

Product Overview:

The LA-405 universal stereo ear bud is a popular in-ear headphone solution designed to sit just inside the ear, allowing some ambient noise to filter in, while providing quality audio and the freedom of movement without cable snags. Universally styled to fit securely in large or small ears, it provides a comfortable, secure fit in both ears.

The ear buds can be used with the integrated neck loop/lanyard around the neck via the shorter connection cable or with the belt clip, or concealed in a pocket using the included 3.5 mm extension cable.

The hard plastic can be easily and hygienically cleaned and reused using a Listen disinfecting wipe (LA-901 or LA-902).

Disposable foam cushions (LA-163) are available for easy replacement.

Highlights:

- Sits just inside the ear, allows some ambient noise with quality audio without cable snags
- Universally styled to fit securely in large or small ears in both ears
- Use with integrated neck loop/lanyard or 3.5 mm extension cable
- Hard plastic can be easily and hygienically cleaned and reused
