Safety Instructions

Safety precautions and maintenance

WARNING: Use of controls, adjustments or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards and/or mechanical hazards.

Read and follow these instructions when connecting and using your display:

Operation:

• Keep the display out of direct sunlight and away from stoves or any other heat sources.
• Remove any object that could fall into ventilation holes or prevent proper cooling of the display’s electronics.
• Do not block the ventilation holes on the cabinet.
• When positioning the display, make sure the power plug and outlet are easily accessible.
• When turning off the display by detaching the power cord, wait 6 seconds before re-attaching the power cord for normal operation.
• Ensure the use of an approved power cord provided by Philips at all times. If your power cord is missing, please contact your local service center.
• Do not subject the display to severe vibration or high impact conditions during operation.
• Do not knock or drop the display during operation or transportation.

Maintenance:

• To protect your display from possible damage, do not put excessive pressure on the LCD panel. When moving your display, grasp the frame to lift; do not lift the display by placing your hand or fingers on the LCD panel.
• Unplug the display if you are not going to use it for an extensive period of time.
• Unplug the display if you need to clean it with a slightly damp cloth. The screen may be wiped with a dry cloth when the power is off. However, never use organic solvent, such as, alcohol, or ammonia-based liquids to clean your display.
• To avoid the risk of shock or permanent damage to the set, do not expose the display to dust, rain, water or an excessively moist environment.
• If your display becomes wet, wipe it with dry cloth as soon as possible.
• If a foreign substance or water gets in your display, turn the power off immediately and disconnect the power cord. Then remove the foreign substance or water, and send the unit to the maintenance center.
• Do not store or use the display in locations exposed to heat, direct sunlight or extreme cold.
• In order to maintain the best performance of your display and ensure a longer lifetime, we strongly recommend using the display in a location that falls within the following temperature and humidity ranges.
  - Temperature: 0-40°C  32-104°F
  - Humidity: 20-80% RH

IMPORTANT: Always activate a moving screen saver program when you leave your display unattended. Always activate a periodic screen refresh application if the unit will display unchanging static content. Uninterrupted display of still or static images over an extended period may cause “burn in”, also known as “after-imaging” or “ghost imaging”, on your screen. This is a well-known phenomenon in LCD panel technology. In most cases, the “burned in” or “after-imaging” or “ghost imaging” will disappear gradually over a period of time after the power has been switched off.

WARNING: Severe “burn-in” or “after-image” or “ghost image” symptoms will not disappear and cannot be repaired. This is also not covered under the terms of your warranty.

Service:

• The casing cover should be opened only by qualified service personnel.
• If there is any need for repair or integration, please contact your local service center.
• Do not leave your display under direct sunlight.

If your display does not operate normally, having followed the instructions set out in this document, please contact a technician or your local service center.
Read and follow these instructions when connecting and using your display:

- Unplug the display if you are not going to use it for an extensive period of time.
- Unplug the display if you need to clean it with a slightly damp cloth. The screen may be wiped with a dry cloth when the power is off. However, never use alcohol, solvents or ammonia-based liquids.
- Consult a service technician if the display does not operate normally when you have followed the instructions in this manual.
- The casing cover should be opened only by qualified service personnel.
- Keep the display out of direct sunlight and away from stoves or any other heat sources.
- Remove any object that could fall into the vents or prevent proper cooling of the display's electronics.
- Do not block the ventilation holes on the cabinet.
- Keep the display dry. To avoid electric shock, do not expose it to rain or excessive moisture.
- When turning off the display by detaching the power cable or DC power cord, wait for 6 seconds before re-attaching the power cable or DC power cord for normal operation.
- To avoid the risk of shock or permanent damage to the set do not expose the display to rain or excessive moisture.
- When positioning the display, make sure the power plug and outlet are easily accessible.
- IMPORTANT: Always activate a screen saver program during your application. If a still image in high contrast remains on the screen for an extended period of time, it may leave an ‘after-image’ or ‘ghost image’ on the front of the screen. This is a well-known phenomenon that is caused by the shortcomings inherent in LCD technology. In most cases the afterimage will disappear gradually over a period of time after the power has been switched off. Be aware that the after-image symptom cannot be repaired and is not covered under warranty.

CE Declaration of Conformity

This product has been tested and found to comply with the harmonized standards for Information Technology Equipment, these harmonized standards published under Directives of Official Journal of the European Union.

Warning:

This equipment is compliant with Class A of EN55032/CISPR 32. In a residential environment this equipment may cause radio interference.

ESD Warnings

When user close to the monitor may cause the equipment discharge and reboot to the display of main menu.

Federal Communications Commission (FCC) Notice (U.S. Only)

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Use only an RF shielded cable that was supplied with the display when connecting this display to a computer device.

To prevent damage which may result in fire or shock hazard, do not expose this appliance to rain or excessive moisture.

Europe – EU Declaration of Conformity

This device complies with the essential requirements of the Radio Equipment Directive (2014/53/EU). The following test methods have been applied in order to prove presumption of conformity with the essential requirements of the Radio Equipment Directive (2014/53/EU):

- EN60950-1

Safety of Information Technology Equipment

- EN 62311

Assessment of electronic and electrical equipment related to human exposure restrictions for electromagnetic fields (0 Hz-300 GHz)
- EN 300 328 (For 802.11b/g/n)

Electromagnetic compatibility and Radio spectrum Matters (ERM); Wideband Transmission systems; Data transmission equipment operating in the 2.4 GHz ISM band and using spread spectrum modulation techniques; Harmonized EN covering essential requirements under article 3.2 of the R&TTE Directive

- EN 301 489-17

Electromagnetic compatibility and Radio spectrum Matters (ERM); ElectroMagnetic Compatibility (EMC) standard for radio equipment and services; Part 17: Specific conditions for 2.4 GHz wideband transmission systems and 5 GHz high performance RLAN equipment

- EN 301 489-1

Electromagnetic compatibility and Radio Spectrum Matters (ERM); ElectroMagnetic Compatibility (EMC) standard for radio equipment and services; Part 1: Common technical requirements

**Taiwan:**

**低功率電波輻射性電機管理辦法**

第十二條 經型式認證合格之低功率射頻電機，非經許可，公司、商號或使用者均不得擅自變更頻率、加大功率或變更原設計之特性及功能。

第十四條 低功率射頻電機之使用不得影響飛航安全及干擾合法通信；經發現有干擾現象時，應立即停用，並改善至無干擾時方得繼續使用。

前項合法通信，指依電信法規定作業之無線電通信。

低功率射頻電機須忍受合法通信或工業、科學及醫療用電波輻射性電機設備之干擾。

**USA:**

Federal Communication Commission Interference Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

**Canada:**

Industry Canada statement:

This device complies with RSS-247 of the Industry Canada Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Ce dispositif est conforme à la norme CNR-247 d'Industrie Canada applicable aux appareils radio exempts de licence. Son fonctionnement est sujet aux deux conditions suivantes: (1) le dispositif ne doit pas produire de bruitage préjudiciable, et (2) ce dispositif doit accepter tout bruitage reçu, y compris un bruitage susceptible de provoquer un fonctionnement in

**Brazil:**

**ANATEL RF STATEMENT**

Per Article 6 of Resolution 506, equipment of restricted radiation must carry the following statement in a visible location

“Este equipamento opera em caráter secundário, isto é, não tem direito a proteção contra interferência prejudicial, mesmo de estações do mesmo tipo, e não pode causar interferência a sistemas operando em caráter primário.”

**ANATEL BODY SAR STATEMENT**

“Este produto atende aos requisitos técnicos aplicados, incluindo os limites de exposição da Taxa de Absorção Específica referente a campos elétricos, magnéticos e eletromagnéticos de radiofrequência, de acordo com as resoluções nº 303/2002 e 533/2009. Este produto atende às diretrizes de exposição à RF na posição normal de uso a pelo menos X centímetros longe do corpo, tendo sido os ensaios de SAR para corpo realizado a X cm de acordo com o informativo de recomendação apresentado no manual do fabricante.”

**Polish Center for Testing and Certification Notice**

The equipment should draw power from a socket with an attached protection circuit (a three-prong socket). All equipment that works together (computer, display, printer, and so on) should have the same power supply source.

The phasing conductor of the room’s electrical installation should have a reserve short-circuit protection device in the form of a fuse with a nominal value no larger than 16 amperes (A).

To completely switch off the equipment, the power supply cable must be removed from the power supply socket, which should be located near the equipment and easily accessible.

A protection mark “B” confirms that the equipment is in compliance with the protection usage requirements of standards PN-93/T-42107 and PN-89/ E-06251.

---

**Wymagania Polskiego Centrum Badań i Certyfikacji**

Urządzenie powinno być zasilane z gniazda z przyłączonym obwodem ochronnym (gniazdo z kolkiem). Współpracujące ze sobą urządzenia (komputer, monitor, drukarka) powinny być zasilane z tego samego źródła.

Instalacja elektryczna pomieszczenia powinna zawierać w przewodzie fazowym rezerwową ochronę przewodów przed zwarciami, w postaci bezpieczenstwa o wartości znamionowej nie większej niż 16A (amperów).

W celu całkowitego wyłączenia urządzenia z sieci zasilania, należy wyjąć wtyczkę kabla zasilającego z gniazda, które powinno znajdować się w pobliżu urządzenia i być łatwo dostępne. Znak bezpieczeństwa "B" potwierdza zgodność urządzenia z wymaganiami bezpieczeństwa użytkowania zawartymi w PN-93/T-42107 i PN-89/E-06251.

**Pozostale instrukcje bezpieczeństwa**

- Nie należy używać wtyczek adapterowych lub uszeregować kółka obwodu ochronnego z wtyczką.
- Jeżeli konieczne jest używanie przedłużacza to należy użyć przedłużacza 3-żylowego z prawidłowo połączonym przewodem ochronnym.
- System komputerowy należy zabezpieczyć przed naglami, chwilowymi wzrostami lub spadkami napięcia, używając eliminatora przepięć, urządzenia dopasowującego lub bezzałogowego źródła zasilania.
- Należy upewnić się, aby nic nie leżało na kablach systemu komputerowego, oraz aby kable nie były umieszczone w miejscu, gdzie można byłoby na nie nađępywać lub potykać się o nie.
- Nie należy rozlewać napojów ani innych płynów na system komputerowy.
- System komputerowy powinien znajdować się z dala od grzejników i źródeł ciepła. Ponadto, nie należy blokować otworów wentylacyjnych. Należy unikać kładzenia luźnych papierów pod komputer oraz umieszczania komputera w ciasnym miejscu bez możliwości cyrkulacji powietrza wokół niego.
Electric, Magnetic and Electromagnetic Fields (“EMF”)

1. We manufacture and sell many products targeted at consumers, which, like any electronic apparatus, in general have the ability to emit and receive electromagnetic signals.
2. One of our leading Business Principles is to take all necessary health and safety measures for our products, to comply with all applicable legal requirements and to stay well within the EMF standards applicable at the time of producing the products.
3. We are committed to develop, produce and market products that cause no adverse health effects.
4. We confirm that if its products are handled properly for their intended use, they are safe to use according to scientific evidence available today.
5. We play an active role in the development of international EMF and safety standards, enabling us to anticipate further developments in standardization for early integration in its products.

