1. Safety Instructions

Safety precautions and maintenance

WARNING: Use of controls, adjustments or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards and/or mechanical hazards.

Read and follow these instructions when connecting and using your display:

Operation:
• Keep the display out of direct sunlight and away from stoves or any other heat sources.
• Keep the display away from oil, otherwise the plastic cover may be damaged.
• Remove any object that could fall into ventilation holes or prevent proper cooling of the display’s electronics.
• Do not block the ventilation holes on the cabinet.
• When positioning the display, make sure the power plug and outlet are easily accessible.
• When turning off the display by detaching the power cord, wait 6 seconds before re-attaching the power cord for normal operation.
• Ensure the use of an approved power cord provided by Philips at all times. If your power cord is missing, please contact your local service center.
• Do not subject the display to severe vibration or high impact conditions during operation.
• Do not knock or drop the display during operation or transportation.
• The eye bolt is for usage in short-time maintenance and installation. We suggest not to use the eye bolt for more than 1 hour. Prolong usage is prohibited. Please keep a clear safety area under the display while using the eye bolt.

Maintenance:
• To protect your display from possible damage, do not put excessive pressure on the LCD panel. When moving your display, grasp the frame to lift; do not lift the display by placing your hand or fingers on the LCD panel.
• Unplug the display if you are not going to use it for an extensive period of time.
• Unplug the display if you need to clean it with a slightly damp cloth. The screen may be wiped with a dry cloth when the power is off. However, never use organic solvent, such as, alcohol, or ammonia-based liquids to clean your display.
• To avoid the risk of shock or permanent damage to the set, do not expose the display to dust, rain, water or an excessively moist environment.
• If your display becomes wet, wipe it with dry cloth as soon as possible.
• If a foreign substance or water gets in your display, turn the power off immediately and disconnect the power cord. Then remove the foreign substance or water, and send the unit to the maintenance center.
• Do not store or use the display in locations exposed to heat, direct sunlight or extreme cold.
• In order to maintain the best performance of your display and ensure a longer lifetime, we strongly recommend using the display in a location that falls within the following temperature and humidity ranges.
  - Temperature: 0-40°C  32-104°F
  - Humidity: 20-80% RH
• LCD panel temperature need to be 25 degrees Celsius at all time for better luminance performance.

IMPORTANT: Always activate a moving screen saver program when you leave your display unattended. Always activate a periodic screen refresh application if the unit will display unchanging static content. Uninterrupted display of still or static images over an extended period may cause “burn in”, also known as “after-imaging” or “ghost imaging”, on your screen. This is a well-known phenomenon in LCD panel technology. In most cases, the “burned in” or “after-imaging” or “ghost imaging” will disappear gradually over a period of time after the power has been switched off.

WARNING: Severe “burn-in” or “after-image” or “ghost image” symptoms will not disappear and cannot be repaired. This is also not covered under the terms of your warranty.

Service:
• The casing cover should be opened only by qualified service personnel.
• If there is any need for repair or integration, please contact your local service center.
• Do not leave your display under direct sunlight.
If your display does not operate normally, having followed the instructions set out in this document, please contact a technician or your local service center.

**Stability Hazard**

The device may fall, causing serious personal injury or death. To prevent injury, this device must be securely attached to the floor/wall in accordance with the installation instructions.

**Read and follow these instructions when connecting and using your display:**

- Unplug the display if you are not going to use it for an extensive period of time.
- Unplug the display if you need to clean it with a slightly damp cloth. The screen may be wiped with a dry cloth when the power is off. However, never use alcohol, solvents or ammonia-based liquids.
- Consult a service technician if the display does not operate normally when you have followed the instructions in this manual.
- The casing cover should be opened only by qualified service personnel.
- Keep the display out of direct sunlight and away from stoves or any other heat sources.
- Remove any object that could fall into the vents or prevent proper cooling of the display's electronics.
- Do not block the ventilation holes on the cabinet.
- Keep the display dry. To avoid electric shock, do not expose it to rain or excessive moisture.
- When turning off the display by detaching the power cable or DC power cord, wait for 6 seconds before re-attaching the power cable or DC power cord for normal operation.
- To avoid the risk of shock or permanent damage to the set do not expose the display to rain or excessive moisture.
- When positioning the display, make sure the power plug and outlet are easily accessible.
- **IMPORTANT:** Always activate a screen saver program during your application. If a still image in high contrast remains on the screen for an extended period of time, it may leave an 'after-image' or 'ghost image' on the front of the screen. This is a well-known phenomenon that is caused by the shortcomings inherent in LCD technology. In most cases the afterimage will disappear gradually over a period of time after the power has been switched off. Be aware that the after-image symptom cannot be repaired and is not covered under warranty.
- If provided with a 3-pin attachment plug on the power cord, plug the cord into a grounded (earthed) 3-pin outlet. Do not disable the power cord grounding pin, for example, by attaching a 2-pin adapter. The grounding pin is an important safety feature.

**EU Declaration of Conformity/UK Declaration of Conformity**

This product has been tested and found to comply with the harmonized standards for Information Technology Equipment, these harmonized standards published under Directives of Official Journal of the European Union.

**ESD Warnings**

When user close to the monitor may cause the equipment discharge and reboot to the display of main menu.

**Warning:**

This equipment is compliant with Class A of ENS5032/CISPR 32. In a residential environment this equipment may cause radio interference.

**Federal Communications Commission (FCC) Notice (U.S. Only)**

**NOTE:** This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Use only an RF shielded cable that was supplied with the display when connecting this display to a computer device.
To prevent damage which may result in fire or shock hazard, do not expose this appliance to rain or excessive moisture.

This device complies with Part 15 of the FCC / ISED’s licence-exempt RSSs Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Le présent appareil est conforme aux CNR d’ ISED applicables aux appareils radio exempts de licence. L’exploitation est autorisée aux deux conditions suivantes : (1) le dispositif ne doit pas produire de brouillage préjudiciable, et (2) ce dispositif doit accepter tout brouillage reçu, y compris un brouillage susceptible de provoquer un fonctionnement indésirable.

Envision Peripherals Inc.
490 N McCarthy Blvd, Suite #120
Milpitas, CA 95035
USA

Europe Statement

IMPORTANT NOTE:

The device is restricted to indoor use only when operating in the 5150 to 5350MHz frequency range. (for 5G product only)

Radiation Exposure Statement:

This equipment complies with CE radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & body.

The frequency, mode and the maximum transmitted power in EU are listed below:

2400-2483.5MHz: < 20 dBm (EIRP) (for 2.4G product only)
5150-5250MHz: < 23 dBm (EIRP)
5250-5350MHz: < 23 dBm (EIRP)
5470-5725MHz: < 30 dBm (EIRP)
5725-5825MHz: < 13.98 dBm (EIRP)
Taiwan:

低功率電波輻射性電機管理辦法

取得審驗證明之低功率射頻器材，非經核准，公司、商號或使用者均不得擅自變更頻率、加大功率或變更原設計之特性及功能。

低功率射頻器材之使用不得影響飛航安全及干擾合法通信；經發現有干擾現象時，應立即停用，並改善至無干擾時方得繼續使用。

前述合法通信，指依電信管理法規定作業之無線電通信。低功率射頻器材須忍受合法通信或工業、科學及醫療用電波輻射性電機設備之干擾。

FCC/ISED/CE-RED Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate this equipment.
This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
Operations in the 5GHz products are restricted to indoor usage only.

Déclaration d’exposition aux radiations:

Cet équipement est conforme aux limites d’exposition aux rayonnements ISED établies pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec un minimum de 20cm de distance entre la source de rayonnement et votre corps.

Canada:

Industry Canada statement:

This device complies with RSS-247 of the Industry Canada Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Ce dispositif est conforme à la norme CNR-247 d’Industrie Canada applicable aux appareils radio exempts de licence. Son fonctionnement est sujet aux deux conditions suivantes: (1) le dispositif ne doit pas produire de brouillage préjudiciable, et (2) ce dispositif doit accepter tout brouillage reçu, y compris un brouillage susceptible de provoquer un fonctionnement indésirable.

Radiation Exposure Statement:

This equipment complies with FCC/ISED/CE-RED radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Déclaration d’exposition aux radiations:

Cet équipement est conforme aux limites d’exposition aux rayonnements ISED établies pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec un minimum de 20 cm de distance entre la source de rayonnement et votre corps.
Polish Center for Testing and Certification Notice

The equipment should draw power from a socket with an attached protection circuit (a three-prong socket). All equipment that works together (computer, display, printer, and so on) should have the same power supply source.

The phasing conductor of the room’s electrical installation should have a reserve short-circuit protection device in the form of a fuse with a nominal value no larger than 16 amperes (A).

To completely switch off the equipment, the power supply cable must be removed from the power supply socket, which should be located near the equipment and easily accessible.

A protection mark “B” confirms that the equipment is in compliance with the protection usage requirements of standards PN-93/T-42107 and PN-89/E-06251.

Electric, Magnetic and Electromagnetic Fields (“EMF”)

1. We manufacture and sell many products targeted at consumers, which, like any electronic apparatus, in general have the ability to emit and receive electromagnetic signals.

2. One of our leading Business Principles is to take all necessary health and safety measures for our products, to comply with all applicable legal requirements and to stay well within the EMF standards applicable at the time of producing the products.

3. We are committed to develop, produce and market products that cause no adverse health effects.

4. We confirm that if its products are handled properly for their intended use, they are safe to use according to scientific evidence available today.

5. We play an active role in the development of international EMF and safety standards, enabling us to anticipate further developments in standardization for early integration in its products.
Information for U.K. only

**WARNING - THIS APPLIANCE MUST BE EARTHED.**

**Important:**

This apparatus is supplied with an approved moulded 13A plug. To change a fuse in this type of plug proceed as follows:

1. Remove fuse cover and fuse.
2. Fit new fuse which should be a BS 1362 5A, A.S.T.A. or BSI approved type.
3. Refit the fuse cover.

If the fitted plug is not suitable for your socket outlets, it should be cut off and an appropriate 3-pin plug fitted in its place.

If the mains plug contains a fuse, this should have a value of 5A. If a plug without a fuse is used, the fuse at the distribution board should not be greater than 5A.

Note: The severed plug must be destroyed to avoid a possible shock hazard should it be inserted into a 13A socket elsewhere.

**How to connect a plug**

The wires in the mains lead are coloured in accordance with the following code:

- BLUE - “NEUTRAL” (“N”)
- BROWN - “LIVE” (“L”)
- GREEN & YELLOW - “EARTH” (“E”)

1. The GREEN & YELLOW wire must be connected to the terminal in the plug which is marked with the letter “E” or by the Earth symbol or coloured GREEN or GREEN & YELLOW.
2. The BLUE wire must be connected to the terminal which is marked with the letter “N” or coloured BLACK.
3. The BROWN wire must be connected to the terminal which marked with the letter “L” or coloured RED.

