and online briefing sessions.**

### Camera performance and functions assure high-quality video streaming

Featuring 4K resolution, wide-angle coverage of up to 74.1° horizontal and a max. 24x optical zoom, the UE50/40 maintains superb build quality and functionality for streaming videos.

The Auto Tracking Software and image stabilizer function contribute to stable video streaming.

### Small size, quietness and stability for anywhere use

The UE50/40 are lightweight and compact. The new direct-drive motor with an operating sound of NC25 or lower achieves highly accurate stopping position precision and enables accurate camerawork, so they can be installed and used at any video shooting sites. The UE50/40 supports NDI®|HX\*1 and SRT\*2 to assure stable and safe streaming of videos.

\*1 In this instance, NDI® is used to indicate low latency with high bandwidth NDI®, NDI®|HX is used to indicate high efficiency low bandwidth NDI®|HX. In the NDI®|HX mode, 4K video signals cannot be output. AW-UE50/AW-UE40 supports NDI®|HX version 2 and Full HD output.

### Excellent system flexibility to achieve smart wiring and smooth operation

By using a Panasonic remote camera controller or linking with available software, the camera can be easily installed, managed and operated. The UE50/40 are suitable for replacing an existing camera or for expanding the present system.

# Invaluable features and functions to deliver flexibility to any video shooting needs.

## Supports SRT<sup>1</sup> to ensure stable video streaming.

The UE50/40 supports SRT, a next-generation video transport protocol which works well even with an unstable network environment and which provides robust security.

\*1 Abbreviation for Secure Reliable Transport

## Use in Online Conferences as Web Camera.

The UE50/40 supports UVC\* so the video and audio signals can be transmitted over USB. By using the PTZ Virtual USB Driver software and connecting with a LAN cable, it is possible to use the UE50/40 as a USB camera. Linkage with Panopto is also possible.

\*UVC: USB video class  
A standard for connecting video-handling devices such as webcams to a computer via USB.

## Supports 4 Interfaces

The UE50/40 supports four output interfaces—3G-SDI\*, HDMI, IP and USB—so it can be used with a wide range of devices.

\*3G-SDI is supported only by AW-UE50.

## Supports NDI<sup>®</sup>|HX version 2

The UE50/40 realizes effective IP transmission of high-image-quality videos even with limited bandwidth. Since the video source can be accessed from any device on the same network, even devices with unknown IP addresses are automatically recognized.

\*NDI<sup>®</sup> is a new IP protocol developed by NewTek, Inc. This protocol supports live video production workflows.  
\*NDI<sup>®</sup> is a registered trademark of NewTek, Inc. in the United States.

## Single controller\* can control up to 200 camera units.

By using the free software, PTZ Control Center, or connecting a Panasonic remote camera controller, multiple remote camera units can be controlled at once from the single controller for easy management and control.

\*This function can be used only with Panasonic PTZ camera controllers AW-RP150GJ and AW-RP60GJ.
