

SHARP®

4T-B70CT1U AQUOS BOARD® Interactive Display

Make Learning and Working More Engaging with a Large Format Interactive Display

AQUOS BOARD®

4K
3840 × 2160 Pixels

A Display That's Built to Enhance Communication

Looking for a powerful, yet affordable solution to make your classrooms and meeting rooms interactive? The Sharp 4T-B70CT1U is a perfect solution for those in search of a large format display that brings interactivity to any room. Plug and Play will let you unleash the interactive capabilities of your devices with easy setup and without the need to install drivers. Precise 20 point multi-touch functionality allows multiple people to collaborate effectively and creatively to facilitate effective learning. A powerful RS-232C and LAN command set enables flexible remote control from connected devices. When selected, "Public Mode" prevents unwanted operations by people in a classroom or any other public location.

Key Features

Precise Multi-Touch

20 point simultaneous touch detection supports better interactive collaboration experience.

Multi OS Support. Plug & Play

Compatible with major operating systems. With Plug & Play, your computer automatically recognizes the 4T-B70CT1U display when connected, without a complicated driver to install.

Protective Glass

Anti-reflective tempered protective glass increases durability and clarity while protecting the display.

Professional Command Control

RS-232C and LAN command set enables flexible remote control from connected devices.

4K Ultra HD Quality

The 4T-B70CT1U interactive display supports 4K Ultra HD and captures fine textures of still and video images, while also reproducing precise details of small text and complex graphics.

16 hour Daily Operation

The 4T-B70CT1U can be used continuously for up to 16 hours per day, providing reliable performance in a classroom or office.

Public Mode

If you select Public Mode via the remote control, operational controls are disabled on 4T-B70CT1U itself. This prevents unwanted adjustments by people in public locations such as classrooms and office spaces.

Built-in Speakers for Powerful Audio

Crystal clear audio, so all your content sounds as good as it looks. Dolby® MS11 Multi-stream Decoder ensures compatibility with premium audio formats.

Simultaneous Writing

Recognizing up to 20 points of contact, the 4T-B70CT1U interactive displays let multiple people write on the screen at the same time using touch pens or fingers. Participants can take an active part in classroom interactions, meetings, brainstorming sessions and more. With simultaneous writing, your discussions and presentations become platforms for the productive and creative exchange of ideas. Having two people write at the same time lets you double the range of opinions gathered during discussions. During a debate between two groups, for example, participants can dictate points to two nominated note writers. And no matter where you're writing on the screen, you can easily change the color and type of pen output or use the included eraser to delete unwanted content.

Note: When multiple touch pens are used simultaneously, they have the same pen settings.

Handwriting Recognition

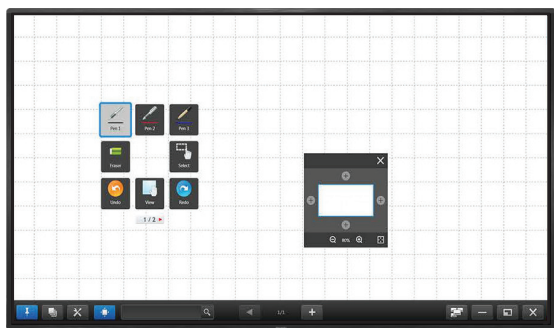

The 4T-B70CT1U interactive displays feature a handwriting recognition* function that converts selected onscreen handwriting into standard text. It can also recognize handwritten shapes—such as circles, triangles, and straight lines—and automatically convert them into objects. This smart and convenient function makes it easy to utilize onscreen content to make a legible record of your lesson or meeting.

* Works with languages supported by Sharp Pen Software.

Whiteboard Mode

Use to create Pen Software files, which can be emailed, printed, saved to PDF, PNG, and BMP.

User-Friendly Sharp Pen Software Interface

Using a touch pen, you can easily launch and display the Sharp Pen Software user interface, a menu comprising smartly arranged icons that provide easy access to pen settings and functions. Menus can be browsed easily and are displayed in a floating format that allows them to be moved to anywhere on the screen.

Display, Write, Edit and Share Information

The AQUOS BOARD® interactive display system's Sharp Pen Software includes two convenient modes that you can select depending on your needs. Whiteboard mode is ideal for writing memos and diagrams, and it comes with a range of useful background templates: a calendar, an action plan, a to-do list, a corkboard and more. With overlay mode, meanwhile, you can write or draw directly onto displayed photos, videos, PDFs, or Microsoft® Excel®, Word and PowerPoint® documents. In either mode, you can easily save your notes, make printouts, send files as email attachments, and share data with selected recipients. Because meetings and classroom discussions revolve around a single large monitor, participants can stay focused on the interaction itself rather than on their own note-taking.