Before replacing the plug cover, make certain that the cord grip is clamped over the sheath of the lead - not simply over the three wires.

本表格依据SJ/T 11364的规定编制。

*: 电路板组件包括印刷电路板及其构成的零部件，如电阻、电容、集成电路、连接器等。
O: 表示该有害物质在该部件所有均质材料中的含量均在GB/T 26572规定的限量要求以下。
X: 表示该有害物质至少在该部件的某一均质材料中的含量超出GB/T 26572规定的限量要求。

上表中打“X”的部件，应功能需要，部分有害物质含量超出GB/T 26572规定的限量要求，但符合欧盟RoHS法规要求（属于豁免部分）。

备注：上表仅做为范例，实际标示时应依照各产品的实际部件及所含有害物质进行标示。

环保使用期限

此标识指期限(十年)，电子电气产品中含有的有害物质在正常使用条件下不会发生外泄或突变，电子电气产品用户使用该电子电气产品不会对环境造成严重污染或对其人身、财产造成严重损害的期限。

《废弃电器电子产品回收处理管理条例》提示性说明

为了更好地关爱及保护地球，当用户不再需要此产品或产品寿命终止时，请遵守国家废弃电器电子产品回收处理相关法律法规，将其交给当地具有国家认可的回收处理资质的厂商进行回收处理，不当利用或者处置可能会对环境和人类健康造成影响。

警告

此为A级产品。在生活环境中，该产品可能会造成无线电干扰。在这种情况下，可能需要用户对干扰采取切实可行的措施。

Обладнання відповідає вимогам Технічного регламенту щодо обмеження використання деяких небезпечних речовин в електричному та електронному обладнанні, затвердженого постановою Кабінету Міністрів України від 3 грудня 2008 № 1057
End-of-Life Disposal

Your new Public Information Display contains materials that can be recycled and reused. Specialized companies can recycle your product to increase the amount of reusable materials and to minimize the amount to be disposed of.

Please find out about the local regulations on how to dispose of your old display from your local Philips dealer.

(For customers in Canada and U.S.A.)

This product may contain lead and/or mercury. Dispose of in accordance to local-state and federal regulations. For additional information on recycling contact www.eia.org (Consumer Education Initiative)

Waste Electrical and Electronic Equipment-WEEE

Attention users in European Union private households

This marking on the product or on its packaging illustrates that, under European Directive 2012/19/EU governing used electrical and electronic appliances, this product may not be disposed of with normal household waste. You are responsible for disposal of this equipment through a designated waste electrical and electronic equipment collection. To determine the locations for dropping off such waste electrical and electronic, contact your local government office, the waste disposal organization that serves your household or the store at which you purchased the product.

Attention users in United States:

Please dispose of according to all Local, State and Federal Laws. For the disposal or recycling information, contact: www.mygreenelectronics.com or www.eiae.org.

End of Life Directives-Recycling

Your new Public Information Display contains several materials that can be recycled for new users. Please dispose of according to all Local, State, and Federal laws.

Restriction on Hazardous Substances statement (India)

This product complies with the “E-Waste (Management) Rules, 2016” CHAPTER V, rule 16, sub-rule (1) . Whereas New Electrical and Electronic Equipment and their components or consumables or parts or spares do not contain Lead, Mercury, Cadmium, Hexavalent Chromium, polybrominated biphenyls and polybrominated diphenyl ethers beyond a maximum concentration value of 0.1% by weight in homogenous materials for lead, mercury, hexavalent chromium, polybrominated biphenyls and polybrominated diphenyl ethers and of 0.01% by weight in homogenous materials for cadmium. except of exemptions set in Schedule 2 of the Rule.

E-Waste Declaration for India

This symbol on the product or on its packaging indicates that this product must not be disposed of with your other household waste. Instead it is your responsibility to dispose of your waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help to conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. For more information about E-waste please visit http://www.india.philips.com/about/sustainability/recycling/index.page and to know where you can drop off your waste equipment for recycling in India please contact on below given contact details.

Helpline number: 1800-425-6396 (Monday to Saturday, 9 a.m. to 5:30 pm)
E-mail: india.callcentre@tpv-tech.com
Batteries

For EU: The crossed-out wheeled bin implies that used batteries should not be put to the general household waste! There is a separate collection system for used batteries, to allow proper treatment and recycling in accordance with legislation.

Please contact your local authority for details on the collection and recycling schemes.

For Switzerland: The used battery is to be returned to the selling point.

For other non-EU countries: Please contact your local authority for correct method of disposal of the used battery.

According to EU directive 2006/66/EC, the battery can’t be disposed improperly. The battery shall be separated to collect by local service.

Information for FAC:

2. Unpacking

- This product is packed in a carton, together with the standard accessories.
- Any other optional accessories will be packed separately.
- As this product is high and heavy, the operation of moving the device is recommended to be performed by two technicians.
- After opening the carton, ensure that the contents are complete and in good condition.

■ Before Unpacking

- Please read and fully understand unpacking notice before installation.
- Please check the packing, there should be no any abnormality such as creak, dent mark…etc.
- Please do necessary inspection before you move the display out of the carton.
- Always install the display by experienced technician to prevent any damage.

■ Notice

- Take the display out of the carton box by two adults with both hands.
- Please do not grab or touch the glass of the display.
- Please grab on the bezel surface (plastic or metal) of the display.
- Please keep the display vertically when moving it.
- Place the display vertically and its weight should spread evenly on the surface.
• Please keep vertically, no bending and torsion during moving the display.
2.1. Package Contents

Please verify that you received the following items with your package content:

- LCD Display
- Quick start guide
- Remote Control and AAA batteries
- Power cable
- RS232 cable
- RS232 daisy chain cable
- IR sensor cable
- HDMI cable
- DVI cable
- Touch USB
- Philips logo plate
- Cleaning cloth
- USB Cover
- Cable Clip
- AC Cover
- Touch pen (Only 55BDL3452T)

* The supplied power cord varies depending on destination.

NOTES:

- Keep the packaging materials appropriately after unpacking the product.

2.2. Installation Notes

- Only use the power cable provided with this product. If an extension cord is required, please consult your service agent.
- The product should be installed on a flat surface, or the product may tip over. Leave a space between the rear of the product and the wall for proper ventilation. Do not install the product in a kitchen, bathroom or a place exposed to moisture, failure to do so may shorten the life of the internal parts.
- Do not install the product where it is 3000m and higher in altitude. Failure to do so may result in malfunctions.
2.3. Mounting on a Wall

To mount this display on a wall, a standard wall-mounting kit (commercially available) is required. It is recommended that you use a mounting interface that complied with TÜV-GS and/or UL1678 standard in North America.

1. Prepare a flat and horizontal surface that is larger than the display and spread a thick protective sheet on it to facilitate your operation without scratching the screen.

2. Ensure you have all accessories for all types of mounting (wall mount, ceiling mount, table stand, etc).

3. Follow the instructions that came with the base mounting kit. Failure to follow the correct mounting procedures could result in damage to the equipment, or injury to the user or installer. The product warranty does not cover the damage caused by improper installation.

4. 43BDL3452T/55BDL3452T: For the wall-mounting kit, use the M6 mounting screws (with a length 10 mm longer than the thickness of the mounting bracket) and tighten them securely.

2.3.1. VESA Grid

<table>
<thead>
<tr>
<th>Model</th>
<th>VESA Grid</th>
</tr>
</thead>
<tbody>
<tr>
<td>43BDL3452T</td>
<td>200(H) x 200(V) mm</td>
</tr>
<tr>
<td>55BDL3452T</td>
<td>400(H) x 400(V) mm</td>
</tr>
</tbody>
</table>

Caution:

To prevent the display from falling:

- For wall or ceiling mounting, we recommend that you install the display with metal brackets which are commercially available. For detailed instructions about the installation, refer to the guide provided with the bracket.
- To prevent the display from falling in case of earthquake or other natural disaster, please consult the manufacturer of the bracket for the mounting location.
- As this product is high and heavy, the installation of this product is recommended to be performed by four technicians.

Required space for ventilation

Leave a space of 100 mm at the top, rear, right and left of the display for ventilation.

Note: We recommend you contact a professional technician when installing the display on a wall. We are not responsible for any damage to the product if the installation is not performed by a professional technician.
3. Parts and Functions

3.1. Control Panel

1. [O/]|button
   Turn the display On or put the display to standby mode.

2. [MUTE] button
   Mute the sound or reactivate sound.

3. [INPUT] button
   Select an input source.

4. [↑] button
   Increase the adjustment while OSD menu is On, or increase the audio output level while OSD menu is Off.

5. [↓] button
   Decrease the adjustment while OSD menu is On, or decrease the audio output level while OSD menu is Off.

6. [▲] button
   Move the selected item one level up while the OSD menu is On.

7. [▼] button
   Move the selected item one level down while the OSD menu is On.

8. [MENU] button
   Return to the previous menu while the OSD menu is On. This button can also be used to activate the OSD menu when the OSD menu is Off.

9. Remote control sensor and power status indicator
   - Receive command signals from the remote control.
   - Indicate the operating status of the display:
     - Light green when the display is turned On
     - Light red when the display is in the standby mode
     - When (SCHEDULE) is enabled, the light blinks green and red
     - If the light blinks red, it indicates that a failure has been detected
     - Lights off when the main power of the display is turned off

* Use an IR sensor cable for better remote control performance. (Please refer to the instructions on 4.5)
3.2. Input/Output Terminals

1. **AC IN**
   AC power input from the wall outlet.

2. **MAIN POWER SWITCH**
   Switch the main power between On and Off.

3. **RJ-45**
   The LAN control function is used for sending the remote control signal from the control center.

4. **PC LINE IN**
   Audio input for VGA source (3.5mm stereo phone).

5. **DVI-D IN**
   DVI video input.

6. **VGA IN (D-Sub)**
   VGA video input.

7. **AUDIO OUT**
   Audio output for external AV device.

8. **HDMI1 IN / HDMI2 IN**
   Connect to a source device via an HDMI cable.

9. **USB-B**
   Connect to external PC to support touch function.

10. **IR IN / IR OUT**
    IR signal input/output for the loop-through function.

**NOTES:**
- The remote control sensor of this display will stop working if the jack [IR IN] is connected.
- To remotely control your A/V device via this display, refer to page 26 for IR Pass Through connection.

11. **MICRO SD**
    Insert a Micro SD card.

12. **USB SERVICE PORT**
    Connect to USB storage for main board Firmware update.

   Note: It’s for updating firmware only.

13. **USB 2.0 PORT**
    Connect your USB storage device and service port.

14. **RS232 IN / RS232 OUT**
    Android RS232 network input/output is reserved for customized protocol usage from System Integrator.
3.3. Inserting the batteries in the remote control

The remote control is powered by two 1.5V AAA batteries.

To install or replace the batteries:
1. Press and then slide the cover to open it.
2. Insert the batteries with the correct polarity (+) and (–).
3. Replace the cover.