Information for U.K. only

WARNING - THIS APPLIANCE MUST BE EARTHED.

Important:
This apparatus is supplied with an approved moulded 13A plug. To change a fuse in this type of plug proceed as follows:
1. Remove fuse cover and fuse.
2. Fit new fuse which should be a BS 1362 5A, ASTA. or BSI approved type.
3. Refit the fuse cover.

If the fitted plug is not suitable for your socket outlets, it should be cut off and an appropriate 3-pin plug fitted in its place.

If the mains plug contains a fuse, this should have a value of 5A. If a plug without a fuse is used, the fuse at the distribution board should not be greater than 5A.

NOTE: The severed plug must be destroyed to avoid a possible shock hazard should it be inserted into a 13A socket elsewhere.

How to connect a plug
The wires in the mains lead are coloured in accordance with the following code:
BLUE - “NEUTRAL” (“N”)
BROWN - “LIVE” (“L”)
GREEN & YELLOW - “EARTH” (“E”)

1. The GREEN & YELLOW wire must be connected to the terminal in the plug which is marked with the letter “E” or by the Earth symbol or coloured GREEN or GREEN & YELLOW.
2. The BLUE wire must be connected to the terminal which is marked with the letter “N” or coloured BLACK.
3. The BROWN wire must be connected to the terminal which marked with the letter “L” or coloured RED.

Before replacing the plug cover, make certain that the cord grip is clamped over the sheath of the lead - not simply over the three wires.

*: 电路板组件包括印刷电路板及其构成的零部件，如电阻、电容、集成电路、连接器等。

本表格依据SJ/T 11364的规定编制。

O: 表示该有害物质在该部件所有均质材料中的含量均在 GB/T 26572 标准规定的限量要求以下。
X: 表示该有害物质至少在该部件的某一均质材料中的含量超出 GB/T 26572 标准规定的限量要求。

上表中打“X”的部件中，应功能需要，部分有害物质含量超出GB/T 26572规定的限量要求，但是符合欧盟RoHS法规要求(属于豁免部分)。

备注: 上表仅做为范例，实际标示时应依照各产品的实际部件及所含有害物质进行标示。

### 环保使用期限

此标识指期限(十年)，电子电气产品中含有的有害物质在正常使用条件下不会发生外泄或突变，电子电气产品用户使用该电子电气产品不会对环境造成严重污染或对其人身、财产造成严重损害的期限。

### 中国能源效率标识

根据中国大陆《能源效率标识管理办法》，本显示器符合以下要求

| 能源效率 (cd/W) | >1.05 |
能效等级 | 1 级
能效标准 | GB 21520-2008

详细有关信息请查阅中国能效标识网：http://www.energylabel.gov.cn/

《废弃电器电子产品回收处理管理条例》提示性说明

为了更好地关爱及保护地球，当用户不再需要此产品或产品寿命终止时，请遵守国家废弃电器电子产品回收处理相关法律法规，将其交给当地具有国家认可的回收处理资质的厂商进行回收处理。

警告
此为A级产品。在生活环境中，该产品可能会造成无线电干扰。在这种情况下，可能需要用户对干扰采取切实可行的措施。

End-of-Life Disposal

Your new Public Information Display contains materials that can be recycled and reused. Specialized companies can recycle your product to increase the amount of reusable materials and to minimize the amount to be disposed of.

Please find out about the local regulations on how to dispose of your old display from your local Philips dealer.

(For customers in Canada and U.S.A.)

This product may contain lead and/or mercury. Dispose of in accordance to local-state and federal regulations. For additional information on recycling contact www.eia.org (Consumer Education Initiative)
**Waste Electrical and Electronic Equipment-WEEE**

**Attention users in European Union private households**

This marking on the product or on its packaging illustrates that, under European Directive 2012/19/EU governing used electrical and electronic appliances, this product may not be disposed of with normal household waste. You are responsible for disposal of this equipment through a designated waste electrical and electronic equipment collection. To determine the locations for dropping off such waste electrical and electronic, contact your local government office, the waste disposal organization that serves your household or the store at which you purchased the product.

**Attention users in United States:**

Please dispose of according to all Local, State and Federal Laws. For the disposal or recycling information, contact: www.mygreenelectronics.com or www.eiae.org.

**End of Life Directives-Recycling**

Your new Public Information Display contains several materials that can be recycled for new users. Please dispose of according to all Local, State, and Federal laws

As an ENERGY STAR Partner, we have determined that this product meets the ENERGY STAR guidelines for energy efficiency.

**Restriction on Hazardous Substances statement (India)**

This product complies with the “India E-waste Rule” and prohibits use of lead, mercury, hexavalent chromium, polybrominated biphenyls or polybrominated diphenyl ethers in concentrations exceeding 0.1 weight % and 0.01 weight % for cadmium, except for the exemptions set in Schedule 2 of the Rule.

**E-Waste Declaration for India**

This symbol on the product or on its packaging indicates that this product must not be disposed of with your other household waste. Instead it is your responsibility to dispose of your waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help to conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment.

For more information about where you can drop off your waste equipment for recycling in India please visit the below web link.

http://www.india.philips.com/about/sustainability/recycling/index.page

**Batteries**

For EU: The crossed-out wheeled bin implies that used batteries should not be put to the general household waste! There is a separate collection system for used batteries, to allow proper treatment and recycling in accordance with legislation.

Please contact your local authority for details on the collection and recycling schemes.

For Switzerland: The used battery is to be returned to the selling point.

For other non-EU countries: Please contact your local authority for correct method of disposal of the used battery.

According to EU directive 2006/66/EC, the battery can’t be disposed improperly. The battery shall be separated to collect by local service.

1. **Unpacking and Installation**

1.1. **Unpacking**

- This product is packed in a carton, together with the standard accessories.
- Any other optional accessories will be packed separately.
- Due to the size and weight of this display it is recommended for two people to move it.
- After opening the carton, ensure that the contents are complete and in good condition.

1.2. **Package Contents**

Please verify that you received the following items with your package content:

- LCD display
- Remote control with AAA batteries
- Power cord (1.8 m)
- RS232 cable (1.8 m)
- RS232 daisy-chain cable (1.8 m)
- Quick start guide
- Logo guider & logo
- USB cable (1.8 m)
- IR sensor cable (1.8 m)

* The supplied power cord varies depending on destination.

* Differences according to regions.
  Display design and accessories may differ from those illustrated above.

NOTES:

- For all other regions, apply a power cord that conforms to the AC voltage of the power socket and has been approved by and complies with the safety regulations of the particular country (Type H05VV-F, 2G or 3G, 0.75 or 1mm² should be used).
- You might like to save the package box and packing material for shipping the display.

1.3. **Installation Notes**

- Due to the high power consumption, always use the plug exclusively designed for this product. If an extended line is required, please consult your service agent.
- The product should be installed on a flat surface to avoid tipping. The distance between the back of the product and the wall should be maintained for proper ventilation. Avoid installing the product in the kitchen, bathroom or any other places with high humidity so as not to shorten the service life of the electronic components.
- The product can normally operate only under 3000m in altitude. In installations at altitudes above 3000m, some abnormalities may be experienced.
1.4. Installing and Removing Table Stands (optional)

To install table stands:

**Step 1 - Put on the table**

Lay a protective sheet on the table, which was wrapped around the display when it was packaged, beneath the screen surface so as not to scratch the screen face.

**Step 2 - Fix the tube to the display (by using M6xL41 screws)**

Please refer to the following drawing to know the position of screws.

**Step 3 - Set up the stand (by using thumb)**

To remove table stands:

1. Power off the display.
2. Spread a protective sheet on a flat surface.
3. Grab the carrying handles and place the display face-down on the protective sheet.
4. Remove screws using a screwdriver and place them in a safe place for reuse.
1.5. Mounting on a Wall

To mount this display to a wall, you will have to obtain a standard wall-mounting kit (commercially available). We recommend using a mounting interface that complies with TUV-GS and/or UL1678 standard.

1. Lay a protective sheet on a table, which was wrapped around the display when it was packaged, beneath the screen surface so as not to scratch the screen face.
2. Ensure you have all accessories for mounting this display (wall mount, ceiling mount, table stand, etc).
3. Follow the instructions that come with the base mounting kit. Failure to follow correct mounting procedures could result in damage to the equipment or injury to the user or installer. Product warranty does not cover damage caused by improper installation.
4. For the wall-mounting kit, use M6 mounting screws (having a length 10 mm longer than the thickness of the mounting bracket) and tighten them securely.

1.5.1. VESA Grid

| 43BDL4051T | 400(H) x 400(V) mm |

Caution:

To prevent the display from falling:

- For wall or ceiling installation, we recommend installing the display with metal brackets which are commercially available. For detailed installation instructions, refer to the guide received with the respective bracket.
- To lessen the probability of injury and damage resulting from fall of the display in case of earthquake or other natural disaster, be sure to consult the bracket manufacturer for installation location.

Ventilation Requirements for enclosure locating

To allow heat to disperse, leave space between surrounding objects as shown in the diagram below.
1.6. Mounting in Portrait Position

This display can be installed in portrait position.

1. Remove the table stand, if attached.
2. Rotate 90 degrees counter-clockwise. The “PHILIPS” logo should be on the RIGHT side when facing the display.

1.6.1. How to use the logo guider for portrait position

1. Put the guider on the lower-left corner of the front bezel of the display. Fold down both of its edges.
2. Peel off the protective film at the back of the “PHILIPS” logo sticker. Hold and press the guider with your left hand. Put the “PHILIPS” logo sticker with its adhesive side down into the logo hole with your right hand, and press to make it stick tightly onto the front bezel.
3. Remove the guider.

1.6.2. How to remove the logo

1. Prepare a piece of paper with a cutting area of logo as a protector to prevent the front bezel from scratching.
2. Using a knife, carefully remove the logo sticker with the paper placing beneath.
3. Tear off the logo sticker.

NOTE: When installing the display on a wall, please consult a professional technician for proper installation. We accept no liability for installations not performed by a professional technician.
1.7. Using of Remote sensor and power indicator

1. Pull left the lens to have better remote control performance and easy to observe the light information of power status.
2. Push right the lens to collapse it if needed.
3. Pull/Push the lens until hearing the click sound.
2. Parts and Functions

2.1. Control Panel

1. [MUTE] button
   Use this button to turn the display on or put the display to standby.

2. [MUTE] button
   Switch the audio mute ON/OFF.

3. [INPUT] button
   Choose the input source.

4. [+] button
   Increase the adjustment while OSD menu is on, or increase the audio output level while OSD menu is off.
   • Used as [OK] button in the On-Screen-Display menu.

5. [-] button
   Decrease the adjustment while OSD menu is on, or decrease the audio output level while OSD menu is off.

