WE ARE NONSTOP

Technology progresses, guests are on the move and design trends forward.

Our products are uniquely compelling for hotels because our business is a unique collaboration of award-winning product design, backed by experienced consumer electronics' manufacturing and led by seasoned hotel-savvy management.

We're on the pulse of the latest tech and design to appeal to a wide variety of today's guests. From tech savvy road warriors and adventure craving Millennials, to families on vacation and guests looking for traditional comfort. Nonstop is technology that makes guests feel at home.

Guests First

We designed our products from the ground up to delight today's guests who are focused on their mobile phones and portable devices. With Qi Fast Wireless Charging and Dual USB ports, they'll never go hunting for an outlet again. Plus friendly features like dimmable displays and Lightsleeper™ means they are sure to sleep well too.

Designed for Hotels

We understand the functional needs for hotels. Our products are equipped with a wide array of hotel-specific features like single-day alarms, Auto-DST, and security features to prevent theft. Minimize the service burden on your staff with easy time set and our innovative battery-free clock memory.

Decor Driven Design

The days of boring boxes with cluttered buttons are over. If you're the kind of hotel that differentiates with design, then you need modern designs that are different too. From form factor to unique decor inspired finishes, even our stock options are anything but standard.

UV Station™

CLEAN & CHARGE

UV Station is a next generation nightstand amenity that uses the power of UV-C to sterilize remote controls, phones and other personal devices. The wireless Qi charging stand and front facing dual USB ports keep guests' devices charged.

Clean Remotes are Good for Everyone

Time Magazine found that the single dirtiest item in hotel rooms was the remote, which delivered bacteria readings as high as 498 - 5 times the acceptable level.

Phones and more Mobile phones and other personal devices are believed to be conduits for the transfer of bacteria and viruses. UV Station solves this problem in a effective, safe and reliable way.