Caution:
Incorrect use of batteries may cause leakage or explosion. Be sure to follow the instructions below:
• Insert “AAA” batteries with the correct polarity (+ and -).
• Do not mix battery types.
• Do not use a new battery with a used one together. Otherwise, it may cause leakage or shorten the life of the batteries.
• Remove the dead batteries immediately to avoid battery leakage in the battery compartment. Do not touch exposed battery acid, as it may cause injury to your skin.
• Disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion; leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and a battery subjected to extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas.

Note: Remove the batteries from the battery compartment when not using for an extended period of time.

3.4. Handling the remote control

• Do not drop or apply shock to the remote control.
• Do not allow any liquid to get inside the remote control. If water has entered the remote control, wipe the remote control with a dry cloth immediately.
• Do not place the remote control near heat and steam sources.
• Do not attempt to disassemble the remote control, unless you need to place batteries in the remote control.

3.5. Operating range of the remote control

Point the top front of the remote control at the remote sensor on the display when you press the buttons.

Use the remote control within a distance of less than 4m/16ft from the display’s sensor, and a horizontal and vertical angle of less than 0°.

Note: The remote control may not function properly when the remote control sensor on the display is under direct sunlight or strong illumination, or when there is an object between the remote control and the remote sensor of the display.
3.6. Remote Control

3.6.1. General functions

1. [+] POWER button
   - [|] Turn the power On.
   - [o] Turn the power Off.

2. [PLAY] buttons
   - Control playback of media files. (for Media Input only)
   - Freeze feature
     - Pause: hotkey for freezing all inputs content.
     - Play: hotkey for unfreezing all input content.

3. [HOME] button
   - Root Menu: Go to the OSD of Main Menu.
   - Others: Exit from the OSD.

4. [SOURCE] button
   - Root Menu: Go to the OSD of Video source.

5. [LIST] button
   - Reserved.

6. [INFO] button
   - Show Information OSD.

7. NAVIGATION buttons
   - [\[a\]]
     - Root Menu: Go to the OSD of Smart picture.
     - Main Menu: Move the selected item up to make adjustment.

   - [\[b\]]
     - IR Daisy Chain Menu: Increase the controlled Group ID number.
     - Root Menu: Go to the OSD of Audio source.
     - Main Menu: Move the selected item bar down to make adjustment.

   - [\[c\]]
     - IR Daisy Chain Menu: Decrease the controlled Group ID number.

8. [OK] button
   - Root Menu: Go to the OSD of IR daisy chain in Primary/Secondary mode.
   - Main Menu: Confirm an entry or selection.

9. [\[\[<\]]\] BACK button
   - Return to the previous page or exit from the previous function.

10. [MUTE] button
    - Mute or unmute the sound.

11. [COLOR] buttons
    - Choose a task or option. (for Media Input only)
    - [\[\]] Hotkey for Window selection function.

12. [FORMAT] button
    - Select image zoom mode from Full, 4:3, 1:1, 16:9, 21:9 or Custom.

13. [Number/ID SET/ENTER] button
    - Enter text for network setting.
    - Press to set the display ID. Refer to 3.6.2. ID Remote Control for more details.

14. [ADJUST] button
    - Go to the OSD of Auto Adjust (for VGA only).

15. [POINTER] button
    - Mouse function for Android

16. [VOLUME] button
    - Adjust the volume.
3.6.2. ID Remote Control
Set remote control ID number when using several displays.

Press the [ID] button and the red LED blinks twice.

1. Press [ID SET] button for more than 1 second to enter the ID Mode. The red LED lights up.
   Press the [ID SET] button again will exit the ID Mode. The red LED lights off.

Press the digit numbers [0] – [9] to select the display to be controlled.
For example: press [0] and [1] for display No.1, press [1] and [1] for display No.11.
The numbers available are [01] ~ [255].

2. If no button is pressed within 10 seconds, it will exit from the ID mode.

3. If a wrong button is pressed, wait for 1 second until the red LED lights off and then turns on again, then press the correct digits.

4. Press [ENTER] button to confirm your selection. The red LED blinks twice and then lights off.

NOTE:
- Press [NORMAL] button. The green LED blinks twice, indicating that the display is under normal operation.
- It is necessary to set up the ID number for each display before selecting its ID number.
3.6.3. Remote Control buttons on Android source

1 [||] POWER button
   Turn the display On or standby mode.
   The button is only controlled by Scalar.

2 [PLAY] buttons
   1. Control playback of media (video/audio/picture) files.
      There are 4 ways to play the media files.
      1) File Manager
      2) Media Player -> Compose -> edit or add a new playlist -> choose any media files -> press [\(\Rightarrow\)] button to play the media file directly.
      3) Media Player -> Play -> choose non-empty play list -> press [\(\Rightarrow\)] to play all media files from the playlist.
      4) Set media playlist in Boot on Source or Schedule by OSD menu.

2. When playing a video or music file, you can press [\(\Rightarrow\)] button to stop playing. If you press [\(\Rightarrow\)] again, playback will be started from the beginning of the file.

3. When playing a video or music file, you can press [\(\Rightarrow\)] button to pause playing.

4. All media files should be located in the folder of “philips”, under the root directory of the specified storage (internal/USB/SD Card). All sub-folders (video/photo/music) are named by media types and shouldn’t be changed.

   - videos: (root dir of storage)/philips/video/
   - photos: (root dir of storage)/philips/photo/
   - music: (root dir of storage)/philips/music/

   Note that the root directories of three storages are:

   - Internal storage: /sdcard
   - USB storage: /mnt/usb_storage
   - SD card: /mnt/external_sd

3 [\(\Rightarrow\)] HOME button
   Access the OSD menu.
   The button is only controlled by Scalar.

4 [\(\Rightarrow\)] SOURCE button
   Select an input source.
   The button is only controlled by Scalar.

5 [\(\Rightarrow\)] LIST button
   1. In the content of the web page, move the focus up to the next selectable items.
   2. Move the focus up to the next control or widget such as buttons.

6 [\(\Rightarrow\)] INFO button
   1. Display information about the current input signal. It is shown by Scalar.
   2. Media Player -> Compose -> edit or add a new playlist -> choose any media files -> press [\(\Rightarrow\)] to show the information of the selected media file.

7 NAVIGATION buttons
   1. Navigate through the menus and select an item.
   2. In the content of the web page, these buttons are for controlling the scroll bar of the screen. Press [\(\Rightarrow\)] or [\(\Rightarrow\)] for moving the vertical scroll bar up or down. Press [\(\Rightarrow\)] or [\(\Rightarrow\)] for moving the horizontal scroll bar left or right.

8 [\(\Rightarrow\)] button
   Confirm an entry or selection.

9 [\(\Rightarrow\)] BACK button
Return to the previous page or exit from the previous function.

10 [·] MUTE button
Mute or unmute the sound.
The button is only controlled by Scalar.

11 [·] COLOR buttons

12 [Number/ ID SET/ ENTER] button
ID SET and ENTER are reserved on Android source. These buttons are only controlled by Scalar.

13 [·] FORMAT button
Change picture format. The button is only controlled by Scalar.

14 [·] OPTIONS button
Open the toolbox from Media Player.
1. Media Player -> Compose -> Edit or add a new playlist -> press OPTIONS to open a toolbox. The toolbox will slide from the left side of the screen.

15 [·] POINTER buttons
Mouse function for Android.

16 [·] ADJUST button
1. In the content of the web page, move the focus down to the next selectable items.
2. Move the focus down to the next control or widget such as buttons.

17 [—] [+] VOLUME button
Adjust volume level. The buttons are only controlled by Scalar. Reserved.
3.7. **USB Cover**

* Use the USB cover and screws to cover the USB stick and Micro SD card.
  - Install the USB sticker and micro SD card.
  - Use the screw from accessory to fix the USB cover.

Maximum suitable USB stick size: 20(W)x10(H)x80(L) mm
3.8. AC Switch Cover

- Use AC Switch Cover to cover the AC switch.
  1. Release the screw.
  2. Install the AC Switch Cover.
  3. Fix the AC Switch Cover with the screw in step 1.
4. Connecting External Equipment

4.1. Connecting External Equipment (Multimedia Player)

4.1.1. Using HDMI video input

4.2. Connecting a PC

4.2.1. Using DVI input

4.2.2. Using HDMI input
4.2.3. Using VGA

![Diagram of VGA connections]

4.3. Connecting Audio Equipment

4.3.1. Connecting an external audio device

![Diagram of audio connections]

4.4. Connecting Multiple Displays in a Daisy-chain Configuration

You can interconnect multiple displays to create a daisy-chain configuration for applications such as a menu board.

4.4.1. Display control connection

Connect the [RS232 OUT] connector of DISPLAY 1 to the [RS232 IN] connector of DISPLAY 2.

![Diagram of daisy-chain connections]
4.5. IR connection

NOTE:
1. The remote control sensor of this display will stop working if the [IR IN] is connected.
2. IR loop through connection can support up to 9 displays.
3. IR in daisy chain via RS232 connection can support up to 9 displays.

4.6. IR Pass-through Connection
4.7. Touch Operation

This display is equipped with a touch-sensitive screen and supports the Windows Touch features either by singletouch or multitouch operation. You can touch the pictures or text on the display gently with your fingers, and the system will react.

This section explains about the touch operation on the display. For further detail on how to run the touch operation, please refer to the Windows operation instruction.

Single Tap

Touch the target on the screen with one fingertip for one quick tap, then release.

Please note that a touch screen will respond to a light touch from your fingertip when tapping within 2.5mm above touch screen.

Double Tap

Touch the target on the screen with one fingertip for two quick taps, then release.

Pan

Touch the target on the screen with one fingertip and move across the target without losing direct contact, then release.

Flick

Touch the target on the screen with one fingertip and brush the surface quickly.

Zoom in

Touch the target on the screen with two fingertips held together and move them apart to zoom in (magnify) the screen image.

Zoom out

Touch the target on the screen with two fingertips stretched apart and move them closer to zoom out (shrink) the screen image.

Touch and Hold

Touch and hold the target on the screen with one fingertip for a while to display a context menu or options page for an item.

Avoid

• Avoid scratching with sharp object on the screen. Only use your fingertips to perform touch operation.
• Do not expose the screen to intensive light, spotlight, or wide-spread light.
• Do not install the product to a location where is close to the windows or glass-doors as the direct sunlight may affect the touch-control performance.
• To avoid screen interference with each other, do not place 2 touch screens side by side as shown below.

Fig. Touch screens interference
The Touch screen does not require a device driver installed on the host computer for Windows OS. For Windows 7 and Windows 8, it is recommended that the standard Microsoft Window Control Panel calibration is used.

* Support 20-point touch.
** Mac OSX for multi touch from version 10.6 to 10.15, please download “UPDD “.
*** Chrome for multi touch can support up to 16-point.
**** Support up to 16-point.
***** Support 20-point by Ubuntu 14.04 or above with kernel 4.4.0+.