6. [▲] button
   Move the highlight bar up to adjust the selected item while OSD menu is on.

7. [▼] button
   Move the highlight bar down to adjust the selected item while OSD menu is on.

8. [MENU] button
   Return to previous menu while OSD menu is on, or to activate the OSD menu when OSD menu is off.

9. Remote control sensor and power status indicator
   • Receives command signals from the remote control.
   • Indicates the operating status of the display:
     - Lights green when the display is turned on
     - Lights red when the display is in standby mode
     - Lights amber when the display enters sleep mode
     - When [SCHEDULE] is enabled, the light blinks green and red
     - If the light blinks red, it indicates that a failure has been detected
     - Lights off when the main power of the display is turned off
2.2. Input/Output Terminals

1. **AC SWITCH**
   Switch the AC power on/off.

2. **AC IN**
   AC power input from the wall outlet.

3. **HDMI1 IN / HDMI2 IN**
   HDMI video/audio input.

4. **IR IN / IR OUT**
   IR signal input/output for the loop-through function.

5. **RJ-45**
   LAN control function for the use of remote control signal from control center.

6. **RS232 IN / RS232 OUT**
   RS232 network input/output for the loop-through function.

7. **Audio OUT**
   Audio output to external AV device.

8. **USB PORT B**
   Touch connector to PC.

9. **USB PORT A**

10. **PC LINE IN**
    Audio input for VGA source (3.5mm stereo phone).

11. **DVI OUT**
    DVI or VGA video output.

12. **Micro USB**
    Connect your USB storage device.

13. **Micro SD CARD**
    Connect your MICRO SD CARD.

14. **Security Lock**
    Used for security and theft prevention.

15. **DVI OUT**
    DVI or VGA video output.

16. **DisplayPort IN / DisplayPort OUT**
    DisplayPort video input/output.

17. **DVI IN**
    DVI-I video input.
2.3. Remote Control

2.3.1. General functions

① [ ] POWER button
Power ON/OFF.

② [ ] PLAY buttons
Control playback of media files.(for Media Input only)
Freeze feature
Pause: Freeze hot key for all inputs content.
Play: Unfreeze hot key for all input content.

③ [ ] SOURCE button
Root Menu: Go to Video source OSD.

④ [ ] HOME button
Root Menu: Go to Main Menu OSD.
Others: Exit OSD.

⑤ [ ] LIST button
No function.

⑥ NAVIGATION buttons

[ ]
Root Menu: Go to Smart picture OSD.
Main Menu: Move the highlight bar up to adjust the selected item.
IR Daisy Chain Menu: Increase controlled Group ID number.

[ ]
Root Menu: Go to Audio source OSD.
Main Menu: Move the highlight bar down to adjust the selected item.
IR Daisy Chain Menu: Decrease controlled Group ID number.

[ ]
Main Menu: go to previous level menu.
Source Menu: Exit source menu.
Volume Menu: Decrease Audio Volume.

[ ]
Main Menu: go to next level menu or set selected option.
Source Menu: Go to selected source.
Volume Menu: Increase Audio Volume.

⑦ [ ] OK button
Root Menu: Go to IR daisy chain OSD in Primary/Secondary mode.
Main Menu: Confirm an entry or selection.

⑧ [ ] ADJUST button
Go to Auto Adjust OSD for VGA only.

⑨ [ ] MUTE button
Toggle Audio Mute/Unmute.

⑩ [ ] COLOR buttons
Choose tasks or options.(for Media Input only)
[ ] Hot key for Window selection function.

⑪ [Number/ ID SET/ ENTER] button
Enter text for network setting.
Press to set the display ID. Refer to 2.3.2. ID Remote Control for more detail.

12 [FORMAT] button
Change Image Zoom Mode [Full][4:3][1:1][16:9][21:9][Custom].

13 [BACK] button
Return to the previous menu page or exit from the previous function.

14 [INFO] button
Show Information OSD

15 [OPTIONS] button
No function.

16 [VOLUME] button
Adjust volume.
2.3.2. ID Remote Control

You can set the remote control ID when you want to use this remote control on one of several different displays.

Press [ID] button. The red LED blinks twice.
1. Press [ID SET] button for more than 1 second to enter the ID Mode. The red LED lights up.
   Press the [ID SET] button again will exit the ID Mode. The red LED lights off.
   Press the digit numbers [0] ~ [9] to select the display you want to control.
   For example: press [0] and [1] for display No.1, press [1] and [1] for display No.11.
   The numbers available are from [01] ~ [255].
2. Not pressing any button within 10 seconds will exit the ID Mode.
3. If an error pressing of buttons other than the digits occurred, wait 1 second after the red LED lights off and then lights up again, then press the correct digits again.
4. Press [ENTER] button to confirm. The red LED blinks twice and then lights off.

NOTE:
• Press [NORMAL] button. The green LED blinks twice, indicating the display is in normal operation.
• It is necessary to set up the ID number for each display before selecting its ID number.
2.3.3. Remote Control buttons on Android source

**POWER button**

Turn the display on or put the display to standby.
The button is only controlled by Scalar.

**PLAY buttons**

1. Control playback of media (video/audio/picture) files.
   There are 4 ways to play media files.
   1) File Manager
      Find the media file from the File Manager and select it to play.
   2) Media Player -> Compose -> edit or new add playlist -> choose any media files -> press \( \) to play the media file directly.
   3) Media Player -> Play -> choose non-empty play list -> press \( \) to play all the media files in the play list.
   4) Set media playlist in Boot on Source or Schedule by OSD menu.

2. Play PDF file
   There are 3 ways to play media files.
   1) File Manager
      Find the pdf file from the File Manager and select it to play.
   2) PDF Player -> Play -> choose non-empty play list -> press \( \) to play all the PDF files in the play list.
   3) Set pdf playlist in Boot on Source or Schedule by OSD menu.

3. When playing PDF, video or music, press \( \) button to stop playing.
   Then if pressing \( \) again, playing will be started from the beginning of the file.

4. When playing PDF, video or music, press \( \) button to pause playing.

5. All media or pdf files should be put at the folder, which is named “philips” with sub-folder; under the root directory of the specified storage (internal/USB/SD Card). All sub-folders (video/photo/music/pdf) are named by media types and shouldn’t be changed.
   - videos: \( \{\text{root dir of storage}/philips/video/\} \)
   - photos: \( \{\text{root dir of storage}/philips/photo/\} \)
   - music: \( \{\text{root dir of storage}/philips/music/\} \)
   - pdfs: \( \{\text{root dir of storage}/philips/pdf/\} \)
   Note that the root directories of three storages are
   - Internal storage: /sdcard
   - USB storage: /mnt/usb_storage
   - SD card: /mnt/external_sd

**SOURCE button**

Choose input source.
The button is only controlled by Scalar.

**HOME button**

Access OSD menu.
The button is only controlled by Scalar.

**LIST button**
1. In the content of the web page, move the focus up to the next clickable items.
2. Move the focus up to the next control or widget such as buttons.

6. **[1][1][−][−] NAVIGATION buttons**

   1. Navigate through menus and choose items.
   2. In the content of the web page, these buttons are to control the scroll bar of the screen. Press [1] or [1] is for moving vertical scroll bar up or down. Press [−] or [−] is for moving horizontal scroll bar left or right.
   3. For PDF files,
      - when zoom in/out has been performed,
      - when zoom in/out has been not performed,
        - Press [−] to go to the next page.
        - Press [−] to go to the previous page.

7. **[OK] button**

   Confirm an entry or selection.

8. **[H] ADJUST button**

   1. In the content of the web page, move the focus down to the next clickable items.

9. **[MUTE] button**

   Press to turn the mute function on/off. The button is only controlled by Scalar.

10. **[COLOR] buttons**

    1. [1][1][1][1]: No function on Android source. These two buttons are only controlled by Scalar.
    2. For PDF files,
       - press button to perform zoom-in;
       - press button to perform zoom-out.

    After zoom-in or zoom-out, press button to revert the pdf file to the original size.

11. **[Number/ ID SET/ ENTER] button**

    1. No functions for ID SET and ENTER on Android source. These buttons are only controlled by Scalar.
    2. For PDF file, enter the page number by pressing number buttons and then press button to jump to the specific page.

12. **[FORMAT] button**

    Change picture format. The button is only controlled by Scalar.

13. **[BACK] button**

    Return to the previous page or exit from the previous function.

14. **[INFO] button**

    1. Display information about current input signal. It is shown by Scalar.
    2. Media Player -> Compose -> edit or new add playlist -> choose any media files -> press to show the information of the chosen media file.

15. **[OPTIONS] button**

    Open toolbox in Media Player or PDF Player:

    1. Media Player -> Compose -> Edit or new add playlist -> press to open toolbox. Toolbox will be slide from the left side of the screen.
    2. PDF Player -> Compose -> Edit or new add playlist -> press to open toolbox. Toolbox will be slide from the left side of the screen.

16. **[−][+] VOLUME button**

    Adjust volume. The buttons are only controlled by Scalar.

2.3.4. **Inserting the batteries in the remote control**

The remote control is powered by two 1.5V AAA batteries.

To install or replace batteries:

1. Press and then slide the cover to open it.
2. Align the batteries according to the (+) and (−) indications inside the battery compartment.
3. Replace the cover.
Caution:
The incorrect use of batteries can result in leaks or bursting. Be sure to follow these instructions:
• Place “AAA” batteries matching the (+) and (−) signs on each battery to the (+) and (−) signs of the battery compartment.
• Do not mix battery types.
• Do not combine new batteries with used ones. It causes shorter life or leakage of batteries.
• Remove the dead batteries immediately to prevent them from liquid leaking in the battery compartment. Don’t touch exposed battery acid, as it can damage your skin.

NOTE: If you do not intend to use the remote control for a long period, remove the batteries.

2.3.5. Handling the remote control
• Do not subject to strong shock.
• Do not allow water or other liquid to splash the remote control. If the remote control gets wet, wipe it dry immediately.
• Avoid exposure to heat and steam.
• Other than to install the batteries, do not open the remote control.

2.3.6. Operating range of the remote control
Point the top of the remote control toward the display’s remote control sensor when pressing a button.
Use the remote control within a distance of less than 5m/16ft from the display’s sensor, and a horizontal and vertical angle of less than 30 degrees.

NOTE: The remote control may not function properly when the remote control sensor on the display is under direct sunlight or strong illumination, or when there is an obstacle in the path of signal transmission.
3. Connecting External Equipment

3.1. Connecting External Equipment (DVD/VCR/VCD)

3.1.1. Using HDMI video input

3.2. Connecting a PC

3.2.1. Using DVI-I input
3.2.2. Using DVI input

3.2.3. Using HDMI input

3.2.4. Using DisplayPort input
3.3. Connecting Audio Equipment

3.3.1. Connecting an external audio device

3.4. Connecting Multiple Displays in a Daisy-chain Configuration

You can interconnect multiple displays to create a daisy-chain configuration for applications such as a video wall.

