LG CreateBoard™ TR3DJ (86" / 75" / 65")

Bringing People Together

LG's whiteboard brings us together across platforms, regardless of the collaboration space.

The TR3DJ interactive whiteboard provides a versatile platform that allows employees, teams, crew, and mission critical command staff to collaborate, display, annotate, and share content from a wide variety of sources.

 Smooth Touch & Writing Experience

 Connection & Sharing

 User Friendly Experience

 Security & Compatibility

20 Point Multi Touch

Minimal Air Gap

Screen Mirroring

Integrated Speaker and Wi-Fi Module

Over the Air OS Updates

Rolling Cart Capable

Energy Efficient (EU ErP Compliant)

SMOOTH TOUCH & WRITING EXPERIENCE

Multi Touch

Up to 20-points of multi-touch can be accomplished simultaneously to deliver an interactive experience that makes collaboration a breeze. LG's TR3DJ CreateBoard™ is designed to enhance group work sessions in conference rooms, huddle spaces, global seminar spaces or Emergency operations centers.

Enhanced Visibility with Low Parallax

The TR3DJ series whiteboard features a scant 1mm gap between the screen and tempered glass, greatly reducing parallax issues for a more precise touch and excellent writing experience.

Dual Pen & Dual Color

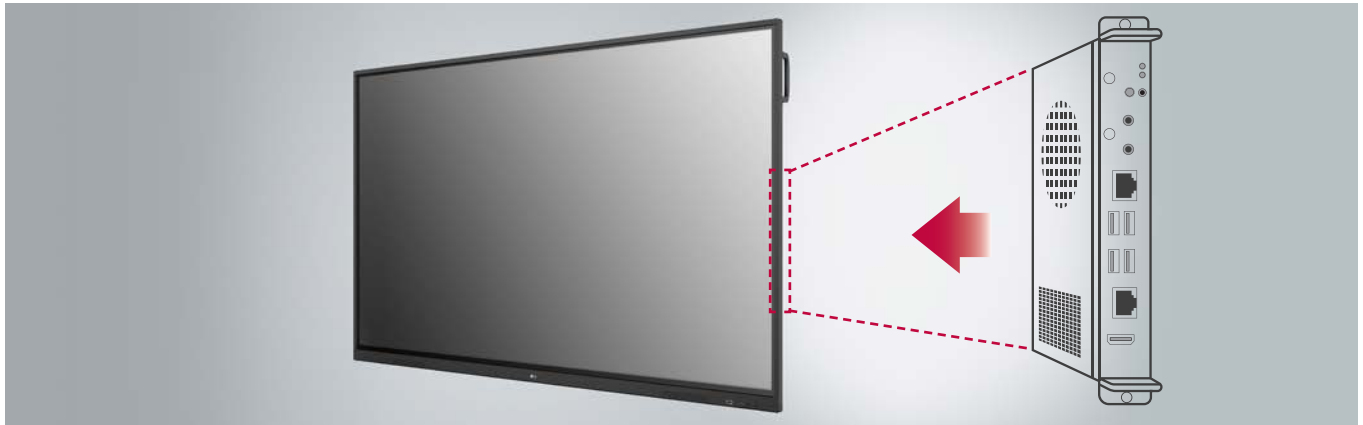

To better enhance simultaneous use, the stylus pens come in two different colors and two different tip sizes (3mm and 8mm).

Easy Writing Experience

The TR3DJ series allows you to write and annotate on virtually any input source to deliver a more efficient and smooth writing experience.

EASY CONNECTION & SHARING

Built-in OPS Slot

For more expanded functions, the TR3DJ series supports Open Pluggable Specification (OPS) slots, allowing you to mount an OPS device easily and conveniently to the back of the digital board without the hassle of connecting to an external device.

ScreenShare Pro

ScreenShare Pro enables you to display up to six shared screens, or a file on a screen, in real-time. It also allows users to share via Chromecast or with Apple device mirroring on the same network without needing an additional application.

Connectivity Options

The TR3DJ series provides a wide variety of connection options, including Bluetooth wireless connections to various devices such as a speaker, mouse, keyboard, and others. Wired connection options include HDMI (x3), Analog RGB, RS232, and USB input.

* All images are intended to help you understand, and there may be some differences in practical use.