1. We highly recommend that you use the latest Service Pack with all Windows 7 OS.
2. Digitizer input to Windows refers to touch digitizer as opposed to touch stylus in tablet PCs.
3. Set as default by Microsoft.
5. **Operation**

Note: The control button described in this section is mainly on the remote control unless specified otherwise.

5.1. **Watch the Connected Video Source**

1. Press the [SOURCE] button.
2. Press [①] or [②] button to select a device, then press [③] button.

5.2. **Change Picture Format**

You can change the picture format to suit the video source. Each video source has its available picture formats. The available picture formats depend on the video source:

1. Press [FORMAT] button to select a picture format.
   - PC mode: {Full} / {4:3} / {Real} / {21:9} / {Custom}.
   - Video mode: {Full} / {4:3} / {Real} / {21:9} / {Custom}.

5.3. **Launcher**

Launcher:

- You can press “Source” and select “Home” to startup it.
- Multiple Home shortcut items can be added to the Launcher.

The Launcher consists of the following Apps:

- “Whiteboard”, “Present” and “Apps”.
- Whiteboard: go to whiteboard page.
- Present: go to interact page.
- Apps: show all apps.

Add multiple home shortcuts to the homepage:

Settings -> Signage Display -> General settings -> Home shortcut.

![Whiteboard page:](image1)

![Present page:](image2)

![Apps page:](image3)
5.4. Media Player

5.4.1. OSD menu interaction with media player:
1. Boot on source:
   - Input:
     ■ If you select Media player as the source, the system will enter media player automatically after the boot process is completed.
   - Playlist:
     ■ 0: go to the main page of media player.
     ■ 1 - 7: go to media player and playback File1 - File7 of playlist automatically.

2. Schedule:
   - Today:
     ■ Show date and time.
   - 1 - 7:
     ■ Set up to 7 schedules.
   - On/Off:
     ■ Set start time and end time.
   - Input:
     ■ Select Media player as the source, the PD will launch the media player automatically at end time.
   - MON, TUE, WED, THU, FRI, SAT, SUN, Every week:
     ■ Set life cycle.
   - Play list:
     ■ 0: go to the main page of media player.
     ■ 1 - 7: go to media player and playback File1 - File7 of the playlist automatically.
   - Clear all

5.4.2. Media Player introduction:
1. Main page of Media Player app, this App consists of three items: “Play”, “Compose” and “Settings”.
   Play: select a playlist to play.
   Compose: edit playlist.
   Settings: set play properties.

2. Select “Play” on the main page, first you should choose one playlist to play between FILE 1 and FILE 7. The pencil icon means the playlist is non-empty.

3. Select “Compose” on the main page, first you should choose one playlist to edit between FILE 1 and FILE 7. The pencil icon means the playlist is non-empty.

4. If an empty playlist is chosen, the app will guide you through selecting the media source.
   All media files should be placed in /philips/ of root directory.
   For example,
   - videos in /philips/video/
   - photos in /philips/photo/
   - music in /philips/music/
5. If you select “USB” storage, the app will guide you through selecting the USB device.

6. To edit or delete a non-empty playlist, select the desired playlist that shows a pencil icon on right side of the file.

7. Once you start to edit a playlist, a menu is displayed as below:
   - Source - files in storage.
   - Playlist – files in playlist.
   - Option – launch slidebar.
   - Play – play media file.
   - Info – show media info.

Note: When long press on one of the directory in Source, full path will be displayed.

7.1 In the slidebar, the following functions are available:
   - Select all: select all storage files.
   - Delete all: delete all playlist files.
   - Add/Remove: update playlist from source.
   - Sort: sort playlist.
   - Save/abort: save or abort playlist.
   - Back: return.

8. If “Sort” is selected, you can customize the file order severally.

Note: When leaving from this page, all data will be saved automatically.

9. After selecting the desired file, press “Info” key to get detailed information.
10. After selecting the desired file, press “Play” key to play the media file immediately.

11. If you created a playlist with all image files, you will be asked to add a background music to the slideshow before saving.

12. Select “Settings” in the main page, there are five options available: “Repeat Mode”, “Slideshow Effect”, “Effect Duration”, “Software Decode” and “Autoplay”. 
   **Repeat Mode**: select repeat once or repeat all.
   **Slideshow Effect**: photo slideshow effect (right to left, fold corner or none).
   **Effect Duration**: photo effect duration (5 seconds, 10 seconds, 15 seconds or 20 seconds).
   **Software Decode**: no black screen between videos play (enable, disable).
   **Autoplay**: Plug in the USB and it will automatically play files from USB root path. (enable and disable autoplay, photo only, video only, photo and video, help).
13. Media Player import text file
   Step 1. Create media player text file.
   - File name: mpplaylistX.txt, “X” means playlist number(1,2,3,4,5,6,7).
     Ex. mpplaylist1.txt, mpplaylist2.txt
   - Content:
     Note: If the playlist contains video and music files, the screen becomes black when playing music file.
   Step 2. Copy “mpplaylistX.txt” to “philips” folder of internal storage. You may use FTP to do this.
     - File path: /storage/emulated/legacy/philips (for DL, PL)
     Ex. /storage/emulated/legacy/philips/mpplaylist1.txt
   Step 3. Prepare media files to “photo”, “video” and “music” folder under “philips” folder, internal storage only.
     - Ex. /storage/emulated/legacy/philips/photo/xxx.jpg
       /storage/emulated/legacy/philips/video/yyy.mp4
       /storage/emulated/legacy/philips/music/zzz.mp3
   Step 4. Start media player app, it will automatically import media player text file.
   Note: Once the playlist file (text) is imported, if user changes playlist via remote control, this change will not be written on playlist text file.

5.5. CMND & Play
   1) Server
      Setup CMND & Play server address
   2) Account
      Setup CMND & Play account
   3) PIN Code
      Setup CMND & Play PIN code
   (4) Version
      There are two options, Ver.2 and Ver.3
      Ver. 2
      use 2.0/2.2 agreement
      Ver. 3
      use 3.0/3.1 agreement
   (5) Content
      There are 3 options available: internal storage, SD card and USB storage.
      If Ver.2, is selected, Server/Account/PIN code will be shown in gray and cannot be set.
5.6 Side Bar

1. Hide
   Hide side bar.

2. Home
   Open Home.

3. Source menu
   Open source menu.

4. OSD Menu
   Open OSD menu.

5. My Favorite
   Open my favorite, add or remove frequently used APK.

6. Tool
   (6-1) Freeze/Unfreeze: Only freeze/unfreeze the signal screen of non-Android, the audio signal is still alive.
   (6-2) Touch Lock: Lock the touch function, you need to input password to unlock it after the touch lock is enable.
   The default password is 123. You also can set the new password in Settings -> Signage Display -> System tools -> Touch lock password.

7. Quick info
   It will display the information of Time, Network and Monitor Information.

8. History
   Show history app.

9. Back
   Return to the previous page or exit from the previous function.
6. Setting UI

6.1. Settings

Setting menu consists of the following items:
(1). Network & Internet
(2). Signage Display
(3). Apps
(4). Display
(5). Security
(6). System

6.1.1. Network & Internet

6.1.1.1. Wi-Fi

Settings -> Network & Internet -> Wi-Fi

Important Note: This option is available only when the supported Wi-Fi dongle is plugged. Wi-Fi dongle hot spot is however not supported. Reboot the device whenever you plug or remove the USB Wi-Fi dongle.

Enable Wi-Fi

Enable/disable Wi-Fi connection through main switch in Setting -> Network & Internet -> Wi-Fi -> Off/On toggle button.

Wi-Fi Off

Wi-Fi On

On the available network list, select an AP (access point) on an existing wireless network.

Enter the required settings.

At the bottom of the list, select "Add network" to add a network not shown on your list.

If needed, enter the network name (SSID) and security details.

Note:
When Wi-Fi is enabled, Ethernet will be disabled automatically.
Wi-Fi Preference

Settings -> Network & Internet -> Wi-Fi -> Wi-Fi Preference

Using WPS

WPS network can be enabled using 2 options:

PBC (Push Button Configuration), in which the user simply has to push a button to connect.

PIN (Personal Identification Number), in which a PIN will be entered in client WPS device to connect.

When using PBC method, select “WPS Push Button” to connect.
When using PIN method, select “WPS Pin Entry” and enter the PIN to connect.

Wi-Fi Network Information

MAC address: shows Wi-Fi MAC address.
IP address: shows the IP address when the device joins a network.

6.1.1.2. Ethernet

Settings -> Network & Internet -> Ethernet

Enable Ethernet

Enable/disable Ethernet connection by Setting -> Network & Internet -> Ethernet toggle button.

By default, the system uses DHCP to join the network.
Connection Information (When the options are grayed out, they are not editable).

(1). IP Address
(2). Gateway
(3). Netmask
(4). DNS 1 / 2 IP Address

Note:
Wi-Fi connection will be disabled automatically when Ethernet connection is enabled.

Ethernet Static IP

User can manually set Ethernet IP address, Netmask, DNS address and gateway IP address when toggle “Static IP”.

Then toggle Ethernet button again.

Note:
1. Please input IPv4 address in all fields; in dot-decimal notation, consisting of four decimal numbers, each ranges from 0 to 255, separated by dot.
2. User must input all fields for static IP connection before enabling Ethernet again.
6.1.2. Signage Display
Settings -> Signage Display, to setup most features of signage display. See below for more detailed information about Signage Display settings.

6.1.2.1. General Settings
Settings -> Signage Display -> General Settings Set up Signage Display name, User logo, Screenshot, Navigation bar and Home shortcut.

Signage Display Name
Settings -> Signage Display -> General Settings -> Signage Display Name
Set up Signage Display name, the default name is Ethernet MAC address with prefix “PD_”. For example, “PD_000b12223398”. The maximum length of name is 36 characters in UTF8 format. Click to rename it.

Boot Logo
Settings -> Signage Display -> General Settings -> Boot Logo
User can set up device boot up logo (boot animation) when OSD Menu -> Configuration 2 -> Logo is set to “User” mode.

If “Logo” is not set to “User” mode, user cannot select custom boot animation.

When it is set to “User” mode, the option “Choose Boot Animation” becomes available.

When Logo is set to “User” mode, the default Philips logo will be replaced by user selected boot animation file.

Click “Choose Boot Animation” and a pop-up menu appears for user to select boot animation file. Content saved on a SD card or USB memory card will be scanned automatically. Boot animation file name must be set as “bootanimation.zip”, any other format is invalid.

All available boot animation files can be found in the following folder:
1. File under /data/local/bootanimation/:
The boot animation file that are copied from USB or SD card.
2. File under (SD_STORAGE_VOLUME_NAME)/:
The boot animation file saved on the SD card.
3. File under (USB_STORAGE_VOLUME_NAME)/:
The boot animation file saved on the USB storage.

