NEC MultiSync® ME Series Large Format Displays

43", 50", 55" and 65" Commercial Displays Ideal for Digital Signage Applications
Cost-conscious commercial design with full metal chassis allows for seamless integration into any digital signage environment while maintaining the commercial ruggedness necessary for retail, education and corporate signage

**Focused Design, Meaningful Message**

Create pixel-perfect imagery at a cost-conscious price point with the new fully commercial NEC ME Series large format displays. By focusing on customer needs and maintaining expected NEC quality, the ME series gives customers a reliable mainstream digital signage display that can support both landscape and portrait orientations while also allowing customers the modularity possibilities to customize their needs dependent on their application and use. The new series contain a full metal mechanical chassis, allowing for a more robust design necessary for commercial applications while maintaining the attractive aesthetics that allow the focus of onlookers to be on what matters – the message. Simple and targeted connectivity options allow customers to have the up-to-date options that they need while not having to overpay for excess and unused interfaces. The NEC ME series boasts 400 cd/m² brightness which is ideal for a majority of digital signage applications in corporate, education, house of worship, retail and grocery store environments when the focus should be on the message, not the budget.

**High-End UHD Picture Quality**

By supporting native 3840 x 2160 resolution with HDR compatibility across the entire ME series lineup, imagery and messaging can become more vivid and lifelike than ever before!

**Even Bezel Design**

Completely even bezel design along all 4 sides of the display allow for a true, commercial grade look when mounted in either landscape or portrait orientations.

**Cisco Compatible Partner:**

Full compatibility with Cisco WebEx Kit products. The Cisco WebEx Kit is a professional video conferencing tool that has everything integrated into a single soundbar including microphone(s), camera(s), the speaker and the Video Conferencing Codec. This, combined with the large format NEC displays provide the ultimate conferencing solution.
**Professional Modularity**

The ME series gives customers everything they need for their digital signage application while also offering the ability to enhance their screen through multiple integrated professional technologies. The ME Series accepts Intel® Smart Display Modules Large or Small through clever mechanical and electrical design allowing for sleek all-in-one intelligence and interoperability in a small form factor setting. This allows for the flexible implementation of Intel® processor-based products directly into the NEC ME series products without having to deal with the hassles of mounting external devices and running video or audio cabling. Audio, video, control and power signals are all internal from the Intel® SDM through to the display, simplifying installations and allowing for clean and easy set-up.

The ME series also expands on the success of earlier display line-ups by allowing for the optional implementation of a Raspberry Pi Compute Module 4 directly into each display (available Q2 2021). The Raspberry Pi Compute Module 4 greatly outperforms previous versions by offering gigabyte network speeds, faster CPU processing and true 4K support. The new version also comes imaged with the new and user-friendly NEC Mediaplayer. Through an intuitive user-interface, the NEC Media Player allows you to load, schedule and edit playlists, access internal storage, access online media through an internal browser or even image the RPi to qualified CMS partner platforms - all through the supplied NEC remote control or remotely through a web-interface!

**Input Detect Functionality**

This feature allows for the customer to prioritize up to 3 inputs so that if a primary source goes down, the display will automatically switch to whatever the customer has prioritized next. The first detect option also allows for the display to automatically turn onto any source that plugs into it, allowing the display to wake on any synced signal.

**Typical Display**

If the source fails, this results in a blank screen

**ME Series**

If the source fails, the display automatically switches to the next prioritized source, allowing for zero down time on the display

**First Detect**

Setting the display to First Detect would allow for the display to automatically turn on when any source is plugged into it.

---

**NaViSet Administrator 2**

This software is an all-in-one remote support solution that runs from a central location and provides monitoring, asset management and control functionality of NEC display devices and Windows computers. It is ideal for multi-device installations over arrays as it allows for task management, reporting and on-demand control options. Control your entire NEC ecosystem through this free optional asset management software!

### Connectivity

#### Input Terminals
- Digital HDMI 2.0 x 2, DP 1.2 x 1
- Analog N/A
- Audio N/A
- External Control N/A
- LAN (1000Mbit), 3.5mm Mini Jack IR Remote, RS-232C
- Data USB 2.0 (5V/2A, Media Player)
- USB (Media Player / Power)
- Audio 3.5mm Mini Jack
- Analog N/A
- External Control N/A
- Audio N/A
- Analog N/A

#### Output Terminals
- Digital N/A
- Analog N/A
- Audio N/A

### Sensors

- Ambient Light Sensor Optional (KT-R33)
- Human Sensor Optional (KT-R33)
- Temperature Sensor Integrated and Programmable
- NFC Sensor N/A

### Environmental Conditions

- Operating Temperature 0 to 40C
- Operating Humidity 20 - 80%
- Operating Altitude 3000m (9843ft)

### Limited Warranty

3 years Advanced Replacement