NOTE: Maximum 25 displays (5x5) can be used in a DVI daisy-chain configuration. For VGA daisy-chain, Maximum 9 displays can be used.

3.4.1. Display control connection

Connect the [RS232 OUT] connector of DISPLAY 1 to the [RS232 IN] connector of DISPLAY 2.

3.4.2. Digital video connection

Connect the [DVI OUT / DVI-I OUT] connector of DISPLAY 1 to the [DVI IN] connector of DISPLAY 2.
Connect the [DP OUT] connector of DISPLAY 1 to the [DP IN] connector of DISPLAY 2.

Connect the [DVI OUT] connector of DISPLAY 1 to the [DVI IN] connector of DISPLAY 2.

**3.4.3. Analog video connection**

Connect the [DVI OUT/DVI-I OUT] connector of DISPLAY 1 to the [DVI-I IN] connector of DISPLAY 2.

**3.5. IR connection**
NOTE:
1. This display’s remote control sensor will stop working if the [IR IN] is connected.
2. IR loop through connection can support up to 9 displays.

3.6. IR Pass-through Connection
3.7. Touch Operation

This display is equipped with a touch-sensitive screen and supports the Windows Touch features either by singletouch or multitouch operation. You can touch the pictures or words on the display gently with your fingers, and your computer will react.

The following description illustrate some typical touch operation behavior. For further detail on how to run the touch operation, please refer to the Windows operation instruction.

Single Tap

Touch the target on the screen with one fingertip for one quick tap, then release.

Double Tap

Touch the target on the screen with one fingertip for two quick taps, then release.

Pan

Touch the target on the screen with one fingertip and move across the target without losing direct contact, then release.

Flick

Touch the target on the screen with one fingertip and brush the surface quickly.

Zoom in

Touch the target on the screen with two fingertips holded together and move them apart to zoom in (magnify) the screen image.

Zoom out

Touch the target on the screen with two fingertips stretched apart and move them closer to zoom out (shrink) the screen image.

Touch and Hold

Touch and hold the target on the screen with one fingertip for a while to display a context menu or options page for an item.

Avoid

- Avoid scratching with sharp object on the screen. Only your fingertips are allowed to do the touch control.
- Avoid intensive light, spotlight, or wide-spread light from direct beaming on the screen.
- Avoid installation location close to the windows or glass-doors as the direct sunlight may affect the touch-control performance.
- To avoid screens interfere with each other, do not make 2 touch screens side by side as the following picture.

Avoided

Fig. Touch screens interfering
The Touch screen does not require a device driver be installed on the host computer for Windows OS. For Windows 7 and Windows 8, it is recommended that the standard Microsoft Windows Control Panel calibration is used.

<table>
<thead>

</table>

For Mac OS X, it is recommended
- For Single Touch, please download "TouchService_V3030_MAC_20150310_01.rar" ([link](http://download.cvte.com/viewfile.php?file_id=56315))
- For Multi Touch, please download "updd_05_01_1476.dmg" ([link](http://download.cvte.com/viewfile.php?file_id=55078))

1. We highly recommend using the latest Service Pack with all Windows 7 OS.
2. Digitizer input to Windows refers to touch digitizer as opposed to pen digitizer in tablet PCs.
3. Set as default by Microsoft.
4. Touch cannot work if TPM USB cable plug into USB I/F.
5. For Mac OS 10.10, it is recommended using the tool "TouchService_V3030_MAC" to re-define the touch position and simulate mouse operation (single touch). Firstly installing the tool "TouchService_V3030_MAC" to Mac OS, then follow the instruction of Touch Service Manual in the software package “Touch Service for Mac 10.10.rar” which is enclosed in the CD Disk.
6. Please visit [http://www.philips.com/signagesolutions](http://www.philips.com/signagesolutions) for the latest information about Mac OSX mode support.
4. Operation

NOTE: The control button described in this section is mainly on the remote control unless specified otherwise.

4.1. Watch the Connected Video Source

See page 14 for external equipments connection.
1. Press [SOURCE] button.
2. Press [ ] or [ ] button to choose a device, then press [OK] button.

4.2. Change Picture Format

You can change the picture format to suit the video source. Each video source has its available picture formats.

The available picture formats depend on the video source:
1. Press [FORMAT] button.
2. Press [ ] or [ ] button to choose a picture format, then press [OK] button.

- PC mode: {Full} / {4:3} / {1:1} / {16:9} / {21:9} / {Custom}.
- Video mode: {Full} / {4:3} / {1:1} / {16:9} / {21:9} / {Custom}.

4.3. Android Launcher

1. Android PD launcher:
   - Android PD launcher is black page, as below:

2. Admin mode:
   - You can press “Home + 1888” to startup admin mode.

- Admin mode will show four icons: “Settings”, “Apps”, “Network” and “Help”.
- When you leave admin mode, system will return to last source.

1) Home page of admin mode, this page has four items: “Settings”, “Apps”, “Network” and “Help”.
   Settings : go to settings app.
   Applications : show all apps.
   Network : set wifi or ethernet.
   Help : display QRcode.

2) Application page:

3) Network page

4) Wi-Fi page:
4.4. Media Player introduction:

1. Home page of Media Player, this page has three items: “Play”, “Compose” and “Settings”.
   - Play: select playlist to play.
   - Compose: edit playlist.
   - Settings: setting play properties.

2. Select “Play” on home page, first you should choose one playlist to play between FILE 1 and FILE 7.
   The pencil icon means the playlist is non-empty.

3. Select “Compose” on home page, first you should choose one playlist to edit between FILE 1 and FILE 7.
   The pencil icon means the playlist is non-empty.

4. If an empty playlist is chosen, the app will guide you to select the media source.
   All media files should be placed in /philips/ of root directory.
   For example,
   - videos in /root/philips/video/
   - photos in /root/philips/photo/
   - music in /root/philips/music/

5. You could edit or delete a non-empty playlist, just choose the desired playlist which is with pencil icon.
6. Once you start to edit a playlist, you will see below screen.
   Source - files in storage.
   Playlist – files in playlist.
   There are 4 icons which map to the keys of remote controller:
   Option key – launch slide bar
   Play key – play media file.
   Info key – show media info.
   Ok key – select/unselect file.

6-1 In the slide bar, it helps you to do the following:
- select all: select all storage files.
- delete all: delete all playlist files.
- add/remove: update playlist from source.
- sort: sort playlist.
- save/abort: save or abort playlist.
- back: return.

7. If you choose “Sort” in the slide bar, you can change the order of files one by one.

8. Press info key after you choose desired file, you will get the detail information.

9. Press play key after you choose desired file, you will plays the media file directly.

10. If you make a playlist with all images files, before saving, the app will ask you if you want to have background music while playing slideshow.

11. Select “Settings” on home page, this page has three parts, “Repeat Mode”, “Slideshow Effect” and “Effect Duration”.
   Repeat Mode: play mode.
   Slideshow Effect: photo slideshow effect.
   Effect Duration: photo effect duration.

12. Media Hotkey
   Play: Playback file.
Pause: Pause file.
Fast forward: forward 10 second.
Rewind: back 10 second.
Stop: Stop file and return to start. If the gif file, it like the pause.

4.5. Browser manual

1. Home page of Browser app, this page has one item: “Settings”. Press Settings then enter next page.

2. Users can choose 1~7. Press any one will show a dialog.

3. Enter url and press OK then data will save on List

4. Press “Option” then left side will pop up a list
   Import : Import url list file
   Export : Export url list file
   Delete all : Delete all url record on right side
   Back : left side list will be closed.

4.1 Import
   - Click import

   - Choose storage

   - Choose file contains urls
**Import file and url will show on list**

- Dialog shows path file will be saved and file’s name. Press “save” button then urls on list will be saved.

**File format for import**

- Format should be like below with file extension “txt”

```
urls.txt
1 http://www.abc.com
2 http://www.baidu.com
3 http://www.bbc.com
4 http://www.bbc.com.tw
5 http://www.cnn.com
6 http://www.youtube.com
7 http://www.yahoo.com.tw
```

**4.2 Export:**

- **Click export**

**Choose storage**

5. Press OK then url records will be saved

6. On url list page, if you select non-empty item, it will show a dialog to ask edit or play url. If press “Edit”, it will show edit url dialog; if press “Play”, it will show web page of item’s url.
7. OSD menu interaction with Browser

7.1 Boot on source

- Set OSD menu => Configuration1 => Boot on source => Input be BROWSER Play List be 0.
  Then PD will show Browser after reboot.
- Set OSD menu => Configuration1 => Boot on source => Input be BROWSER Play List be 1.
  Then PD will show web page with 1st URL in Browser app.

7.2 Schedule

Set OSD menu => Advanced option => Schedule =>
On time1, Off time2, Input be BROWSER, any day you want of week, and Play List.
Finally check the right box.
Then PD will show web page with URL in Browser app at time1 and finish at time2.

4.6. PDF reader play

1. Home page of PDF Player; this page has three items: “Play”, “Compose” and “Settings”.
   - Play: select playlist to play.
   - Compose: edit playlist.
   - Settings: setting play properties.

2. Select “Play” on home page, first you should choose one playlist to play between FILE 1 and FILE 7.
   The pencil icon means the playlist is non-empty.

3. Select “Compose” on home page, first you should choose one playlist to edit between FILE 1 and FILE 7.
   The pencil icon means the playlist is non-empty.

4. If an empty playlist is chosen, the app will guide you to select the media source.
   All media files should be placed in /philips/ of root directory. For example,
   - pdfs in /root/philips/pdf/
5. You could edit or delete a non-empty playlist, just choose the desired playlist which is with pencil icon.

6. Once you start to edit a playlist, you will see below screen.
   
   Source - files in storage.
   
   Playlist – files in playlist.
   
   There are 4 icons which map to the keys of remote controller.
   
   Option key – launch slide bar
   
   Play key – play media file.
   
   Info key – show media info.
   
   Ok key – select/unselect file.

   6-1. In the slide bar, it helps you to do the following:
   
   - select all : select all storage files.
   
   - delete all : delete all playlist files.
   
   - add/remove : update playlist from source.
   
   - sort : sort playlist.
   
   - save/abort : save or abort playlist.
   
   - back : return.

7. if you choose “Sort” in the slide bar, you can change the order of files one by one.

8. Select “Settings” on home page, this page has two parts, “Repeat Mode” and “Effect Duration”.
   
   Repeat Mode: play mode.
   
   Effect Duration: photo effect duration.

Media Hotkey:
   
   Play: Playback file.
   
   Pause: Pause page.
   
   Fast forward: go to next page, if the page is end of the file, it will go to next file.
   
   Rewind: back to last page, if the page is first of the file, it will back to last file.
   
   Stop: return to first page of file

Color Hotkey:
   
   Blue: Zoom in.(+10%)
   
   Yellow: Zoom out.(-10%)
   
   OK: Restore zoom

Arrow keys:
   
   Up/Down/Left/Right: Adjust page. (When the page has zoomed in/out)
   
   Left: Previous Page. (When the page has not zoomed in/out)
   
   Right: Next Page. (When the page has not zoomed in/out)

Combination key:
   
   Number key + OK key: select specific page, and press ok key to change page.
   