Dialog options:
1. FORGET
Clear “bootanimation.zip under /data/local/bootanimation/.
Custom boot animation will not be used during system boot up.
2. CANCEL
Cancel and close the dialog box.
3. SAVE
Copy selected file to /data/local/bootanimation/. After doing this, user can remove their external storage (USB and SD). System uses the boot animation file under /data/local/bootanimation.
If system does not find any bootanimation.zip file under external storage (USB, SD) and /data, the file list is empty. The “SAVE” and “FORGET” buttons are grayed out, user should check content saved on the USB memory or SD card. Click “CANCEL” button to close the dialog box, and plug in the USB memory or SD card again.

If /data/local/bootanimation/ folder is empty, it means that “bootanimation.zip” has not been saved before by user. Default Philips logo appears during system boot up.

When "bootanimation.zip" is found under external storage, a dialog box of the file list will appear.

If the file “bootanimation.zip” can be found in the folder “/data/local/bootanimation/”, the pop-up dialog box will show that file as the first option. It simply means that user has previously copied (saved) the file “bootanimation.zip” and that the system will boot up with boot animation from /data/local/bootanimation/bootanimation.zip.

Boot animation file can be replaced by using the “SAVE” button.

**Screenshot**

Settings -> Signage Display -> General Settings -> Screenshot

To capture the screenshots from the imported content, click “Enable” to enable the auto screenshot function. If the screenshot options are shown in gray, it means that the screenshot function is not enabled yet.

(1). Interval
Set the interval time between each screenshot. The available options are 30 and 60 minutes.

(2). Start Time
Set the start time of a day to begin the screenshot function. Make sure that you click the “Save” button before leaving the dialog box, or your settings will not be saved. The start time must be set at an earlier time than the end time. A toast message will appear notifying you if it is an invalid value.

(3). End Time
Set the end time of a day to end the screenshot function. Make sure that you click the “Save” button before leaving the dialog box, or your settings will not be saved. The start time must be set at an earlier time than the end time. A toast message will appear notifying you if it is an invalid value.

(4). Repeat
Set the repeat mode for auto screenshot.

NOTE:
1. The screenshot images will be deleted automatically under the following conditions:
   (1). When the start time of screenshot feature is set to 0 second.
(5). Save to
The screen images will be saved under the folder named “philips/screenshot” of the internal storage.

(6). Purge Screenshots
Set the interval time for deleting the screenshot images. The available options are “Every day” and “Every week”.

(7). Send screenshots via email
You can send every screenshot image as an e-mail attachment. User must set up mail information first in “Settings -> Signage Display -> Server Settings -> Email notification” (Refer to Email Notification section).

Navigation bar
Definition support sidebar of source
Android source:
43”/55” Will show sidebar except Kiosk source, and follow the navigation bar setting
External source:
43” /55” Will show sidebar, and follow the navigation bar setting
Definition of option
1. Always on: sidebar will stay on both sides of the screen except external source
2. Always off: sidebar will not appear on the screen
3. Auto hide: sidebar will disappear in 10 seconds
The way to appear after disappearing
A. Gesture swipe from left or right to center, the sidebar will be show on the screen, and disappear again after 10 seconds
B. If source support sidebar, the sidebar will be show on the screen when change source, and disappear again after 10 seconds
Definition of arrows on both sides of the screen
a. click arrows on both sides can open sidebar menu, click the arrow at the top or waiting for 15 seconds, the sidebar menu will be disappear
b. long press arrows on both sides, it can move the sidebar position

Home shortcut
Add APP/ Source shortcut to the Home launcher.

6.1.2.2. Server Settings
Settings -> Signage Display -> Server Settings

Email Notification
Settings -> Signage Display -> Server Settings -> Email Notification
Click checkbox to enable/disable E-mail notification feature. Set SMTP and manager E-mail after enabling the E-mail notification feature.
SMTP
Setup sender E-mail address and SMTP server information. There are two types of SMTP server for user to set up: “Gmail” and “Other”. By using “Other” option, user can manually setup SMTP server, security type and server port.

Note:
1. The password should be in UTF8 format with 6 to 20 characters.
2. User cannot set port 5000 (SICP default port) and 2121 (FTP server default port).
   SICP network port setting in “Settings -> Signage Display -> Network Application -> SICP network port”.
   FTP network port settings in “Settings -> Signage Display -> Server settings -> FTP -> Port”.

Gmail: (SMTP server, Security type and Port are grayed out)

Other:

Gmail Security Settings
If a problem occurs when sending the e-mail via Gmail, please visit Google website “https://www.google.com/settings/security/lesssecureapps” for checking the security setting of your Google Account. Then turn on “Access for less secure apps”.

Manager Email
Specify the destination address to receive the e-mail.

Test
To check if your e-mail settings are correct or not, select “Send Test Mail” to send a test e-mail.

FTP
Settings -> Signage Display -> Server Settings -> FTP

Click the checkbox to enable/disable FTP server feature. After enabling this feature, user can setup account, password and port number.

1. Account: The user name to log in the FTP server. The length of the account name should be ranged from 4 to 20 characters, only [a-z], [A-Z] and [0-9] are allowed to use.
2. Password: The password to log in the FTP server. The length of the password should be ranged from 6 to 20 characters, only [a-z], [A-Z] and [0-9] are allowed to use. The password are covered by asterisks after setting.
3. Storage path: The FTP server has access to the internal storage only. The storage path is unchangeable.
4. Port: The port number for FTP server. Available port number ranges from 1025 to 65535, the default setting is 2121. The following port number cannot be used: 8000 / 9988 / 15220 / 28123 / 28124 and SICP network port (default 5000).

Finally, manually reboot the system to apply FTP settings.

Remote Control
Settings -> Signage Display -> Server Settings -> Remote Control

Click the checkbox “Enable” to enable or disable the remote control client service. The default setting is “Enabled”. To use the remote control feature, the device must be bound with the remote control server.

In the entry field of “Server”, input the URL address with the prefix of “https://”. If the device is not bound with the remote control server, please enter the PIN code provided by the server.
Bind status:

1. If the device does not have appropriate network connection, a message “Network is disconnected” will appear.
2. If the device is equipped with network function, but is not connected to the remote control server, a message “Server is disconnected” will appear.
3. If a server is connected, but not bound, a message “Server is unbinded” will appear.
4. If the device is bound with the server successfully, a message “Server is binded” will appear.
5. If the PIN code is not correct, a message “Error PIN code” will appear.

SNMP
Enable/Disable SNMP service.

Please refer to the SNMP user manual.

ADB over Network
You can access ADB over a network connection with port 5555.

6.1.2.3. Source Settings
6.1.2.3.1. Android Source
Settings -> Signage Display -> Source Settings
User can configure source APK’s detailed options.

Media Player
Settings -> Signage Display -> Source Settings -> Media Player
Open Media Player APK’s edit play list activity and edit effect settings activity.

Browser
Settings -> Signage Display -> Source Settings -> Browser
Open Browser APK’s bookmark editor activity.

Kiosk
Settings -> Signage Display -> Source Settings -> Kiosk
Open Kiosk APK’s bookmark editor activity.

CMND & Play
Settings -> Signage Display -> Source Settings -> CMND & Play
CMND & Play APK settings activity

1. Server
   Set up CMND & Play Server IP address. Not available in 2.0 protocol.

2. Account
   Set up CMND & Play Server account, account format should be [a-z] [A-Z] [0-9]. Not available in 2.0 protocol.

3. PIN Code
   Set up CMND & Play PIN code. Not available in 2.0 protocol.

4. Version
   Set up CMND & Play server protocol version.
   (1). 2.0: Used for protocol version 2.0/2.2 (default)
   (2). 3.0: Used for protocol version 3.0/3.1 (default when user selects JP language in OOBE)

5. Content
   CMND & Play APK supports playback content from internal storage (select “Internal Storage”) and external storage (select “SD card” or “USB storage”). CMDN & Play APK will search content from the selected storage. The default setting is internal storage.
   
   Please note that external storage cannot be removed (plug-out) when CMND & Play is playing content. In addition, the free disk space of the external storage must be double of the CMS file size for extracting CMS content.

PDF Player
Settings -> Signage Display -> Source Settings -> PDF Player
Open PDF Player APK’s edit play list activity and edit effect settings activity.

Custom app
Settings -> Signage Display -> Source settings -> Custom app
User can set up customer source APK. The selected APK will be launched when switching into customer input source. If customer source APK is not set, the system shows a black screen when switching to customer input source.

Default is “CMND&Deploy” APK.

If a custom source APK is set, the APK name will be displayed. Otherwise, it means that the custom App has not been set.
Select APP
Select a specific APP for custom APP source.

Note:
The APKs pre-installed by the system will not be shown on the list. Only the APKs that were installed manually will be listed.

(1). FORGET button
Clear the custom source application. It will be shown in gray if the customer source application has not been set.

(2). CANCEL button
Quit without saving changes.

(3). SAVE button
Click the “Save” button to select the APS as the custom source application. It will be shown in gray if no available application can be selected.

Force Restart Custom APP
When this feature is enabled, the system can monitor the status of custom APP. If the custom APP doesn't exist and that boot on source is set to “Custom app”, the system will then try to launch custom APP again.
Default setting is Disable.

6.1.2.3.2. Source label/enable
Enable/Disable editing function for name of non-Android source.

6.1.2.4. Network Application
Settings -> Signage Display -> Network Application

Proxy
Settings -> Signage Display -> Network Application -> Proxy
Enable the proxy server by clicking the checkbox of “Enable”. User can set up the host IP and port number of the proxy server. The default setting is “Disable”.

System supports the following proxy types: HTTP, HTTPS, SOCKS4, and SOCKS5. Choose one for your proxy server.

If an authorization is requested by proxy server, click the checkbox of “Authorization” and enter the username and password.

SICP Network Port
Settings -> Signage Display -> Network Application -> SICP Network Port
Set up the default port of SICP and enable/disable the network SICP. The default SICP is enabled with the port 5000.

Note:
Port number ranges from 1025 ~ 65535.
The following ports are already occupied and cannot be assigned: 8000, 9988, 15220, 28123, 28124. The default FTP port is 2121.

6.1.2.5. System Tools
Settings -> Signage Display -> System Tools
There are eight major features in signage display system tools:
(1). Clear Storage
(2). Reset
(3). Auto restart
(4). Import & Export
(5). Clone
(6). Security
(7). Admin Password
(8). Touch lock password
(9). Swipe up
Clear Storage
Settings -> Signage Display -> System Tools -> Clear Storage

Clear data under \{storage\}/philips/folder of the internal and external storage.

(1). All
   Clear the folder “Philips” from the internal storage, USB and SD card.

(2). Internal Storage
   Clear the folder “Philips” from the internal storage only.

(3). USB Storage
   Clear the folder “Philips” from the USB storage only.

(4). SD Card
   Clear the folder “Philips” from the SD card only.

A dialog box lists all folders that the system is going to clear. Press “RESET” to clear all data under the listed folder, or press back key to quit without saving.

