

Multi Camera Live Streaming Kit

Quick Setup Guide

500785

1

Please validate that you received all contents listed below:

(1) Camera

(1) Streamer/Transmitter

(1) 4x1 Switcher

(1) IR Emitter

(2) HDMI Cables

(1) Wireless Mic Kit

2

Download the MuxStream Desktop App to manage the above devices at: www.muxlab.com/muxstream or at the **Apple App Store** for iOS and **Google Play Store** for Android, available for Tablet and Smartphones.

3

Internet access **required** to stream to:

WiFi is **required** if the MuxStream App is run from a wireless device.

4

Connect the 1st HDMI cable to the Camera HDMI port and to the HDMI input port 1 of the 4x1 Switcher. *Additional cameras (sold separately) may be similarly connected in sequence to the 4x1 switcher.*

5

Connect the 2nd HDMI cable to the 4x1 Switcher HDMI output port and to the HDMI port of the Streamer/Transmitter.

6

Connect the Mic Wireless Receiver to the Streamer/Transmitter (Audio Input port). *Make sure the Mic and its Receiver are charged.*

7

Connect the IR Emitter to the Streamer/Transmitter (IR port), and secure the Emitter screen to the IR Sensor screen located on the front of the HDMI 4x1 Switcher.

8

Connect the Camera (Ethernet Port) to your Router via a Cat 6 (or better) Ethernet cable (not included).

9

Connect the Streamer/Transmitter (Ethernet Port) to your Router via a Cat 6 (or better) Ethernet cable (not included).

10

Power **all** the supplied devices above. *Make sure to turn on the wireless Mic and its Receiver in close proximity for them to **pair**.*

11

Open the MuxStream App you have downloaded in **step 2** then follow the onscreen instructions to complete the configuration.
