## LEGRAND NETWORK METERED POWER DISTRIBUTION UNIT (PDU)

Network Metered PDUs enable line level power metering in real time. Allowing remote monitoring of the load level, custom notifications, and user specified conditions. Each Network Metered PDU provides visibility and reporting of power usage on the PDUs Color LCD screen and to tablets, smart phones, or computers from nearly anywhere.

### FEATURES

- **Networked Controller:** Enables remote and local monitoring of the PDU and peripherals
- **Load Monitoring:** View the power being drawn for the entire PDU, receive notifications of potential issues or when near max amperage draw
- **User-Defined Notifications:** User-defined thresholds for power draw or environmental factors with notifications if threshold have been met
- **Remote Management:** Manage and configure the unit from any location
- **High-Resolution Color LCD:** Displays energy reading, current, and voltage; important configuration settings, alarm settings, and control outlets which simplifies commissioning
- **Integrated Locking Outlets on IEC Receptacles:** Eliminates the need for special locking cords
- **Rotatable Cord:** Enables maximum flexibility for routing the input plug—simplifying the installation of Zero U PDUs
- **Mounting Types:** Available in horizontal and vertical configurations to ensure power distribution is optimally located
- **PDU Linking:** Cascade up to 16 PDUs via Ethernet or USB—this can minimize port usage on network switches or consolidate accessibility to multiple PDUs from a single IP address
- **Hydraulic-Magnetic Breakers:** Provide less heat dependent local protection and quick recovery from circuit overload, by utilizing a two-step response curve—these breakers provide a delay on normal overcurrents, while tripping quickly on short circuits
- **Optional Environmental Sensors and Remote Locking:** Can alert to any threats of downtime or potential physical security breaches
- **Software Interoperability:** Seamlessly integrate into any monitoring software with open JSON-RPC interface  
Compatibility – SNMP, LUA, Java, JavaScript, and Perl