Reset
Settings -> Signage Display -> System Tools -> Reset

Factory Reset
This function allows you to clear all user data and settings. The system will auto reboot and jump to OOBE after rebooting.

Important Note:
1. Only the data stored in the internal storage will be cleared and cannot be recovered, the data includes the device settings, installed APPs, APPs’ data, downloaded files, music, photos and all data under ”/data”. However, the data stored on the USB and SD card will not be cleared.

2. Make sure that the AC adapter and power are always present during the factory reset process. User can only power off after seeing OOBE on the screen.

Click “Factory Reset” to perform factory reset. Press “OK” to confirm when the dialog box appears. Please note this action clears all data in the internal storage and it is not recoverable.

Auto Restart
Auto Restart function allows the device to restart automatically at the time you specify.

Select Disable/Enable auto restart feature from the Main Switch.

Use the time picker to set auto restart time.

Import & Export
Settings -> Signage Display -> System Tools -> Import & Export

This function allows you to import/export the settings and 3rd party APK from/to other device. Please note that:

(1). Export data to BDL3452T-clone.zip file under \{storage\}/philips/clone folder.

(2). Support old clone files method, and put files under \{storage\}/philips/sys_backup:
   - AndroidPDMediaPlayerData.db
   - AndroidPDPdfData.db
   - menu_settings.db
   - settings_global.xml
   - settings_secure.xml
   - settings_system.xml
   - signage_settings.db
   - smartcms.db

   Note that latest export data will archive all files into ZIP file.

(3). “Signage Display Name” will not be imported/exported.

Export Signage Display Settings
System exports database data and third party APKs into \{storage\}/philips/clone/BDL3452T-clone.zip file of the selected storage (internal storage, SD card or USB storage).
Note:
If the selected storage (internal storage, USB or SD card) does not contain Philips/folder, then the system will create it automatically.

A list of all available storage (internal storage, SD card and USB storage):

Import Signage Display Settings
Import database data from philips/clone/BDL3452T-clone.zip file of the selected storage (Internal Storage, SD Card or USB storage). System imports following data in ZIP file:
1. Import database in BDL3452T-clone.zip
2. Import 3rd party APK in BDL3452T_clone.zip

A list of all available storage (internal storage, SD card and USB storage):

A confirmation dialog box is displayed before importing the settings and APKs. Click the “OK” button to start importing the data.

Clone
Settings -> Signage Display -> System Tools -> Clone

Clone Media Files
This function allows you to copy the media files from the selected source storage to the target storage.
1. System clone files are under the following folder:
   - philips/photo
   - philips/music
   - philips/video
   - philips/cms
   - philips/pdf
   - philips/browser
2. Clone CMS files (file extension is “.cms”):
   - Source storage:
     - Check if there is CMS file on the FTP server.
     - check philips/folder in source storage
   - Source is external storage (SD card or USB storage):
     - Check CMS file in root directory of storage
   - Target storage:
     - Target is internal storage
     - CMS file will be saved to philips/ folder
     - Target is external storage (SD card or USB storage)

CMS file will be saved to root directory of storage

Security
Settings -> Signage Display -> System tools -> Security

External Storage
Click the checkbox to lock or unlock external storage (SD card and USB storage). Default is unlocked.
1. Unchecked (Disable): SD card/USB External Storage Unlock.
2. Checked (Enable): SD card/USB External Storage Lock.

Note:
When you disable external storage lock to enable state, please unplug and plugin external storage again (for both SD card and USB storage). After that, system can detect external storage again.

Admin Password
Settings -> Signage Display -> System Tools -> Admin Password

Enable:
Click the checkbox to enable or disable Admin Password. Default is disable.

Password:
Change the password if needed.

Reset Password:
Reset the password to its default value which is “1234”. If reset is successful, it shows a message as “Successful”.

Touch lock password
The default password is 123., You also can change touch password by this option.

Swipe up
Enable/disable up slide to turn on source menu.

6.1.2.6. Misc.
TeamViewer Support
Click the checkbox to enable or disable TeamViewer support. TeamViewer will send a virtual HOME key to open Admin mode. Default is enable.
TeamViewerHost and TeamViewerQSAddOn APKs will be installed to the system automatically. Or, system will remove them if “TeamViewer Support” is disabled.

The following two APKs will be listed in Settings->Apps if “TeamViewer support” is enabled.

### 6.1.2.7. System updates

#### Local update

Settings -> Signage Display -> System updates -> Local update

System will auto search “update.zip” in root folder of USB disk and SD card. If “update.zip” is found on the external storage, a list will be shown for user to select the file to update.

Once the file is selected from the list, the system starts rebooting and updating.

Please note that:

1. Do not turn off the power or remove the power adapter until the update is complete.
2. Current system only supports full Android update.
3. The update file must be named as “update.zip” only.
4. The “update.zip” file must be stored in the root folder of your external storage.

### 6.1.3. Apps

Display installed APKs information.

#### 6.1.3.1. App info

All installed Android APP are listed. User can manage each APP’s permission and other settings.

#### 6.1.3.2. App permissions

List of major permission of Android system and the APP that has permission to control it.

#### 6.1.3.3. Default Apps

User can set default APPs if someone sends related request.

**Browser app**

The default APP to open a webpage URL. Default is Chromium.

**Home app**

The default launcher APP, default is DefaultHome APP. If user changes this APP, the external source may not display correctly.

**Opening links**

This feature allows the APP to open supported links inside its APP directly.
6.1.4. Display
Change the font size of your display.

6.1.4.1. Font Size
Drag the slide to adjust system font size. Default setting is “Largest”.

6.1.5. Security
Settings -> Security
List show app when it support admin related operations and control.

6.1.6. System
The following options are listed in Settings -> System.
(1). Keyboard & inputs
(2). Developer options
(3). About

6.1.6.1. Keyboard & input
Settings -> System -> Keyboard & input
User can change IME and keyboard settings.

Virtual keyboard
Allow user to set default software IME (virtual keyboard) and control detailed IME settings.
Japanese IME will be installed automatically when Japanese language is selected in OOBE.

Physical keyboard
Allow user to control physical keyboard and detailed keyboard settings.
The “TPV Vir-IR” is a system-level virtual keyboard; it will always exist on the keyboard list.

On-screen keyboard enable
Settings -> Languages & input -> On-screen keyboard enable
Used to enable/disable system pre-installed software keyboard (IME). User can press “menu” six times to enable on-screen software keyboard when it is disabled. By default, on-screen keyboard is enabled.

6.1.6.2. Developer options
Settings -> System -> Developer options
Android developer options for developers, default setting is On and USB debugging is also “On” by default.
6.1.6.3. About
Settings -> System -> About
View the following information about the system.
(1). Status
(2). Legal information
(3). Model (model name of this device)
(4). Android version
(5). Android security patch level
(6). Kernel version
(7). Build number (release version)

7. **OSD Menu**

An overview of the On-Screen Display (OSD) structure is shown below. You can use it as a reference for further adjustment of your display.

7.1. **Navigating the OSD Menu**

7.1.1. **Navigating the OSD menu using the remote control**

1. Press `[Home]` button on the remote control to display the OSD menu.
2. Press `[Cursor Left]` or `[Cursor Right]` button to select the item to adjust.
3. Press `[OK]` or `[Enter]` button to enter the submenu.
4. In the submenu, press `[Cursor Up]` or `[Cursor Down]` button to toggle between items, press `[Cursor Left]` or `[Cursor Right]` button to adjust the settings. If there is a submenu, press `[OK]` or `[Enter]` button to enter the submenu.
5. Press `[Back]` button to return to the previous menu, or press `[Home]` button to exit from the OSD menu.

7.1.2. **Navigating the OSD menu using the display’s control buttons**

1. Press `[MENU]` button to display the OSD menu.
2. Press `[Cursor Left]` or `[Cursor Right]` button to select the item to adjust.
3. Press `[Cursor Up]` button to enter the submenu.
4. In the submenu, press `[Cursor Left]` or `[Cursor Right]` button to toggle between items, press `[Cursor Up]` or `[Cursor Down]` button to adjust settings. If there is a submenu, press `[Cursor Up]` button to enter the submenu.
5. Press `[MENU]` button to return to the previous menu, or keep pressing `[MENU]` button to exit from the OSD menu.

7.2. **OSD Menu Overview**

**Brightness**

Adjust the brightness of this display’s backlight.

**Contrast**

Adjust the contrast ratio for the input signal.

Note: VIDEO source only

**Sharpness**

This function is digitally capable to keep a distinct image at all times.

Adjust the sharpness of the picture for each picture mode.

Note: VIDEO source only

**Black level**

Adjust the image brightness for the background.

Note: VIDEO source only. sRGB picture mode is standard and cannot be changed.

**Tint (Hue)**

Adjust the tint of the screen.

Press + button the flesh tone color becomes greenish.

Press - button the flesh tone color becomes purplish.

Note: VIDEO source only

**Color (Saturation)**

Adjust the color of the screen.

Press + button to increase color depth.

Press - button to decrease color depth.

Note: VIDEO source only

**Noise reduction**

Adjust the noise reduction level.

Note: VIDEO source only

**Gamma selection**

Select a display gamma. It refers to the brightness performance curve of signal input. Choose from {Native} / {2.2} / {2.4} / {s gamma} / {D-image}.

Note: VIDEO source only. sRGB picture mode is standard and cannot be changed.
Color temperature
Adjust the color temperature.
The image becomes reddish as the color temperature decreases, and becomes bluish as the color temperature increases.
Note: VIDEO source only.

Color Control
The color levels of red, green, and blue can be adjusted by the color bars.
R: Red gain, G: Green gain, B: Blue gain.

Smart power
Control of lower power consumption based on brightness setting.
- (OFF): no adaptation
- (MEDIUM): 80% of power consumption relative to current settings
- (HIGH): 65% of power consumption relative to current settings

Overscan
If you encounter problems with overscanning, you can change display area of the image.
- (ON): Display 95% of the total image area.
- (OFF): Display 100% of the total image area.
Note: VIDEO source only.

Picture reset
Reset all settings in the Picture menu.
Select “RESET” to restore factory preset data.
Press “CANCEL” button to cancel and then return to the previous menu.

7.2.2. Screen menu

H position
Control Horizontal Image position within the display area of the LCD.
Press + button to move screen to right.
Press - button to move screen to left.
Note: VGA input only.

V position
Control Vertical Image position within the display area of the LCD.
Press + button to move screen to up.
Press - button to move screen to down.

Clock
Press + button to expand the width of the image on the screen to the right.
Press - button to narrow the width of the image on the screen to the left.
Note: VGA input only.

Clock Phase
Improves focus, clarity and image stability by increasing or decreasing this setting.
Note: VGA input only.

Zoom mode
Choose one for video input: (Full) / (Real) / (21:9)/ (4:3)/ (Custom)

Custom zoom
You can use this function to further customize the zoom settings to suit the image you want to display.
Note: This item is functional only when the (Zoom mode) is set to (Custom).
H position
Moves the horizontal position of the image left or right.