   - Press number key.
- Press OK key, the bottom of the page will show the page number; if page number over total page number, it will not change page and show current page number at the bottom of the page.
**4.7. SmartCMS**

1. **Settings**
   
   1) Server IP: Your_SmartCMS_server_address
   2) Account: admin
   3) PIN Code: 0281 (Default, which can be generate by server tool)
   4) Version: Ver. 3 (default value)

   You can select Ver. 2 or Ver. 3. And SmartCMS would download cms contents from a Ver. 2 server or a Ver. 3 server:
   
   a. Ver. 3: You need to set server information (IP, account, PIN Code) in the settings.
   
   b. Ver. 2: You need to install cms data from local storage for the first time. And server information would be accessed from the local cms content. The options in the settings, including IP, account, and PIN Code, would be disabled.

   5) Content: cms content can be stored in the internal storage, SD card, and USB storage. By default, the target is internal.
   
   a. If server is connected, cms data would be downloaded from SmartCMS server.
   
   b. If server is disconnected, cms data would be accessed from local storage.

   6) Local cms content (*.cms file)
   
   a. If content is set to be internal storage, *.cms should be stored in the FTP root folder (high priority) or /sdcard/philips (low priority).
   
   b. If content is set to be USB storage or SD card, *.cms should be stored in the root folder of external storage.

2. Set source to SmartCMS, cms data will be downloaded automatically

   1) If there is no cms data in the server or the network is disconnect. “No Content” will be shown.
   
   2) If you select “SD card” or “USB storage”, “No Content” will be shown when you remove the SD card/USB storage.

7) You can delete cms data via System Tools.
4.8. Custom app

User can set up the application for Customer Source

Note:
(1) Only display User Installed app.
(2) Will not show up system pre-install app.

4.8.1. OSD Menu operation:

RCU: Source -> Custom

If set up customer APK, PD will open customer app when switch source to Customer mode.

If no set up customer APK, PD will show Black screen when switch source to Customer mode.

4.8.2. Function Introduction

Save
Select the App, click the Save will perform the function of storage.

Forget
After press the Forget, can remove previously stored information.

Cancel
Don’t do any change, directly closed Windows.

If no customer installed apk, the list will be blank. The list will be blank and “Save” “Forget” will be gray and useless.

If customer installed apk, user can select customer installed apk in list
• Case 1: Not set up Custom App case.
  Customer app will show up and focus on first item automatically.

After set up, the setting screen display the app name.

• Case 2: Set up Custom App case (there is entity circle to the right of icon)
5. signage display

5.1. Setting

Setting main items:

1. Wi-Fi
2. Ethernet
3. Signage Display
4. System Tools
5. Storage
6. Apps
7. Date & time
8. Developer options
9. About

5.2. Wi-Fi

Via Enable/Disable to control Wi-Fi On/Off. After Enable, the screen will list all available WiFi AP.

Note:
Ethernet will be disable automatically if WiFi turn on and connect to network.

5.3. Ethernet

Via Enable/Disable to control Ethernet On/Off. After enable Ethernet, it will display:

1. Connect Type (available type is DHCP/Static IP)
   A. DHCP
   B. Static IP
   C. IP Address
   D. Netmask
   E. DNS Address

5.3.1. DHCP

DHCP mode:

1. Cannot modify IP Address, Netmask, DNS Address and Gateway.
2. (If connect successfully, it will display current network configuration.)

5.3.2. Static IP

Under Static IP, User can manually input IP Address, Netmask, DNS Address and Gateway.

Note:
IP address, netmask, DNS address and gateway address input limitation
1. Format:
   I. number 0-9
   II. decimal point "."

F. Gateway Address
(2) Mac Address

Note:
WiFi will be disable automatically if Ethernet turn on and connect to network.
5.4. Signage Display

Divide into 3 groups: General Settings / Server Settings / Source Settings

(1) General Settings
A. Signage Display Name
B. Boot Logo
C. Screenshot

(2) Server Settings
A. Email Notification
B. FTP
C. Remote Control

(3) Source Settings
A. Media Player
B. Browser
C. SmartCMS
D. PDF Player
E. Custom app

5.4.1. General Settings

1. Signage Display Name
Set up PD name “PD_” + Ethernet Mac Address.
Note:
Input limitation:
(1) length: Max 36 characters
(2) format: no limit

2. Boot Logo
   1) Scalar OSD menu to control Android boot logo enable/disable.
      Scalar OSD Menu operation:
      RCU:Home -> Configuration2 -> Logo -> On/Off/User
      In User mode, user can choose their own boot logo animation file.
      Note:
      (1) Boot animation file name must be: bootanimation.zip

(2) Will pop-up a window for user to select USB and SD card. No priority issue.

2) When boot logo selection, PD will check if there is bootanimation.zip under USB and SD card.

Function introduction:
   a. Option description
      /data/local
      Use customized boot animation file which is copied from SD card or USB
      /mnt/external_sd
      Use boot animation file under SD card
      /mnt/usb_storage
      Use boot animation file under USB
   b. Save
      Press Save key to save SD card or USB bootanimation.zip to /data/local and set it as boot logo.
   c. Forget
      Press Forget key to delete /data/local bootanimation.zip and not show boot logo.
   d. Cancel
      Close dialogue w/o changes.

Scenario introduction:
Case 1
The users do not settle customized boot logo, PD does not find any bootanimation.zip file under SD and USB. The List will be blank. Save and Forget button will be gray and useless.
Case 2
The users do not settle customized boot log, PD find bootanimation.zip file under SD or USB. The screen will show bootanimation.zip and select the first file automatically.

Case 3
The user settle customized boot logo, The screen will show /data/local/ bootanimation.zip

3) If OSD menu Logo item is On or Off, the users cannot choose boot animation in Android settings.

3. Screenshot
Via Enable/Disable to control screenshot On/Off. After Enable, user can set screenshot timeslot and save path.

Note:
Time slot of deletion and screenshot:
(1) Will delete picture at initial time 0 sec.
(2) Will screenshot at first 40 sec.

1) Interval
Set up interval timeframe. 30 mins or 60 mins.

2) Start Time
Set up screenshot start time.

Note:
(1) No Cancel, Confirm button in dialog.
(2) Just press Back key to exit dialog for Set up
(3) Start time cannot be newer than End time. It will show Error toast.
3) End Time
Set up screenshot End time

Note:
(1) No Cancel, Confirm button in dialog.
(2) Just press Back key to exit dialog for set up
(3) (Start time cannot be newer than End time. It will show error toast.

4) Repeat
Set screenshot repeat cycle. User can choose screenshot time frame. (Multiple selection)

5) Save to
Set up screenshot save path. Internal storage, SD card or USB storage.

Note:
picture storage path:
(1) In root of internal storage/usb storage/sd card, PD will create folder automatically.
(2) the picture will save to philips/Screenshot/.

6) Purge Screenshots
Set up purge timeframe. One day or One week.

5.4.2. Server Settings
1) Email Notification
Via Enable/Disable to control Email On/Off. After Enable, user can set up Email notification configuration.

1) SMTP
Email
Set SMTP configuration. User can set Gmail account or other mail account. User can select other mail account and set up SMTP server, Security type and port itme.

Note:
Password input limitation
(1) Length: 6-20 characters
(2) Format: no limit
(3) Do not use the port: 5000
Gmail safety setting

If it can not send manager after setting Gmail, please login your Gmail test account, then access to website:
Confirm the “Access for less secure apps”, please set to Turn on

Google

Less secure apps

Access for less secure apps

Turn off

Turn on

2) Manager Email

Email

Set up Receiver mail account

3) Test

Send Test Mail

To test Gmail account receive/send function.

2. FTP

Via Enable/Disable to control FTP On/Off. After set up, PD can share FTP files.

1) Account

Set up FTP account

Note:

Input limitation

(1) Length: 4-20 characters

(2) Format:

I.  English a-z and A-Z

II. Number 0-9

2) Password

Set up FTP password.

Note:

Input limitation

(1) Length: 6-20 characters

(2) Format:

I. English a-z and A-Z
II. Number 0-9

FTP password display

(1) Will show ‘*’ symbol to instead password if set up passwork via remote control.

(2) After set up, the password text will show as ‘*’ symbol. Before password input:

After password input:

Set up completed screen:

3) Storage Path
Set up FTP share path:/storage/emulated/legacy
Note:
Input limitation
(1) Cannot save if the path is invalid

4) Port
Set up FTP port number. Default: 2121
Note:
Input limitation
(1) Length: Max 5 characters
(2) Range: 1-65535
(3) Format:

I. Number 0-9

(4) Do not use the port: 5000

3. Remote Control
Via Enable/Disable to Control Remote Control On/Off
User can input Server address. If server does not registered, it will ask user for PIN code.

Bind status:

(1) Will show network is disconnected if not yet connects to network.

Bind status:

(2) Will show Server is disconnected if network connected but remote control server disconnected.
Bind status:
(3) Will show Server is unbinded if Remote control server feedback unbinded status.

(1) Open Media Player Player List edit page.
(2) Open Media Player slideshow effect edit page.

Bind status:
(4) Will show server is binded if Server binded successfully.

2. Browser
Can edit Bookmark configuration.

Bind status:
(5) Will show Error PIN code if input incorrect PIN code.
38

3. SmartCMS

1) Server
Set up SmartCMS Server address.
2) Account
Set up SmartCMS account.
Note:
Input format limitation: ASCII only (refer to 11.2 ASCII Table)
3) PIN Code
Set up SmartCMS PIN Code
4) Version
Can select Ver. 2 and Ver. 3
• Ver. 2: Using 2.0/2.2 update advertising agreement.
• Ver. 3: Using 3.0/3.1 update advertising agreement.
In Ver. 2 cases, do not use Server/Account/PIN Code values, so the three gray and cannot be used.

5. Custom app

4. PDF Player
Can edit PDF Player Play List and Effect Settings.

1) Open PDF Player Player List edit page.

2) Open PDF Player effect edit page.
Please refer to Page 30 Custom app

5.5. System Tools

System tools 4 main functions:
(1) Navigation Bar (only for touch model)
(2) Clear Storage
(3) Factory Reset
(4) Import & Export

5.5.1. Navigation Bar
To enable/disable Navigation Bar: (Touch model only)
- Disable:
  Hide navigation bar.
- Enable:
  Show navigation bar. The Back key will show on bottom of screen.

5.5.2. Clear Storage
The purpose is to clear all data in Philips folders.
Divided into 4 mode:
(1) Clear all Philips folders
(2) Only clear Philips folder under Internal storage.
(3) Only clear Philips folder under USB storage.
(4) Only clear Philips folders under SD card.

Pop-up the window to display all folders which can be clear.

5.5.3. Factory Reset
Factory Reset can recover to Factory default settings.
Press OK to execute Reset function automatically.

