## Who Are We?

Technology progresses, guests are on the move and design trends forward. Your opportunities are endless but sometimes it can feel hard to keep up. We're here to help. We know hotels, technology and design and we're leading the charge to bring them all together for your rooms.

Our products are different, because we built a different kind of company. Our team is the trifecta of an award-winning product designer backed by experienced consumer electronics' manufacturing and led by seasoned hotel-savvy management.

We're on the pulse of the latest tech and design trends to appeal to all different guests from tech savvy road warriors and adventure craving Millennials, to families and guests looking for traditional comfort. With our products your guest will feel at home with tech in their room.

**NONSTOP™**

## Designed for Hotels

Our products are our designs. From the first sketch through delivery, they are purposely designed to deliver on your brand's commitment to delight your guests. We believe design is the heartbeat of the product and we hold it near. We don't source our designs from stock factory options or outsource to consultants. In the Nonstop Design Studio, we scrutinize every function, button, curve and finish.

**STOP™ DESIGN STUDIO NONS**

### Guests First

Our products were designed from the ground up with one thing in mind - guest satisfaction. With Qi Fast Wireless Charging, dual USB ports and other guest friendly features like a dimmable display and Lightsleeper™, your guests will never go looking for an outlet again.

### Safe & Secure

Unique to consumer products, hospitality products live in a public space and need to withstand daily use looking good, working reliably and staying put in the room. Our products are equipped with security features as well as features to minimize the service burden on your staff including easy time set and our innovative battery-free clock backup.

### Decor Driven Design

The decor of your room is the heart of the guest experience in your hotel. If you're the kind of hotel that differentiates with design, then you need designs that are different. From form factor to unique decor inspired finishes, even our stock options are anything but standard. And if you're the kind of hotel that crafts every detail in the room, then you can work with the Nonstop Design studio to develop designs that are as one-of-a-kind as your brand.