Overlay Mode

Works like a transparency. Use Pen Software to write, draw and insert objects over any screen you have open in Windows. Open and save multiple overlays, capture screenshots of each page and save, send via email and print as PDF or image.

Sharp Pen-On-Paper Experience

Glare Resistant

Bright rooms help facilitate a lively exchange of ideas, but can be disruptive when the sunlight or overhead lighting creates on-screen glare. Sharp's proprietary anti-glare coating eliminates the disruptive glare while still providing a bright, easy-to-view user experience.

Natural Writing Flow

Not all writing surfaces are created equally. Writing on a flat panel display needn't feel slippery like you're sliding around uncontrollably on glass. The combination of Sharp's proprietary glass coating and the AQUOS BOARD interactive display's pen tip material produces a natural writing feel—like pen on paper!

Accurate Touch

Not all touch screens perform the same. There can be noticeable differences between the actual touch point and where the digital ink appears. It's known as "parallax error." Sharp's integrated touch technology is specifically engineered and manufactured for high accuracy and longevity.

Smooth and Responsive

Not all touch screens are able to keep up with today's fast paced handwriting and drawings. Sharp's integrated touch technology is specially designed to keep up with the way you write and draw: no skips or stutters. The result is a smooth and responsive digital inking experience.

System Requirements

Connected Equipment

Hardware	Must have USB 2.0 compliant port (CD-ROM drive) required for software installation
Operating System	Windows® 8.1 (32-bit or 64-bit versions), Windows 10 (32-bit or 64-bit versions)
	macOS® v 10.13, v 10.14, v10.15
	Google Chrome™ OS Version 74 or later

Supplied Software (Windows)

CPU	Intel® Core™ i5-6360U or faster Intel® Core™ i7-6650U or faster recommended
Video Output	Must be capable of output at a Vsync of 60 Hz or higher
Memory	At least 4 GB
Free space on hard drive	At least 4 GB (free space separately required for data storage)

Requirements when the software (Windows®) supplied with this monitor is used.

Specifications

Model Name	4T-B70CT1U	
Installation	Landscape	
LCD Panel	70" class (69.5" diagonal) LCD	
	Max. Resolution	3,840 x 2,160 pixels
	Max. Display Colors (approx.)	1.07 billion colors
	Pixel Pitch (H x V)	0.40075x 0.40075 mm
	Brightness*1	260 cd/m2
	Contrast Ratio	4,000: 1
	Viewing Angle (H/V)	176°/176° (CR 10)
	Active Screen Area (W x H)	60 5/8" x 34 3/16"
	Response Time	8.5 ms
	Backlight	LED, Direct
Touchscreen	Touch Technology	IR (infrared blocking detection method)
	PC Connection Port	USB Type C x 1
	Multi Touch	20 points
	Protection Glass	Thickness: Approx. 4.0mm Shock resistance: 130 cm
Touch Pen	Passive Pen	2 included
Computer Input	Video	HDMI
	Plug & Play	VESA DDC2B
Video Color System		NTSC-M/PAL-N/PAL-M
Analog/Digital Tuner		NTSC/ATSC
Input Terminals*2		HDMI x 2, Video (3.5 mm-diameter mini stereo jack) x 1, RS-232C (3.5 mm-diameter mini stereo jack) x 1, ANT/Cable x 1, USB x 1
Output Terminals*2		Audio: 3.5 mm-diameter mini stereo jack (L/R) x 1
Input/Output Terminals*2		Ethernet RJ-45 x 1
Speaker Output		10 W + 10 W
Power Supply		110 V AC, 60 Hz
Power Consumption		200W
Operating Temperature		0°C to 40°C
Dimensions (W x D x H) (approx.) (display only)		62 3/4" x 3 5/16" x 36 13/16"
Weight (approx.) (display only)		100 lbs

*1 Brightness depends on input mode and other picture settings. Brightness level will decrease slightly over the lifetime of the product. Due to the physical limitations of the equipment, it is not possible to maintain a precisely constant level of brightness. *2 Use supplied USB cable and adapter to connect with computers *3 Use a commercially available connection cable for PC and other video connections. *4 The AC power cord is an inlet type. The cable is bundled (3 pins). *5 Temperature conditions may change when using the monitor together with optional equipment. In such cases, please check the temperature conditions specified by the optional equipment.