V position
Moves the vertical position of the image up or down.

Auto adjust
Press "Set" to detect and adjust H position, V position, Clock, Phase automatically.
Note: VGA input only.

Screen reset
Reset all settings in the Screen menu to factory preset values.

7.2.3. Audio menu

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Balance
Adjust to emphasize left or right audio output balance.

Treble
Adjust to increase or decrease higher-pitched sounds.

Bass
Adjust to increase or decrease lower-pitched sounds.

Volume
Adjust the volume.

Audio Out (line out)
Adjust to increase or decrease the line out audio output level (volume).
Note: This function will be disabled when Audio Out Sync is ON.

Maximum volume
Adjust limitation for the maximum volume setting.

Minimum Volume
Adjust limitation for the minimum volume setting.

Mute
Turn the mute function on/off.

Audio Source
Select the audio input source.
(Analog): audio from audio input.
(Digital): audio from HDMI/DVI audio.

Audio reset
Reset all settings in the Audio menu to factory preset values.

Audio Out Sync
Line out volume sync with internal speaker Volume.
(On): Enable the function and gray out Audio Out (line out) Volume.
(Off): Disable the function.

Speaker Setting
Turn internal speaker (On)/(Off).

7.2.4. Configuration 1 menu

Switch on state
Select the display status when you connect the power cord next time.
- (Power off) - The display will remain off when the power cord is connected.
- (Forced on) - The display will turn on when the power cord is connected.
- (Last status) - The display will return to the previous power status (on/off/standby mode) when the power cord is connected.

Panel saving
Choose to enable the panel saving functions and thus reduce the risk of image persistence or ghost imaging.
- (Brightness) - Select (On) and the image brightness will reduce to an appropriate level. The Brightness setting in the Picture menu cannot be changed when this setting is enabled.
- (Pixel Shift) - Select the time interval ((Auto), (10-900) seconds, (Off)) for display to slightly expand the image size and shift the position of pixels in four directions (up, down, left and right). Activating pixel shift will disable H position, V position and Zoom mode in Screen menu.

Note: Video source only.

RS232 routing
Select RS232 routing path
- (RS232) – RS232 is routed from 2.5mm phone jack
- (LAN->RS232) – RS232 is routed from RJ45

Boot on source
Choose to select a source when booting up.
- (Input) – Select input source when booting up.
• {Playlist} – Select playlist index for MediaPlayer, Browser. 0 indicates there is no playlist.

WOL (Wake on LAN)
Allow the display to be turned on by a network message.
Note: This function only works in power mode 1 and mode 2.

Light sensor
Choose to turn on or off the light sensor function of CRD41.

Human sensor
Choose to turn on or off the human sensor function of CRD41.

Configuration 1 reset
Reset all settings in Configuration 1 menu to factory preset values.

Factory Reset
Reset all customized settings in Picture, Screen, Audio, Configuration 1, Configuration 2 and Advanced Option to the factory default values.

7.2.5. Configuration 2 menu

<table>
<thead>
<tr>
<th>Picture</th>
<th>Screen</th>
<th>Audio</th>
<th>Configuration 1</th>
<th>Configuration 2</th>
<th>Advanced option</th>
<th>Android Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>OSD turn off</td>
<td>45</td>

<td>HDMI version</td>
<td></td>
<td>Configuration 2 reset</td>
<td>Action</td>
<td></td>
</tr>
</tbody>
</table>

OSD turn off
Set the period of time the OSD (on-screen display) menu stays on the screen.
The options are {Off, 5 - 120} seconds. {Off} does not disappear automatically.

OSD H position
Adjust the horizontal position of the OSD menu.

OSD V position
Adjust the vertical position of the OSD menu.

Rotation
Change OSD and Android to Landscape / Portrait mode.
Note: Video inputs will not rotate with this setting.
Note: If Android APK plays video content, user MUST stop and re-play to get correct video image.

Information OSD
Set the period of time the information OSD display on the upper left corner of the screen. The information OSD will display when input source and signal are changed.
The options are {Off, 1 - 60} seconds.

Logo
Choose to enable or disable the picture of Logo when turning on your display.

{Off} – Both static Philips logo and Android boot animation will not be shown.
{On} – Default value. Both Philips logo and Android boot animation will be shown.
{User} – Static Philips logo will not be shown, only user-selected boot animation will be shown in Android settings.
Note: Logo will not be rotated even thought rotation setting is set.

Monitor ID
Set the ID number for controlling the display via the RS232 connection. Each display must have a unique ID number when multiple sets of the display are connected. Monitor ID number range is between 1 and 255.
• {Monitor ID} set range in {1-255}. The default setting is 1.
• {Monitor group} set range in {1-254}. The default setting is 1.

Heat Status
Current thermal status.

Monitor information
Shows information about your display, including model name, SW version, serial number, and operation hours.

HDMI version
Set the HDMI version to 1.4 or 2.0.
Note: HDMI input source only.

Configuration 2 reset
Reset all settings in Configuration 2 menu to factory preset values.

7.2.6. Advanced Option menu

<table>
<thead>
<tr>
<th>Picture</th>
<th>Screen</th>
<th>Audio</th>
<th>Configuration 1</th>
<th>Configuration 2</th>
<th>Advanced option</th>

</tr>
</tbody>
</table>

IR control
Select the operation mode of the remote control when multiple displays are connected via RS232 connection.
• {Unlock} - All displays can be operated normally by the remote control unit.
• {Primary} - Designate this display as the primary display for remote control operation. Only this display can be operated
by the remote control. (In primary mode, IR key will always be processed regardless of the monitor ID/group settings).

- **(Secondary)** - Designate this display as the secondary display. This display cannot be operated by the remote control, and will only receive the control signal from the primary display via RS232 connection.

- **(Lock All) / (Lock all but Volume) / (Lock all but Power) / (Lock all except PWR & VOL)** - Lock the remote control function of this display. To unlock, press and hold the INFO button on the remote control for 6 (six) seconds.

**Power LED light**
Choose to set power indication LED on or off. Choose (On) for normal use.

**Keyboard control**
Choose to enable or disable the display keyboard (control buttons) function.

- **(Unlock)** - Enable the keyboard function.
- **(Lock All) / (Lock all but Volume) / (Lock all but Power) / (Lock all except PWR & VOL)** - Disable the keyboard function.

Note: “Keyboard Control Lock Mode” This function completely disables the access to all Keyboard Control functions. To enable or disable the keyboard control lock, press both [VOL+] and [UP] buttons and hold down continuously more than 3 seconds.

**Tiling**
Create a single large-screen matrix (video wall) that consists of up to 150 sets of the display (up to 10-sets on the vertical and 15-sets on the horizontal sides). This function requires daisy-chain connection.

- **Switch on Delay:** Set the power-on delaying time (in seconds). Default option (Auto) allows a sequential powering-on for each display by monitor ID when multiple displays are connected. The options are: {Off, Auto, 2-255}.

- **Brightness:** (Normal) – Adjust the overall image and background screen brightness (backlight) in Screen menu. (ACS) – Apply brightness values (backlight) which is adjusted by MIC tool. The default value before adjustment is the same as brightness setting in Screen menu.

- **H monitors:** Select the number of displays in horizontal side.

- **V monitors:** Select the number of displays in vertical side.

- **Position:** Select the position of this display in the screen matrix.

<table>
<thead>
<tr>
<th>V monitors</th>

<tr>
<td>16</td>
<td>17 18 19 20</td>
</tr>
<tr>
<td>21</td>
<td>22 23 24 25</td>
</tr>
</tbody>
</table>

- **Frame comp.:** Turn frame compensation function on and off. The display adjusts the image to compensate the width of display bezels in order to accurately display the image. With frame compensation:

- **Enable:** Check to enable tiling function.

**Off timer**
Set automatic power off time (in hours).

**Date and time**
Adjust the current date and time for the display’s internal clock.

- **Auto Sync**
- **Set date**
- **Set time**

**Schedule**
Allow user setup up to seven different scheduled intervals of display activity.

- **(Schedule list)** – Select 1-7 schedules to edit.
- **(Enable)** – Enable/disable selected schedule. If time conflict with other schedule or start/end time, input source are empty, user cannot enable this schedule.
- **(Start time)** – Set start time.
- **(End time)** – Set end time.
- **(Input)** – Set input source, system will go to selected source automatically at start time.
- **(Play list)** – Set playlist 1-7 for MediaPlayer and Browser sources.
- **(Days of the week)** – Set Sunday, Monday, Tuesday, Wednesday, Thursday, Friday and Saturday.
- **(Every week)** – Set lifecycle.
- **(Back)** – Cancel and do not change schedule data.
- **(SAVE)** – Save schedule data.

**HDMI with One Wire**
Enable or disable HDMI CEC.

**HDMI One Wire Power Off**
Allow user to set multiple devices to standby mode by pressing the power button. This function is only available when HDMI CEC is enabled.
Auto signal detection

OPTION:
{Off}, {All}, {Failover}
{Off}: Disable Auto signal detection
{All}: HDMI1 -> HDMI2 -> DVI** -> VGA* -> OPS* -> Media Player -> Browser -> SmartCMS -> Kiosk -> Custom -> Home
* Not all modules have all source in this list. DVI can be DVI-I or DVI-D

{Failover}:
Failover 1: Home (default)
Failover 2: Home (default)
Failover 3: Home (default)
Failover 4: Home (default)
Failover 5: Home (default)
Failover 6: Home (default)
Failover 7: Home (default)
Failover 8: Home (default)
Failover 9: Home (default) *
Failover 10: Home (default) *
Failover 11: Home (default) *
* Not all modules have all 11 failover list, depends on total source of module

Language

Select the language used in the OSD menu.
The options are: English/Deutsch/简体中文/Français/Italiano/Español/Русский/Polish/Türkçe/한국어/Português/العربية/Danish/Swedish/Finnish/Norwegian/Dutch/Czech/Lithuanian/Latvian/Estonian.

OSD Transparency

Adjust OSD transparency.

- {Off} - Transparency off.
- {1-100} - Transparency level 1-100

Power Save

Mode 1 [TCP off, WOL on, auto off]
Mode 2 [TCP off, WOL on, auto on/off]
Mode 3 [TCP on, WOL off, auto on/off]
Mode 4 [TCP on, WOL off, no auto on/off]

<table>
<thead>
<tr>

</tbody>
</table>

Following table is the action for Android board with different power mode.

OPS settings

Set the OPS configuration under each power condition.

- {Auto} - After selecting {Card OPS} for video source input, the OPS will be set to off when the display power is set to off, or vice versa. If you set to other video source inputs, the OPS will always be set to on.
- {Always off} - The OPS will always be set to off.
- {Always on} - The OPS will always be set to on.

Advanced option reset

Reset all settings except {Date and Time} in the advanced option menu to factory preset values.