5.5.4. Import & Export
The function of Import & Export PD settings.
Note:
(1) Saved file name: settings.db
(2) Will save to Philips folder in storage.
1. Export
Will export settings.db to Philips folder under USB or SD card.
Note:
If no Philips folder exists in USB or SD card, it will be created automatically.
2. **Import**

Import settings.db from Philips folder under USB or SD card.

---

**5.6. Storage**

Display current PD Android storage information.

**SD CARD and USB STORAGE:**

Need to insert SD card or USB, the information will show up total space and available of SD card or USB storage.

---

**5.7. Apps**

Display applications information.

---

**5.8. Date & time**

Via Scalar OSD menu to control Auto Time On/Off.

When Scalar OSD menu turn off Auto time, user can set up Time Zone manually.

**Note:**

Add new NTP server to display current serverIP.

---

**5.9. Developer options**

Android developer options.

---

**5.10. About**

Main info in About:

1. System updates
2. Android version
3. Kernel version
4. Build number
5.10.1. System updates

Will automatically search update.zip in USB or SD card. Will be shown in list for user selection if found.

Note:
1. Only support Android Full image.
2. File name should be update.zip.
3. The file should be located in root of storage.

After select update.zip file, PD will restart and start to update.

5.11. Supplementary

5.11.1. Rotation

Via Scalar OSD menu to operate Rotation:

Home -> Configuration2 -> Rotation -> OSD rotation

1. Landscape

After set up Landscape mode, the setting screen will divide into 2 part. Select Left item, right side will display the sub menu.

2. Portrait

5.11.2. ASCII Table

<table>
<thead>
<tr>
<th>ASCII TABLE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Decimal</td>
</tr>
<tr>
<td>----------</td>
</tr>
<tr>
<td>0-31</td>
</tr>
<tr>
<td>32-126</td>
</tr>
<tr>
<td>128-255</td>
</tr>
</tbody>
</table>

After set up Portrait mode, the setting screen only display one layer.
6. OSD Menu
An overall view of the On-Screen Display (OSD) structure is shown below. You can use it as a reference for further adjusting your display.

6.1. Navigating the OSD Menu

6.1.1. Navigating the OSD menu using the remote control

1. Press [ ] button on the remote control to display the OSD menu.
2. Press [ ] or [ ] button to choose the item you want to adjust.
3. Press [OK] button to enter the submenu.
4. In the submenu, press [ ] or [ ] button to toggle among items. Press [ ] or [ ] button to adjust settings. If there is a submenu, press [OK] button to enter the submenu.
5. Press [ ] button to return to the previous menu, or press [ ] button to exit the OSD menu.

NOTES:
• When there is no OSD menu on the screen, press [ ] to display the menu of {Smart picture}.
• When there is no OSD menu on the screen, press [ ] to display the menu of {Audio source}.

6.1.2. Navigating the OSD menu using the display’s control buttons

1. Press [MENU] button to display the OSD menu.
2. Press [ ] or [ ] button to choose the item you want to adjust.
3. Press [ ] button to enter the submenu.
4. In the submenu, press [ ] or [ ] button to toggle among items. Press [ ] or [ ] button to adjust settings. If there is a submenu, press [ ] button to enter the submenu.
5. Press [MENU] button to return to the previous menu, or press [MENU] button several times to exit the OSD menu.

6.2. OSD Menu Overview

6.2.1. Picture menu

Brightness(Picture)
Adjust the overall image and background screen brightness (backlight).

Contrast
Adjust the image contrast ratio for the input signal.

Sharpness
This function is digitally capable to keep crisp image at any timings. It is adjustable to get a distinct image or a soft one as you prefer and set independently for each picture mode.

Black level
Adjust the image brightness for the background.
NOTE: sRGB picture mode is standard and cannot be changed.

Tint(Hue)
Adjust the tint of the screen.

Select a display gamma, it’s refer to the brightness performance curve of signal input. Choose from {Native} / {2.2} / {2.4} / {s gamma} / {D-image}.
NOTE: sRGB picture mode is standard and cannot be changed.

Color temperature
It is used to adjust the color temperature.
The image becomes reddish as the color temperature decreases, and becomes bluish as the color:

<table>
<thead>
<tr>
<th>CCT</th>
<th>10000 °K</th>
<th>9300 °K</th>
<th>7500 °K</th>
<th>6500 °K</th>
<th>5000 °K</th>
<th>4000 °K</th>
<th>3000 °K</th>
</tr>
</thead>
<tbody>
<tr>
<td>X</td>
<td>0.279 ± 0.003</td>
<td>0.283 ± 0.003</td>
<td>0.299 ± 0.003</td>
<td>0.313 ± 0.003</td>
<td>0.346 ± 0.003</td>
<td>0.382 ± 0.003</td>
<td>0.440 ± 0.003</td>
</tr>
<tr>
<td>Y</td>
<td>0.292 ± 0.003</td>
<td>0.298 ± 0.003</td>
<td>0.315 ± 0.003</td>
<td>0.329 ± 0.003</td>
<td>0.359 ± 0.003</td>
<td>0.384 ± 0.003</td>
<td>0.403 ± 0.003</td>
</tr>
</tbody>
</table>
**Color control**
The color levels of red, green, and blue are adjusted by the color bars.
- R: Red gain,
- G: Green gain,
- B: Blue gain.

**Smart picture**
**PQ setting**
- PC mode: (Standard) / (Highbright) / (sRGB).
- Video mode: (Standard) / (Highbright) / (Cinema).

**Smart Contrast**
Auto detect black data and white data on content and set suitable backlight:

<table>
<thead>
<tr>
<th>Surface Ratio</th>
<th>Backlight Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>5%-90%</td>
<td>(MaxBacklight-MinBacklight)* Surface Ratio/100</td>
</tr>
<tr>
<td>&lt;5%</td>
<td>Min Backlight</td>
</tr>
<tr>
<td>&gt;90%</td>
<td>Max Backlight</td>
</tr>
</tbody>
</table>

**Smart power**
Smart Power control is not relative to brightness control:

1. Initial setting Brightness
   - 70 (in the range from 0-100)
   - Power consumption 70% of maximum power consumption
2. Smart Power
   - OFF: no adaptation
   - MEDIUM: 80% of power consumption relative to current settings
   - HIGH: 65% of power consumption relative to current settings
3. Panel saving/Brightness ON: 40% of maximum power consumption
   - The controls settings should only be visible on its own controls. It should not have secondary effects on other controls
     (ea brightness setting changes when smart power setting has changed).

**Overscan**
Change the display area of the image.
- ON: Set to display area about 95%
- OFF: Set to display area about 100%

**Picture reset**
Reset all settings in the Picture menu.
Select “Yes” and press “SET” button to restore to factory preset data.
Press “EXIT” button to cancel and then return to the previous menu.

**6.2.2. Screen menu**

**H position**
Control Horizontal Image position within the display area of the LCD.

**V position**
Control Vertical Image position within the display area of the LCD.
Press + button to move screen to right.
Press - button to move screen to left.

**V position**
Control Vertical Image position within the display area of the LCD.
Press + button to move screen to up.
Press - button to move screen to down.

**Clock**
Press + button to expand the width of the image on the screen the right.
Press - button to narrow the width of the image on the screen the left.
NOTE: VGA input only

**Clock phase**
Improves focus, clarity and image stability by increasing or decreasing this setting.
NOTE: VGA input only

**Zoom mode**
PC mode: (Full) / (4:3) / (1:1) / (16:9) / (21:9) / (Custom).
Video mode: (Full) / (4:3) / (1:1) / (16:9) / (21:9) / (Custom).
*Zoom mode setting is by input. If input in multi-windows, the setting will apply for windows with the same input.
And the INFO OSD will show the latest setting.

<table>
<thead>
<tr>

</tbody>
</table>

**Balance**
Adjust to emphasize left or right audio output balance.

**Treble**
Adjust to increase or decrease higher-pitched sounds.

**Bass**
Adjust to increase or decrease lower-pitched sounds.

**Volume**
Adjust to increase or decrease the audio output level.

**Audio out (line out)**
Adjust to increase or decrease line out output level.

**Maximum volume**
Adjust your own limitation for the maximum volume setting. This stops the volume from being played too loudly.

**Minimum volume**
Adjust your own limitation for the minimum volume setting.

**Mute**
Turn the mute function on/off.

**Audio source**
Select the audio input source. Analog: audio from audio input. Digital: audio from HDMI/DVI audio. Displayport: audio from DP.

**Sync. Volume**
Enable/disable audio out (line out) volume adjustability to sync with internal speakers.

**Audio reset**
Reset all settings in the Audio menu to factory preset values.
6.2.4. PIP menu

Sub mode
Select the sub mode.
Choose from: (Off) / (PIP) / (POP) / (Quick swap) / (PBP).

- Off
- PIP
- PBP 2Win

Quick swap
Switch main on top or sub on top.

PIP size
Select the size of the sub picture in the PIP (Picture-in-Picture) mode.
Choose from: (Small) / (Medium) / (Large).

PIP position
Select the position of the sub picture in the PIP (Picture-in-Picture) mode.
Choose from: (Bottom-Right) / (Bottom-Left) / (Top-Right) / (Top-Left).

PIP change
Exchange Main and PIP / PBP / Quick swap input signal.

PIP source
Select the input signal for the sub picture.

PIP audio
Select the audio source in the Sub mode.
- (Main) - Select audio from the main picture
- (Sub) - Select audio from the sub picture.

PIP reset
Reset all settings in the PIP menu to factory preset values.

- The PIP function is available only for certain signal source combinations as shown in the table below.

(O: PIP function available, X: PIP function unavailable)
- The availability of the PIP function will also depend on the resolution of the input signal being used.

Note: Touch function is only for single full screen. Multiple screen touch event will be incorrect corresponding.

6.2.5. Configuration1 menu

Switch on state
Select the display status used for the next time you connect the power cord.
- {Power off} - The display will remain off when the power cord is connected to a wall outlet.
- {Forced on} - The display will turn on when the power cord is connected to a wall outlet.
- {Last status} - The display will return to the previous power status (on/off/standby) when removing and replacing the power cord.

Panel saving
Choose to enable the panel saving functions and thus reduce the risk of "image persistence" or "ghost-imaging".
- {Brightness} - Select {On} and the image brightness will be reduced to an appropriate level. The Brightness setting in the Picture menu will be unavailable when selected.
- {Pixel shift} - Select the time interval ([Auto] / [10 ~ 900] Seconds / [Off]) for the display to slightly expand the image size and shift the position of pixels in four directions (up, down, left, or right).

RS232 routing
Select the network control port.
Choose from: (RS232) / (LAN ->RS232).
**Boot on source**
Choose to select source when boot up.
Input: select input source when bootup.
Playlist: select playlist index for Media player; Browser; PDF player:
0: no play list. Same as switch source from OSD.1~7: playlist number.

