- Administrative management of the KVM is accomplished through the Administration and Security Management 1.2 utility. This is a free download (see the Support Tab at the top of this page) which provides management of user credentials, CAC device management, logs, EDID locking and restoring factory defaults.
- The Admin and Security Management 1.2 utility is available for Windows only. For managing MAC computers connected to the KVM, settings must be applied through a Windows PC.

Secure KVM Switch, DVI to DVI - 4-Port, NIAP PP3.0 Certified, Audio, Single Monitor, TAA

MODEL NUMBER: B002-DV1A4
NIAP-certified KVM switch lets you swap between 4 computers with government- and military-level security and data protection.

Features

4-Port KVM Switch, DVI to DVI, Is Ideal for Applications That Demand Secure Networks This 4-port KVM switch is recommended for any government, military, financial or healthcare environment where tight security of sensitive data is of utmost importance in a world of constantly changing cyberthreats. Each KVM port is an electronically isolated channel, making it impossible for data to be transferred between connected computers through the KVM. The single-monitor switch supports crystal-clear HD video resolutions up to 2560 x 1600 (including 1080p) at 60 Hz.

NIAP PP3.0 Certified to Meet Today's Top Information Assurance Standards This KVM switch is certified by NIAP (National Information Assurance Partnership), which is operated by the National Security Agency (NSA), to the latest Common Criteria Protection Profile for Peripheral Sharing Switches Version 3.0. Discrete processing paths to each connected system prevent data leakage, transfer and crosstalk between adjacent ports. Peripheral isolation enables data to flow from device to host only.

Top-of-the-Line Security Features Keep Your Data Safe Special protection prevents re-programming or reading firmware, so the switch's KVM logic remains unaltered. The keyboard buffer clears automatically after data transmission, ensuring no information is left stored. Plus, you can only access connected computers via buttons on the switch's panel. Other port-switching methods, such as On-Screen Display (OSD) and Hotkey Commands, have been excluded to further ensure data integrity.

Anti-Tampering Protection Prevents Physical Breeches If the housing is opened, internal anti-tamper switches will disable the unit, causing it to become inoperable and the front-panel LEDs to flash repeatedly. Seals on the enclosure will provide visual evidence of tampering.

Maintains Constant Keyboard and Mouse Emulation for Smooth No-Delay Switching Full USB device filtering ensures support for keyboard and mouse only. This KVM switch also supports secure video emulation and EDID learning, which prevents unwanted data from transmitting through the DDC lines. Both keyboard/mouse and video emulation controllers restrict discovery of newly connected

Highlights

- Safely and securely switches between 4 isolated computers with different security levels
- Certified to NIAP/Common Criteria Protection Profile for Peripheral Sharing Switches V3.0
- Isolated port paths prevent data leakage between secure and unsecure computers
- Supports HD resolutions up to 2560 x 1600 (@ 60 Hz) for crystal-clear video
- Complies with Federal Trade Agreements Act (TAA) for GSA Schedule purchases

Applications

- Control up to 4 computers with different security levels from a single monitor/keyboard/mouse
- Protect private information, such as medical or military intelligence data, from cyberattacks

System Requirements

- DVI monitor
- Wired USB mouse/keyboard with no internal hub or composite device functions (wireless mouse/keyboard not supported)
- Computer with DVI and USB ports
- Computer and speakers with 3.5 mm stereo audio port (optional)
- Windows, Mac, Linux or any

peripherals or monitors during switching operations, shielding your computers from potential vulnerabilities.

Accessory Cable Kits - P784-006 & P784-010 (Not Included) Designed specifically for the Tripp Lite B002-DV1A2 and B002-DV1A4 NIAP KVMs, these six-foot cables support DVI video resolutions up to 2560 x 1600 (including 1080p) at 60 Hz, as well as USB 2.0 data transfer speeds up to 480 Mbps. By combining three different cables into one convenient cord, you cut down on unnecessary clutter and save money.

TAA-Compliant for GSA Schedule Purchases The B002-DV1A4 is compliant with the Federal Trade Agreements Act (TAA), which makes it eligible for GSA (General Services Administration) Schedule and other federal procurement contracts.
