

BASEPAK

Reliable Power Distribution at a low cost.

The BasePak offers a space-efficient, high-density power solution that’s easy to install and ideal for AV and office environments. Perfect for limited-space applications, it provides reliable power distribution at a low cost.

The BasePak Compact Power Distribution Unit (PDU) is designed with space-saving efficiency in mind, making it the perfect power solution for environments where space is limited, such as behind displays or under tables. Built to accommodate a variety of devices, this compact PDU is ideal for AV setups, office spaces, and other applications where a standard-sized PDU would be too large.

Despite its small footprint, the BasePak PDU packs a powerful punch with its ability to support high-density power needs. With six available outlets, this PDU allows you to power multiple devices simultaneously, ensuring that even as your power needs grow, the BasePak has you covered.

Installing the BasePak is simple and hassle-free, thanks to built-in mounting brackets that allow it to be securely positioned in tight spaces. Whether you’re placing it under a desk, behind a display, or within an AV cabinet, the BasePak provides a reliable, versatile, and easy-to-manage power distribution solution.

FEATURES:

- **Space Efficiency:** The BasePak’s compact design allows it to fit seamlessly into tight spaces, making it ideal for use in areas where rack space is limited.
- **High Density:** Despite its small size, the BasePak can support up to six outlets, accommodating multiple devices and growing power needs.
- **Versatility:** Suitable for a range of applications, the BasePak can be installed in spaces as varied as under furniture or behind displays, making it adaptable to diverse environments.
- **Ease of Installation:** With built-in mounting brackets, the BasePak is quick and easy to install, ensuring a secure fit in any location.