**WOL**
Choose to turn on or off the wake on LAN function.
Choose from: {Off} / {On}

**DDC/CI**
Choose to turn on or off the DDC/CI communication function.
Select {On} for normal use.

**Light sensor (require Philips accessory CRD41 External Sensor Box)**
Choose to turn on or off backlight adjustment according to environment brightness.
Choose from: {Off} / {On}

**Human sensor (require Philips accessory CRD41 External Sensor Box)**
The Human sensor can detect if people approach the display or not.
The display will turn off backlight if detect nothing in setting time.
The display will back to backlight on when people approach it.
The options are:
• {Off} (Default), {10 Min.}, {20 Min.}, {30 Min.}, {40 Min.}, {50 Min.}, {60 Min.}

**Power LED light**
Choose to set power indicate LED on or off.
Choose {On} for normal use.

**Configuration1 reset**
Reset all settings in Configuration1 menu to the factory preset values.

**Factory reset**
Reset all settings in the OSD menus of {Picture}, {Screen}, {Audio}, {PIP},
(Configuration1), (Configuration2), and {Advanced option} to the factory preset values.
Android settings will also reset when factory reset.
Press [←] or [→] button to select {Reset}, and press [OK] button to do the reset.

6.2.6. **Configuration2 menu**

- **OSD turn off**
Set the period of time the OSD (on-screen display) menu stays on the screen.
The options are: {0 ~ 120} seconds.
*(0) does not disappear automatically.

- **OSD H-position**
Adjust the horizontal position of the OSD menu.

- **OSD V-position**
Adjust the vertical position of the OSD menu.

- **OSD Transparency**
Adjust OSD transparency.
• {Off} - Transparency off.
• {1-100} - Transparency level 1-100.

- **Information OSD**
Set the period of time the information OSD is displayed on the upper right corner of the screen. The information OSD will display when input signal is changed.
The information OSD will remain on the screen with {Off} selection.
The options are: {1 ~ 60} seconds.

- **Logo**
Choose to enable or disable the picture of Logo when turn on your display.
The options are:
• {Off} (Default)
• {On}*
• {User}**
  ** If Logo set to USER.
User logo does NOT support rotation function.

**Monitor ID**

Set the ID number for controlling the display via the RS232C connection. Each display must have a unique ID number when multiple sets of this display are connected. Monitor ID number range is between 1 to 255.

The option are: {Monitor group} / {Tiling matrix} / {Auto ID}

- **{Monitor group}**
  The options are: {Off} / {1-254}
  - {Off} -- {Monitor group} are not supported.
  - {1-254} -- {Monitor group} are supported. The default setting is 1.

- **{Tiling matrix}**
  Tiling matrix number range is between 1 to 15. 1 is default setting. The {Auto ID} setup function enables setting up {Monitor ID} of connected machine according to {Tiling matrix} settings.

Example: Tiling matrix sets as 4

```
1 2 3 4
5 6 7 8
9 10 11 12
13 14 15 16
```

- **{Auto ID}**
  The option are: {Start} / {End}. The default is {End}.
  - Switch to Start option to set up IDs of machines backward from current one.
  - Once the setup is completed, the option exits to End automatically.
  - To use this function, serial connect all machines with RS-232 cable and set their Control ports to RS-232 too.

**Heat status**

This function allows you to check the thermal status at any time.

- A temperature-warning message will be shown on the screen if the temperature reaches 97°C(207°F). All key functions except [O] key will then be disabled.
- Once the temperature reaches 98°C(208°F), the display power will be shut down automatically.

**Monitor information**

Shows information about your display, including model number; serial number; operating hours and software version.

**Monitor ID**

<table>
<thead>
<tr>
<th>Model name</th>
<th>43BDL4051T</th>
</tr>
</thead>
<tbody>
<tr>
<td>Serial no</td>
<td>CNCA124567/89</td>
</tr>
<tr>
<td>Operation hours</td>
<td>40H45M</td>
</tr>
<tr>
<td>SW Version</td>
<td>V0.300</td>
</tr>
</tbody>
</table>

**DP version**

DisplayPort support mode.

The options are:

- {DP 1.1} (Default) : DP 1.1 single stream(clone mode)
- {DP 1.2 SST} : DP 1.2 Single stream(clone mode)
- {DP 1.2 MST} : DP 1.2 Multi-Stream

*NOTE:*

The DP version must be set the same for all daisy chain displays.

**Window selection**

Select the window for adjusting setting. The selected window will be highlighted green border.

Window selection will set to Main after power on.

The options are:

- {Main} (Default), {PIP}
- [ ] Hot key for Window selection function.

**Rotation**

Set the rotation of Main/Sub/OSD

- Auto Rotate : Off/On Default : Off
- OSD Rotate : Landscape/Portrait Default : Landscape
- Image Rotate:
  - All : Off/On Default : Off
  - Main : Off/On Default : Off
  - Sub : Off/On Default : Off

Auto Rotate: {Off}, {On} when value is On, automatically detect whether the PD rotation, Off is set by OSD.

OSD Rotate: {Off}, {On} when value is on, OSD rotate 90 °, Off is restored.

All: {Off}, {On} when value is on, all Window screen rotate 90 °, Off the reference set individual window.

Main: {Off}, {On} when value is on, Main window screen rotate 90 °, Off is restored.

Sub: {Off}, {On} when value is on, Sub1 Window screen rotate 90 °, Off is restored.

* When the Main / Sub source is the same, rotation is given priority to with Sub.

* Not supported De-Interlacing function in rotation mode.

**Language**

Select the language used in the OSD menu.

The options are: English/Deutsch/简体中文 /Français/Italiano/Español/Русский/Polski/繁體中文 /日本語 /ارabic/العربية/ Danish/Svenska/Suomi/Norsk/Nederlands.

**Configuration2 reset**

Reset all settings in Configuration2 menu to the factory preset values.
6.2.7. Advanced option menu

**Input resolution**
Set the resolution of the VGA input. This is only required when the display is unable to detect the VGA input resolution correctly.

**NOTE:** This item is functional for VGA input only.

The options are:
- \{1024x768 / 1280x768 / 1360x768 / 1366x768\}
- \{1400x1050 / 1680x1050\}
- \{1600x1200 / 1920x1200\}
- \{Auto\}: Determines the resolution automatically.

The selected settings will become effective after turning off the power and turning it on again.

**IR control**
Select the operation mode of the remote control when multiple displays are connected via an RS232C connection.

- \{Normal\} - All displays can be operated normally by the remote control unit.
- \{Primary\} - Designate this display as the primary display for remote control operation. Only this display can be operated by the remote control. (In primary mode, IR key will always be processed regardless the monitor id/group settings).
- \{Secondary\} - Designate this display as the secondary display. This display can not be operated by the remote control, and will only receive the control signal from the primary display via the RS232C connection.
- \{Lock All\} / \{Lock all but Volume\} / \{Lock all but Power\} / \{Lock all except PWR & VOL\} - Lock the remote control function of this display. To unlock, press and hold the [INFO] button on the remote control for 6 (six) seconds.

**Keyboard control**
Choose to enable or disable the display keyboard (control buttons) function.

- \{Unlock\} - Enable the keyboard function.
- \{Lock All\} / \{Lock all but Volume\} / \{Lock all but Power\} / \{Lock all except PWR & VOL\} - Disable the keyboard function.

**NOTE:** “Keyboard Control Lock Mode” This function completely disables the access to all Keyboard Control functions. To enable or disable the keyboard control lock, press both [+] and [INFO] buttons and hold down continuously for more than 3 seconds.

**Tiling**
With this function you can create a single large-screen matrix (video wall) that consists of up to 225 sets of this display (up to 15-sets on the vertical and 15-sets on the horizontal sides). This function requires a daisy-chain connection.

**Example:**

- **2 x 2 screen matrix (4 displays)**
  - \(\text{H monitors} = 2\) displays
  - \(\text{V monitors} = 2\) displays

- **5 x 5 screen matrix (25 displays)**
  - \(\text{H monitors} = 5\) displays
  - \(\text{V monitors} = 5\) displays

**NOTE:** Touch function is only for single full screen. Multiple screen touch event will be incorrect corresponding.
Frame compensation - Yes

Frame compensation - No

- (Enable) - Choose to enable or disable the Tiling function. If enabled, the display will apply the settings in (H monitors), (V monitors), (Position), and (Frame comp.).
- (Switch on delay) - Set the power-on delaying time (in seconds). The default option (Auto) allows a sequential powering-on for each display by their ID number when multiple displays are connected. The options are: (Off/Auto/2-255)
- Brightness: (Normal)/(ACS)
  (Normal): Apply OSD brightness value (backlight)
  (ACS): Apply brightness value (backlight) which is adjusted by MIC tool. The default value before adjustment is the same as OSD brightness value, e.g., 70
Some brightness (backlight) settings cannot be adjusted by OSD. Please refer to Picture Menu Backlight setting priority.

Off Timer
Set automatically power off time (in hours).

Date and time
Adjust the current date and time for the display’s internal clock.

1. Press [OK] button to enter the submenu.
2. Press [▲] or [▼] button to toggle between (Year), (Month), (Day), (Hour), (Minute), and (Daylight saving time).
3. Press [←] or [→] button to adjust all settings except (Daylight saving time).
4. Press [OK] button to enter the (Daylight saving time) submenu.

5. Press [←] or [→] button to select item, press [▲] or [▼] button to adjust.

The Daylight saving time definition and behavior:
The current implementation of daylight saving is a reminder tool for the customer which doesn’t know how to adjust the clock for daylight saving on and off. It does not adjust the real time clock automatically. Problem is that there are no stable rules per region, or country when to adjust the clock. To solve this the user must be able to set the daylight saving start and stop date. When daylight saving correction is on (user selectable) then the real time clock should be adjusted at the moment in time set in the daylight saving on and off date. At daylight start date the clock should be put forward 1 hour at 2 o’clock. At daylight stop date the clock should be put back 1 hour at 2 o’clock.
The existing daylight on/off menu item should be replaced with the following menu structure:

- Menu item <Daylight saving setup> opens submenu containing the following items:
  - Menu item <Daylight-saving start date> Selection item <1st, 2nd, 3rd, 4th, last> Sunday of selection item <1-12 month>
  - Menu item <Daylight-saving stop date> Selection item <1st, 2nd, 3rd, 4th, last> Sunday of selection item <1-12 month>
  - optional
- Menu item <Correction time> Selection item <0.5, 1.0, 1.5, 2.0> hour
- Menu item <Daylight saving correction> Selection item <on, off> when “daylight saving” is “on” the real time clock would have been adjusted automatically for winter and summer time when passing the critical moment in time (e.g. March 29, 2009, 02.00 o’clock: time will be set 1 hour later or October 25, 2009, 02.00 o’clock: time will be set 1 hour earlier)

Schedule
This function allows you to program up to 7 (seven) different scheduled time intervals for the display to activate.
You can select:
- The time for the display to turn on and turn off.
• The days in a week for the display to activate.
• Which input source the display will use for each scheduled activation period.

NOTE: We recommend you to set up current date and time in the (Date and time) menu before using this function.

