

Product Overview:

The LA-404 universal single ear bud is a popular in-ear headphone solution designed to sit just inside the ear, allowing some ambient noise to filter in, while providing quality audio and the freedom of movement without cable snags. Universally styled to fit securely in large or small ears, it provides a comfortable, secure fit in either the right or left ear.

The single ear bud can be used with the integrated neck loop/lanyard around the neck via the shorter connection cable or with the belt clip, or concealed in a pocket using the included 3.5 mm extension cable.

The hard plastic can be easily and hygienically cleaned and reused using a Listen disinfecting wipe (LA-901 or LA-902).

Disposable foam cushions (LA-163) are available for easy replacement.

Highlights:

- Sits just inside the ear, allows some ambient noise with quality audio without cable snags
- Universally styled to fit securely in large or small ears in either the right or left ear
- Use with integrated neck loop/lanyard or 3.5 mm extension cable
- Hard plastic can be easily and hygienically cleaned and reused

Includes:

- One (1) LA-404 Universal Single Ear Bud
- One (1) LA-434 Earphone Extension Cable

Architectural Specification:

The LA-404 Universal Single Ear Bud shall provide an audio response of 20 Hz to 20 KHz with an impedance of 32 ohms. The device shall be easy to put on, easy to clean and shall provide a cable length of 13 in (33 cm) that reduces cable tangling. The device shall have replaceable foam cushion. The LA-404 is specified.
