UHD Signage 65/55/49/43" UH5F-H

LG UHD Signage

Clear View with Non-glare Coating	**4K UHD** Superb Picture Quality	Sleek and Practical Design
Product Reliability	webOS Smart Platform	Meeting Room Solution

SUPERB PICTURE QUALITY

Without Non-glare Coating   With Non-glare Coating

FULL HD   1,080   1,920

ULTRA HD   2,160   3,840
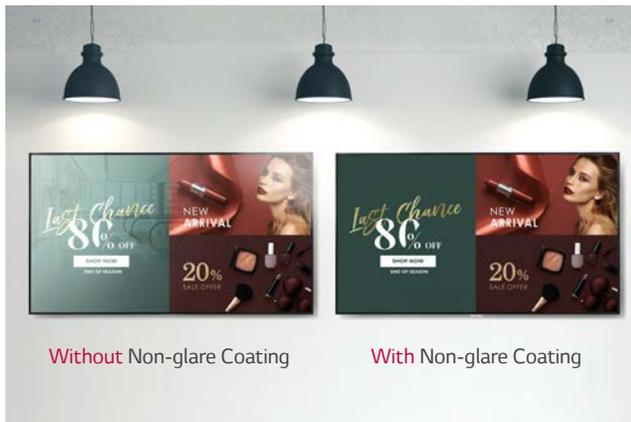

## Clear View with Non-glare Coating

Viewers can be distracted by unnecessary reflections when watching a screen under brightly lit conditions. The UH5F-H series has resolved such inconveniences by increasing the level of haze, which enhances visibility and text readability.
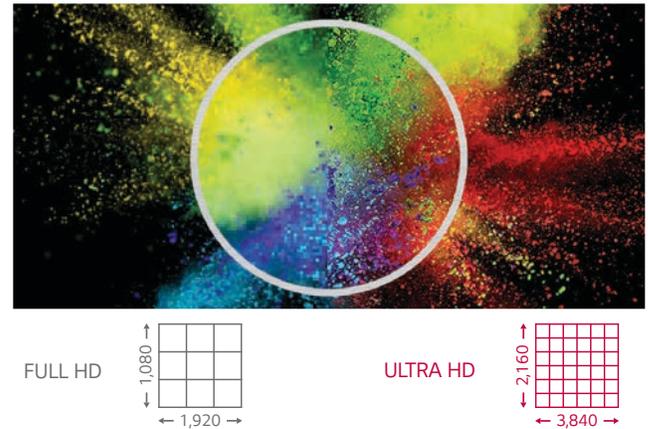

ULTRA HD Resolution

With resolution that is 4 time higher than Full HD, Ultra HD makes the color and details of the contents more vivid and realistic. In addition, the wide viewing angle enabled by LG IPS Panel, provides clear contents with no distortion.

SLEEK AND PRACTICAL DESIGN

9.9 mm
43" 8.4 mm

39.9 mm

14.4 mm
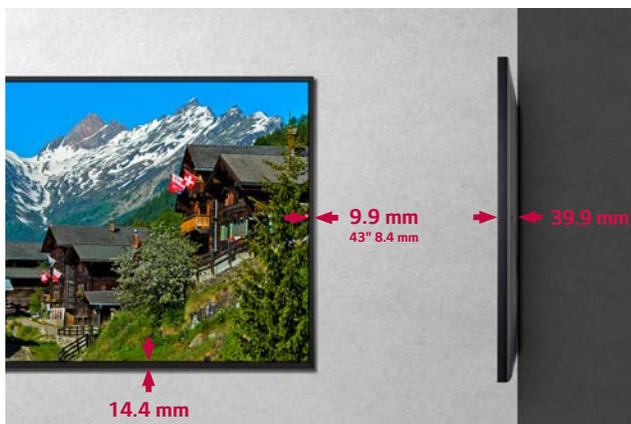

Narrow Bezel & Slim Depth

This series has a smaller bezel size and thickness, which saves space and enables easy installation. In addition, it increases the immersive experience from the screen and provides a sophisticated design, improving the décor of the space where the product is installed.

Detachable Logo and Built-in Speaker

This series is equipped with a new transparent logo which is well organized with surroundings. Also, it is removable so users have flexibility during installation. Contents will be enriched with sound effects from built-in speakers, without the need for purchasing or installing external speakers.

PRODUCT RELIABILITY

IP5x Certified Design

The IP5x Dust-Proof Certification ensures that the product is completely protected from dust, eliminating the risk of performance degradation.

