

High Ambient Light Reducing Panel for ViewSonic's Laser Projectors

The ViewSonic BrilliantColorPanel™ BCP120 is the ideal screen for ViewSonic's LS Series Laser Projectors. With a 120" screen size and 16:9 aspect ratio, the BCP120 is designed to deliver larger than life, high quality images. By diffusing high ambient light, this BrilliantColorPanel™ enhances contrast and helps to eliminate washed out images, making it the perfect screen for home theaters, businesses, classrooms, and public displays. With a simplistic design, the BCP120 can be quickly and easily assembled and mounted with specialized hardware frames.

The Most Innovative TV in the Market

Complementing ViewSonic's Laser Projectors for enhanced color brilliance, the premium projector screen drastically redefines the previous, accepted definition of image quality. Catch the attention of your neighbors at home or increase the perceived value of your business.

Freedom to Display Anywhere!

The BrilliantColorPanel™ is specifically engineered for bright environments. Powered by innovative panel technology, the ranged surface can prevent up to 90% of environmental ambient light, while completely reflecting the projected colors. With easy setup, people can deploy the BrilliantColorPanel™ wherever they want.

A Spectacular Visual Sensation!

Immerse yourself in the moment with a massive 120" screen. The screen outputs at a 16:9 aspect ratio, perfectly broadcasting 1080P images. Compared to a large HDTV, the price of the BrilliantColorPanel™ costs much less and is a greater overall value for your long-term use.

Displays Immersive Imagery!

Eliminates washed out images and slim frames. The BrilliantColorPanel™ presents you with a vibrant, life-like experience with 4-time enhanced contrast, when compared with common projector screens.

More People to Watch

The BrilliantColorPanel™ offers a 160-degree viewing angle, bringing more friends together for sports or movie watching. An expanded viewing angle also gives businesses more flexibility with setup and screen placement, reaching as many customers as possible.

Easy to Ship and Carry

Consisting of a roll-able soft screen and four hardware frames, the BrilliantColorPanel™ can be disassembled and fit into a small box that is easy to carry and transport. Businesses no longer need to have professional installers move large bulky screens.

Easy to Install and Hang

With an extremely light weight of 14.5kgs, installers can easily lift and assemble the screen. Disassembling and moving it is also easy, making it more efficient to use when compared to a large HDTV.

Technical Specifications

Image Size (aspect ratio / screen size)	16:9 / 120"
Image Area	2657 x 1494mm
Physical(Assembly)	2679 x 1516 x 35 mm
Carton Box	2770 x 380 x 160mm
Weight	Net: 14.5kg; Gross: 33Kg
Optimal Projector Info	Lens Throw ratio <0.3
Film type	TPU
Peak gain	0.35 (+/-) 0.05
Horizontal half-gain angle	80 degrees
Lens pitch	300 um
Frame Width	11mm
Safety/EMC	RoHS

Included Accessories

Screen * 1
The main frame * 4