7.2.7. Android Settings

Open Android Settings

1. When enabled admin password from Android Setting -> System tools, it must enter the password before entering the android settings.

Default password is 1234.
8. **Supported Media Formats**

**USB Multimedia Formats**

**Note:** OPS support 3840x2160@30Hz.

- The PC text quality is optimum in UHD mode (3840 x 2160, 60Hz).
- Your PC display screen might appear different depending on the manufacturer (and your particular version of Windows).
- Check your PC instruction book for information about connecting your PC to a display.
- If a vertical and horizontal frequency-select mode exists, select 60Hz (vertical) and 31.5KHz (horizontal). In some cases, abnormal signals (such as stripes) might appear on the screen when the PC power is turned off (or if the PC is disconnected). If so, press the [INPUT] button to enter the video mode. Also, make sure that the PC is connected.
- When horizontal synchronous signals seem irregular in RGB mode, check PC power saving mode or cable connections.
- The display settings table complies to the IBM/VESA standards, and based on the analog input.
- The DVI support mode is regarded as same to the PC support mode.
- The best timing for the vertical frequency to each mode is 60Hz.
- Resolution 3840x2160 50/60Hz must be equipped with HDMI certified cable (Premium High Speed HDMI Cables).
10. Pixel Defect Policy

We strive to deliver the highest quality products and use some of the industry’s most advanced manufacturing processes whilst practicing stringent quality control. However, pixel or sub-pixel defects on the PDP / TFT panels used in Plasma- & LCD- displays are sometimes unavoidable. No manufacturer can guarantee that all panels will be free from pixel defects, but Philips guarantees that any Plasma- & LCD- displays with an unacceptably number of defects will be repaired during the warranty period in line with your local guarantee conditions.

This notice explains the different types of pixel defects and defines the acceptable defect level for the LCD screen. In order to qualify for repair under warranty, the number of pixel defects must exceed a certain level as shown in the reference table. If the LCD screen is within specification a warranty exchange / claim back will be refused. Additionally, because some types or combinations of pixel defects are more noticeable than others, Philips sets even higher quality standards for those.

10.1. Pixels and Sub-Pixels

A pixel, or picture element, is composed of three sub-pixels in the primary colors of red, green and blue. Many pixels together form an image. When all sub-pixels of a pixel are lit, the three colored sub-pixels together appear as a single white pixel. When all are dark, the three colored sub-pixels together appear as a single black pixel. Other combinations of lit and dark sub-pixels appear as single pixels of other colors.

10.2. Types of Pixel Defects + Dot Definition

Pixel and sub-pixel defects appear on the screen in different ways. There are three categories of pixel defects and several types of sub-pixel defects within each category.

Dot definition = What is a defective “Dot”?:
One or more defective, adjacent sub-pixel are defined as one “dot”. The no. of defective sub-pixels are not relevant to define a defective dot. This means that a defective dot can consist of one, two or three defective sub-pixels which can be dark or lit.

10.3. Bright Dot Defects

Bright dot defects appear as pixels or sub-pixels that are always lit or “on”. These are the examples of bright dot defects:

- One lit red, green or blue sub pixel
- Two adjacent lit sub pixels:
  - Red + Blue = Purple
  - Red + Green = Yellow
  - Green + Blue = Cyan (Light Blue)
- Three adjacent lit sub pixels (one white pixel)
10.4. Dark Dot Defects
Black dot defects appear as pixels or sub-pixels that are always dark or “off”. These are the examples of black dot defects:

- One dark dot
- Two adjacent dark dots = 1 pair of dark dots
- Two dark dots, specifications defines the minimum distance between dark dots

10.5. Proximity of Pixel Defects
Because pixel and sub-pixels defects of the same type that are nearby one another may be more noticeable, Philips also specifies tolerances for the proximity of pixel defects. In the table below you can find specifications about:
- Allowed amount of adjacent dark dots = (adjacent dark dots = 1 pair of dark dots)
- Minimum distance between dark dots
- Total no. of all defective dots

10.6. Pixel Defect Tolerances
In order to qualify for repair due to pixel defects during the warranty period, a PDP / TFT panel in a Philips Plasma / LCD display must have pixel or sub-pixel defects exceeding the tolerances listed in the following table.

<table>
<thead>
<tr>
<th>BRIGHT DOT EFFECT</th>
<th>ACCEPTABLE LEVEL</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 lit sub pixel</td>
<td>2</td>
</tr>
<tr>
<td>BLACK DOT EFFECT</td>
<td>ACCEPTABLE LEVEL</td>
</tr>
<tr>
<td>1 dark sub pixel</td>
<td>10</td>
</tr>
<tr>
<td>TOTAL DOT DEFECTS OF ALL TYPES</td>
<td>12</td>
</tr>
</tbody>
</table>

Note: * 1 or 2 adjacent sub pixel defects = 1 dot defect

10.7. MURA
Dark spots or patches may occasionally appear on some liquid crystal display (LCD) panels. This is known within the industry as Mura, which is a Japanese term for “unevenness.” It is used to describe an irregular pattern or area in which uneven screen uniformity appears under certain conditions. Mura is a result of the deterioration of the liquid crystal alignment layer and is most commonly caused by long-term operation under high ambient temperatures. It is an industry-wide phenomenon and Mura is not repairable. It is also not covered by our warranty terms.

Mura has been around since the introduction of LCD technology and with screens getting bigger and in operation 24/7, many displays are running in low light conditions. This all adds to the possibility of Mura affecting displays.

HOW TO SPOT MURA
There are many symptoms of Mura and also multiple causes. Several of these are listed below:
- Impurities or foreign particles in the crystal matrix
- Uneven distribution of LCD matrix during manufacturing
- Non-uniform luminance distribution of the backlight
- Panel assembly induced stress
- Flaws within the LCD cells
- Thermal induced stress - high temperature operation over long periods of time

HOW TO AVOID MURA
Although we can not guarantee the complete eradication of Mura every time, in general the appearance of Mura can be minimized by these methods:
- Lower the backlight brightness
- Use a screen saver
- Reduce the ambient temperature around the unit
11. Cleaning and Troubleshooting

11.1. Cleaning

Caution When Using the Display

- Do not bring your hands, face or objects close to the ventilation holes of the display. The top of the display is usually very hot due to the high temperature of exhaust air being released through the ventilation holes. Burns or personal injuries may occur if any body parts are brought too close. Placing any object near the top of the display could also result in heat related damage to the object as well as the display itself.
- Be sure to disconnect all cables before moving the monitor. Moving the monitor with its cables attached may damage the cables and thus cause fire or electric shock.
- Disconnect the power plug from the wall outlet as a safety precaution before carrying out any type of cleaning or maintenance procedure.

Front Panel Cleaning Instructions

- The front of the display has been specially treated. Wipe the surface gently using only a cleaning cloth or a soft, lint-free cloth.
- If the surface becomes dirty, soak a soft, lint-free cloth in a mild detergent solution. Wring the cloth to remove excess liquid. Wipe the surface of the display to remove dirt. Then use a dry cloth of the same type to dry.
- Do not scratch or hit the surface of the panel with fingers or hard objects of any kind.
- Do not use volatile substances such as insert sprays, solvents and thinners.

Cabinet Cleaning Instructions

- If the cabinet becomes dirty, wipe the cabinet with a soft, dry cloth.
- If the cabinet is extremely dirty, soak a lint-free cloth in a mild detergent solution. Wring the cloth to remove as much moisture as possible. Wipe the cabinet. Use another dry cloth to wipe over until the surface is dry.
- Do not use solution that contains oil to clean the plastic parts. Such product damage the plastic parts and void the warranty.
- Do not allow any water or detergent to come into contact with the surface of the display. If water or moisture gets inside the unit, operating problems, electrical and shock hazards may result.
- Do not scratch or hit the cabinet with fingers or hard objects of any kind.
- Do not use volatile substances such as insert sprays, solvents and thinners on the cabinet.
- Do not place anything made from rubber or PVC near the cabinet for any extended periods of time.
## 11.2. Troubleshooting

Warranty policy for Philips Professional Display Solutions

Thank you for purchasing this Philips product. Philips products are designed and manufactured with high standards and deliver high quality performance, ease of use and ease of installation. If you encounter any difficulties while using your product, we recommend that you first consult the user manual or the information in the support section of the website, where (depending on the product type) you may find a downloadable user manual, frequently asked questions, instruction videos or a support forum.

LIMITED WARRANTY
In the unlikely event the product requires service, we will arrange for your Philips product to be serviced free-of-charge within the warranty period, provided that the product was used in accordance with the user manual (e.g. in the intended environment). For these product categories, a partner company of Philips is the warrantor of the product. Please check the documentation supplied with your product.

WHO IS COVERED?
Your Warranty coverage begins from the first date of purchase of the product. You need to provide proof of purchase to receive warranty service. A valid sales receipt or other valid document showing that you purchased the product is considered proof of purchase.

WHAT IS COVERED?
If any defect due to faulty materials and/or workmanship occurs within the warranty period, we will make arrangements for a free of charge service. Where a repair is not possible or not commercially viable, we may replace the product with a new or equivalent refurbished product with similar functionality. Replacement will be offered at our discretion and the warranty will continue from the date of original purchase of the first date of purchase of the product. Please note that all parts, including repaired and replaced parts, are covered only for the duration of the original warranty period.

WHAT IS EXCLUDED? Your warranty does not cover:
- Consequential damages (including but not limited to loss of data or loss of income), nor compensation for activities done by yourself, such as regular maintenance, installing firmware updates or saving or restoring data (Some states do not allow the exclusion of incidental or consequential damages, so the above exclusion may not apply to you. This includes, but is not limited to, prerecorded material, whether copyrighted or not copyrighted.)
- Labor charges for installation or setup of the product, adjustment of customer controls on the product, and installation or repair of various types of external devices (e.g., WiFi, antenna, USB dongles, OPS type devices) and other systems outside of the product.
- Reception problems caused by signal conditions or cable or antenna systems outside the unit.
- A product that requires modification or adaptation to enable it to operate in any country other than the country for which it was designed, manufactured, approved and/or authorized, or repair of products damaged by these modifications.
- If the model or production number on the product has been altered, deleted, removed or made illegible.
The warranty applies on condition that the product has been handled properly for its intended use and in accordance with the operating instructions.

To Obtain Warranty Service And Information
For detailed warranty coverage information and additional support requirement and help line, please contact the seller and/or system integrator you purchased the product from. Please note in the USA, this limited warranty is only valid for Products purchased in the Continental United States, Alaska, and Hawaii.

Before Requesting Service
Please check your user’s manual before requesting service. Adjustments of the controls discussed there may save you a service call.

WARRANTY PERIOD
Warranty period for PHILIPS signage display is listed as below, for areas not covered in this table, please follow their warranty statement.

Standard warranty period for PHILIPS signage display is listed as below, for areas not covered in this table, please follow the local warranty statement.
