

LWR-1020 Wi-Fi Audio Receiver

Listen EVERYWHERE from Listen Technologies is a simple and affordable Wi-Fi streaming solution that allows people to use their smartphones for assistive listening.

The new LWR-1020 Wi-Fi audio receiver is a dedicated assistive listening receiver for use with a Listen EVERYWHERE. Your guests can choose to use their own smartphone or borrow a LWR-1020 to access the Wi-Fi streamed audio.

ADA compliant

Compliant with the Americans with Disabilities Act for accessibility.

Virtually No Latency

No lip sync issues! Low latency means the audio does not lag.

Give Guests a Choice

Let guests choose to use their device or borrow the LWR-1020 receiver.

Bluetooth® Connectivity

Connect to the audio using wireless headphones, earbuds, or hearing aids.

Easy to Use

Turn on the device, select the desired channel, and adjust the volume.

T-Coil Friendly

The LWR-1020 is compatible with t-coil enabled hearing aids and cochlear implants.

Buy the new LWR-1020 Wi-Fi Audio Receivers to use with an existing Listen EVERYWHERE system or purchase the LW-10 Listen EVERYWHERE system that includes everything needed to meet ADA compliance.

Available Accessories

SKU	Product	Description
LA-511	Protective Case	Protect your LWR-1020 Wi-Fi Audio Receivers with this rugged case from OtterBox. This sleek profile case provides good coverage of the corners, edges, and back of the receiver to protect it from accidental drops and impacts.
LA-164	Ear Speaker	One of Listen's most popular earpieces, the ear speaker fits easily over the ear.
LA-165	Headphones	Dual ear, over-the-head style earphones provide clear sound to both ears. The headphones provide users with a traditional way of hearing your message.
LA-161	Single Ear Bud	The LA-161 is a single ear bud, friction fit with one replaceable cushion.
LA-304	Awareness Kit	Achieve compliance with assistive listening regulations while also ensuring that visitors know about your system's availability. Each kit includes one (1) clearly printed plaque and one (1) window sticker.
LA-166	Neck Loops	Neck loops allow hearing aid users to connect to the audio using the telecoil in their hearing aids.
