LS-71-072 Listen iDSP Advanced Level IV Stationary RF System (72 MHz)

Product Overview:

Offering coverage up to 1,500 ft. (457.2 m) for venues handling as many as 100 visitors or clients, the LS-71 Stationary RF System from Listen Technologies is the perfect high-capacity assistive listening solution for permanent installations. The complete package includes our LT-800-072 Stationary RF transmitter and four of our high-performance LR-5200-072 iDSP receivers, as well as everything needed to get set up immediately.

The LS-71 system comes with our LA-381 Intelligent 12-unit charging tray, which provides plenty of capacity for charging, storing, and managing up to twelve (12) receivers. The high-capacity tray allows room for upgrading and expanding your RF system as the demands of your venue grow.

An assistive listening notification signage kit, cable management unit, log book, disinfecting wipes, and more are also included to create a convenient and complete solution for offering assistive listening immediately.

Highlights:

- Advanced DSP SQTM noise reduction technology delivers 20 dB less noise and hiss than any other listening device