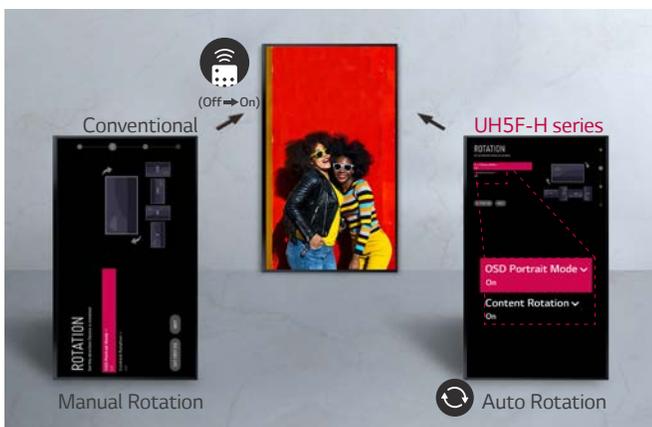

30° Tilting Installation

When a display is installed at high places, it is usually tilted for the user's comfort viewing. In consideration of this, the UH5F series supports the installation with 30 degrees of tilt*.

* Tilt installation of up to 30 degrees facedown is supported.
  (In conditions within 30°C temperature, 50% humidity)

EASY INSTALLATION

Auto Screen Rotation

This series automatically detects its orientation (landscape or portrait mode) in the initial installation step, so manual rotation set-up process isn't required. The direction of display and background contents will be already set when you turn on a display at first.
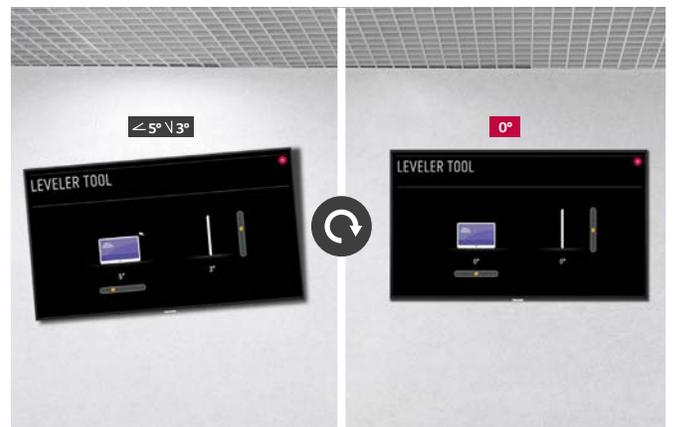

Fine Adjustment

This UH5F-H series is equipped with a "horizontal sensor" which shows users how the device is tilt, so that it can be precisely installed.

webOS SMART SIGNAGE PLATFORM
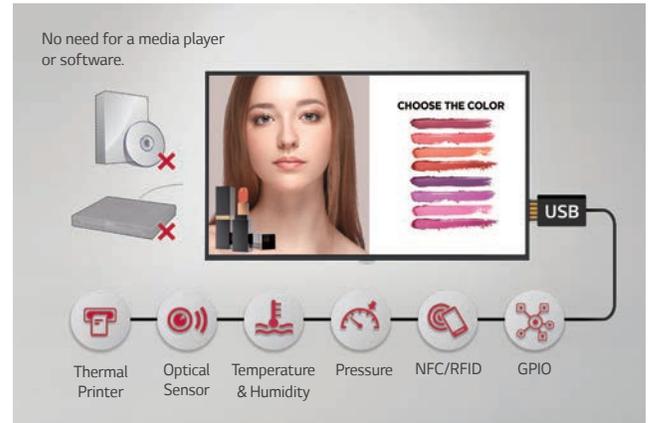

High-Performance with webOS

The UH5F-H series has a built-in Quad Core System-on-Chip (SoC) that can execute several tasks at once while providing smooth content playback without the need for a media player. Utilizing the SoC, LG's webOS smart signage platform has a convenient graphical user interface and simple app development tools.

Various Sensor Applications

LG webOS smart signage platform easily supports connections with external sensors such as GPIO, NFC/RFID, temperature sensors, etc, via USB plug-in. That means there is no cost to purchase or maintain additional software or media players for creating value-added solutions.

MEETING ROOM SOLUTION COMPATIBILITY

Compatible with AV Control Systems

The UH5F-H series has been certified Crestron Connected® for high compatibility with professional AV controls to achieve seamless integration and network-based control, boosting business management efficiency.

Compatible with Video Conference System

The UH5F is compatible with Cisco conferencing systems that offer powerful HDMI-based control for a smarter video conference experience that avoids wasted time setting up the picture or input settings.