1. Press [OK] or [ ] button to enter the submenu.

2. Press [ ] or [ ] button to select a schedule item (item number 1 ~ 7), and then press [OK] button to mark it the item number.

3. Press [ ] or [ ] button to select the schedule:
   1. Power-on schedule: Press [ ] or [ ] button to set the hour and minute for the display to turn on.
   2. Power-off schedule: Press [ ] or [ ] button to set the hour and minute for the display to turn off.
   Select or leave an empty “__” for both the hour and minute slot if you do not want to use this power-on or power-off schedule.
   3. Input-source selection: Press [ ] or [ ] button to select an input source. If no input source is selected, the input source will remain the same as last selected.
   4. Date schedule: Press [ ] button to select which day in a week this schedule item will be take effect, and then press the [OK] button.
   5. When Input-source select to USB, enable to access playlist setting:

4. For additional schedule settings, press [ ], then repeat the steps above. A check mark in the box next to the number of the schedule item indicates that the selected schedule is in effect.

NOTES:
• If the schedules overlap, the scheduled power-on time takes priority over scheduled power-off time.
• If there are two schedule items programmed for the same time, the highest numbered schedule takes priority. For example, if schedule items #1 and #2 both set the display to power on at 7:00 AM and off at 5:00 PM, then only schedule item # 2 will take effect.

HDMI with One Wire
CEC control.
• (Off) - Disable CEC.(Default)
• (On) - Enable CEC.

Auto signal detection
Choose to let the display detect and display available signal sources automatically.
• (Off) - Once a signal is connected, it can only be selected manually.
If the selected input is no signal, set the display to display the image automatically according to the search order of each option.
The options are: (All) / (Failover)
• (All): DP -> HDMI11 -> HDMI12 -> DVI -> VGA -> Media Player -> Browser -> SmartCMS -> PDF Reader -> Custom.
• (Failover)

Power Save
Power save modes
Mode 1: DC off -> Power off, LED: Red.
Power Save -> Power off, LED: Red
Mode 2: DC off -> Power off, LED: Red.
Power Save -> Power Saving, LED: Orange. Can be wake up.
Mode 3: DC off -> Back light off, LED: Red
Power Save -> Back light off, LED: Orange. Can be wake up.
Mode 4: DC off -> Back light off, LED: Red
Power Save -> Will not enter power save mode. show “no signal” only.
*Note: When Auto FW update is not OFF, display will work under Mode 3 for FW update, but OSD item will not change.
### Mode 3

<table>
<thead>
<tr>
<th>DC OFF:</th>
<th>Power Save:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Backlight Off only</td>
<td>Power Save:</td>
</tr>
</tbody>
</table>

<table>

</tr>
</tbody>
</table>

### Scalar FW Update

Update scalar FW by USB.

### Auto FW Update

Setup Android FW auto background update time.

*Note: When Auto FW update is not OFF, display will work under Mode3 for FW update, but OSD item will not change.

### USB cloning

Copy PD settings from one set to another:
- Import: Copy settings from file to display
- Export: Copy PD settings into file.

* Cloned data stores in android internal storage. User need to use APK to copy cloned data to another display.

### Advanced option reset

Reset all settings except **Date and Time** in the **Advanced option** menu to factory preset values.

1. Press **[OK]** or **[ ]** button to enter the submenu.
2. Press **[ ]** or **[ ]** button to select **Reset** and press the **[OK]** button to restore settings to factory preset values.
3. Press the **[ ]** button or select **Cancel** and press the **[OK]** button to cancel and then return to the previous menu.
### 7. USB device compatibility

- The PC text quality is optimum in HD 1080 mode (1920 x 1080, 60Hz).
- Your PC display screen might appear different depending on the manufacturer (and your particular version of Windows).
- Check your PC instruction book for information about connecting your PC to a display.
- If a vertical and horizontal frequency-select mode exists, select 60Hz (vertical) and 31.5KHz (horizontal). In some cases, abnormal signals (such as stripes) might appear on the screen when the PC power is turned off (or if the PC is disconnected). If so, press the [INPUT] button to enter the video mode. Also, make sure that the PC is connected.
- When horizontal synchronous signals seem irregular in RGB mode, check PC power saving mode or cable connections.
- The display settings table complies to the IBM/VESA standards, and based on the analog input.
- The DVI support mode is regarded as same to the PC support mode.
- The best timing for the vertical frequency to each mode is 60Hz.
9. Pixel Defect Policy

We strive to deliver the highest quality products and use some of the industry’s most advanced manufacturing processes whilst practicing stringent quality control. However, pixel or sub-pixel defects on the PDP / TFT panels used in Plasma- & LCD- displays are sometimes unavoidable. No manufacturer can guarantee that all panels will be free from pixel defects, but Philips guarantees that any Plasma- & LCD- displays with an unacceptable number of defects will be repaired during the warranty period in line with your local guarantee conditions.

This notice explains the different types of pixel defects and defines the acceptable defect level for the LCD screen. In order to qualify for repair under warranty, the number of pixel defects must exceed a certain level as shown in the reference table. If the LCD screen is within specification a warranty exchange / claim back will be refused. Additionally, because some types or combinations of pixel defects are more noticeable than others, Philips sets even higher quality standards for those.

9.1. Pixels and Sub-Pixels

A pixel, or picture element, is composed of three sub-pixels in the primary colors of red, green and blue. Many pixels together form an image. When all sub-pixels of a pixel are lit, the three colored sub-pixels together appear as a single white pixel. When all are dark, the three colored sub-pixels together appear as a single black pixel. Other combinations of lit and dark sub-pixels appear as single pixels of other colors.

9.2. Types of Pixel Defects + Dot Definition

Pixel and sub-pixel defects appear on the screen in different ways. There are three categories of pixel defects and several types of sub-pixel defects within each category.

Dot definition = What is a defective “Dot”? :

One or more defective, adjacent sub-pixel are defined as one “dot”. The no. of defective sub-pixels are not relevant to define a defective dot. This means that a defective dot can consist of one, two or three defective sub-pixels which can be dark or lit.

9.3. Bright Dot Defects

Bright dot defects appear as pixels or sub-pixels that are always lit or “on”. These are the examples of bright dot defects:

| One lit red, green or blue sub pixel | Two adjacent lit sub pixels: Red + Blue = Purple Red + Green = Yellow Green + Blue = Cyan (Light Blue) | Three adjacent lit sub pixels (one white pixel) |
9.4. Dark Dot Defects

Black dot defects appear as pixels or sub-pixels that are always dark or “off”. These are the examples of black dot defects:

- One dark dot
- Two adjacent dark dots = 1 pair of dark dots
- Two dark dots, specifications defines the minimum distance between dark dots

9.5. Proximity of Pixel Defects

Because pixel and sub-pixels defects of the same type that are nearby one another may be more noticeable, Philips also specifies tolerances for the proximity of pixel defects. In the table below you can find specifications about:

- Allowed amount of adjacent dark dots = (adjacent dark dots =1 pair of dark dots)
- Minimum distance between dark dots
- Total no. of all defective dots

9.6. Pixel Defect Tolerances

In order to qualify for repair due to pixel defects during the warranty period, a PDP / TFT panel in a Philips Plasma / LCD-display must have pixel or sub-pixel defects exceeding the tolerances listed in the following table.

<table>
<thead>
<tr>
<th>BRIGHT DOT EFFECT</th>
<th>ACCEPTABLE LEVEL</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 lit sub pixel</td>
<td>2</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>BLACK DOT EFFECT</th>
<th>ACCEPTABLE LEVEL</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 dark sub pixel</td>
<td>10</td>
</tr>
</tbody>
</table>

| TOTAL DOT DEFECTS OF ALL TYPES | 12 |

NOTE: * 1 or 2 adjacent sub pixel defects = 1 dot defect

9.7. MURA

Dark spots or patches may occasionally appear on some liquid crystal display (LCD) panels. This is known within the industry as Mura, which is a Japanese term for “unevenness.” It is used to describe an irregular pattern or area in which uneven screen uniformity appears under certain conditions. Mura is a result of the deterioration of the liquid crystal alignment layer and is most commonly caused by long-term operation under high ambient temperatures. It is an industry-wide phenomenon and Mura is not repairable. It is also not covered by our warranty terms.

Mura has been around since the introduction of LCD technology and with screens getting bigger and in operation 24/7, many displays are running in low light conditions. This all adds to the possibility of Mura affecting displays.

HOW TO SPOT MURA

There are many symptoms of Mura and also multiple causes. Several of these are listed below:

- Impurities or foreign particles in the crystal matrix
- Uneven distribution of LCD matrix during manufacturing
- Non-uniform luminance distribution of the backlight
- Panel assembly induced stress
- Flaws within the LCD cells
- Thermal induced stress - high temperature operation over long periods of time

HOW TO AVOID MURA

Although we can not guarantee the complete eradication of Mura every time, in general the appearance of Mura can be minimized by these methods:

- Lower the backlight brightness
- Use a screen saver
- Reduce the ambient temperature around the unit
10. Cleaning and Troubleshooting

10.1. Cleaning

Caution When Using the Display

- Do not bring your hands, face or objects close to the ventilation holes of the display. The top of the display is usually very hot due to the high temperature of exhaust air being released through the ventilation holes. Burns or personal injuries may occur if any body parts are brought too close. Placing any object near the top of the display could also result in heat related damage to the object as well as the display itself.

- Be sure to disconnect all cables before moving the display. Moving the display with its cables attached may damage the cables and thus cause fire or electric shock.

- Disconnect the power plug from the wall outlet as a safety precaution before carrying out any type of cleaning or maintenance procedure.

Front Panel Cleaning Instructions

- The front of the display has been specially treated. Wipe the surface gently using only a cleaning cloth or a soft, lint-free cloth.

- If the surface becomes dirty, soak a soft, lint-free cloth in a mild detergent solution. Wring the cloth to remove excess liquid. Wipe the surface of the display to remove dirt. Then use a dry cloth of the same type to dry.

- Do not scratch or hit the surface of the panel with fingers or hard objects of any kind.

- Do not use volatile substances such as insert sprays, solvents and thinners.

Cabinet Cleaning Instructions

- If the cabinet becomes dirty, wipe the cabinet with a soft, dry cloth.

- If the cabinet is extremely dirty, soak a lint-free cloth in a mild detergent solution. Wring the cloth to remove as much moisture as possible. Wipe the cabinet. Use another dry cloth to wipe over until the surface is dry.

- Do not allow any water or detergent to come into contact with the surface of the display. If water or moisture gets inside the unit, operating problems, electrical and shock hazards may result.

- Do not scratch or hit the cabinet with fingers or hard objects of any kind.

- Do not use volatile substances such as insert sprays, solvents and thinners on the cabinet.

- Do not place anything made from rubber or PVC near the cabinet for any extended periods of time.
## 10.2. Troubleshooting

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Possible Cause</th>
<th>Remedy</th>
</tr>
</thead>
<tbody>
<tr>
<td>No picture is displayed</td>
<td>1. The power cord is disconnected.</td>
