- ▸ WIRELESS USB MODULE - DESIGNED AND DEVELOPED FOR SHARP PN-B AND PN-M SERIES
- ▸ EASY, FAST, "PLUG & GO" INSTALLATION
- ▸ RELIABLE AND LONG-LIFE PERFORMANCE WITH ALL WIRELESS NETWORKING BENEFITS
- ▸ SUPPORTS WIRELESS CONTENT DISTRIBUTION
- ▸ SUPPORT WIRELESS MONITOR CONTROL AND MANAGEMENT
- ▸ PLUGS DISCREETLY IN THE REAR DISPLAY CABINET

The PN-ZW01 wireless USB module has been exclusively developed for Sharp's smart large format display line-ups PN-B and PN-M Series. The module slots into the USB connection in the rear of the display, and connects automatically to the embedded Android system to provide full wireless network capability.

The wireless USB module is the perfect choice for signage applications, where cabled network support is not practical or desirable. The wireless adapter allows for straightforward wireless distribution of image and video content to the display, or allows for easy remote management and control of the display operation.

With the PN-ZW01 you will never have to worry about providing network access to awkward installation locations or concern yourself with laying obtrusive network cable.
