Wallboard

Break through Digital Signage Barriers

Why Wallboard?

We are in a category of one.

Discover Wallboard – a comprehensive digital signage solution that transforms the way you create, collaborate, and update content. Unlike standard CMS, Wallboard is more than just a playback engine. It offers a user-friendly content editor that requires no specialized design skills, enabling you to create visually compelling signage content in minutes. Wallboard's cutting-edge integrations ensures your content stays relevant and up-to-date, saving you significant time. Experience the future of digital signage with Wallboard – where creativity meets simplicity and teamwork.

Six engines, one platform for all your digital signage needs.

Creative

Think Photoshop blended with Canva built right in. Add in animations, transitions layers, video and more, and you have the fully featured creative suite of your dreams!

Content

The easiest and most flexible content management platform to organize your content, just like you would in Google Drive or Microsoft SharePoint.

Scheduling

Intuitive scheduling and calendar interface allows you to manage your content across your network with ease. Drag, drop, and edit everything all in real time.

Interactive

Rev up your engines! Easily create interactive experiences with data, using our drag-and-drop interface - no coding required!

Campaigns

Perfect for enterprise content management at scale or out-of-home advertising, no add-ons needed!

Integration

Live data connections make it easy to create data driven content through integrations with Google, Microsoft, JSON, RSS feeds and so much more!

"One of the most easy to use and intuitive digital signage creative platform I've seen…"

- Darryl Kuder, President Red Dot
