WyreStorm recommends reading through this document in its entirety to become familiar with the product’s features prior to starting the installation process.

**Important! Installation Requirements**

- Visit the product page to download the latest firmware, document version, additional documentation, and configuration tools.
- Read through the Wiring and Connections section for important wiring guidelines before creating or choosing premade cables.
- While this product supports CEC, WyreStorm cannot guarantee compatibility with all forms of CEC communication.

### In the Box

- 1x EX-35-H2-ARC Transmitter
- 1x EX-35-H2-ARC Receiver
- 1x 12V DC 3A Power Supply (US/EU/UK)
- 3x 3-pin Screw Down Male Phoenix Connectors
- 1x IR Emitter
- 1x IR Receiver
- 4x Mounting Brackets (2x for TX | 2x for RX)
- 1x Quickstart Guide (this document)

### Basic Wiring Diagram

![Basic Wiring Diagram](image-url)
Front Panel (TX/RX)

A  Power LED  
   - **Solid**: The receiver is powered On
   - **Off**: The receiver is powered Off

B  Status LED  
   - **Flashing**: The receiver is operating normally.
   - **Off**: The receiver is not operating normally.

C  HDCP LED  
   - **Solid**: HDCP content is present.
   - **Flashing**: HDCP content is not present.
   - **Off**: No signal.

D  LINK LED  
   - **Solid**: Link to receiver has been established.
   - **Flashing**: Link to receiver has not been established.

E  Source Audio Out  
   Use this connection to send audio separate from the HDMI connection to the RX.

F  Audio Return Input  
   Set the switch to **ARC** to receive audio from the display via the HDMI connection.
   Set the switch to **S/PDIF In** to receive audio from the display via the S/PDIF In connection.

Rear Panel (TX/RX)

A  Power In  
   - 5.5mm Screw Down Barrel Jack
   - Connect to the included 18V DC 1A power supply to the transmitter or receiver. A power supply is not required on the other end as it will be powered using PoH.

B  HDBT In  
   - 8-pin RJ-45 female
   - Connect the transmitter’s HDBT Out to the receiver’s HDBT In.

C  IR TX  
   - 3.5mm (1/8in) Mono Jack: Connect to the supplied IR emitter to control a local device from the remote display location via HDBaseT.
   - IR RX - 3.5mm (1/8in) Stereo Jack: Connect to the supplied IR receiver to send IR to the remote display location via HDBaseT.
   - See IR TX/RX Guidelines for more information.

D  RS-232  
   - 1x RS-232: 3-pin Phoenix

E  HDMI In  
   - 19-pin type A HDMI female
   - Supports HDMI and DVI/D with adapter

F  S/PDIF In/Out  
   - S/PDIF Out on the TX transmits audio from the RX received via HDBaseT.
   - S/PDIF In on the RX receives audio to be sent to the TX via HDBaseT. Audio Return Input switch must be set to **S/PDIF In** in order for audio to be transmitted.

Troubleshooting

**No or Poor Quality Picture (snow or noisy image)**
- Verify that power is being supplied to the transmitter and receiving device.
- Verify that all HDMI and HDBaseT connections are not loose and are functioning properly.
- Verify that the HDBaseT cable is properly terminated following EIA568B standard.
- Verify that the output resolution of the source and display is supported by this extender.
- Configure EDID Settings to a lower resolution.
- If transmitting 3D or 4K, verify that the HDMI cables used are 3D or 4K rated.

**No or Intermittent 3rd party Device Control**
- Verify that the IR and RS-232 cables are properly terminated following the Wiring and Connections section.

**Troubleshooting Tips:**
- WyreStorm recommends using a cable tester or connecting the cable to other devices to verify functionality.
Wiring and Connections
WyreStorm recommends that all wiring for the installation is run and terminated prior to making connections to the switcher. Read through this section in its entirety before running or terminating the wires to ensure proper operation and to avoid damaging equipment.

**IMPORTANT! Wiring Guidelines**
- The use of patch panels, wall plates, cable extenders, kinks in cables, and electrical or environmental interference will have an adverse effect on signal transmission which may limit performance. Steps should be taken to minimize or remove these factors completely during installation for best results.
- WyreStorm recommends using pre-terminated HDMI cables due to the complexity of these connector types. Using pre-terminated cables will ensure that these connections are accurate and will not interfere with the performance of the product.

**RS-232 Wiring**
The EX-35-H2-ARC uses a 3-pin RS-232 with no hardware flow control. Most control systems and computers are DTE where pin 2 is RX, this can vary from device to device. Refer to the documentation for the connected device for pin functionality to ensure that the correct connections can be made.

**IR TX/RX Guidelines**
- Using WyreStorm infrared emitters and receivers is the best way to ensure that most IR coding formats are transmitted and received by the NetworkHD system. Other 3rd party emitters and receivers can be used; however, these devices must operate in the same manner as the WyreStorm devices.
- Due to differences in IR across 3rd party control systems their IR ports should never be connected directly to a NetworkHD system as an incompatibility may exist. WyreStorm offers a cable that compensates for voltage differences as well adjusts for differences in the pins used within the port. Refer to the CAB-IR-LINK product page for more information.

**IR TX Port Pinout**
Connection for IR TX (transmit) uses a 3.5mm (1/8in) mono plug.
- Tip: Anode
- Sleeve: Cathode (IR Signal)

**IR RX Port Pinout**
Connection for IR RX (receive) uses a 3.5mm (1/8in) stereo jack that outputs +5V DC to power the included IR receiver.
- Tip: +5V DC
- Ring: IR Signal
- Sleeve: Ground (GND)

**Audio Return Input**
This receiver contains a switch that determines where the Audio Return is received to be sent back to the transmitter. Set this switch based on the connections being used to send and receive audio.

Set the switch to **ARC** to receive audio from the display via the HDMI connection.

Set the switch to **S/PDIF In** to receive audio from the display via the S/PDIF In connection.
## Specifications