USER FRIENDLY EXPERIENCE

Built-in Web Browser

The TR3DJ series supports an embedded Android web browser, allowing you to search the web easily and quickly without connecting to an external tablet or computer.

Convenient Toolbar

An intuitive toolbar provides convenient access to any necessary tools. The annotation feature works on virtually all file types, while the Spotlight feature allows you to highlight sections you wish to emphasize. Countdown and Stopwatch are two features that can help you manage class time effectively.

Audio Experience

The TR3DJ series features two 10-watt speakers for high-quality, crisp sound reproduction. A speaker is located within both sides of the front bezel for added dispersion throughout the room.

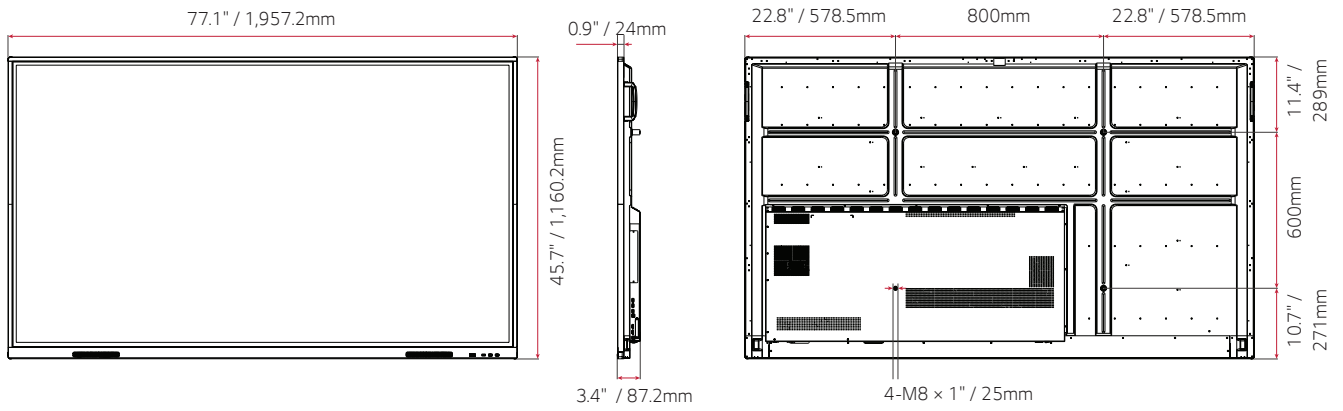

USB Block

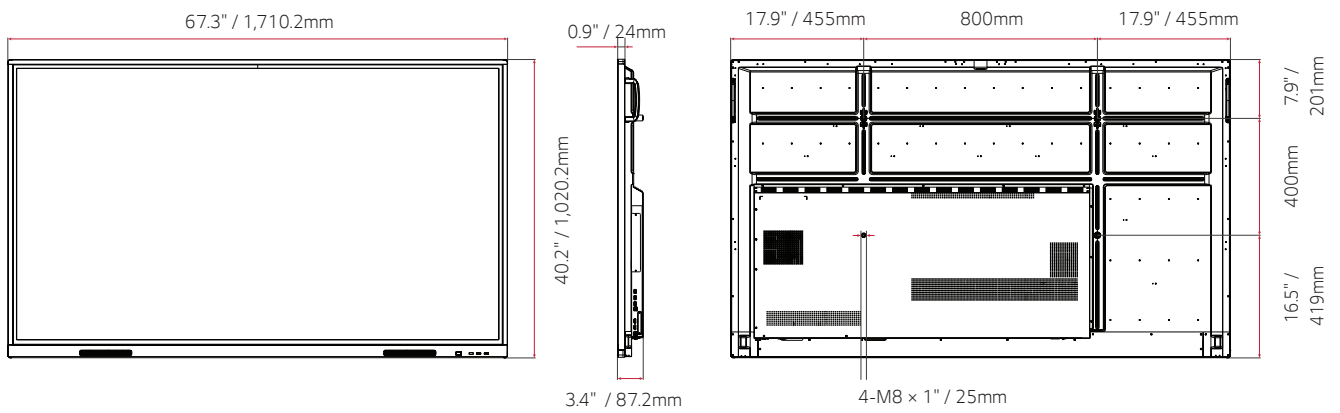

USB Block Mode is an added security measure that helps prevent data from being copied to unauthorized devices, an essential feature in spaces where security is critical.
