WyreStorm recommends reading through this document in its entirety to become familiar with the product’s features prior to starting the installation process.

**IMPORTANT! Installation Requirements**
- Visit the product page to download the latest document version, additional documentation, firmware, and configuration tools.
- Install the latest firmware to ensure that all features described in this document are available during and after installation.
- Read through the Wiring and Connections section for important wiring guidelines before creating or choosing premade cables.
- An HDBaseT receiver is required to use this product.
- See Recommended Products for guidelines on choosing a receiver.
- While this product supports CEC, WyreStorm cannot guarantee compatibility with all forms of CEC communication.

**Recommended Products**
To take full advantage of the features of this switcher, WyreStorm recommends the following products be used to complete the installation.

**RX-70-4K HDBaseT Receiver** – This Class A PoH receiver can be used for general purpose transmission where IR and RS-232 routing maybe required.

**RX-70-4K-ARC HDBaseT Receiver** – This Class A PoH receiver can be used for general purpose transmission where IR and RS-232 routing or Audio Breakout maybe required.

**Note:** If CEC control of displays is required, the RX-70-4K-ARC cannot be used as it does not support this feature.

**Basic Wiring Diagram**

**In the Box**
- 1x SW-0401-HDBT Switcher
- 1x 12V DC 3A Power Supply
- 1x AC Power Cord with US Plug
- 1x AC Power Cord with UK Plug
- 1x AC Power Cord with EU Plug
- 2x 3-pin Male Phoenix Connector
- 1x 4-pin Male Phoenix Connector
- 3x 5-pin Male Phoenix Connector
- 2x Mounting Brackets
- 1x Quickstart Guide (This Document)

**Additional Information**
Visit the product page at wyrestorm.com for additional content regarding this product.
- Product API for configuring control via a 3rd party control system.
- Firmware updates – We consistently improve our products and may supply firmware updates in the future to improve the operation.
Wiring and Connections

WyreStorm recommends that all wiring for the installation is run and terminated prior to making connections to the switcher. Read through this section in entirety before running or terminating the wires to ensure proper operation and to avoid damaging equipment.

HDMI/HDBaseT Wiring

**IMPORTANT! HDMI/HDBaseT Wiring Guidelines**

- The use of patch panels, wall plates, cable extenders, kinks in cables, and electrical or environmental interference will have an adverse effect on HDMI and Ethernet transmission limiting performance. Steps should be taken to minimize or remove these factors completely during installation for best results.
- WyreStorm recommends using high quality HDMI cables such as WyreStorm Active Optical or Express to ensure the highest content performance available.
- The type of category cable and length used can restrict the available video resolution. While Cat5e can be used, WyreStorm recommends using Cat6 or higher to ensure the highest content performance available. See Video Resolutions in the Specifications table before determining cable type and length.

RS-232 Communication

Most control systems and computers are DTE where pin 2 is RX, this can vary from device to device. Refer to the documentation for the connected device for pin functionality to ensure that the correct connections can be made.

See SW-0401-HDBT API located on the website for commands and configuration of communication ports.

**RS-232 Switcher Control**

<table>
<thead>
<tr>
<th>WyreStorm Connector</th>
<th>3rd Party Device</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pin 1 12V DC Out</td>
<td>--&gt; To --&gt; Reserved</td>
</tr>
<tr>
<td>Pin 2 TX (Transmit)</td>
<td>--&gt; To --&gt; RX (Receive)</td>

<td>--&gt; To --&gt; TX (Transmit)</td>
</tr>
<tr>
<td>Pin 4 G (Ground)</td>
<td>--&gt; To --&gt; G (Ground)</td>
</tr>
</tbody>
</table>

**CEC Link Control**

The CEC link allows for a hard wire contact closure connection to turn CEC On and Off to control the standby mode of the display.

**Contact In/Tally Out**

Contact connections are provided to allow for switching sources and feedback to a contact closure button on a desk or wall plate.

**Audio Out**

The Audio Out supports both balanced and unbalanced connections. Wiring may vary on the 3rd party device, refer to the documentation for the device being connected.

**Balanced Connections**

<table>
<thead>
<tr>
<th>WyreStorm Connector</th>
<th>3rd Party Device</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pin 1 Left Positive (L+)</td>
<td>--&gt; To --&gt; Left Positive (L+)</td>
</tr>
<tr>
<td>Pin 2 Left Negative (L-)</td>
<td>--&gt; To --&gt; Left Negative (L-)</td>
</tr>
<tr>

<td>--&gt; To --&gt; Right Positive (R+)</td>
</tr>
<tr>
<td>Pin 5 Right Negative (R-)</td>
<td>--&gt; To --&gt; No Connection</td>
</tr>
</tbody>
</table>
**EDID/Scaler Settings**

The SW-0401-HDBT handles EDID differently than other switchers and has direct settings for EDID. When connected to a source and display the EDID is still passed to the source, however the output of the switcher can be scaled to match the resolution of the display and maintain the highest output from the sources. This allows for HD sources to be scaled up to UHD and UHD sources to be scaled down to maintain a consistent picture quality.

<table>
<thead>
<tr>
<th>Scaling Resolution</th>
<th>Rotary Switch</th>

</tbody>
</table>

**Audio De-Embed/Control Method**

The SW-0401-HDBT has modes available to control how the audio is handled from the source HDMI, how sources are switched, and how CEC controls display standby. These are configured via a 4 position dip switch as defined in the table.

<table>
<thead>
<tr>
<th>Mode Selection</th>

<td></td>
</tr>
</tbody>
</table>

**Troubleshooting**

**No or Poor Quality Picture (snow or noisy image)**
- Verify that power is being supplied to all devices in the system and that they are powered On.
- Verify that all source and HDBaseT connections are not loose and are functioning properly.
- Verify that all HDMI/HDBaseT Wiring is properly terminated.
- Verify that the EDID/Scaler Settings are set to a resolution that the display can receive.
- Verify that the switcher, receiving device, and display support the output resolution of the source.
- Refer to Video Resolutions (Max) in the Specifications table.
- If transmitting 3D or 4K, verify that the HDMI cables used are 3D or 4K rated.

**Troubleshooting Tips:**
- WyreStorm recommends using a cable tester or connecting the cable to other devices to verify functionality.
- Use a flashlight to locate the IR receiver behind any tinted panels on the device being control.

Warranty Information

This product is covered by a 3 year limited parts and labor warranty. During this period there will be no charge for unit repair, component replacement or complete product replacement in the event of malfunction. The decision to repair or replace will be made by the manufacturer. This limited warranty only covers defects in materials or workmanship and excludes normal wear and tear or cosmetic damage. Visit the product page located at wyrestorm.com for additional information on this product including important technical information not provided in this document and warranty terms & conditions.
