.

* Network based control

**Compatible with Video Conference System**

For the optimum visual meeting, the UH5F-H series has certified its compatibility with Cisco System that offers powerful and integrated control* for a smarter video conference, eliminating a waste of time for setting up the picture quality or changing input on incoming calls.

* Using an HDMI cable connection
