

Since our birth, TASCAM has released several epoch-making products inspired by the passion between TASCAM and our customers, driven by the persistence to seek artistic creativity, high quality sound, and better results.

Today 50 years from our birth, trends have come and gone, people have changed, but our passion to produce creative products with the finest sound have continually grown day after day.

We would like to thank our customers for their deep support which has enabled us to evolve and adopt our passion for products that produce the best in creativity and sound.

Our 50th anniversary marks a huge milestone in TASCAM history. As a tribute, we are releasing several new milestone products. This will continue our desire to create the best sound-making tools and support the creativity of our customers all over the world establishing a new era of TASCAM.

Mixcast 4

THE FUTURE OF PODCASTING IS HERE.

**TASCAM MIXCAST 4 PODCAST
STATION WITH BUILT-IN
RECORDER/ USB AUDIO INTERFACE**

TASCAM®

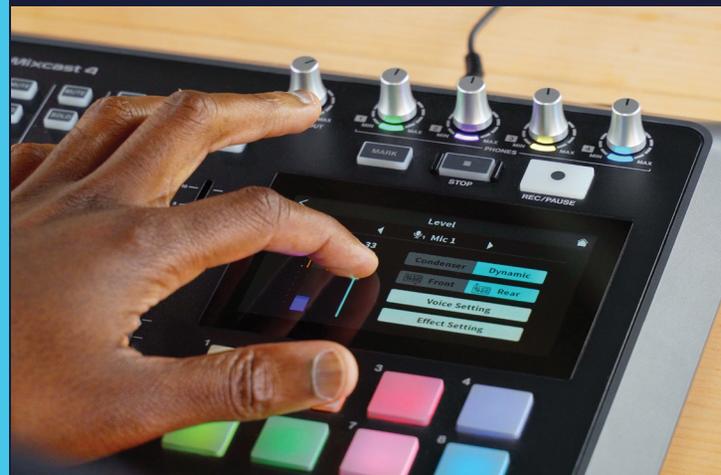

Designed and engineered for podcast creation, live streaming, event production, and voice over, the Mixcast 4 mixes and records up to 4 mic inputs, internal audio and music, and external audio input from a phone or PC.

With an internal 14-track recorder written to an SD card and a rich feature set including the powerful and intuitive TASCAM Podcast Editor, the new Mixcast 4 offers a complete audio production environment- from pre-production to project completion.

YOUR ONE-STOP RECORDING AND MIXING WORKSTATION FOR PODCAST CREATION, STREAMING, VOICE OVER PRODUCTION AND MORE.

- Complete Audio Solution
- The Mixcast 4 was designed to provide a comprehensive solution for live-streaming, events, podcasts, and other audio applications so that anyone can perform like a pro.
- Optimized Workflow for Maximum Inspiration
- In addition to physical faders, touchpads, and knobs, the Mixcast 4 features a 5-inch color touchscreen for intuitive use and easy access to everything you need, when you need it.
- One Station, Infinite Uses
- From audio recording to mixing, the Mixcast4 offers a one-stop solution with multiple convenient functions such as 14-track multi-track recording direct to the unit's SD card, Bluetooth®, AUX IN (3.5mm) connection for external sound sources, and PC connectivity to import sounds into the Mixcast 4.

TASCAM PODCAST EDITOR SOFTWARE

The included TASCAM Podcast Editor software was specifically designed to take the Mixcast 4 to the next level, offering straightforward and practical editing of audio content, track arming, and configuration and assignment on the unit's sound pads. The TASCAM Podcast Editor extends the Mixcast 4's workflow through an intuitive user interface that guides users through their production—eliminating the need for experience with DAW software.
